

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 40-F

Registration statement pursuant to Section 12 of the Securities Exchange Act of 1934

or

Annual report pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934

For the fiscal year ended December 31, 2023

Commission File Number 001-40370

Bitfarms Ltd.
(Exact name of Registrant as specified in its charter)

<u>Canada</u> (Province or other jurisdiction of incorporation or organization)	<u>6199</u> (Primary Standard Industrial Classification Code Number)	<u>N/A</u> (I.R.S. Employer Identification Number)
---	--	--

110 Yonge Street
Suite 1601
Toronto, Ontario, M5C 1T4
(647) 259-1790
(Address and telephone number of Registrant's principal executive offices)

Cogency Global Inc.
122 E. 42nd Street, 18th Floor
New York, New York 10168
(800) 221-0102
(Name, address (including zip code) and telephone number (including area code) of agent for service in the United States)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Trading Symbol(s)</u>	<u>Name of each exchange on which registered</u>
Common Shares	BITF	Nasdaq Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act: None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: None

For annual reports, indicate by check mark the information filed with this Form:

Annual information form

Audited annual financial statements

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report: 334,153,000 of the Registrant's common shares were issued and outstanding as of December 31, 2023.

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit such files).

Yes No

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 12b-2 of the Exchange Act.

Emerging growth company

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards[†] provided pursuant to Section 13(a) of the Exchange Act.

[†] The term "new or revised financial accounting standard" refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b).

EXPLANATORY NOTE

Bitfarms Ltd. (the “Registrant”) is a Canadian issuer whose common shares are listed on the Toronto Stock Exchange and is eligible to file this annual report (this “Annual Report”) pursuant to Section 12 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), on Form 40-F pursuant to the U.S.-Canadian Multijurisdictional Disclosure System. The Registrant is a “foreign private issuer” as defined in Rule 3b-4 under the Exchange Act. Equity securities of the Registrant are accordingly exempt from Sections 14(a), 14(b), 14(c), 14(f) and 16 of the Exchange Act pursuant to Rule 3a12-3.

FORWARD LOOKING STATEMENTS

This Annual Report and the exhibits incorporated by reference herein contain forward-looking statements or information (collectively, “forward-looking statements”). All statements, other than statements of historical fact, incorporated by reference are forward-looking information. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions or future events or performance (often, but not always, through the use of words or phrases including, but not limited to, and including grammatical tense variations of such words as: “may”, “assume”, “anticipates”, “contemplate”, “is expected to”, “estimates”, “intends”, “plans”, “projection”, “could”, “vision”, “goals”, “objective” and “outlook”) are not historical facts and may be forward-looking and may involve estimates, assumptions and uncertainties which could cause actual results or outcomes to differ materially from those expressed in the forward-looking statements. In making these forward-looking statements, the Registrant has assumed that the current market will continue and grow and that the risks listed below will not adversely impact the Registrant.

By their nature, forward-looking statements involve numerous assumptions, inherent risks and uncertainties, both general and specific, which contribute to the possibility that the predicted outcomes may not occur or may be delayed. Forward-looking statements may relate to future financial conditions, results of operations, plans, objectives, performance or business developments. These statements speak only as of the date they are made and are based on information currently available and on the then current expectations and assumptions concerning future events, which are subject to a number of known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from that which was expressed or implied by such forward-looking statements, including, but not limited to, risks and uncertainties related to:

- the availability of financing opportunities, risks associated with economic conditions, dependence on management and conflicts of interest;
- the ability to service debt obligations and maintain flexibility in respect of debt covenants;
- economic dependence on regulated terms of service and electricity rates;
- the speculative and competitive nature of the industry;
- dependency in continued growth in blockchain and cryptocurrency usage;

1

- lawsuits and other legal proceedings and challenges;
- conflict of interests with directors and management;
- government regulations;
- other risks described in this Annual Report and the exhibits incorporated by reference herein; and
- other factors beyond the Registrant’s control.

Other factors which may cause the actual results, performance or achievements of the Registrant to be materially different from any future results, performance or achievements expressed or implied by such forward-looking information include, among others, risks relating to: a Bitcoin halving event; insolvency, bankruptcy or cessation of operations of mining pool operators; reliance on foreign mining pool operators; mining pool agreements being governed by foreign laws; independent mining; indemnification of mining pools; reliance on manufacturing in foreign countries and the importation of equipment into jurisdictions in which the Registrant operates; emerging markets; valuation and price volatility of cryptocurrencies; share price fluctuations; future capital needs and the uncertainty of additional financing and dilution; indebtedness; hedges; global financial conditions; the possibility of Bitcoin mining algorithms transitioning to proof of stake validation; the Registrant’s limited operating history; employee retention and growth; cybersecurity threats and hacking; the limited history of the de-centralized financial system; technological obsolescence and difficulty in obtaining hardware; cryptocurrency network difficulty and the impact of increased global computing power; economic dependence on regulated terms of service and electricity rates; increases in commodity prices or reductions in the availability of such commodities; future profits/losses and production revenues/expenses; fraud and failure of cryptocurrency exchanges, custodians and other trading venues; the costs and demands upon management and the Company’s accounting and finance resources as a result of complying with the laws and regulations affecting public companies; the expense and impact of restatement of the Registrant’s historical financial statements; the lack of comprehensive accounting guidance for cryptocurrencies under IFRS Accounting Standards; a material weakness in internal control over financial reporting and the costs to remediate that material weakness or any future material weaknesses; political conditions and regulations; permits and licenses; server or internet failures; tax consequences; environmental regulations; environmental liability; the adoption of ESG practices and the impacts of climate change; emerging legislation and scrutiny regarding human rights issues; erroneous transactions and human error; facility developments; insurance risks; competition; uncertainty of the acceptance and/or widespread use of cryptocurrencies; hazards associated with high-voltage electricity transmission and industrial operations; corruption; the U.S. Foreign Corrupt Practices Act and similar legislation; political instability; third-party suppliers; the potential of the Registrant being classified as a passive foreign investment company; and pandemic and infectious disease.

A description of assumptions used to develop such forward-looking information and a description of additional risk factors that may cause actual results to differ materially from forward-looking information can be found in the Registrant’s disclosure documents, such as the Registrant’s Annual Information Form for the year ended December 31, 2023, dated March 7, 2024, on the SEDAR+ website at www.sedarplus.ca, attached hereto as Exhibit 99.1. Although the Registrant has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. Readers are cautioned that the foregoing list of factors is not exhaustive. Readers are further cautioned not to place undue reliance on forward-looking information as there can be no assurance that the plans, intentions or expectations upon which they are placed will occur. Forward-looking information contained in this Annual Report and the exhibits incorporated by reference herein are expressly qualified by this cautionary statement. The forward-looking statements contained in this Annual Report and the exhibits incorporated by reference herein represents the expectations of the Registrant as of the date of this Annual Report or the applicable exhibit incorporated by reference herein and, accordingly, is subject to change after such date. However, the Registrant expressly disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as expressly required by applicable securities law.

DIFFERENCES IN UNITED STATES AND CANADIAN REPORTING PRACTICES

The Registrant is permitted, under a multijurisdictional disclosure system adopted by the United States, to prepare this report in accordance with Canadian disclosure requirements, which are different from those of the United States. The Registrant prepares its financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (“IFRS Accounting Standards”), and the audit is subject to Public Company Accounting Oversight Board auditing standards. IFRS Accounting Standards differ in certain respects from United States generally accepted accounting principles (“U.S. GAAP”) and from practices prescribed by the Securities and Exchange Commission (the “SEC”). Therefore, the Registrant’s financial statements filed with this Annual Report may not be comparable to financial statements prepared in accordance with U.S. GAAP.

CURRENCY

Unless otherwise indicated, all dollar amounts in this Annual Report are in United States dollars.

ANNUAL INFORMATION FORM

The Registrant’s Annual Information Form for the year ended December 31, 2023 is attached as Exhibit 99.1 to this Annual Report and is incorporated by reference herein.

AUDITED ANNUAL FINANCIAL STATEMENTS

The Registrant’s audited annual consolidated financial statements as at and for the years ended December 31, 2023 and 2022, are attached as Exhibit 99.2 to this Annual Report and are incorporated by reference herein.

MANAGEMENT’S DISCUSSION AND ANALYSIS

The Registrant’s Management’s Discussion and Analysis for the year ended December 31, 2023 is attached as Exhibit 99.3 to this Annual Report and is incorporated by reference herein.

DISCLOSURE CONTROLS AND PROCEDURES

As of the end of the period covered by this Annual Report, the Registrant carried out an evaluation, under the supervision of the Registrant’s Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Registrant’s disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act). Based upon that evaluation and the material weakness in the Registrant’s internal control over financial reporting described below, the Registrant’s Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this Annual Report, the Registrant’s disclosure controls and procedures were not effective to give reasonable assurance that information required to be disclosed by the Registrant in reports that it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) accumulated and communicated to the Registrant’s management, including its principal executive officer and principal financial officer, to allow timely decisions regarding required disclosure, in each case, because of the material weakness in its internal control over financial reporting, which is further discussed below.

INTERNAL CONTROL OVER FINANCIAL REPORTING

Management’s Report on Internal Control Over Financial Reporting

Management of the Registrant, under the supervision of the Registrant’s Chief Executive Officer and Chief Financial Officer, is responsible for establishing and maintaining an adequate system of “internal control over financial reporting” as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS Accounting Standards. Management, including the Chief Executive Officer and the Chief Financial Officer, has evaluated the effectiveness of the Registrant’s internal control over financial reporting in accordance with Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). Based on this assessment, management, including the Chief Executive Officer and the Chief Financial Officer, concluded that the Registrant’s internal control over financial reporting was not effective as of December 31, 2023, as a result of a material weakness identified in the Registrant’s internal control over financial reporting, which is further described below.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the Registrant’s annual or interim financial statements will not be prevented or detected on a timely basis. In conjunction with the preparation of the Registrant’s financial statements for the year ended December 31, 2023, and specifically, in connection with the accounting for private placement warrants that were issued in the fourth quarter of 2023, management identified an error in its accounting for previously issued warrants that were issued in connection with certain private placement financings in 2021. Management has determined that the control over accounting for complex financing transactions did not operate effectively in 2021 as the warrants issued in 2021 should have been classified as a financial liability and accounted for at fair value through profit and loss, and not as equity instruments. The restatement to correct the classification and subsequent accounting for those warrants impacted the Registrant’s consolidated financial statements for the year ended December 31, 2022, which has been reflected in the restated comparative periods (including an opening balance sheet as of January 1, 2022) presented in the consolidated financial statements for the year ended December 31, 2023. Management considers these restatements to constitute a material weakness that requires remediation, and management is in the process of implementing remediation measures to address the material weakness.

The Registrant’s remediation efforts to date comprise expanding the finance team to include more Chartered Professional Accountants with technical expertise and experience in evaluating more complex areas of IFRS, involving the Company’s legal counsel on evaluating complex agreements involving financial instruments and engaging with external third-party consultants to assist with assessing the accounting for complex financial instruments and review of financial statements. Management’s efforts are ongoing and its remediation plan is expected to be completed during 2024. If these remedial measures are insufficient to address the material weakness described above, or

are not implemented timely, or additional deficiencies arise in the future, material misstatements in the Registrant's interim or annual financial statements may occur in the future and could have the effects described in the "Risk Factors" section of the Registrant's Management's Discussion and Analysis for the year ended December 31, 2023, which is attached as Exhibit 99.3 to this Annual Report.

Changes in Internal Control Over Financial Reporting

Except as otherwise described above, no change occurred in the Registrant's internal control over financial reporting during the fiscal year ended December 31, 2023 that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Attestation Report of the Registered Public Accounting Firm

Under the Jumpstart Our Business Startups Act, "emerging growth companies" are exempt from Section 404(b) of the Sarbanes-Oxley Act of 2002, which generally requires that a public company's registered public accounting firm provide an attestation report relating to management's assessment of internal control over financial reporting. As of December 31, 2023, the Registrant qualifies as an "emerging growth company" and, therefore, has not included in, or incorporated by reference into, this Annual Report such an attestation report as of the end of the period covered by this Annual Report.

NOTICES PURSUANT TO REGULATION BTR

The Registrant was not required by Rule 104 of Regulation BTR to send any notices to any of its directors or executive officers during the fiscal year ended December 31, 2023.

5

AUDIT COMMITTEE

Identification of the Audit Committee

The Board of Directors has a separately designated standing Audit Committee established for the purpose of overseeing the accounting and financial reporting processes of the Registrant and audits of the financial statements of the Registrant in accordance with Section 3(a)(58)(A) of the Exchange Act and Rule 5602(c) of the NASDAQ Stock Market Rules. As of the date of this Annual Report, the Registrant's Audit Committee is comprised of Brian Howlett (who serves as the committee's chair), Andrés Finkelsztain and Edith Hofmeister, all of whom are considered independent based on the criteria for independence prescribed by Rule 10A-3 of the Exchange Act and Rules 5605(a)(2) and (c)(2) of the listing rules of the Nasdaq Stock Market LLC (the "Nasdaq Stock Market Rules").

The Board of Directors has also determined that each member of the Audit Committee is financially literate, meaning each such member has the ability to read and understand a set of financial statements that present a breadth and level of complexity of the issues that can reasonably be expected to be raised by the Registrant's financial statements.

Audit Committee Financial Expert

The Board of Directors has determined that Brian Howlett qualifies as a financial expert (as defined in Item 407(d)(5)(ii) of Regulation S-K under the Exchange Act) and Rule 5605(c)(2)(A) of the Nasdaq Stock Market Rules; and (ii) is independent (as determined under Exchange Act Rule 10A-3 and Rule 5605(a)(2) of the Nasdaq Stock Market Rules).

The SEC has indicated that the designation or identification of a person as an audit committee financial expert does not make such person an "expert" for any purpose, impose any duties, obligations or liability on such person that are greater than those imposed on members of the audit committee and the board of directors who do not carry this designation or identification, or affect the duties, obligations or liability of any other member of the audit committee or board of directors.

CODE OF ETHICS

The Registrant has adopted a Code of Business, Conduct and Ethics that applies to directors, officers and employees of, and consultants to, the Registrant (the "Code"). The Code is posted on the Registrant's website at <https://investor.bitfarms.com/corporate-governance/governance-documents>. The Code meets the requirements for a "code of ethics" within the meaning of that term in General Instruction 9(b) of Form 40-F. Unless and to the extent specifically referred to herein, the information on the Registrant's website shall not be deemed to be incorporated by reference in this Annual Report.

All waivers of the Code with respect to any of the employees, officers or directors covered by it will be promptly disclosed as required by applicable securities rules and regulations. Since adopted by the Registrant, and until December 31, 2023, the Registrant did not waive or implicitly waive any provision of the Code with respect to any of the Registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions.

6

PRINCIPAL ACCOUNTANT FEES AND SERVICES

Tabular disclosure of the amounts billed to us by our independent registered public accounting firm, PricewaterhouseCoopers LLP, Chartered Professional Accountants (PCAOB ID 271) for the fiscal years ended December 31, 2023 and 2022 as Audit Fees, Audit-Related Fees, Tax Fees and All Other Fees appears on page 86 of the Annual Information Form, filed as Exhibit 99.1 to this Annual Report.

PRE-APPROVAL OF SERVICES PROVIDED BY INDEPENDENT AUDITOR

The audit committee pre-approves all audit and non-audit services to be provided to the Registrant by its independent registered public accounting firm, PricewaterhouseCoopers LLP, Chartered Professional Accountants. The audit committee sets forth its pre-approval and/or confirmation of services authorized by the audit committee in the minutes of its meetings.

RECOVERY OF ERRONEOUSLY AWARDED COMPENSATION

The Registrant has adopted a compensation recovery policy (the "Executive Compensation Clawback Policy") as required by the Nasdaq listing rules and Rule 10D-1 of the Exchange Act. A copy of the Executive Compensation Clawback Policy is filed as Exhibit 97.1 to this Annual Report. As described above, the Registrant was required to prepare an accounting restatement of its consolidated financial statements for the year ended December 31, 2022, which has been reflected in the restated comparative periods

(including an opening balance sheet as of January 1, 2022) presented in the consolidated financial statements for the year ended December 31, 2023 that are filed as Exhibit 99.2 to this Annual Report. The Registrant concluded that it was not required under the Executive Compensation Clawback Policy to recover any previously awarded incentive-based compensation because the Executive Compensation Clawback Policy applies only to incentive-based compensation received on or after October 2, 2023, and no current or former executive officer who is subject to said policy received any incentive-based compensation on or after such date. The Registrant also notes that current and former executive officers who are subject to the Executive Compensation Clawback Policy have never received incentive-based compensation based on any financial reporting measure that was impacted by the referenced restatement.

NASDAQ CORPORATE GOVERNANCE

A foreign private issuer that follows home country practices in lieu of certain provisions of the Nasdaq Stock Market Rules must disclose the ways in which its corporate governance practices differ from those followed by U.S. domestic companies. As required by Nasdaq Rule 5615(a)(3), the Registrant discloses on its website, www.bitfarms.com, each requirement of the Nasdaq Stock Market Rules that it does not follow and describes the home country practice it follows in lieu of such requirements.

BOARD DIVERSITY MATRIX

The director diversity matrix required by Nasdaq Marketplace Rule 5606 is available on the Registrant's website, www.bitfarms.com, in the "Governance" section under the "Investors" tab.

MINE SAFETY DISCLOSURE

None.

DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

None.

UNDERTAKING AND CONSENT TO SERVICE OF PROCESS

A. Undertaking. The Registrant undertakes to make available, in person or by telephone, representatives to respond to inquiries made by the SEC staff, and to furnish promptly, when requested to do so by the SEC staff, information relating to the securities registered pursuant to Form 40-F, in relation to which the obligation to file an annual report on Form 40-F arises or transactions in said securities.

B. Consent to Service of Process. The Registrant has previously filed a Form F-X in connection with its common shares. Any change to the name or address of the Registrant's agent for service shall be communicated promptly to the Commission by amendment to the Form F-X referencing the file number of the Registrant.

7

EXHIBIT INDEX

The following documents are being filed with the Commission as Exhibits to this Registration Statement:

Exhibit	Description
97.1	Clawback Policy
99.1	Annual Information Form for the year ended December 31, 2023
99.2	Audited Consolidated Financial Statements as at and for the years ended December 31, 2023 and 2022
99.3	Management's Discussion and Analysis for the year ended December 31, 2023
99.4	Certification of Chief Executive Officer pursuant to Rule 13a-14(a) or 15d-14(a) of the U.S. Securities Exchange Act of 1934, as amended
99.5	Certification of Chief Financial Officer pursuant to Rule 13a-14(a) or 15d-14(a) of the U.S. Securities Exchange Act of 1934, as amended
99.6	Certification of Chief Executive Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
99.7	Certification of Chief Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
99.8	Consent of PricewaterhouseCoopers LLP

Clawback Policy

1.0 Purpose

The purpose of this Clawback Policy (this “**Policy**”) is to enable Bitfarms Ltd. (the “**Company**”) to recover Erroneously Awarded Compensation from Covered Executive Officers in the event that the Company is required to prepare an Accounting Restatement. This Policy is designed to comply with, and shall be interpreted to be consistent with, Section 954 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, as codified in Section 10D of the Securities Exchange Act of 1934, as amended (the “**Exchange Act**”), Rule 10D-1 promulgated under the Exchange Act (“**Rule 10D-1**”) and Listing Rule 5608 of the corporate governance rules of The Nasdaq Stock Market (“**Nasdaq**”) (the “**Listing Standards**”). Unless otherwise defined in this Policy, capitalized terms shall have the meaning ascribed to such terms in **Section 2**.

2.0 Definitions

As used in this Policy, the following capitalized terms shall have the meanings set forth below.

- a. “**Accounting Restatement**” means an accounting restatement of the Company’s financial statements due to the Company’s material noncompliance with any financial reporting requirement under the securities laws, including any required accounting restatement to correct an error in previously issued financial statements that (i) is material to the previously issued financial statements (i.e., a “Big R” restatement) or (ii) is not material to the previously issued financial statements but would result in a material misstatement if the error were corrected in the current period or left uncorrected in the current period (i.e., a “little r” restatement).
- b. “**Accounting Restatement Date**” means the earlier to occur of (i) the date the Board, a committee of the Board, or the officer or officers of the Company authorized to take such action if the Board’s action is not required, concludes, or reasonably should have concluded, that the Company is required to prepare an Accounting Restatement and (ii) the date a court, regulator, or other legally authorized body directs the Company to prepare an Accounting Restatement.
- c. “**Applicable Period**” means, with respect to any Accounting Restatement, the three completed fiscal years immediately preceding the Accounting Restatement Date, as well as any transition period (that results from a change in the Company’s fiscal year) within or immediately following those three completed fiscal years (except that a transition period that comprises a period of at least nine months shall count as a completed fiscal year).
- d. “**Board**” means the board of directors of the Company.
- e. “**Code**” means the U.S. Internal Revenue Code of 1986, as amended. Any reference to a section of the Code or regulation thereunder includes such section or regulation, any valid regulation or other official guidance promulgated under such section, and any comparable provision of any future legislation or regulation amending, supplementing, or superseding such section or regulation.
- f. “**Covered Executive Officer**” means an individual who is currently or previously served as the Company’s president, principal financial officer, principal accounting officer (or, if there is no such accounting officer, the controller), vice president of the Company in charge of a principal business unit, division, or function (such as sales, administration, or finance), an officer who performs (or performed) a policy-making function, or any other person who performs (or performed) similar policy-making functions for the Company or is otherwise determined to be an executive officer of the Company pursuant to Item 401(b) of Regulation S-K. An executive officer of the Company’s parent (if any) or subsidiary is deemed a “Covered Executive Officer” if the executive officer performs (or performed) such policy-making functions for the Company.

- g. “**Erroneously Awarded Compensation**” means, in the event of an Accounting Restatement, the amount of Incentive-Based Compensation previously received that exceeds the amount of Incentive-Based Compensation that otherwise would have been received had it been determined based on the restated amounts in such Accounting Restatement, and must be computed without regard to any taxes paid by the relevant Covered Executive Officer; provided, however, that for Incentive-Based Compensation based on stock price or total stockholder return, where the amount of Erroneously Awarded Compensation is not subject to mathematical recalculation directly from the information in an Accounting Restatement: (i) the amount of Erroneously Awarded Compensation must be based on a reasonable estimate of the effect of the Accounting Restatement on the stock price or total stockholder return upon which the Incentive-Based Compensation was received and (ii) the Company must maintain documentation of the determination of that reasonable estimate and provide such documentation to Nasdaq.
- h. “**Financial Reporting Measure**” means any measure that is determined and presented in accordance with the accounting principles used in preparing the Company’s financial statements and any measure that is derived wholly or in part from such measure. Financial Reporting Measures include, but are not limited to, the following (and any measures derived from the following): the Company’s stock price; total shareholder return; revenues; net income; operating income; profitability of one or more reportable segments; financial ratios; earnings before interest, taxes, depreciation and amortization; and earnings measures (e.g., earnings per share). A Financial Reporting Measure is not required to be presented within the Company’s financial statements or included in a filing with the U.S. Securities and Exchange Commission (the “**SEC**”) to qualify as a “Financial Reporting Measure.”
- i. “**Incentive-Based Compensation**” means any compensation that is granted, earned, or vested based wholly or in part upon the attainment of a Financial Reporting Measure. Incentive-Based Compensation is deemed “received” for purposes of this Policy in the Company’s fiscal period during which the Financial Reporting Measure specified in the Incentive-Based Compensation award is attained, even if the payment or grant of such Incentive-Based Compensation occurs after the end of that fiscal period.

3.0 Administration

This Policy shall be administered by the Compensation Committee of the Board (the “**Compensation Committee**”). For purposes of this Policy, the Compensation Committee shall be referred to herein as the “**Administrator**.” The Administrator is authorized to interpret and construe this Policy and to make all determinations necessary, appropriate or advisable for the administration of this Policy, in each case, to the extent permitted under the Listing Standards and in compliance with (or

pursuant to an exemption from the application of) Section 409A of the Code. All determinations and decisions made by the Administrator pursuant to the provisions of this Policy shall be final, conclusive and binding on all persons, including the Company, its affiliates, its stockholders and Covered Executive Officers, and need not be uniform with respect to each person covered by this Policy.

In the administration of this Policy, the Administrator is authorized and directed to consult with the full Board, the Audit Committee of the Board and/or any such other committee of the Board as may be necessary or appropriate as to matters within the scope of such other committee's responsibility and authority. Subject to any limitation at applicable law, the Administrator may authorize and empower any officer or employee of the Company to take any and all actions necessary or appropriate to carry out the purpose and intent of this Policy (other than with respect to any recovery under this Policy involving such officer or employee). Any action or inaction by the Administrator with respect to a Covered Executive Officer under this Policy in no way limits the Administrator's decision to act or not to act with respect to any other Covered Executive Officer under this Policy or under any similar policy, agreement or arrangement, nor shall any such action or inaction serve as a waiver of any rights the Company may have against any Covered Executive Officer other than as set forth in this Policy.

4.0 Application

This Policy applies to all Incentive-Based Compensation received by a Covered Executive Officer on or after October 2, 2023: (i) after beginning service as a Covered Executive Officer; (ii) who served as a Covered Executive Officer at any time during the performance period for such Incentive-Based Compensation; (iii) while the Company had a listed class of securities on a US national securities exchange; and (iv) during the Applicable Period. For the avoidance of doubt, Incentive-Based Compensation that is subject to both a Financial Reporting Measure vesting condition and a service-based vesting condition shall be considered received when the relevant Financial Reporting Measure is achieved, even if the Incentive-Based Compensation continues to be subject to the service-based vesting condition. In the event of any inconsistency between this Policy and the terms of any employment agreement or other similar agreement to which a Covered Executive Officer is a party, or the terms of any compensation plan, program or agreement under which any compensation has been granted, awarded, earned or paid to a Covered Executive Officer, in each case, by or with the Company or any of its subsidiaries, the terms of this Policy shall govern.

5.0 Recovery Requirement

In the event of an Accounting Restatement, the Company must recover Erroneously Awarded Compensation reasonably promptly, in amounts determined pursuant to this Policy. The Company's obligation to recover Erroneously Awarded Compensation is not dependent on the filing of restated financial statements. Recovery under this Policy with respect to a Covered Executive Officer shall not require the finding of any misconduct by such Covered Executive Officer or such Covered Executive Officer being found responsible for the accounting error leading to an Accounting Restatement. In the event of an Accounting Restatement, the method for recouping Erroneously Awarded Compensation shall be determined by the Administrator in its sole and absolute discretion, to the extent permitted under the Listing Standards and in compliance with (or pursuant to an exemption from the application of) Section 409A of the Code. Recovery may include, without limitation, (i) reimbursement of all or a portion of any incentive compensation award, (ii) cancellation of incentive compensation awards and (iii) any other method authorized by applicable law or contract. To the extent that a Covered Executive Officer fails to repay all Erroneously Awarded Compensation to the Company when due, the Company shall take all actions reasonable and appropriate to recover such Erroneously Awarded Compensation from the applicable Covered Executive Officer, subject to the provisions of the immediately following paragraph. The applicable Covered Executive Officer shall be required to reimburse the Company for any and all expenses reasonably incurred by the Company (including legal fees) in recovering such Erroneously Awarded Compensation in accordance with the immediately preceding sentence.

The Company is authorized and directed pursuant to this Policy to recover Erroneously Awarded Compensation in compliance with this Policy unless the Compensation Committee has determined that recovery would be impracticable solely for the following limited reasons, and subject to the following procedural and disclosure requirements:

- a. The direct expenses paid to a third party to assist in enforcing this Policy would exceed the amount to be recovered. Before reaching such conclusion, the Administrator must make a reasonable attempt to recover such Erroneously Awarded Compensation, document such reasonable attempt(s) to recover, and provide that documentation to Nasdaq;
- b. Recovery would violate home country law where that law was adopted prior to November 28, 2022. Before reaching such conclusion, the Administrator must obtain an opinion of home country counsel, acceptable to Nasdaq, that recovery would result in such a violation, and must provide such opinion to Nasdaq; or
- c. Recovery would likely cause an otherwise tax-qualified retirement plan, under which benefits are broadly available to employees of the Company, to fail to meet the requirements of Section 401(a)(13) or Section 411(a) of the Code.

6.0 Prohibition on Indemnification and Insurance Reimbursement

The Company shall not indemnify any Covered Executive Officer against or with respect to the loss of any Erroneously Awarded Compensation. Further, the Company shall not pay or reimburse a Covered Executive Officer for the cost of purchasing insurance to cover any such loss. The Company shall also not enter into any agreement or arrangement whereby this Policy would not apply or fail to be enforced against a Covered Executive Officer.

7.0 Required Filings

The Company shall file all disclosures with respect to this Policy in accordance with the requirements of US federal securities laws, including disclosures required to be included in SEC filings. A copy of this Policy and any amendments hereto shall be posted on the Company's website and filed as an exhibit to the Company's annual report on Form 40-F.

8.0 Acknowledgment

Each Covered Executive Officer shall sign and return to the Company within thirty (30) calendar days following the later of (i) the effective date of this Policy set forth below or (ii) the date such individual becomes a Covered Executive Officer, the Acknowledgement Form attached hereto as Exhibit A, pursuant to which the Covered Executive Officer agrees to be bound by, and to comply with, the terms and conditions of this Policy; provided, however, that this Policy shall be effective in respect of each Covered Executive Officer regardless of whether such Covered Executive Officer signs and returns the Acknowledgment Form.

9.0 Amendment; Termination

The Compensation Committee may amend this Policy from time to time in its sole and absolute discretion and shall amend this Policy as it deems necessary to reflect the Listing Standards or to comply with (or maintain an exemption from the application of) Section 409A of the Code. The Compensation Committee may terminate this Policy at any time; provided, that the termination of this Policy would not cause the Company to violate any federal securities laws, rules promulgated by the SEC or the Listing Standards.

10.0 Effective Date

This Policy shall be effective as of November 29, 2023 (the "Effective Date"). The terms of this Policy shall apply to any Incentive-Based Compensation that is received by Covered Executive Officers on or after October 2, 2023, even if such Incentive-Based Compensation was approved, awarded or granted to Covered Executive Officers prior to the Effective Date and shall not limit any right of recovery with respect to compensation received prior to the Effective Date.

11.0 Other Recovery Obligations; General Rights.

The Board intends that this Policy shall be applied to the fullest extent of the law. To the extent that the application of this Policy would provide for recovery of Incentive-Based Compensation that the Company already recovered pursuant to Section 304 of the Sarbanes-Oxley Act or other recovery obligation, any such amount recovered from a Covered Executive Officer will be credited to any recovery required under this Policy in respect of such Covered Executive Officer.

This Policy shall not limit the rights of the Company to take any other actions or pursue other remedies that the Company may deem appropriate under the circumstances and under applicable law, in each case, to the extent permitted under the Listing Standards and in compliance with (or pursuant to an exemption from the application of) Section 409A of the Code.

This Policy is binding and enforceable against all Covered Executive Officers and their beneficiaries, heirs, executors, administrators or other legal representatives.

Dated: November 29, 2023 (the "**Effective Date**")
Approved by: Board of Directors

EXHIBIT A

**CLAWBACK POLICY
ACKNOWLEDGEMENT FORM**

By signing below, the undersigned acknowledges and confirms that the undersigned has received and reviewed a copy of the Bitfarms Ltd. Clawback Policy (the "Policy").

By signing this Acknowledgement Form, the undersigned acknowledges and agrees that the undersigned is and will continue to be subject to the Policy and that the Policy will apply both during and after the undersigned's employment or service with the Company. Further, by signing below, the undersigned agrees to abide by the terms of the Policy, including, without limitation, by returning any Erroneously Awarded Compensation (as defined in the Policy) to the Company to the extent required by, and in a manner consistent with, the Policy and notwithstanding anything to the contrary in any other policy, plan, program, agreement or other arrangement to which the undersigned is subject or a party or in which the undersigned participates.

BITFARMS LTD.
2023 Annual Information Form

GLOSSARY OF DEFINED TERMS

In this Annual Information Form, the following capitalized words and terms shall have the following meanings:

Terms	Definition
2021 F-10 Registration Statement	Form F-10 that included the August SFBS Prospectus filed with SEC as described in Section 3 - <i>GENERAL DEVELOPMENT OF THE BUSINESS - FISCAL 2021 - E. Prospectus Filings</i>
AIF	This annual information form dated March 6, 2024.
Anchorage Digital	Anchorage Digital Bank N.A.
ANDE	The National Electricity Administration, the operator of Paraguay's national electricity grid.
Argentina Expansion	The existing and planned construction of a server farm facility in stages in Argentina. <i>Sect. 5.2 - ARGENTINA EXPANSION</i>
ASIC	Application specific integrated circuit.
ATM Agreement	The at-the-market offering agreement dated August 16, 2021, between the Company and H.C. Wainwright & Co.
ATM program	At-the-market equity program that commenced on August 16, 2021 by means of a prospectus supplement dated August 16, 2021, to the Company's short form base shelf prospectus dated August 12, 2021, and U.S. registration statement on Form-F-10, which included a prospectus supplement related to the ATM. The ATM program expired on September 12, 2023.
ATM Prospectus Supplement	A Prospectus Supplement to the August SFBS Prospectus filed with SEC as described in Section 3 - <i>GENERAL DEVELOPMENT OF THE BUSINESS - FISCAL 2021 - E. Prospectus Filings</i> .
Audit Committee Charter	The Charter of the Audit Committee as described in section 15.1 - <i>AUDIT COMMITTEE</i> .
August SFBS Prospectus	The final base shelf short form prospectus filed by the Company on August 12, 2021.
Backbone	Backbone Hosting Solutions Inc.
Backbone Argentina	Backbone Hosting Solutions S.A.U. (Argentina).

Backbone Paraguay	Backbone Hosting Solutions Paraguay S.A.
Bitcoin Halving	Has the meaning ascribed thereto in <i>RISK FACTORS of the MD&A</i> .
Bitfarms	The operating business name and trademarked name of Backbone.
Bitfarms or the Company	Bitfarms Ltd., a corporation incorporated pursuant to the laws of Canada and continued under the Ontario Business Corporation Act., listed on the TSX and Nasdaq under the symbol BITF, including all subsidiaries thereof.
Bitfarms Board or the Board	The board of directors of Bitfarms.
Bitfarms Shares or Common Shares	The common shares in the capital of Bitfarms.
BMS	Backbone Mining Solutions, Inc.
BTC or Bitcoin	Bitcoin, a decentralized digital currency that can be sent from user to user on the BTC network without the need for intermediaries to clear transactions.
Bunker	The Company's leased property in Sherbrooke, Québec in 2021 to develop a mining facility. The project was completed in 2022. Refer to Section 3 - <i>GENERAL DEVELOPMENT OF THE BUSINESS - FISCAL 2021 - I. Quebec Expansion</i> .
CEO	Chief Executive Officer.

BITFARMS LTD.
2023 Annual Information Form

1. GENERAL INFORMATION

1.1 INFORMATION REGARDING BITFARMS

In this annual information form ("AIF"), Bitfarms Ltd., together with its subsidiaries, as the context requires, is referred to as the "Company" and "Bitfarms". All information contained in this AIF is as of March 6, 2024, unless otherwise stated.

Reference is made in this AIF to the Financial Statements, together with the auditor's report thereon, and Management's discussion and analysis ("MD&A") for Bitfarms for Fiscal 2023. The Financial Statements and MD&A are available for review on the SEDAR+ website located at www.sedarplus.ca and on the U.S. Securities and Exchange Commission's EDGAR website at www.sec.gov/EDGAR.

1.2 EXEMPTION

The Company is not relying on any exemptions of NI 52-110.

1.3 CURRENCY

Unless otherwise indicated, all references to "\$", "US\$" or "dollars" refer to United States dollars, and references to CAD\$ refer to Canadian dollars.

1.4 CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This AIF contains forward-looking statements about the Company's objectives, plans, goals, aspirations, strategies, financial condition, results of operations, cash flows, performance, prospects, opportunities and legal and regulatory matters. Specific forward-looking statements in this AIF include, but are not limited to, statements with respect

to the Company's anticipated future results, events and plans, strategic initiatives, future liquidity, and planned capital investments. Forward-looking statements are typically identified by words such as "expect", "anticipate", "believe", "foresee", "could", "estimate", "goal", "intend", "plan", "seek", "strive", "will", "may", "maintain", "achieve", "grow", "should" and similar expressions, as they relate to the Company and its Management. Forward-looking statements reflect the Company's current estimates, beliefs and assumptions, which are based on management's perception of historical trends, current conditions and expected future developments, as well as other factors it believes are appropriate under the circumstances. The Company's expectation of operating and financial performance is based on certain assumptions including assumptions about operational growth, anticipated cost savings, operating efficiencies, anticipated benefits from strategic initiatives, future liquidity, and planned capital investments. The Company's estimates, beliefs and assumptions are inherently subject to significant business, economic, competitive and other uncertainties and contingencies regarding future events and as such, are subject to change. The Company can give no assurance that such estimates, beliefs and assumptions will prove to be correct.

BITFARMS LTD.
2023 Annual Information Form

1. GENERAL INFORMATION (continued)

1.4 CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS (continued)

Numerous risks and uncertainties could cause the Company's actual results to differ materially from those expressed, implied or projected in the forward-looking statements. Such risks and uncertainties include:

- Bitcoin Halving event;
- insolvency, bankruptcy, or cessation of operations of mining pool operator;
- reliance on foreign mining pool operator;
- counterparty risk;
- emerging markets operating risks;
- reliance on manufacturing in foreign countries and the importation of equipment to the jurisdictions in which the company operates;
- dependency on continued growth in blockchain and cryptocurrency usage;
- the availability of financing opportunities and risks associated with economic conditions, including BTC price, Bitcoin network difficulty and share price fluctuations;
- global financial conditions;
- employee retention and growth;
- cybersecurity threats and hacking;
- limited operating history and limited history of de-centralized financial system;
- risk related to technological obsolescence and difficulty in obtaining hardware;
- economic dependence on regulated terms of service and electricity rates;
- costs and demands upon Management and accounting and finance resources as a result of complying with the laws and regulations affecting public companies;
- expense and impact of restatement of the Company's historical financial statements;
- lack of comprehensive accounting guidance for cryptocurrencies under IFRS Accounting Standards;
- internal control material weakness;
- increases in commodity prices or reductions in the availability of such commodities could adversely impact the Company's results of operations;
- permits and licenses;
- server or internet failures;
- tax consequences;
- environmental regulations and liability;
- adoption of environmental, social, and governance practices and the impacts of climate change;
- erroneous transactions and human error;
- facility developments;
- non-availability of insurance;
- competition;
- hazards associated with high-voltage electricity transmission and industrial operations;
- corruption, political and regulatory risk;
- potential being classified as a passive foreign investment company;
- lawsuits and other legal proceedings and challenges;
- conflict of interests with directors and management; and
- other factors beyond the Company's control.

The above is not an exhaustive list of the factors that may affect the Company's forward-looking statements. For a more comprehensive discussion of factors that could affect the Company, refer to the risk factors contained in the Section 4.19 - *RISK FACTORS of this AIF*. Other risks and uncertainties not presently known to the Company or that the Company presently believes are not material could also cause actual results or events to differ materially from those expressed, implied or projected in its forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect the Company's expectations only as of the date of this AIF. Except as required by law, the Company does not undertake to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

BITFARMS LTD.
2023 Annual Information Form

2. CORPORATE STRUCTURE

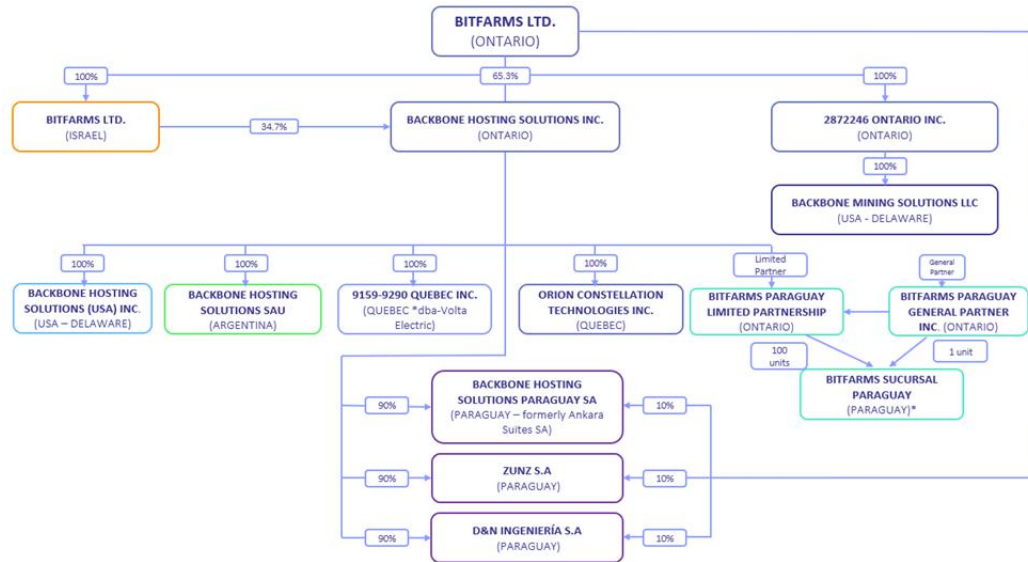

2.1 INCORPORATION OF THE COMPANY

Bitfarms was incorporated under the Canada Business Corporations Act on October 11, 2018, and continued under the Business Corporations Act (Ontario) ("OBCA") on August 27, 2021. the symbol “BITF” on the Toronto Stock Exchange (the “TSX”) and on the Nasdaq Stock Market (“Nasdaq”) in the United States.

2.2 SUBSIDIARIES

Bitfarms has the following main controlled subsidiaries:

BITFARMS LTD. 2023 Annual Information Form

3. GENERAL DEVELOPMENT OF THE BUSINESS

The highlights relating to the development of the Company’s business over the past three years are described below.

FISCAL 2021

A. Board and Management Changes

In Fiscal 2021, the following changes to the Company’s board of directors (the “Board”) and Management were made:

- On January 14, 2021, Mathieu Vachon resigned as the Chief Information Officer and director of the Company.
- On March 31, 2021, Darcy Donelle was appointed as Vice-President of Corporate Development.
- On June 3, 2021, the Company announced Jeffrey Lucas was appointed as Chief Financial Officer of the Company effective June 14, 2021, and was issued 364,050 incentive stock options exercisable into one common share at a price of CAD\$5.45 for a period of five years, pursuant to the Company’s stock option plan.
- On June 3, 2021, the Company announced Ben Gagnon was appointed Chief Mining Officer and Nathaniel Port, Director of Finance, was appointed Senior Vice President of Finance and Accounting, both effective June 1, 2021.
- On September 6, 2021, Darcy Donelle resigned as Vice President of Corporate Development.
- On November 1, 2021, Patricia Osorio was appointed as Vice President of Corporate Affairs.
- On November 1, 2021, Benoit Gobeil was appointed as Senior Vice President of Operations and Infrastructure.
- On December 9, 2021, Geoff Morphy was appointed as Chief Operating Officer in addition to his role as President of the Company.

B. Private Placements

On January 7, 2021, the Company closed a private placement (the “January 7, 2021 Offering”) for gross proceeds of approximately CAD\$20.0 million, comprised of 8,888,889 common shares along with warrants to purchase an aggregate of up to 8,888,889 common shares at a purchase price of CAD\$2.25 per common share and associated warrant. The warrants have an exercise price of CAD\$2.75 per common share and an exercise period of three years. The net proceeds of the private placement were used by the Company principally to acquire additional miners, expand infrastructure, and improve its working capital position. H.C. Wainwright & Co. acted as the agent and received (i) a cash commission equal to 8.0% of the gross proceeds of the January 7, 2021 Offering and (ii) broker warrants exercisable for up to 711,111 common shares of the Company at a per share price of CAD\$2.81 at any time on or before January 8, 2024.

3. GENERAL DEVELOPMENT OF THE BUSINESS (continued)

FISCAL 2021 (continued)

B. Private Placements (continued)

On January 13, 2021, the Company closed a private placement (the “**January 13, 2021 Offering**”) for gross proceeds of approximately CAD\$20.0 million, comprised of 5,586,593 common shares along with warrants to purchase an aggregate of up to 5,586,593 common shares at a purchase price of CAD\$3.58 per common share and associated warrant. The warrants have an exercise price of US\$3.10 per common share and exercise period of three and a half years. The net proceeds of the private placement were used by the Company principally to acquire additional miners, expand infrastructure, and improve its working capital position. H.C. Wainwright & Co. acted as the agent and received (i) a cash commission equal to 8.0% of the gross proceeds of the January 13, 2021 Offering and (ii) broker warrants exercisable for up to 446,927 common shares of the Company at a per share price of US\$3.53 at any time on or before July 15, 2024.

Ten percent of the gross proceeds of the January 7, 2021 Offering and January 13, 2021 Offering were utilized to reduce the amount of the respective outstanding Loans due in March and November 2021.

On February 10, 2021, the Company closed a private placement (the “**February 2021 Offering**”) for gross proceeds of approximately CAD\$40.0 million, comprised of 11,560,695 common shares along with warrants to purchase an aggregate of up to 11,560,695 common shares at a purchase price of CAD\$3.46 per common share and associated warrant. The warrants have an exercise price of US\$3.01 per common share and exercise period of three and one-half years. The net proceeds of the private placement were used by the Company principally to acquire additional miners, expand infrastructure, and improve its working capital position. H.C. Wainwright & Co. acted as the agent and received (i) a cash commission equal to 8.0% of the gross proceeds of the February 2021 Offering and (ii) broker warrants exercisable for up to 924,856 common shares of the Company at a per share price of US\$3.39 at any time on or before August 12, 2024.

On May 20, 2021, the Company closed a private placement (the “**May 2021 Offering**”) for gross proceeds of approximately CAD\$75.0 million, comprised of 14,150,940 common shares along with warrants to purchase an aggregate of up to 10,613,208 common shares at a purchase price of CAD\$5.30 per common share and associated warrant. The warrants have an exercise price of US\$4.87 per common share and an exercise period of three years (through May 20, 2024). The net proceeds were used by the Company principally to acquire additional miners, expand infrastructure and improve its working capital position. H.C. Wainwright & Co. acted as the agent and received (i) a cash commission equal to 8.0% of the gross proceeds of the May 2021 Offering, and (ii) broker warrants exercisable for up to 1,132,076 common shares of the Company at a per share price of US\$5.49 at any time on or before May 20, 2024.

C. Debt Financing**Dominion**

The Company had previously entered into a secured debt financing facility with Dominion Capital (“**Dominion**”) for up to \$20 million (the “**Dominion Facility**”) on March 14, 2019. The Dominion Facility was structured into four separate loans in tranches of \$5.0 Million, with each such tranche bearing interest at 10% per annum on the initial principal balance of each tranche. The Company also agreed to issue 1,666,667 warrants (“**Lender Warrants**”) to purchase Bitfarms’ common shares at US\$0.40 for each loan tranche drawn. In September 2020, the Company entered into an agreement with Dominion to amend its second loan tranche and third loan tranche. The amendment in respect of the second loan tranche of \$5.0 Million resulted in the extension of the maturity date from the original due date of April 17, 2021, to November 1, 2021 (the “**Tranche #2 Restructuring**”). As consideration for the Tranche #2 Restructuring, the Company issued 1,000,000 common shares to Dominion, and reduced the term of the 1,666,667 warrants exercisable at US\$0.40 from April 16, 2024, to November 1, 2021.

BITFARMS LTD.

2023 Annual Information Form

3. GENERAL DEVELOPMENT OF THE BUSINESS (continued)

FISCAL 2021 (continued)

C. Debt Financing (continued)**Dominion** (continued)

The amendment in respect of the third loan tranche of \$5.0 million, due June 20, 2021, resulted in this tranche being made convertible, at the option of Dominion, into common shares at a fixed conversion of US\$0.59 per share, representing a premium of approximately 100% to the then current market price of the common shares (the “**Tranche #3 Restructuring**”). Further, pursuant to the Tranche #3 Restructuring, the previously issued 1,666,667 warrants exercisable at US\$0.40 per common share, expiring on June 20, 2024, were cancelled and 1,666,667 new warrants were issued at an exercise price of US\$0.304 per share with an expiry date of June 20, 2021.

On January 11, 2021, the Company received notice from Dominion of its election to convert \$5.0 million, the principal amount of the third loan tranche, into equity. The conversion to equity took place in January 2021. An aggregate of 6,666,668 Lender Warrants have been issued for the loan agreements that have been drawn down pursuant to the Dominion Facility. As of February 2021, the Dominion Facility was repaid in its entirety and all Lender Warrants were exercised.

Foundry Loans #1, #2, #3 and #4

In April and May 2021, the Company entered into four loan agreements for the acquisition of 2,465 WhatsMiner Miners, referred to herein as “Foundry Loans #1, #2, #3 and #4”, respectively. Foundry Loan #1 was fully repaid in Fiscal 2022 and Foundry Loans #2, #3 and #4 were fully repaid in Fiscal 2023.

Galaxy Digital LLC

On December 30, 2021, the Company secured a US\$100 million credit facility with Galaxy Digital LLC (the “**December 2021 Debt Facility**”). The December 2021 Debt Facility is a revolving, multi-draw credit facility that renews annually. The Company made an initial US\$60 million draw with a six-month term at an interest rate of 10.75% per annum (the “**Initial Draw**”). The credit facility is secured by Bitcoin, with the minimum value of Bitcoin pledged as collateral calculated as 143% of the amount borrowed.

The Initial Draw and the December 2021 Debt Facility were used for general corporate purposes and for the Company's global growth initiatives. The December 2021 Debt Facility was fully repaid in December 2022.

D. Nasdaq Listing

On May 7, 2021, the Company announced that its application to list its common stock on the Nasdaq Global Market had been approved by Nasdaq.

On June 17, 2021, in connection with the Company's listing on Nasdaq, the Company received "Depository Trust Company" (also known as "DTC") eligibility for its common shares.

On June 21, 2021, trading of the Company's common shares on Nasdaq commenced under the symbol "BITF".

3. GENERAL DEVELOPMENT OF THE BUSINESS (continued)

FISCAL 2021 (continued)

E. Prospectus Filings

On March 12, 2021, the Company filed a preliminary base shelf short form prospectus in Canada.

On August 12, 2021, the Company filed a final base shelf short form prospectus (the "August SFBS Prospectus") in Canada relating to the offering for sale of such number of securities of the Company as would result in aggregate gross proceeds of up to US\$500 million, over a 25-month period.

On August 13, 2021, the Company filed with the SEC a shelf registration statement on Form F-10 that included the August SFBS Prospectus (the "2021 F-10 Registration Statement").

On August 16, 2021, the Company commenced an at-the-market equity offering program (the "ATM program") by filing a prospectus supplement to the August SFBS Prospectus in Canada qualifying the distribution of up to US\$500 million Common Shares through Nasdaq pursuant to an at-the-market offering agreement (the "ATM Agreement") dated August 16, 2021, between the Company and H.C. Wainwright & Co. (the "ATM Prospectus Supplement").

On August 17, 2021, the Company filed with the SEC the ATM Prospectus Supplement as a prospectus supplement to the 2021 F-10 Registration Statement.

F. IR Agreement

On March 12, 2021, the Company entered into an agreement to retain the services of CORE IR, an investor relations, public relations and shareholder communications firm (the "CORE IR Agreement"). Under the Core IR Agreement, the Company agreed to pay US\$15,000 per month for an initial term of twelve months and made a one-time grant to CORE IR of 15,000 incentive stock options exercisable at a price of CAD\$6.35 per share for a period of two years. The CORE IR Agreement was terminated as of October 2021. See Section 3 – GENERAL DEVELOPMENT OF THE BUSINESS – FISCAL 2022 – F. IR Agreement.

On September 17, 2021, the Company announced it entered into of an agreement, subject to TSX Venture Exchange ("TSXV") approval, to retain the services of LHA Investor Relations, to handle the Company's public relations and shareholder communications (the "LHA IR Agreement"). Under the LHA IR Agreement, the Company agreed to pay US\$20,000 per month for an initial term of six months.

G. Digital Asset Management Program

In early January 2021, the Company implemented a program (the "Digital Asset Management Program"), pursuant to which the Company added approximately 3,201 BTC to its balance sheet during the year ended December 31, 2021. See Section 4.8 – DESCRIPTION OF BUSINESS – DIGITAL ASSET MANAGEMENT PROGRAM.

3. GENERAL DEVELOPMENT OF THE BUSINESS (continued)

FISCAL 2021 (continued)

H. Development of Operations

A summary of the development of computing power in Fiscal 2021 is as follows:

Installed	Equipment
Q1 2021	Leased: 3,000 MicroBT's WhatsMiner M31S+ machines, adding approximately 240 PH of computing power.
Q1 2021	Acquired: 1,500 MicroBT's WhatsMiner M31S machines, adding approximately 120 PH of computing power.
January 2022 – December 2022	Entered into agreements to acquire 48,000 MicroBT's WhatsMiner machines, adding what was expected to be approximately 5.0 EH of computing power. In December 2022, the Company negotiated its miner purchasing agreements by extinguishing the remaining 24,000 MicroBT commitment, without penalty.
June 2021	Acquired: 1,500 MicroBT M31S+ and 700 Bitmain S19j machines, adding 183 PH of computing power.

Q2 – Q4 2021	Acquired: 2,465 WhatsMiner M30S Bitcoin Mining machines, adding 133 PH.
Q2-Q3 2021	Acquired: 1,996 MicroBT’s WhatsMiner M31S machines, adding approximately 120 PH of computing power.
Q3 – Q4 2021	Acquired: 6,600 Bitmain S19j Pro Antminer machines, adding approximately 660 PH of computing power.

On July 3, 2021, the Company entered into 3 purchase agreements for miners with affiliated companies of MicroBT, pursuant to which, the Company purchased 48,000 Miners to be delivered throughout Fiscal 2022 (the “2021 Miner Purchase Agreements”) – see Section 13 – MATERIAL CONTRACTS.

BITFARMS LTD.
2023 Annual Information Form

3. GENERAL DEVELOPMENT OF THE BUSINESS (continued)

FISCAL 2021 (continued)

I. Quebec Expansion

On September 7, 2021, the Company entered into an agreement with the City of Sherbrooke by which the Company’s existing operations at the De la Pointe Property were to be replaced by new, higher efficiency facilities with next-generation mining equipment optimized for higher output levels and lower power consumption. On October 27, 2021, the Company entered into lease agreements for two new high power production facilities in Sherbrooke, and announced the start of construction of these new facilities, known as “Leger” and “Bunker”, with a combined capacity of 78 MW, expected to be completed in the second quarter of 2022.

On October 4, 2021, the Company announced that it had completed its planned expansion in Cowansville, Quebec, consisting of the replacement of the original 4 MW facility that was operational since 2017 with an entirely newly constructed 17 MW facility. The Company also announced that it had installed 450 new Bitmain S19j Pro miners at the Cowansville facility, in addition to other used miners, adding approximately 100 PH/s of production.

J. Washington Expansion

On March 2, 2021, the Company entered into a hosting agreement in the United States (the “**Hosting Agreement**”). Pursuant to the Hosting Agreement, the Company delivered older generation equipment already owned and used by the Company for hosting at one of the host’s facilities located in the United States in order to free up capacity at the Quebec facilities (namely, the facilities at Farnham, Saint-Hyacinthe, Cowansville, Magog, and De la Pointe) for more efficient and profitable mining equipment. In July 2021 the Hosting Agreement was replaced by a new hosting agreement for 12 MW under which 4,000 Bitmain S19j Pro miners with a capacity of 400 PH/s were installed at the host’s facility (the “**July 2021 Hosting Agreement**”).

On November 9, 2021, the Company acquired a Bitcoin Mining production facility used for providing hosting services in Washington State, US (the “**November 2021 Washington Acquisition**”). The July 2021 Hosting Agreement terminated upon the closing of the November 2021 Washington Acquisition.

K. Argentina Expansion

On April 19, 2021, the Company entered into an eight-year power purchase agreement with a private power producer in Argentina to secure up to 210 MW of electricity with variable rate mechanisms, further to the Company’s plan to pursue the development of a Bitcoin Mining facility in Argentina. The current permits in place allow for 100 MW of electricity. See Section 5.2 - FUTURE GROWTH PLANS - ARGENTINA EXPANSION.

On October 7, 2021, the Company announced that it had entered into engineering, procurement and construction contracts with Proyectos y Obras Americanas S.A. (“**PROA**”) and Dreicon, as the owner’s engineer to commence construction of a production facility in Argentina of up to 210 MW.

L. Paraguay Expansion

On September 8, 2021, the Company announced that it had signed a 5-year lease and an annually renewable power purchase agreement to secure up to 10 MW of green hydro electrical capacity at approximately US\$3.6 cents per kilowatt hour in Paraguay. In December 2021, the Company completed the construction of a 10 MW facility in Paraguay (the “**Villarrica Facility**”). See Section 5.3 - FUTURE GROWTH PLANS - PARAGUAY EXPANSION.

BITFARMS LTD.
2023 Annual Information Form

3. GENERAL DEVELOPMENT OF THE BUSINESS (continued)

FISCAL 2022

A. Board and Management Changes

In Fiscal 2022, the following changes to the Board and Management were made:

- On February 14, 2022, the Company announced the addition of three executives for newly created positions. Philippe Fortier was appointed Vice President, Special Projects; Andrea Keen Souza was appointed Vice President of Human Resources; and Stephanie Wargo was appointed Vice President of Marketing & Communications.
- On May 15, 2022, Nathaniel Port resigned as Senior Vice President of Finance and Accounting.
- On May 16, 2022, Marc-André Ammann was appointed as Vice President of Finance & Accounting.

- On May 24, 2024, Paul Magrath was appointed as Vice President of Taxation.
- On November 17, 2022, the Company announced the addition of Edie Hofmeister to the Board, bringing the total number of directors to six.
- On December 29, 2022, Emiliano Grodzki resigned as CEO and remained as non-executive member of the board of directors. Geoffrey Morphy was promoted from President and Chief Operating Officer to the position of President and Chief Executive Officer. The Company also announced that Nicolas Bonta has shifted from the position of Executive Chairman to the role of Chairman of the Board of Directors.

B. At-the-market equity offering program

For the Fiscal year 2022, the Company issued a total of 29,324,277 common shares, in exchange for US\$54.1 million of net proceeds, through the ATM program.

C. Debt Financing

On February 24, 2022, the Company secured a US\$32 million credit facility with a private lender (the “**February 2022 BlockFi Loan Facility**”). The February 2022 BlockFi Loan Facility had a 24-month term at an interest rate of 14.5 % per annum and was secured by approximately 6,100 Bitmain S19j Pro miners. The February 2022 BlockFi Loan Facility was used for general corporate purposes and for the Company’s global growth initiatives.

On March 31, 2022, the Company made an additional draw of US\$40 million from its December 2021 Debt Facility.

On June 17, 2022, the Company entered into an equipment financing agreement with NYDIG ABL LLC (“**NYDIG**”) which provided for initial funding of US\$37 million at an interest rate of 12% per annum (the “**June 2022 NYDIG Financing**”). The June 2022 NYDIG Financing was collateralized by 10,395 WhatsMiner M30S Miners at Leger and the Bunker, funded as the assets were installed and became operational.

On June 17, 2022, the Company announced that it had reduced the December 2021 Debt Facility from US\$100 million to US\$66 million, funded through the sale of 1,500 BTC.

On June 30, 2022, the Company amended its December 2021 Debt Facility and extended its maturity date to October 1, 2022.

BITFARMS LTD. 2023 Annual Information Form

3. GENERAL DEVELOPMENT OF THE BUSINESS (continued)

FISCAL 2022 (continued)

C. Debt Financing (continued)

On September 29, 2022, the Company amended its December 2021 Debt Facility and extended its maturity date from October 1, 2022, to December 29, 2022, and reduced the collateral requirement from 143% to 135%, for a maximum of US\$40 million at an interest rate of 11.25%. The December 2021 Debt Facility was fully repaid in December 2022.

As of December 31, 2022, Foundry Loan #1 matured and was fully repaid.

D. TSX Listing

On April 7, 2022, the Company announced that it had received final approval for the up listing of its common shares to trade on the TSX. The Common Shares commenced trading on the TSX under the symbol “BITF” effective market open on April 8, 2022, and were concurrently delisted from the TSXV.

E. NASDAQ Listing

On December 14, 2022, the Company announced that it received a written notice from Nasdaq indicating that, for the prior thirty days, the bid price for the Common Shares had closed below the minimum US\$1.00 per share requirement for continued listing on Nasdaq under Nasdaq Listing Rule 5550(a)(2). In accordance with Nasdaq Listing Rule 5810(c)(3)(A), the Company was provided an initial period of 180 calendar days (until June 12, 2023) to regain compliance.

F. IR Agreement

In March 2022, the Company extended the LHA IR Agreement for an indefinite period, under the same terms.

G. Digital Asset Management Program

In January 2022, the Board authorized management to purchase 1,000 BTC for US\$43.2 million, increasing the Company’s BTC holdings by approximately 30%.

On June 21, 2022, the Company announced that it had adjusted its Digital Asset Management Program to improve liquidity and strengthen its balance sheet. During the second and third quarter of 2022, the Company sold 3,670 BTC in collateral to partially pay the December 2021 Credit Facility. During the same period the Company also sold 2,275 BTC in treasury to manage liquidity levels. Since August 2022, the Company started selling almost all of its daily BTC Mining production, and as of December 31, 2022, held 405 BTC valued at approximately US\$6.7 million based on a BTC price of approximately US\$16,500 as of December 31, 2022.

3. GENERAL DEVELOPMENT OF THE BUSINESS (continued)

FISCAL 2022 (continued)

H. Development of Operations

A summary of the development of computing power in Fiscal 2022 is as follows:

Installed	Equipment
Q1 2022	4,800 MicroBT WhatsMiners
Q2 2022	11,600 MicroBT WhatsMiners
Q3 2022	7,800 MicroBT WhatsMiners
Q4 2022	1,600 MicroBT WhatsMiners

In August 2022, to better align the number of Miners on hand with the infrastructure capacity available to utilize the Miners, the Company amended the 2021 Miner Purchase Agreements, with deliveries originally expected to be completed during Fiscal Year 2022, to postpone into 2023, without penalty, the delivery and payment of certain remaining equipment purchases. In December 2022, the Company made a second amendment of this agreement for which 28,000 Miner deliveries had already arrived in 2022. Following the amendment, the obligation to acquire the remaining 20,000 Miners was cancelled without penalty.

I. Quebec Expansion

On March 11, 2022, the Company acquired a building in Sherbrooke Quebec expected to accommodate 18 MW of electrical infrastructure (**“Garlock”**).

On March 17, 2022, the Company began operations in Phase one of the Bunker (as defined herein).

On April 6, 2022, the Company began operations at Leger (as defined herein) in Sherbrooke, Quebec, bringing the total operational hashrate to 3 EH/s.

On July 28, 2022, the Company announced that it had completed the second phase of its expansion of the Bunker, bringing the total operational hashrate to 3.8 EH/s.

During December 2022, the remaining phases of the Bunker (6 MW) and Garlock (12 MW) farms in Sherbrooke, Quebec were energized, reaching their full capacity of 48 MW and 18 MW, respectively, which represented the completion of the Sherbrooke Expansion (as herein defined).

On December 16, 2022, the Company announced that it had completed the sale of the De la Pointe Property, receiving US\$3.6 million in net proceeds.

20 | Page

BITFARMS LTD.

2023 Annual Information Form

3. GENERAL DEVELOPMENT OF THE BUSINESS (continued)

FISCAL 2022 (continued)

J. Washington Expansion

During the second quarter of 2022, the Company added 3 MW of electrical infrastructure and started operating approximately 20 MW of electrical infrastructure with the majority of the Company’s Antminer S19j Pro Miners generating approximately 600 PH/s in this facility. As of December 31, 2022, the Company had an application pending for an additional 6 MW, which was originally expected to be energized before the end of Fiscal 2022. An additional 3 MW in process application is estimated to be energized after 2027 due to the nearby substation being at full capacity. See *Section 5.4 - FUTURE GROWTH PLANS - WASHINGTON EXPANSION*.

K. Paraguay Expansion

In January 2022, the Villarrica Facility became operational with the installation of 2,900 of the Company’s older generation Miners relocated from Quebec and generating approximately 125 PH/s. On February 1, 2022, the Company announced commencement of 10 MW operations at the Villarrica Facility, increasing the total farms operated by the Company from six to seven and total mining capacity to 116 MW. See *Section 5.3 - FUTURE GROWTH PLANS - PARAGUAY EXPANSION*.

L. Argentina Expansion

On September 19, 2022, the Company announced commencement of operations at the first 10 MW module of its 50 MW warehouse in Argentina, increasing the total number of farms operated by the Company to ten and the total operational hashrate to 4.1 EH/s. See *Section 5.2 - FUTURE GROWTH PLANS - ARGENTINA EXPANSION*.

As of December 31, 2022, construction of all 5 MW modules at the 50 MW warehouse in Argentina had been completed and commissioning was underway.

FISCAL 2023

A. Board and Management Changes

In Fiscal 2023, until March 20, 2023, the following changes to the Board and Management have been made:

- On January 1, 2023, Jeff Gao was appointed as Vice President of Risk Management.
- On December 11, 2023, Guillaume Reeves was appointed Vice President of IT, Guillaume is one of the oldest employees of the Company and had previously occupied the position of Director of IT.
- On December 29, 2023, Tracy Krumme was appointed Senior Vice President, Head of Investor Relations.

B. At-the-market equity offering program

In Fiscal year 2023, the Company issued 52,120,899 common shares in the ATM program in exchange for gross proceeds of \$70.8 million at an average share price of approximately \$1.36. The Company received net proceeds of \$68.5 million after paying commissions of \$2.2 million to the sales agent for the program and \$0.1 million in other transaction costs.

The ATM Agreement expired on September 12, 2023.

21 | Page

BITFARMS LTD. 2023 Annual Information Form

3. GENERAL DEVELOPMENT OF THE BUSINESS (continued)

FISCAL 2023 (continued)

C. Debt Financing (continued)

In January 2023, the principal amount of the remaining Foundry Loans #2, #3 and #4, entered into on May 2021, were fully repaid before their maturity date.

On January 13, 2023, the Company announced that it was working to modify and reduce indebtedness of the February 2022 BlockFi Loan Facility. In connection with this, the Company announced it had taken certain actions, including not making installment payments. This constituted a default under the February 2022 BlockFi Loan Facility and entitled the lender to exercise various rights and remedies against the Company and in respect of the collateral.

During February 2023, the Company negotiated a settlement of its February 2022 BlockFi Loan Facility with an outstanding debt balance of \$20.3 million for a payment of \$7.8 million in cash. Upon settlement, the 6,100 Bitmain S19j Pro miners that secured the February 2022 BlockFi Loan Facility became unencumbered.

D. 2023 Private Placement

In November 2023, the Company completed a private placement (the “**November 2023 Offering**”) for total gross proceeds of \$43.8 million (CAD\$60.0 million) in exchange for 44,444,446 common shares and 22,222,223 common shares purchase warrants to purchase common shares at a price of CAD\$1.35 for each share and associated one-half warrant. The funds were raised via a fully subscribed private placement of equity securities among U.S. institutional investors. H.C. Wainwright & Co. acted as the exclusive placement agent for the offering.

In December 2023, 6,962,693 warrants and 2,306,667 broker warrants issued in the private placement that closed on November 28, 2023, were exercised resulting in the issuance of 9,269,360 common shares for gross proceeds of approximately \$11.0 million (or \$1.23 per share for the broker warrants and \$1.17 per share for the warrants).

E. Prospectus Filings

On November 10, 2023, the Company filed a short form base shelf prospectus (the “**November 2023 SFBS Prospectus**”) related to the offering for sale, of such number of securities of the Company as would result in aggregate gross proceeds of up to US\$375 million, over a 25-month period.

F. Development of Operations

A summary of the development of computing power in Fiscal 2023 is as follows:

Installed	Equipment
Q1 2023	3,000 Miners

BITFARMS LTD. 2023 Annual Information Form

3. GENERAL DEVELOPMENT OF THE BUSINESS (continued)

FISCAL 2023 (continued)

G. Quebec Expansion

On July 5, 2023, the Company acquired 100% of the shares of a corporation that owns the right to 22 MW of hydro power capacity in the city of Baie-Comeau, Quebec. In addition, the Company entered into a lease agreement for a site to operate the acquired capacity. Following the closing of the acquisition, the Company immediately commenced production at Baie-Comeau with an initial 3 MW online. The Company fully energized the 11 MW Baie-Comeau facility on October 20, 2023. See *Section 5.5 - FUTURE GROWTH PLANS - CANADA EXPANSION*.

H. Washington Expansion

In April 2023, the Company received approval from the power supplier for the 6 MW application that was pending as of December 31, 2022. Subject to completion of the

construction of required civil work for the deployment of the additional mining capacity, the 6 MW is expected to be operated in the first quarter of 2024.

In June 2023, the Company began the construction of another facility on Company-owned land in the State of Washington.

In July 2023, after obtaining lower results than expected, both in terms of performance and costs, the Company de-energized its 2 MW containerized immersion cooling pilot project in the State of Washington. See *Section 5.4 - FUTURE GROWTH PLANS - WASHINGTON EXPANSION*.

I. Argentina Expansion

In April 2023, the private power producer obtained permits to provide the Company with up to 100 MW. During the same month testing of the Rio Cuarto substation was completed, and with the energization of 2,100 Miners in the Rio Cuarto facility, the Company reached 5 EH/s of production.

During Q2 2023, approximately 5,100 new M30S WhatsMiner miners were installed in the Rio Cuarto facility, increasing capacity by over 100% to 29 MW and added approximately 510 PH/s, bringing its total hashrate in that facility to approximately 700 PH/s. See *Section 5.2 - FUTURE GROWTH PLANS - ARGENTINA EXPANSION*.

In August and September 2023, approximately 1,300 new M50 WhatsMiner Miners, 700 new S19j Pro Antminer miners and 5,500 new S19j Pro+ Antminer Miners were installed, increasing the warehouse's capacity to 51 MW and operational hashrate to 1.5 EH/s. Approximately 600 additional M50 WhatsMiner miners and 200 new Bitmain S19j Pro+ Antminer Miners were installed in October 2023, further increasing the warehouse's capacity to 54 MW and operational hashrate to 1.6 EH/s.

In November 2023, the Company secured a fixed rate with the private Argentinian power producer, to receive power at the Rio Cuarto facility at a fixed rate of 2.1 cents per kWh plus VAT for the months of November 2023 through April 2024, which is expected to significantly lower the Company's blended cost of power at the Rio Cuarto facility to an average of 2.5 cents per kWh plus taxes for the first year of full operations.

At December 31, 2023 the Company operated one 54 MW facility in Argentina.

23 | Page

BITFARMS LTD.

2023 Annual Information Form

3. GENERAL DEVELOPMENT OF THE BUSINESS (continued)

FISCAL 2023 (continued)

J. Paraguay Expansion

In January 2023, all the older generation Miners in the Villarrica Facility were replaced with approximately 3,000 new M30S WhatsMiner Miners generating approximately 290 PH/s, a 165 PH/s increase compared to the hashrate that was being produced by the older generation Miners. During the three months ended March 31, 2023, the Company sold the older generation Miners to a third party for approximately \$0.2 million. See *Section 5.3 - FUTURE GROWTH PLANS - PARAGUAY EXPANSION*.

In July 2023, the Company acquired 100% of the shares of two corporations owning power purchase agreements in Paraguay for up to 150 MW of eco-friendly hydro power: one for up to 50 MW in Villarrica, in close proximity to the Company's existing operations, and one for up to 100 MW in Yguazu, a new location close to the Itaipú dam, the third largest hydro-electric dam in the world.

In August 2023, in anticipation of the construction of the 50 MW new operating facility in Villarrica, known as the "Paso Pe" facility, the Company placed orders using vendor credits for eight 2.4 MW hydro containers and approximately 1,900 hydro-cooled Miners capable of producing approximately 675 PH/s once installed.

In September 2023, construction commenced at the Paso Pe facility.

In December 2023, the Company announced that it had entered into an amending agreement for an additional 20 MW of energy at the Paso Pe facility, enabling an expansion at the site from 50 MW to 70 MW, of which about 50 MW will be air cooled and the remaining hydro containers. The construction of the Paso Pe facility is expected to be completed before the end of the second quarter of 2024.

K. Transformative Fleet Upgrade

In November 2023, the Company announced that as part of a comprehensive strategy to increase the Company's fleet efficiency and operating capacity, it placed a firm purchase order for 35,888 Bitmain T21 miners totaling \$95.5 million with deliveries scheduled from March 2024 to May 2024 and made a non-refundable deposit of \$9.5 million. In addition, the Company secured a purchase option for an additional 28,000 Bitmain T21 miners totaling \$74.5 million and made a non-refundable deposit of \$7.4 million in respect to the purchase option. This purchase option gives the Company the right until December 31, 2024, but not the obligation, to purchase, in whole or in part, up to an additional 28,000 Bitmain T21 miners.

BITFARMS LTD.

2023 Annual Information Form

3. GENERAL DEVELOPMENT OF THE BUSINESS (continued)

FISCAL 2024

During Fiscal 2024 until March 6, 2024:

A. South America Expansion

Paraguay

On January 2024, Bitfarms announced the purchase of land for its future 100 MW production facility in Yguazu, Paraguay. This newly acquired land is located in the heart of Paraguay near the Itaipú Dam, the third largest hydropower dam in the world with 14 Gigawatts of installed capacity. Positioned to benefit from the region's abundant renewable energy resources, this new facility is expected to be sustainable both economically and environmentally. Once the Yguazu facility comes online, over 85% of the Company's portfolio will be powered by low-cost green energy that promotes environmentally sustainable Bitcoin Mining. The construction of the facility's build-out is anticipated to be completed in the second half of 2024.

B. Current Computing Power

The Company's total operating hashrate is approximately 6.5 EH/s as of March 6, 2024.

BITFARMS LTD. 2023 Annual Information Form

4. DESCRIPTION OF BUSINESS

4.1 GENERAL

Bitfarms owns and operates server farms comprised of computers (referred to as "Miners") designed for the purpose of validating transactions on the BTC Blockchain (referred to as "Mining"). Bitfarms generally operates its Miners 24 hours a day, which produce computational power used for hashing calculations (measured by hashrate) that Bitfarms sells to a Mining Pool under a formula-driven rate commonly known in the industry as Full Pay Per Share ("FPPS"). Under FPPS, Mining Pools compensate Mining companies for their computational power used for hashing calculations, measured through hashrate, based on what the Mining Pool would expect to generate in revenue for a given time period if there was no randomness involved. The fee paid by a Mining Pool to Bitfarms for its computational power used for hashing calculations may be in cryptocurrency, U.S. dollars, or another currency. However, the fees are generally paid to the Company in BTC on a daily basis. Bitfarms accumulates the cryptocurrency fees it receives or exchanges them for U.S. dollars through reputable and established cryptocurrency trading platforms.

Prior to January 2021, the Company routinely exchanged cryptocurrencies mined into U.S. dollars through reputable cryptocurrency trading platforms. At the beginning of Fiscal 2021, the Company implemented the Digital Asset Management Program under which the Company decided how many mined Bitcoin would be held by the Company through its custodians. See section 4.8 - *DESCRIPTION OF BUSINESS - DIGITAL ASSET MANAGEMENT PROGRAM*.

As of March 6, 2024, Bitfarms operates 11 operating Bitcoin Mining facilities and two under development, which are situated in four countries: Canada, the United States, Paraguay and Argentina. Powered predominately by environmentally friendly hydro-electric and long-term power contracts, Bitfarms is committed to using sustainable and often underutilized energy infrastructure. The Company's ability to operate and secure power through its operational sites is summarized as follows:

Country	Region	Number of server farms	Source of energy	Operating power as of March 6, 2024	Contracted power as of March 6, 2024
Canada	Québec	8	Hydroelectric	158 MW	179 MW
United States	Washington State	1	Hydroelectric	18 MW	21 MW
Paraguay	Villarrica	1	Hydroelectric	10 MW	180 MW
Argentina	Rio Cuarto	1	Natural gas	54 MW	210 MW
		11		240 MW	590 MW

In addition, Bitfarms owns proprietary software, known as the MGMT System, that is used to control, manage, report and secure mining operations. The MGMT System scans and reports the location, status, computing power and temperature of all Miners at regular intervals to allow the Company to monitor performance and maximize up-time. The MGMT System was substantially upgraded during 2022 and is continually getting updated to enhance its features and improve its functionality. The revised system is referred to as MGMT-2. See Section 4.14 - *HARDWARE AND SOFTWARE*.

Volta provides electrician services to both commercial and residential customers in Québec, while assisting Bitfarms in building and maintaining its server farms in Quebec.

BITFARMS LTD. 2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.2 MINING POOL PARTICIPATION

Bitfarms generally operates Miners 24 hours a day producing computational power used for hashing calculations (measured by hashrate) which it sells to Mining Pools (as defined herein), and is compensated on a FPPS basis. Bitfarms currently participates in only one Mining Pool, being Foundry USA Pool ("Foundry Pool"). Under FPPS, pools compensate Mining companies for their hashrate based on what the pool would be expected to generate in revenue for a given time period if there was no randomness involved. The fee paid by a Mining Pool to Bitfarms for its hashrate may be in cryptocurrency, U.S. dollars, or other currency. However, the fees are generally paid to the Company to BTC on a daily basis. Bitfarms accumulates the cryptocurrency fees it receives or exchanges them for U.S. dollars, as determined to be needed, through reputable and established cryptocurrency trading platforms. The Company provides its Mining Pool with computing power (hashrate) over a 24-hour period and continues to record the recognition of revenue upon delivery of the service which generally coincides with the receipt of crypto assets in exchange for mining activities. Mining Pools generate revenue by Mining with purchased hashrate through the accumulation of block rewards and transaction fees issued by the Bitcoin network.

The Company's miners' hashrate is directed to Foundry Pool's cloud-based network with a specific URL address. Bitfarms uses at least one unique URL address per location. Mining Pools (including Foundry Pool) generally have software to compute distribution proportions among participating Miners, verify Miner's contributions, and distribute

rewards to each Miner. Other members of the Mining Pool also direct their Miners hashrate to Foundry Pool with URL address(es) that are unique to those members.

Although the Company expects that it could earn marginally more revenues over a specific time period by not participating in a Mining Pool (as a result of not being charged any fee by the Mining Pool), it elects to do so primarily to make its earning more predictable and to generate revenues on a daily basis, i.e. based on what it would be expected to mine. Indeed, prior to the commencement of a particular day, the Company is able to formulate a reasonably accurate estimate of the revenues it will earn that day, based on its expected hashrate contributed to the Pool. In practice, the hashrate contributed to the Mining Pool by the Company will vary somewhat for any number of reasons, (e.g. an individual miner malfunctions, requiring repairs).

The short-term impact of not using a Mining Pool cannot be estimated. It is possible that the Company experiences a period of good fortune and solves a greater number of blocks than it would be expected to based solely on its hashrate, in which case its revenues would be greater than the FPPS payout methodology, for that specific time period. On the other hand, over a specific time period, Bitfarms could solve fewer blocks and earn less revenues.

The payout formula that Foundry Pool pays to Bitfarms (not including transaction fees) is as follows:

$$\text{Subaccount FPPS Payout Amount} = \text{Daily PPS Base per Subaccount} \times \text{FPPS Rate} \times (1 - \text{Pool Fee \%})$$

where Subaccount FPPS Payout Amount is the amount of payment (in Bitcoin) that the Company actual receives; Daily PPS Base per Subaccount is the amount of Bitcoin earned by the Company based on the block subsidy that is paid to Bitcoin Miners for solving a block (the "Reward Component"); FPPS Rate is a factor that increases the Reward Component to account for transaction fees paid by users of the Bitcoin network who wish to record a transaction to the Bitcoin blockchain and which fees are paid to Bitcoin Miners for solving a block that includes that transaction; and Pool Fee % is the fee withheld by Foundry Pool, i.e. the discount applied to the total FPPS payout otherwise attributed to computing power service providers for their sale of computing power used for hashing calculations as defined in the rate schedule of the agreement with the Mining Pool.

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.2 MINING POOL PARTICIPATION (continued)

The Daily PPS Base per Subaccount is calculated as follows:

$$\sum_{\text{workers}=1}^{\# \text{ of workers}} \sum_{\text{shares}=1}^{\# \text{ of shares}} \text{block subsidy (BTC)} \times \frac{\text{share difficulty}}{\text{network difficulty}}$$

where worker is the number of Miners (or groups of Miners), shares equals a number equal to the aggregate hashrate of a worker divided by sets equal to the size of the share difficulty (such that the sum of all such shares is equal to the aggregate Hashpower of a particular worker; block subsidy is the amount of Bitcoin rewarded for solving a block (currently 6.25 Bitcoin, until the next Halving event, scheduled to occur in April 2024 (the "2024 Halving")), and network difficulty is the Bitcoin network difficulty.

The FPPS Rate is calculated as follows:

$$\text{FPPS Rate} = 1 + \frac{\sum_{i=4}^{n-3} \text{Transaction Fees}}{\sum_{i=4}^{n-3} \text{Block Subsidy}}$$

where the sum of the Block Subsidy (indexed for i equals 4 to i equals n-3) is the aggregate amount of block subsidies awarded to all Miners on the Bitcoin blockchain over a particular period of time (e.g. 24 hours), after eliminated the three blocks with the lowest Transaction Fees and the three blocks with the highest Transaction Fees, and the sum of the Transaction Fees (indexed for i equals 4 to i equals n-3) are the actual transaction fees paid by all Bitcoin network users for the transaction they log to the blockchain on the blocks over the same period of time (i.e. 24 hours), after eliminated the three blocks with the lowest Transaction Fees and the three blocks with the highest Transaction Fees. This whole reward payment (i.e. the sum of the block subsidy and the transaction fee) can be publicly inspected on the Bitcoin blockchain, and the transaction fee is determined by subtracting the block subsidy, i.e. 6.25 Bitcoins until the 2024 Halving. As a control measure, on a monthly basis, the Company re-calculates the reward payment it should earn based on its theoretical hashrate and compares it to the reward payments received from Foundry. The Company has not identified any material differences with Foundry Pool's reward payments.

4.3 PRODUCTS AND SERVICES

The Company contributes its computational power used for hashing calculations to one or more mining pools from which it receives payment in Bitcoin through the Mining process, as well as providing electrical services through Volta.

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.4 CRYPTOCURRENCY BACKGROUND

Bitcoin Blockchain technology was developed around 2009 by a pseudonymous person or organization known as Satoshi Nakamoto. It is often defined as a distributed ledger, or database, with decentralized control. The types of databases that could be implemented using blockchain technology are broad and include, among others, databases similar to a bank ledger that record statements of accounts or transactions, or any other digital record of asset ownership, such as an identity system, land registry or even the rights and obligations defined in a contract. In the traditional centralized ledger models, a master version of such ledgers is controlled by a bank, government or a trusted third party. Disputes are resolved by checking the master version, through a manual and often redundant reconciliation process. In the decentralized blockchain model, a master ledger is not stored in one place or controlled by one entity. Every counterparty on the network receives an identical real-time copy of the ledger; the data in the ledger is tamper-proof using cryptography; new states of the ledger are agreed upon by consensus among all parties.

The shared ledger is made tamper-proof using a cryptographic technique called hashing. A hashing algorithm is a mathematical transformation function with two key properties. First, it accepts any alphanumeric dataset as an input and produces a unique 256-bit code as an output. Second, the smallest change in the dataset results in a significant change in the unique code. Any tampering of the dataset can be detected by re-hashing the data and checking for a change in the unique code. Any user that runs the hash algorithm on the same strings will derive the same unique code. Consequently, the data on the distributed ledger can be run through a series of hash algorithms to create a unique code which ensures the entire ledger is immutable. Whenever a new set or block of transactions is added to the ledger, it is appended with the code from the prior state of the ledger before it is hashed. This chain links both states of the ledger by combining them into a single unique code. Tampering of any historical state of the ledger can be automatically detected by the blockchain network. The historical state of the ledger can be changed if control of more than 50% of the network is obtained; however, in the case of widely held cryptocurrencies with non-trivial valuations, it is likely economically prohibitive for any actor or group of actors acting in concert to obtain the requisite control of more than 50% of the network.

4.5 MINING

The process by which cryptocurrency coins or tokens are created and transactions are verified is called mining. A user or Mining operator operates a publicly distributed mining client, which turns the user's computer into a "node" on the network that validates blocks. In order to add blocks to the Bitcoin blockchain, a Miner must map an input data set (i.e., the blockchain, plus a block of the most recent transactions and an arbitrary number called a "nonce") to a desired output data set of a predetermined length using the SHA256 cryptographic hash algorithm. Each unique block can only be solved and added to the blockchain by one Miner. As more Miners join the network and its processing power increases, the network adjusts the complexity of the block solving equation to maintain a predetermined pace of adding a new block to the blockchain approximately every ten minutes. The prevailing level of complexity in the context of cryptocurrency mining is often referred to as the "difficulty". See Section 4.19 - *RISK FACTORS* of this AIF.

A Miner's proposed block is added to the blockchain once a majority of the nodes on the network confirms the Miner's work which is targeted to occur every ten minutes. Miners that are successful in adding a block to the blockchain are automatically awarded coins or tokens (referred to as block rewards) for their effort plus any transaction fees paid by transferors whose transactions are recorded in the block. This reward system is the method by which new coins enter into circulation to the public.

BITFARMS LTD. 2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.6 BUSINESS AND STRATEGY

The Company's strategy consists mainly of constructing and operating server farms using a geographically diversified portfolio of low-cost energy sources. In support of the strategy, the Company has sourced electrical power from Hydro-Québec, Hydro-Sherbrooke, Hydro-Magog, City of Baie-Comeau and predominantly power grid operators in Washington State and Paraguay. Power from these sources is derived from clean hydroelectricity as opposed to, for instance, coal-fired or gas-fired plants. Hydro-electric power is generated through exploitation of the natural water cycle, which is renewable, sustainable, and abundant owing to the natural geography of the Province of Québec, Washington State and Paraguay. The Company has also entered into an agreement with a private energy producer to secure exclusive use of up to 210 MW of natural gas-powered electricity in Argentina; with current permits in place allowing for 100 MW of electricity. As a result of these efforts, the management of the Company has developed a business model utilizing low-cost power capacity and a supply of computer hardware from leading manufacturers.

The Company's server farms are in part operated by the MGMT-2, a proprietary software suite comprised of three operating programs that control, manage, report and secure the operation. One program in the suite of software is the central point of the infrastructure, and saves the status of the Company's Miners into a database at 30 second intervals. A second program in the suite connects directly to the first program to do the scanning of all the Company's Miners and return the data for analysis and storage. A third program in the suite displays the data retrieved by the other programs in readable and digestible format to assist operators in identifying machines issues. The software is configured to notify operators of profitability conditions, enabling operators to manually optimize margins under different economic conditions through optimizing the hashing performance and energy consumption of the Miners. Additionally, the Company has an automated cooling management system which autonomously controls exhaust fans to maintain the optimal temperature of the Miners at the locations in which they are operated, based on prevailing ambient conditions. See Section 4.14 - *DESCRIPTION OF BUSINESS - HARDWARE AND SOFTWARE*.

4.7 MINING PROFITABILITY

It is not possible to determine with certainty the price of Bitcoin at which the Company's costs would exceed its revenues. This is because the price of Bitcoin and network difficulty are interdependent factors and must be analyzed together to determine whether the economics warrant pausing of mining activities. The Company would consider pausing mining activity if the network difficulty and Bitcoin price resulted in revenue per teraHash decreasing below 4 cents, a level at which the variable cost of mining (i.e. the incremental cost of mining Bitcoin) exceeds the revenue per teraHash. In such a circumstance, the Company would consider the long-term impact of pausing its operations, in addition to the direct economic impact.

For the year ended December 31, 2023, and taking into account the network difficulty, the Company's average direct cost per Bitcoin was approximately US\$15,200, and the Company would likely be in a position to continue mining Bitcoin profitably if the price per Bitcoin decreased to this level. In the event that the price per Bitcoin decreased below approximately US\$15,200, the Company would expect that many other Miners in the industry would earn revenue below their break-even cost of production and suspend operations. Consequently, the Company would expect that the network difficulty would decrease (causing the Company's cost per Bitcoin to also decrease). In the event that the price of Bitcoin decreases below US\$15,200 and network difficulty does not change, the Company may temporarily pause mining until the price surpasses the Company's average direct cost per Bitcoin.

Furthermore, in the event the network difficulty rises or the BTC price decreases such that the direct cost exceeds the revenue per teraHash, the Company may consider reducing the clock rate of its miners, resulting in greater electrical efficiency and a lower direct cost per BTC. See Section 4.19 - *RISK FACTORS - Cryptocurrency Network Difficulty and Impact of Increased Global Computing Power* of this AIF.

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.8 DIGITAL ASSET MANAGEMENT PROGRAM

The Company's Digital Asset Management Program commenced in early January 2021 following the implementation of internal controls, counter-party risk assessments and custody arrangement reviews. Rather than selling all BTC mined at then-prevailing market rates, the Company decided to retain BTC through its custodial arrangements.

Retaining BTC allowed the Company flexibility in deciding when or whether to sell the assets based on prevailing market conditions. With the decrease in BTC prices during late 2021 and 2022, coupled with the high price of mining hardware, the Company converted a portion of its cash position into BTC with a purchase of 1,000 BTC during the first week of 2022. In August 2022, attending to market conditions, the Board approved the sale of the Company's daily BTC earned to reduce indebtedness and increase financial flexibility.

Bitfarms has implemented internal controls and custody arrangements to minimize the risk of loss or theft of the retained BTC. Within the Company, there is a segregation of duties to ensure no individual has the ability to unilaterally perform a BTC transaction. Every BTC transfer requires the approval of two different authorized individuals. All BTC transfers are monitored and monthly reconciliations are performed by individuals that are external to the transaction process. The Company retains Coinbase Trust Company LLC ("Coinbase Custody") and Anchorage Digital Bank N.A. ("Anchorage Digital") as its third-party custodians. Coinbase Custody is a US-based fiduciary and qualified custodian under New York Banking Law and is licensed by the State of New York to custody digital assets. Anchorage Digital is a digital asset platform and infrastructure provider that deals in the holding of cryptocurrency products and the investing of infrastructure for cryptocurrency. Anchorage Digital is the only crypto-native bank to hold a charter from the US Office of the Comptroller, offering institutions secure custody, staking, governance and settlement services. Having a national bank charter in the US places Anchorage Digital on the same regulatory footing as other US national banks. See Section 4.9 - *DESCRIPTION OF BUSINESS - CUSTODY OF CRYPTO ASSETS*.

Every Bitcoin earned is kept or sold based on the Company's liquidity and operational needs. The Company has no specific target or intention with the Bitcoins it earns from Mining operations. Rather, the Company assesses on an on-going basis whether retention on one hand or sales on the other hand support its stated business objectives, considering factors both internal and external to the Company itself. Some Bitcoins are used as collateral as described in the financial statements.

The Company has many controls within the Company itself and within Coinbase Custody and Anchorage Digital, its Bitcoin custodians. Within the Company, there is a segregation of duties to ensure no individual has the ability to perform a BTC transaction alone. Every BTC movement requires the approval of two different individuals. The BTC balance movement is monitored and monthly reconciliations are performed by individuals who are external to the transaction process. Within Coinbase Custody and Anchorage Digital, every BTC is held in a cold wallet. One initiator and two approvers (i.e. CEO, CFO, VP finance) are needed to complete a transaction and video calls are needed for a transfer to a third-party.

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.9 CUSTODY OF CRYPTO ASSETS

The Company's crypto assets, currently BTC, is earned to multi-signature wallets that the Company controls. On a regular basis, the Company transfers BTC from its multi-signature wallets to an external third-party custodian, such as Coinbase Custody and Anchorage Digital. Currently, Coinbase Custody and Anchorage Digital provides only custodial services to the Company and does not use a sub-custodian. Coinbase Custody and Anchorage Digital is not a related party to the Company. Coinbase Custody is a fiduciary of § 100 of the New York Banking Law and is licensed to custody its clients' digital assets in trust on their behalf. Coinbase Custody is a qualified custodian for purposes of § 206 (4) -2(d)(6) of the Advisers Act of 1940, as amended. Anchorage Digital is the only federally chartered crypto bank in the U.S., serves as a custodian for digital assets, and is licensed and regulated by the Office of the Comptroller of the Currency.

As of March 6, 2024, the Company holds 807 BTC, valued at \$54.1 million. As of the date of this AIF, 100% of the Company's BTC are held in custody with Coinbase Custody and Anchorage Digital.

Coinbase Custody maintains an insurance policy of \$320 million for its cold storage, and Anchorage Digital maintains an insurance policy of \$50 million for its cold and hot storage; however, the Company cannot ensure that the limits of those policies would be available to the Company or, if available, would be sufficient to make the Company whole for any BTC that are lost or stolen. The Company is unaware of: (i) any security breaches involving Coinbase Custody which have resulted in the Company's crypto assets being lost or stolen, and (ii) anything with regards to Coinbase Custody's operations that would adversely affect the Company's ability to obtain an unqualified audit opinion on its audited financial statements. The Company's crypto assets held in custody with Coinbase Custody may not be recoverable in the event of bankruptcy by Coinbase Custody or its affiliates. In its annual report on Form 10-K filed with the U.S. Securities Exchange Commission on February 15, 2024, Coinbase Custody disclosed that, in the event of a bankruptcy, custodially held crypto assets could be considered to be the property of the bankruptcy estate and that the crypto assets held in custody could be subject to bankruptcy proceedings with Coinbase Custody's customers being treated as general unsecured creditors. Further, regardless of efforts made by the Company to securely store and safeguard assets, there can be no assurance that the Company's cryptocurrency assets will not be defalcated through hacking or other forms of theft.

Regardless of efforts made by the Company to securely store and safeguard assets, there can be no assurance that crypto assets will not be defalcated through hacking or other forms of theft. See Section 4.19 - *RISK FACTORS* of this AIF.

4.10 HEDGING PROGRAM OF DIGITAL ASSETS

The Company's hedging strategy aims to reduce the risk associated with the variability of cash flows resulting from future disposals of digital assets and in consideration of the volatility and adverse price movements of the digital assets in the prior months. In March 2023, the BOD approved a hedging program and authorized Management, through a

risk management committee specifically created for this purpose, to implement hedges using BTC option contracts for up to 20% of the Company's BTC compensation per month and up to three months of future BTC compensation. In April 2023, the BOD authorized Management to increase the BTC option contracts to up to 50% of the Company's BTC compensation per month and up to six months of expected future BTC compensation. As of March 6, 2024, the risk management committee has not engaged in hedging to the full extent approved by the BOD. The Company has a hedge in place of 160 BTC of expected future BTC compensation.

During the three and twelve months ended December 31, 2023, the Company secured BTC option contracts to sell digital assets which resulted in a loss of \$0.3 million and \$0.5 million, respectively, mainly related to premiums paid for the option contracts hedging the potential risk of the BTC price decreasing and protecting the Company's margins. Refer to Note 22 to the Financial Statements for more details.

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.11 SYNTHETIC HODL PROGRAM OF DIGITAL ASSETS

Alongside the hedging program, and with the intent to manage a more capital-efficient portfolio, in June 2023, the BOD approved a HODL strategy, referred to as a synthetic HODL strategy, which allows up to 20% of the Company's BTC exposure to be replicated using BTC call options. In October 2023, the Company initiated its Synthetic HODL strategy with the purchase of long-dated BTC call options. The primary objective of the Synthetic HODL is to allow the Company to accumulate BTC in treasury and increase BTC exposure in a manner that is risk-managed and capital efficient. As of March 6, 2024, the Company has active call option contracts providing the right to buy up to 135 BTC. It remains within the risk management committee's discretion to dynamically adjust Bitfarms' hedge and Synthetic HODL ratios within the risk limits approved by the BOD to more adequately respond to market factors that are beyond the Company's operational control. During the three and twelve months ended December 31, 2023, the Company purchased long-dated BTC call options which resulted in an unrealized gain of \$0.5 million for both periods primarily attributable to the increase in the BTC price over the respected periods.

4.12 CURRENT MINING OPERATIONS

The following table sets out summary information regarding the Current Facilities as of March 6, 2024.

Location	Power Capacity	Hash-power per second	Property Information	Primary Energy Source
Farnham, Québec, Canada	10 MVW	200 PH/s	Leased	Hydroelectric
Saint-Hyacinthe, Québec, Canada	14 MVW	400 PH/s	Leased	Hydroelectric
Cowansville, Québec, Canada	17 MVW	400 PH/s	Leased	Hydroelectric
Baie-Comeau, Québec, Canada	11 MVW	300 PH/s	Leased	Hydroelectric
Magog, Québec, Canada	10 MVW	300 PH/s	Leased	Hydroelectric

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.13 COMPETITIVE CONDITIONS

The cryptocurrency mining industry is highly competitive. There are several publicly trading companies that mine cryptocurrency including Hut 8 Mining Corp. (TSX: HUT and Nasdaq: HUT), Hive Blockchain Technologies Ltd. (TSXV and NASDAQ: HIVE), Digihost Technology Inc. (TSXV: DGHI), Core Scientific Inc. (Formerly NASDAQ: CORZ); Riot Platforms, Inc. (NASDAQ: RIOT), Marathon Digital Holdings Inc (NASDAQ: MARA), Iris Energy Ltd. (NASDAQ: IREN), and CleanSpark Inc. (NASDAQ: CLSK). In addition, many other private companies are active in the industry.

It is difficult to obtain an accurate estimate of market share. As at March 6, 2024, the hashrate capacity of the Company's installed facilities represented an estimated 1.2% of the entire Bitcoin network hashrate, being approximately 557 EH/s. Estimates of the Bitcoin network hashrate can be retrieved at www.blockchain.com/en/charts/hash-rate. According to internal estimates, management believes that its facilities collectively rank as one of the largest and most cost-effective public cryptocurrency mining operations as measured by installed energy and hash power.

4.14 HARDWARE AND SOFTWARE

The main components of the Company's cryptocurrency mining operations are specialized computers, frequently referred to as ASIC Miners, that consist of ASIC chips, power supply units ("PSU"), network components, security components, electronic components, cooling components and other ancillary hardware. The hardware is composed primarily of: (i) WhatsMiner M30S, M31s and M31s+ and Bitmain S19js miners, which currently comprise most of the Company's mining power; and (ii) peripheral computer hardware required to operate the Miners. As at December 31, 2023, the Company owned and operated approximately 65,000 ASIC Miners. The majority of the Company's currently operating ASIC Miners and those recently secured by purchase order in connection with the expansion plans are primarily manufactured by MicroBT and Bitmain Technologies Inc., each leading suppliers of ASIC Miners for the blockchain and Mining industry. The Miners are typically purchased directly from the manufacturer; however,

during periods of elevated demand and pricing conditions, the Company has on occasion made purchases through secondary suppliers. The MGMT-2 software is used to control and to provide management, reporting and security of cryptographic coin mining systems. The Company's software suite consists of three operating programs: (i) a software program that provides a real-time status report and reports problems in near-real time; (ii) a web interface, management software program that displays various events and alerts by sending short message service ("SMS") messages or other alert methods; and, (iii) a software program that enables management and supervision of the cooling equipment (efficient cooling is an essential condition for the operation of the server farm). The software can be scaled to manage an unlimited number of ASIC components and sites. The software is regularly updated by the Company to incorporate new or upgraded features.

4.15 REVENUE

	Year ended December 31,		
	2023**	2022**	2021*
Revenues	\$ 146.4 million	\$ 142.4 million	\$ 169.5 million

* Revenues are from the sale of computational power used for hashing calculations, the provision of electrical services and the hosting of third-party mining hardware.

** Revenues are from the sale of computational power used for hashing calculations and the provision of electrical services.

	As of December 31,		
	2023	2022	2021
Value of Bitcoin held	\$ 34.0 million	\$ 6.7 million	\$ 152.9 million
Market price of Bitcoin	\$ 42,300	\$ 16,500	\$ 46,300

4. DESCRIPTION OF BUSINESS (continued)

4.16 EMPLOYEES

As of December 31, 2023, the Company and its subsidiaries have 170 employee positions on a global basis. The following table sets out the employees by department:

Department	Number of Employees
IT & Infrastructure	18
Operations – Site & Project Managers	13
Operations – Technicians	60
Business Development, Finance, Administration, Investors Relations and Marketing	53
Sub-Total	144
Volta	26
Total	170

4.17 INTANGIBLE PROPERTIES

The Company continually invests in improvements to its proprietary software called MGMT-2. The source code used to operate the farms is owned by the Company and is in its possession and held in a private account. No patents have been registered on the software and no applications have been made to register or otherwise protect copyrights in the software or its components.

4.18 BANKRUPTCY PROCEEDINGS

There have been no bankruptcies, receivership, or similar proceedings against Bitfarms or its respective subsidiaries, whether voluntary or otherwise, since incorporation and, to the knowledge of management, there are no such contingent or threatened proceedings.

4.19 RISK FACTORS

The following discussion summarizes the principal risk factors that apply to the Company's business and that may have a material adverse effect on the Company's business, financial condition and results of operations, and/or the trading price of the Company's shares. Due to the nature of the Company's business, the legal and economic climate in which it operates and its present stage of development and proposed operations, the Company is subject to significant risks. These risk factors are not a definitive list of all risk factors associated with an investment in the Company or in connection with its operations. Additional risks and uncertainties not presently known to the Company, or that are currently deemed immaterial, may also impair its operations. If any such risks actually occur, the financial condition, liquidity and results of operations of the Company could be materially adversely affected. Investors should carefully consider the risks, factors, and uncertainties described below, together with the other information contained in this AIF, as well as the risk factors, uncertainties, and other information disclosed in the Company's other public filings before making an investment decision regarding the Company's securities.

35 | Page

BITFARMS LTD.

2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Bitcoin Halving Event

The BTC reward for solving a block is subject to periodic incremental halving. Halving is a process designed to control the overall supply and reduce the risk of inflation in BTC using a proof of work consensus algorithm. At a predetermined block, the Mining reward is cut in half, hence the term “halving”. The BTC blockchain has undergone halvings three times since its inception. Most recently, in May 2020, the BTC Block Reward decreased from 12.5 to 6.25 BTC per block (a “BTC Halving”), and, consequently, the number of new BTC issued to Miners as a subsidy decreased to approximately 900 per day, excluding transaction fees.

The May 2020 BTC Halving had a significant negative impact on the Company’s profitability for several months following the BTC Halving. It took approximately six months for the Company’s revenue per terahash to return to the level experienced prior to the May 2020 Bitcoin Halving. Given that profitability is required for self-acting agents to perform Mining to continue to support the validation of transactions, the expected impact of the BTC Halving is that market variables of BTC price will adjust over time to ensure that Mining remains profitable. The period of market normalization after the next BTC Halving to incentivize profitability levels is unknown.

A BTC Halving is scheduled to occur once every 210,000 blocks, or roughly every four years, until the total amount of BTC rewards issued reaches 21 million, which is expected to occur around 2140. Once 21 million BTC are generated, the network will stop producing more. The next BTC Halving is expected to occur in April 2024, at which time BTC Block Rewards will decrease from 6.25 BTC per block to 3.125 BTC per block. While BTC prices have had a history of price fluctuations around BTC Halving events, there is no guarantee that the price change will be favorable or would compensate for the reduction in Mining reward and the corresponding decrease in the compensation the Company receives from the Mining Pool(s) in which it participates.

If BTC price and difficulty do not maintain or continue their trend of adjusting to pre-BTC Halving profitability levels over time, or the period of market normalization after the BTC Halving to pre-BTC Halving profitability levels is too long, there is a risk that a future BTC Halving will render the Company unprofitable for a sustained time period such that it could be unable to continue as a going concern.

Insolvency, Bankruptcy, or Cessation of Operations of Mining Pool Operator

Over the past five years, Bitfarms has both mined independently and been a member of multiple third-party Mining Pools; however, as of the date hereof, it participates in only one Mining Pool, being Foundry Pool. Foundry Pool is owned indirectly by Digital Currency Group, which also owns Genesis Global Capital (“Genesis”). On January 19, 2023, Genesis filed for U.S. bankruptcy protection. In the event that Foundry Pool (or any other Mining Pool in which the Company participates) ceases making payments to Bitfarms for whatever reason, including bankruptcy, insolvency or cessation of its operations, or for no reason, Bitfarms would expect to immediately cease contributing its Hash power to such Mining Pool and either: (i) join a different Mining Pool; or (ii) commence Mining independently. The Company estimates that such a switch would take approximately one day in either scenario. Given that Foundry Pool pays the Company on a daily basis, the cost of switching, if such a switch is ever deemed necessary by the Company, is expected to be the lost revenues the Company would have earned had it been Mining during that approximate one day period (and one additional day in the case Foundry Pool failed to pay the Company for its work, causing the decision to leave the Mining Pool). In the event that the Company is unable to make such a switch of its operations in a timely manner and its Mining operations experience significant down time, it may experience a material adverse change.

BITFARMS LTD. 2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Reliance on Foreign Mining Pool Operator

Bitfarms participates in a single Mining Pool, being Foundry Pool. Consequently, the Company’s operations are substantially reliant on Foundry Pool and the terms of services and other terms and conditions that govern its relationship with Foundry Pool. Foundry Pool has the right to unilaterally modify the service agreement between it and the Company at any time without notice. This includes the right to modify the payout methodology or Mining Pool fees. In the event that any such modifications are unattractive or unacceptable to the Company, it may: (i) join a different Mining Pool; or (ii) commence Mining independently, either of which may cause a material adverse change. See risk factor *Insolvency, Bankruptcy, or Cessation of Operations of Mining Pool Operator* above.

As a control measure, on a monthly basis, the Company calculates the revenues it should earn based on its theoretical Hashrate and compares it to the payments the Company received from Foundry Pool. As of the date hereof, the Company has not identified any material discrepancies between its calculations and payments actually received from Foundry Pool. In the event that the Company identifies a material difference, the Company may have to engage in litigation and/or cease its relationship with Foundry Pool, either of which may have a material adverse effect on the Company.

Mining Pool Agreements Governed by Foreign Laws

The agreement between the Company and Foundry Pool is governed by the laws of the State of New York. Furthermore, the Mining Pool agreement contains an arbitration provision that requires any dispute arising out of or relating to the Company’s agreement with Foundry Pool, or the breach thereof, to be finally resolved by arbitration administered by the American Arbitration Association under its Commercial Arbitration Rules, or such arbitration body as required by law, rule or regulation, and judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction. Any such arbitration will be conducted in the English language before a single arbitrator in the City of New York, New York. The Company may be required to expend significant costs in order to undertake and complete any such arbitration, and there can be no guarantee of any successful outcome of such arbitration. In such a case, the Company may experience a material adverse change.

Independent Mining Risks

In the event the Company decides to cease participating in a Mining Pool and conduct Mining operations independently, it may be exposed to certain risks. Refer to Section 4 - *DESCRIPTION OF BUSINESS*. The primary risk of conducting independent Mining is that the Company could experience a protracted period of failing to solve any blocks, causing a disruption in its revenue stream. In such a circumstance, the Company may need to borrow or raise additional capital to continue operations. There can be no guarantee that the Company could obtain any such financing on commercially attractive terms, or at all, and, consequently, the Company could experience a material adverse change.

Indemnification of Mining Pool

Pursuant to the terms and conditions of the Foundry Pool to which the Company is subject, the Company has agreed to release, indemnify and hold Foundry Pool harmless from any and all losses, damages, and expenses, including reasonable attorneys’ fees, rights, claims, actions of any kind and injury (including death), arising out of or relating to the Company’s participation in Foundry Pool. In the event of any such losses, damages, or expenses, the Company may experience a material adverse change.

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Reliance on Manufacturing in Foreign Countries and the Importation of Equipment to the Jurisdictions in Which the Company Operates

The Company relies on third party manufacturers in foreign jurisdictions for its Miners. As a result, the Company's business is subject to risks associated with doing business in such foreign jurisdictions, including, but not limited to: trade protection measures such as the imposition of or increase in tariffs, import and export licensing and control requirements; potentially negative consequences from changes in tax laws (both foreign and domestic); difficulties associated with transacting business with parties in a foreign jurisdiction, including increased costs and uncertainties associated with enforcing contractual obligations; and unexpected or unfavorable changes in other regulations and applicable regulatory requirements.

For example, in 2018 and 2019, the U.S. enacted tariffs (or increased existing tariffs) on certain items imported from other countries. Following their enactment, the tariffs sparked an international trade war in which other countries enacted tariffs on imports of U.S. goods. Subsequently, the U.S. and various countries subject to those tariffs have engaged in trade negotiations and, in some instances, agreed to suspend or terminate certain tariffs. It is uncertain whether treaties or other trade policies like those will be enacted or modified by the U.S. or any other government or trade organization in the future. Future changes to trade or investment policies, treaties and tariffs, fluctuations in exchange rates, or the perception that these changes could occur could adversely affect third party manufacturers on which the Company relies, as well as the future of the Company's relationships with those third-party manufacturers, which could have an adverse impact on the Company's business, financial condition and results of operations. In addition, actions by foreign markets to implement further trade policy changes, including limiting foreign investment or trade, increasing regulatory scrutiny or taking other actions that apply to the jurisdictions in which the Company operates or in which third parties with which the Company does business operate, could negatively impact the Company's business, financial condition and results of operations.

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Emerging markets

Investing in a company with operations in emerging markets entails certain inherent risks.

The Company conducts Mining operations in various jurisdictions, including in Argentina and Paraguay, which are emerging markets. Investing in a company with operations in emerging markets involves inherent risks, which may include: (i) expropriation or nationalization of property; (ii) changes in laws or policies or increasing legal and regulatory requirements of particular countries, including those relating to taxation, imports, exports, duties, currency, or other claims by government entities, including retroactive claims and/or changes in the administration of laws, policies and practices; (iii) uncertain political and economic environments, war, terrorism, sabotage and civil disturbances; (iv) lack of certainty with respect to legal systems, corruption and other factors that are inconsistent with the rule of law; (v) delays in obtaining or the inability to obtain or maintain necessary governmental permits or to operate in accordance with such permits or regulatory requirements; (vi) import and export regulations, including restrictions on the import of miners and other equipment relevant to the Company's Mining operations; (vii) limitations on the repatriation of earnings and other forms of currency controls, monetary restrictions and limitations under economic policies; (viii) underdeveloped industrial or economic infrastructure; (ix) internal security issues; (x) increased financing costs; (xi) renegotiation, cancellation or forced modification of existing contracts; and (xii) risk of loss due to disease, and other potential medical endemic or pandemic issues, as a result of the potential related impact to employees, disruption to operations, supply chain delays, trade restrictions and impact on economic activity in affected countries or regions.

There can be no guarantee that one or more of the events described above will not occur in the future, and the impact of such event or events on the Company's operations cannot be accurately predicted at this time. The occurrence of one or more such events may have a material adverse effect on the Company's operations in the affected jurisdiction or jurisdictions, including, but not limited to, disruptions to its operations, the loss of property, unprofitability of its operations, protracted legal and regulatory proceedings, and other penalties or sanctions, which, in turn, may have a material adverse effect on the Company's overall business, financial condition and results of operations, and/or the trading price of the Company's shares.

Argentina and/or Paraguay may experience economic volatility and other challenges that could affect the Company's business, financial condition and result of operations.

The profitability of the Company's Mining operations in Argentina and Paraguay and the Company's ability to continue such operations depend in part upon local economic, social and/or political conditions, which, in turn, may affect the Company's business, financial position and results of operations. Adverse external economic factors; inconsistent fiscal and monetary policies; dependence of governments on external financing; changes in governmental economic policies; high levels of inflation; abrupt changes in currency values; high interest rates; volatility of exchange rates; political and social tensions; exchange controls; wage and price controls; the imposition of trade barriers; and trade shock are examples of economic and social conditions over which the Company has no control and which may have an adverse effect on the Company's operations in those geographies and, given the materiality to the Company of such operations, may adversely affect the Company's business, financial condition, results of operations, cash flows and prospects.

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Emerging markets (Continued)

The economies of Argentina and Paraguay are vulnerable to external shocks caused by significant economic difficulties of their respective trading partners or by more general "contagion" effects.

Weak, flat or negative economic growth or changes in international trade policy of the major trading partners of Argentina and Paraguay could adversely affect their balance of payments and, consequently, their respective economic growth.

Argentina in particular has experienced significant political and social economic instability in the past and may experience further instability in the future. For instance, in 2001 and 2002, Argentina suffered a major political, economic and social crisis, which resulted in institutional instability and a severe contraction of the economy with significant increases in unemployment and poverty rates. Among other consequences, the crisis caused a large currency devaluation and led to the government of Argentina defaulting on its external debt. In response, the government of Argentina implemented a series of emergency measures, including strict foreign exchange restrictions and monthly limits on bank withdrawals, which affected public companies and other sectors of Argentina's economy. Despite a brief recovery from that crisis, growth stagnated starting in 2012, and Argentina has struggled to curb strong inflationary pressures since, with inflation spiking in 2023. In particular, Argentina's annual inflation rate for 2023 ended at 211.4%, the highest since the early 1990s, and it currently has one of the highest rates of inflation in the world. Argentina's high rate of inflation may adversely impact the Company's business, results of operation and financial condition in the future. Due to the political and economic uncertainties in Argentina, the Company is uncertain when, or if, the Argentine VAT receivable will be settled.

The economic conditions of Argentina and Paraguay are dependent on a variety of factors, including, but not limited to, the following: (i) international demand for Argentina's and Paraguay's principal exports; (ii) international prices for Argentina's and Paraguay's principal commodity exports; (iii) stability and competitiveness of the currencies of Argentina and Paraguay compared to foreign currencies; (iv) competitiveness and efficiency of domestic industries and services; (v) levels of domestic consumption and foreign and domestic investment and financing; and (vi) the rate of inflation. Any difficulties faced by the economies of Argentina and Paraguay or challenging or deteriorating financial condition of the same could have a material adverse effect on companies operating in Argentina and Paraguay, including the Company.

The Company conducts operations in countries known to experience high levels of corruption, and any violation of anti-corruption laws could subject us to penalties and other adverse consequences.

The Company is subject to anti-corruption, anti-bribery, anti-money laundering and other international laws and regulations and is required to comply with the applicable laws and regulations of each jurisdiction in which the Company operates. In general, those laws prohibit improper payments or offers of payments to governments and their officials, political parties, state-owned or controlled enterprises, and/or private entities and individuals for the purpose of obtaining or retaining business. In addition, the Company is subject to economic sanctions regulations that restrict its dealings with certain sanctioned countries, individuals and entities.

BITFARMS LTD.

2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Emerging markets (Continued)

The Company conducts operations in countries known to experience high levels of corruption, and any violation of anti-corruption laws could subject us to penalties and other adverse consequences. (Continued)

The Company has operations in Argentina and Paraguay, which are jurisdictions perceived as having relatively high levels of corruption. The Company's activities in those countries increase the risk of, or potential for, unauthorized payments or offers of payments by one of the Company's employees, contractors, or agents that could be in violation of various laws, including anti-bribery laws applicable to the Company. In addition, the Company's ability to secure permits, renewals or other government approvals required to maintain its operations could be negatively impacted by corruption in one or more governmental institutions in Argentina and Paraguay.

The Company has adopted various measures that mandate compliance with applicable anti-corruption, anti-bribery and anti-money laundering laws, and has implemented training programs, compliance controls and procedures, and reviews and audits to ensure compliance with such laws; however, there can be no assurance that the Company's internal controls and procedures will be sufficient to prevent or detect all inappropriate practices, fraud or violations of such laws, regulations and requirements by the Company's affiliates, employees, directors, officers, partners, agents and service providers, or that any such persons will not take actions in violation of the Company's policies and procedures, for which the Company may be ultimately responsible.

Any violations of anti-bribery and anti-corruption laws or sanctions regulations by the Company, or otherwise committed on its behalf, including by its employees, directors, or other agents, could have a material adverse effect on the Company's business, reputation, results of operations and financial condition. The Company cannot predict the nature, scope or effect of future anti-corruption regulatory requirements to which its operations might be subject, the manner in which existing laws might be administered or interpreted or the impact on the Company of any violation of the same.

The Company's operations in Argentina are subject to frequent and unpredictable changes in tax rates, capital controls, and foreign exchange restrictions, which may restrict or affect the profitability of the Company's operations.

The imposition and application of federal, provincial and other local taxation to which businesses located in Argentina are subject may change frequently and without notice. If any taxation authority takes a position or adopts an interpretation that differs from those adopted by the Company, the Company could become subject to unanticipated tax liabilities and cost increases, which could negatively affect its financial condition and results of operations.

For instance, in 2018, the government of Argentina introduced a decree imposing a temporary tax on all exports from Argentina. The tax was introduced as an emergency measure due to the significant devaluation of the Argentinean peso during 2018. In December 2019, the government of Argentina approved a law delaying a scheduled corporate tax rate decrease from 30% to 25% to the end of 2020, following which the government submitted a bill in order to maintain the 30% rate until the end of 2021 and to extend the temporary export tax introduced in September 2018 to the end of 2021. Furthermore, the decree suspended the increase in the dividend withholding tax from 7% to 13% until January 2021. In June 2021, the National Government passed an amendment to the corporate income tax rate, increasing it from a flat rate of 25% to a progressive scale, with a maximum rate of 35% for certain types of companies.

BITFARMS LTD.

2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Emerging markets (Continued)

The Company's operations in Argentina are subject to frequent and unpredictable changes in tax rates, capital controls, and foreign exchange restrictions, which may restrict or affect the profitability of the Company's operations. (Continued)

Changes in taxes, capital controls, and foreign exchange regulations in Argentina and the other jurisdictions in which the Company operates are beyond the Company's control. Increased tax rates, or the imposition of stricter capital controls or foreign exchange regulations, could increase the operating costs at the Company's Mining facilities, prevent or restrict development and production at new or contemplated facilities and constrain the Company's ability to receive distributions from its subsidiaries in those jurisdictions.

Valuation and Price Volatility of Cryptocurrencies

The profitability of the Company's operations has been and will continue to be significantly affected by changes in the spot price of cryptocurrencies, specifically BTC. Cryptocurrency prices (and BTC prices in particular) are highly volatile, fluctuating due to numerous factors beyond the Company's control, including speculation and incomplete information, rapidly changing investor sentiment, changes in technology, regulatory changes, fraudulent or malicious actors, media coverage of cryptocurrency, inflation, and political or economic events, as well as market acceptance and demand for cryptocurrency. The market price of one BTC, in the Company's principal market, ranged from approximately \$16,600 to \$44,700 during the year ended December 31, 2023 and ranged from approximately \$15,600 to \$48,100 during the year ended December 31, 2022. Although the Company partially hedges its investment in BTC, such hedging practices may not adequately protect the Company from BTC's price volatility and surrounding risks.

Currently, the Company does not use a formula or specific methodology to determine whether or when it will sell BTC that it holds, or the number of BTC it will sell. Rather, decisions to hold or sell BTC are currently determined by Management by analyzing forecasts and monitoring the market in real time. Such decisions, however well-informed, may result in untimely sales and even losses, adversely affecting an investment in the Company. Further, some of the business decisions (e.g., purchases of Miners and debt financing) the Company has made, and may in the future make, were or will be tied to the price of BTC at the time of each of those decisions. For example, in 2021, the Company made purchase commitments in respect of a significant number of new Miners to be delivered and paid for during the year 2022, when BTC and Miner prices were much lower than at the time of such purchase. Although the Company was successful in renegotiating the agreement and canceling some of those purchase commitments, it may not be able to do so in the future. If cryptocurrency spot prices decline and remain at low market levels for a sustained period while network difficulty does not decrease proportionally, the Company's results of operations and financial condition, as well as the trading price of the Company's common shares, could be materially adversely affected.

Cryptocurrencies and related mining equipment may be subject to momentum pricing, which is typically associated with growth stocks and other assets whose valuation, as determined by the investing public, accounts for anticipated future appreciation in value. Further, the price of mining equipment is often tied to the price of cryptocurrencies and other cryptocurrency economics, such as mining difficulty and the value of corresponding rewards. Cryptocurrency market prices are determined primarily using data from various exchanges, over-the-counter markets and derivative platforms. Momentum pricing may have resulted, and may continue to result, in speculation regarding future appreciation in the value of cryptocurrencies, inflating their market prices and making those market prices more volatile. As a result, cryptocurrency market prices may be more likely to fluctuate due to changing investor confidence in future appreciation (or depreciation) in their market prices, which could adversely affect the trading price of the Company's common shares.

BITFARMS LTD.

2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Valuation and Price Volatility of Cryptocurrencies (Continued)

In addition, the securities markets have from time to time experienced significant price and volume fluctuations that are unrelated to the operating performance of particular companies. Specifically, the trading price of the Company's common shares is, and, in the future, is likely to continue to be, highly correlated to the trading price of BTC. BTC Mining companies' stock have shown volatility relative to BTC, with many such stocks outperforming BTC in 2020 and 2021 but underperforming relative to BTC in 2022. For example, the closing price of the Company's common shares on December 31, 2022 was \$0.44 and the closing price of BTC was approximately \$16,500 and, as of December 30, 2023, the closing price of the Company's common shares was \$2.91 and the closing price of BTC was approximately \$42,300.

The Company's operating results and financial condition have been and may continue to be adversely affected by declines in cryptocurrency market prices. In addition, the Company has made, and may continue to make, decisions concerning the execution of its business plan, including the development of its facilities and expansion into new markets, purchases of new Miners (or exercising any options it has to purchase new Miners) and incurrence of indebtedness, when BTC prices were, or may be, significantly higher or lower than they currently are, resulting in plans and obligations that the Company reassesses and likely will continue to reassess, particularly in light of potential general declines in cryptocurrency market prices, to determine the practicality, profitability and timeline of such plans and commitments.

Volatility may have an impact on the value of the Company's inventory of cryptocurrencies and could result in margin calls on the Company's long-term debt collateral BTC with NYDIG as described in Note 17 - *Long-term Debt* to the 2023 annual financial statements.

Share Price Fluctuations

In recent years, the securities markets have experienced a high level of price and volume volatility, and the market price of securities of many companies, particularly those in cryptocurrency-focused businesses, have experienced wide fluctuations in price. The market price of the Company's common shares ranged from \$0.42 to \$3.56 on Nasdaq and CAD\$0.57 to CAD\$4.68 on the Toronto Stock Exchange from January 1, 2023 to December 31, 2023. The market price of the Company's common shares fluctuates significantly in response to a number of factors, most of which the Company cannot control and many of which have not necessarily been related to the operating performance, underlying asset values or prospects of the Company. In particular, the trading price of the Company's common shares is in many cases directly tied to the price of BTC. Refer to "*Valuation and Price Volatility of Cryptocurrencies and Mining Equipment*" above for more details. Other factors that may impact the trading price of the Company's common shares include, but are not limited to:

- variations in the Company's financial results between periods or as compared to the Company's projections or the projections or actual results companies that are perceived to be similar to the Company;
- actions by the Company, its competitors, or others in the cryptocurrency industry, such as acquisitions, bankruptcies or restructurings;
- additions or departures of key management personnel;
- legal proceedings involving the Company, the cryptocurrency industry or both;
- legislative or regulatory actions;

- changes in market valuations of companies similar to the Company;
- the prospects of and changes affecting participants in the cryptocurrency industry;
- actions by the Company's shareholders;

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Share Price Fluctuations (Continued)

- speculation or reports by the press or investment community with respect to the Company or the cryptocurrency industry in general;
- changes in the pricing or availability of hydro-electricity, natural gas and other sources of energy;
- general economic, regulatory, market and political conditions; and
- other risks, uncertainties and factors described in these risk factors or otherwise not currently known to the Company.

The stock markets in general have often experienced volatility that has sometimes been unrelated or disproportionate to the operating performance of particular companies. These broad market fluctuations have, in the past, caused, and may, in the future, cause, the trading price of the Company's common shares to decline. A continuation or worsening of the levels of market disruption and volatility seen in the past could have an adverse effect on the Company's ability to access capital, on its business, financial condition, results of operations, cash flow and prospects and on the market price of its common shares. In the past, following periods of volatility in the market price of a company's securities, securities class-action litigation has often been brought against that company. The Company may become the subject of that type of litigation in the future, which litigation may be expensive to defend and may divert Management's attention and resources from the operation of the Company's business.

In addition, the Company must comply with the continued listing requirements of the Toronto Stock Exchange, Nasdaq or any other securities exchange on which its securities are listed in the future to avoid its securities being delisted. A delisting from the Toronto Stock Exchange and/or Nasdaq would result in the Company's common shares being eligible for quotation on the over-the-counter (OTC) market, which is generally considered to be a less efficient system than listing on a national exchange, such as the Toronto Stock Exchange and Nasdaq, because of the OTC's lower trading volumes, transaction delays and reduced security analyst and news media coverage. These factors could contribute to lower prices and larger spreads in the bid and ask prices for the Company's common shares.

Future Capital Needs, Uncertainty of Additional Financing and Dilution

As of December 31, 2023, the Company had cash of \$84.0 million, compared to \$30.9 million as of December 31, 2022. The Company expects to continue to depend upon selling BTC earned and in treasury and utilizing short-term debt, long-term debt and equity instruments to fund its ongoing expansion activities, operating expenses and debt service requirements. Further, the Company expects that it will need to raise additional capital in the future to fund more rapid expansion, respond to competitive pressures, acquire complementary businesses or technologies or take advantage of unanticipated opportunities, and it may seek to do so through public or private financing, strategic relationships or other arrangements. The ability of the Company to secure any required financing will depend in part upon prevailing capital market conditions and business success. There can be no assurance that the Company will be successful in its efforts to secure any additional financing on terms satisfactory to Management or at all. Even if such funding is available, the Company cannot predict the size of future issues of common shares or securities convertible into common shares or the effect, if any, that future issues and sales of common shares will have on the price of the Company's common shares.

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Future Capital Needs, Uncertainty of Additional Financing and Dilution (Continued)

If the Company raises additional capital through the issuance of equity securities, the percentage ownership of the Company's existing shareholders may be reduced, and such existing shareholders may experience additional dilution in net book value per share. Any such newly-issued equity securities may also have rights, preferences or privileges senior to those of the holders of the common shares. If additional funds are raised through the incurrence of indebtedness, such indebtedness may involve restrictive covenants that impair the ability of the Company to pursue its growth strategy and other aspects of its business plan, expose the Company to greater interest rate risk and volatility, require the Company to dedicate a substantial portion of its cash flow from operations to payments on its indebtedness, thereby reducing the availability of its cash flow to fund working capital and capital expenditures, increase the Company's vulnerability to general adverse economic and industry conditions, place the Company at a competitive disadvantage compared to its competitors that have less debt, limit the Company's ability to borrow additional funds, and otherwise subject the Company to the risks discussed under "Indebtedness" below and heighten the possible effects of the other risks discussed in these risk factors. In connection with any such future capital raising transaction, whether involving the issuance of equity securities or the incurrence of indebtedness, the Company may be required to accept terms that restrict its ability to raise additional capital for a period of time, which may limit or prevent the Company from raising capital at times when it would otherwise be opportunistic to do so.

If adequate funds are not available on acceptable terms or at all, the Company may be unable to develop or enhance its business, take advantage of future opportunities or respond to competitive pressures, any of which could have a material adverse effect on the Company's business, financial condition and operating results.

Indebtedness

The Company is party to various arrangements with short-term lenders as described in more detail in the MD&A, and the Company may become party to additional debt financing arrangements in the future. The Company's ability to generate and maintain a level of cash flows from operating activities to make scheduled payments on any debt obligations, or to refinance its debt obligations, will depend on, among other things, its future financial and operating performance, which is subject to prevailing economic and competitive conditions, and to various financial, business, regulatory and other factors, some of which are beyond the Company's control. If the Company is unable to fulfill its debt service obligations, it may be forced to reduce or delay capital expenditures or sell assets, seek additional capital or seek to restructure or refinance its indebtedness. Further, any such indebtedness may impair the Company's ability to obtain additional financing for working capital, capital expenditures, debt service requirements,

restructuring, acquisitions or general corporate purposes.

In addition, any agreements governing the Company's debt obligations may contain financial covenants and covenants that restrict the Company's and its subsidiaries' ability to:

- incur additional indebtedness or issue equity securities;
- create liens on the Company's assets;
- pay dividends or make other equity distributions;
- repurchase the Company's equity securities;
- make certain investments;
- sell assets; and
- consolidate, merge, sell or otherwise dispose of all or substantially all of the Company's assets.

45 | Page

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Indebtedness (Continued)

As a result of any such restrictive covenants, the Company could be limited in the manner in which it conducts its business, and it may be unable to engage in favorable business activities or finance future operations or capital needs. In addition, the indebtedness may contain affirmative covenant obligations (e.g., debt to equity ratios, EBITDA requirements, etc.) that may constrain the Company's financing opportunities and business activities. Any violation by the Company of any of such restrictive or affirmative covenants or failure by the Company to meet payment obligations (as was the case in early 2023 in respect of the Company's strategic decision to delay the making of principal and interest payments on its previously outstanding loan from BlockFi) could provide the lender with the ability to accelerate the maturity of the indebtedness and exercise a variety of remedies, including foreclosing on any collateral securing the debt. The occurrence of any such violation by the Company and the exercise by its lenders of remedies with respect to any such violation could have a material adverse effect on the Company's business, financial condition and results of operations.

Hedges

The Company actively engages in hedging practices with respect to its cryptocurrency holdings to lessen the impact of BTC volatility on the Company's results of operations and financial condition and to optimize cryptocurrency monetization. Although the Company undertakes hedging activities on a risk adjusted basis, there can be no certainty that such activities will be profitable, and these activities could result in significant losses.

In addition, hedging practices involve transactions with third parties. Any settlement delay or failure, security breach, incurred cost or loss of digital assets associated with the use of a counterparty could materially and adversely affect the execution of hedging strategies and result in significant losses. Although the Company maintains rigorous controls on the implementation and monitoring of hedging strategies, including its involvement with counterparties, there can be no assurance that such controls will be effective or timely or sufficient in operation to avoid or even reduce losses.

Global Financial Conditions

Global financial conditions over the last few years have been characterized by volatility, which has contributed to the bankruptcy of several financial institutions in the United States or the rescue thereof by governmental authorities. The continuation of such adverse economic conditions and other related factors may affect the ability of the Company to obtain equity or debt financing in the future on terms favorable to it, or at all, and may cause decreases in asset values that are deemed to be other than temporary, which may result in impairment losses. If such levels of volatility and market turmoil continue, the financial condition of the Company may suffer and the price of the Company's common shares may be adversely affected.

46 | Page

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Global Financial Conditions (Continued)

The Company currently engages in hedging practices with respect to its cryptocurrency holdings to lessen the impact of BTC volatility, and, in the future, the Company may enter into additional hedging transactions to mitigate its exposure to aspects of the economy or specific economic conditions that are particularly volatile, such as interest rates. Although hedging is expected to reduce the impact of these aforementioned risks, entering into hedging transactions may expose the Company to risks associated with such transactions. Hedging against a decline in the values of the Company's assets caused by interest rate risk or volatile BTC market prices does not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of such positions decline for other reasons. Such hedging transactions may also limit the opportunity for gain if the values of the portfolio investments should increase. Moreover, it may not be possible to hedge against a particular fluctuation that is so generally anticipated by the markets that a hedging transaction at an acceptable price is unavailable. In light of these and other factors, the Company may not be successful in mitigating its exposure to volatile economic conditions through any hedging transactions it undertakes.

Possibility of BTC Mining Algorithms Transitioning to Proof of Stake Validation

Proof of stake is an alternative method of validating cryptocurrency transactions. If BTC shifts from a proof of work validation method to a proof of stake validation method, Mining would require less energy and may render any company that maintains advantages in the current climate (e.g., lower priced electricity, processing, real estate or hosting) less competitive. In September 2022, another prominent cryptocurrency, Ether, shifted from proof of work to a proof of stake validation method. If BTC switches to proof of stake validation in the future, Bitfarms, as a result of its efforts to optimize and improve the efficiency of its BTC Mining operations, may be exposed to the risk of losing the benefit of its capital investments and the competitive advantage Bitfarms hopes to gain from this as a result and may otherwise be negatively impacted. Such events could have a material adverse effect on Bitfarms' ability to continue as a going concern or to profitably pursue its current growth strategy, which could have a material adverse effect on

Bitfarms' business, prospects or operations and potentially the value of any BTC that Bitfarms earns or otherwise acquires or holds for its own account.

Limited Operating History

The Company has only a limited operating history upon which an evaluation of the Company and its prospects, as well as an investment in the Company's common shares, can be based. The Company is subject to many risks common to venture enterprises, including under-capitalization, potential cash shortages and limitations with respect to personnel, financial and other resources. Although the Company has achieved profitable quarters in the past, to date, it has not maintained consistent profitability from period to period, and no assurances can be made that the Company will achieve consistent profitability in the near future, if ever. For the year ended December 31, 2023, the Company had a net loss from continuing operations of \$104.0 million, which net losses were generated as the Company executed its business plan and expands its bitcoin mining activities as bitcoin prices have at times been in a bear market. There is no assurance that the Company will be successful in achieving a return on shareholders' investment or meeting other metrics of success, which is dependent on bitcoin prices, among other factors.

47 | Page

BITFARMS LTD. 2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Employee Retention and Growth

The Company depends on a number of key employees including, in particular, the members of the Company's Management, the departure, death, disability or other extended loss of services of any of whom, particularly with little or no notice, could cause delays on projects, frustrate the Company's growth prospects and have an adverse impact on the Company's industry relationships, project exploration and development programs, other aspects of its business and its financial condition, results of operations, cash flow and prospects. The Company has not historically purchased, and, in the future, does not expect to purchase, key person insurance on such individuals, which insurance would provide the Company with insurance proceeds in the event of their death.

The growth and development of the business of the Company also depends on its ability to attract and retain highly qualified management and Mining personnel while maintaining its corporate culture and technical standards. The Company faces competition for personnel from other employers. If the Company is unable to attract or retain qualified personnel as required, it may not be able to adequately manage and implement its business plan. There can be no assurance that the Company will be able to manage such growth effectively or that its Management, personnel or systems will be adequate to support the Company's operations.

Cybersecurity Threats and Hacking

Malicious actors may seek to exploit vulnerabilities within cryptocurrency programming codes. Several errors and defects have been found and corrected, including those that disabled some functionality for users and exposed users' information. Discovery of flaws in or exploitations of the source code that allow malicious actors to take or create cryptocurrency or money occur somewhat regularly. For example, hackers have been able to gain unauthorized access to digital wallets and cryptocurrency exchanges.

The computer network operated by the Company may be vulnerable to intrusions by hackers who could interfere with and introduce defects into the Company's Mining operations. Private keys which enable holders to transfer funds may also be lost or stolen, resulting in irreversible losses of cryptocurrencies.

Limited History of De-centralized Financial System

Compared to traditional and existing centralized financial systems, the cryptocurrency financial system is relatively new and has a limited history. Online cryptocurrency exchanges and trades therein operate with comparatively little regulation and are particularly susceptible to platform failures and fraudulent activities, which may have an adverse effect on the underlying prices of cryptocurrencies. In fact, many of the largest online cryptocurrency exchanges have been compromised by hackers.

In light of these and other factors, traditional banks and other banking institutions may limit or refuse the provision of banking services to businesses that supply cryptocurrencies as payment and may refuse to accept money derived from cryptocurrency-related businesses. This may make the establishment and management of bank accounts held by companies operating in the industry difficult or impossible. The Company has experienced and may in the future experience such banking challenges, which could have a material adverse effect on the Company's business, prospects or operations and potentially the value of any BTC or other cryptocurrencies the Company earns or otherwise acquires or holds for its own account.

48 | Page

BITFARMS LTD. 2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Risk Related to Technological Obsolescence and Difficulty in Obtaining Hardware

To remain competitive, the Company will continue to monitor the state of available technology and invest in hardware and equipment required for maintaining and, as applicable, enhancing its operations. The Company has in the past replaced, and, in the future, may be required to replace, obsolete hardware and software, which required, and, in the future, may require, substantial capital investments by the Company. There can be no assurance that Mining hardware will be readily available, whether at a price that is commercially acceptable to the Company or at all, when the need is identified. Moreover, there can be no assurance that new and unforeseeable technology, either hardware-based or software-based, will not disrupt the existing cryptocurrency industry. For example, the arrival of quantum computers, which are capable of solving certain types of mathematical problems fundamental to cryptocurrency more quickly and efficiently than traditional computers may have a significant effect on the cryptocurrency industry.

Cryptocurrency Network Difficulty and Impact of Increased Global Computing Power

Network difficulty is a measure of how difficult it is to solve the cryptographic hash that is required to validate a block of transactions and earn a cryptocurrency reward from Mining. As Mining companies produce more hashrate and the BTC network hashrate is increased, the BTC network difficulty is adjusted upwards by requiring more hashrate to be deployed to solve a block. Thus, Mining companies are further incentivized to grow their hashrate to maintain or improve their chance of earning new BTC rewards. In theory, these dual processes should continually replicate themselves until the supply of available BTC is exhausted. In response, Mining companies have attempted to achieve greater hashrate by deploying increasingly sophisticated, powerful and expensive Miners in ever greater quantities. If the price of BTC is not sufficiently high to allow the

Company to fund its desired hashrate growth, including through new Miner acquisitions, and if it is otherwise unable to access additional capital to acquire Miners, the Company's hashrate may stagnate and fall behind its competitors, potentially resulting in a decline in its revenues, which would have a material adverse effect on the Company's results of operations and financial condition.

Economic Dependence on Regulated Terms of Service and Electricity Rates Risks

Refer to Section 4.20 - *DESCRIPTION OF BUSINESS - SUPPLY OF ELECTRICAL POWER, ELECTRICITY RATES, TERMS OF SERVICE AND THE RÉGIE DE L'ÉNERGIE* of this AIF.

Increases in Commodity Prices or Reductions in the Availability of Such Commodities

The Company uses and intends to continue using certain commodities in its current and future cryptocurrency Mining operations, including hydro-electricity and natural gas. Unexpected, sudden or prolonged price increases in those commodities, whether as a result of geopolitical events, natural disasters or otherwise, have caused and, in the future, may cause a reduction in the Company's profits where beneficial fixed-priced contracts do not exist or unfavorable fixed-price contracts cannot be modified. There also may be curtailment in electricity or natural gas supply. In particular, the Russia-Ukraine conflict has had an inflationary effect on the cost of natural gas, the duration and future magnitude of which are difficult to predict given the fluidity of the military conflict, the novelty of sanctions against Russia and the possibility of yet harsher sanctions as well as other related developments. The realization or continuation of any of the foregoing risks with respect to commodity prices could increase the Company's operating costs, reduce its profitability and, depending upon the duration and extent of the impact, have a material adverse effect on its financial condition.

Future Profits/Losses and Production Revenues/Expenses

Further development and acquisitions of server farms, and the ongoing operation of the Company's existing Mining farms, will require additional capital to fund expenses. The Company's operating expenses and capital expenditures may also increase in future years as it adds consultants, personnel and equipment associated with the maintenance of its Mining farms and any other Mining farms the Company may acquire or develop, potentially leading to a decrease in the Company's profits if its revenues do not increase correspondingly. The Company may not be successful in obtaining the required financing for these or other purposes, including for general working capital.

BITFARMS LTD.

2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Fraud and Failure of Cryptocurrency Exchanges, Custodians and Other Trading Venues

Cryptocurrency market prices depend, directly or indirectly, on the prices set on exchanges and other trading venues. As compared to traditional securities, derivatives and currency exchanges, cryptocurrency exchanges, custodians and other trading venues are relatively new and, in most cases, largely unregulated, which may make them more susceptible to fraud and failure. The fraud and failure of several cryptocurrency platforms and other actors in the industry, including recent and ongoing bankruptcies of several large cryptocurrency exchanges in the second half of 2022 and into early 2023 (namely, FTX Trading Ltd., Celsius Network LLC, BlockFi, Voyager Digital Ltd., Three Arrows Capital, and Genesis Global Holdco LLC), has impacted and may continue to impact the broader cryptocurrency ecosystem, including the Company. In response to these events, the digital asset markets, including the market for BTC specifically, have experienced extreme price volatility and several other entities in the digital asset industry have been, and may continue to be, negatively affected, further undermining confidence in the digital asset markets and in BTC. These events have also negatively impacted the liquidity of the digital asset markets and, in turn, the market price of shares of companies in the cryptocurrency industry, including the Company, as certain entities affiliated with bankrupt cryptocurrency exchanges engaged in significant trading activity. If the liquidity of the digital asset markets continues to be negatively impacted by these events, digital asset prices (including the price of BTC) may continue to experience significant volatility and confidence in the digital asset markets may be further undermined. These and similar events are ongoing and may occur with respect to other participants in the digital asset ecosystem in the future to develop, and it is not possible to predict at this time all of the risks that such events may pose to the Company, its service providers, the other third parties with which it does business or the digital asset industry as a whole.

Although the Company had no direct exposure to any of the above-mentioned cryptocurrency companies (other than BlockFi prior to the repayment by the Company of indebtedness under its equipment financing arrangement with BlockFi, as discussed in the MD&A) nor any material assets that may not be recovered or may otherwise be lost or misappropriated due to the bankruptcies, the failure or insolvency of large exchanges may cause the price of BTC to fall and decrease confidence in the larger ecosystem, which could adversely affect an investment in the Company. Such market volatility has had a material and adverse effect on the Company's results of operations and financial condition, and the Company expects its results of operations to continue to be affected by the price of BTC as the results of its operations are significantly tied to the price of BTC.

These and similar events have had, and, in the future, may have, an adverse impact on the profitability of the Company's BTC Mining operations and the Company's financial condition and results of operations.

To the extent that cryptocurrency exchanges or other trading venues are involved in fraud or experience security failures or other operational issues in the future, cryptocurrency prices could be suddenly and adversely impacted. Furthermore, fraud or failure of the current and future custodians of the Company's BTC or exchanges can result in a direct loss of the Company's cryptocurrency and fiat currency assets, which loss may not be recoverable by the Company, whether under any insurance policies it has in place or otherwise.

Significant costs and demands upon Management and accounting and finance resources as a result of complying with the laws and regulations affecting public companies

As a public company, the Company incurs significant administrative, legal, accounting and other burdens and expenses beyond those of a private company, including public company reporting obligations and Toronto Stock Exchange and Nasdaq listing requirements. In particular, the Company has needed, and continues to need, to enhance and supplement its internal accounting resources with additional accounting and finance personnel with the requisite technical and public company experience and expertise to enable the Company to satisfy such reporting obligations.

BITFARMS LTD.

2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Expense and impact of restatement of the Company's historical financial statements

The Company restated certain historical financial statements to reflect a correction to its accounting for warrants issued in the 2021 private placements. Specifically, the Company had previously accounted for the warrants as equity instruments; however, in connection with the preparation of its financial statements for the year ended December 31, 2023, Management concluded that the proper accounting classification of the warrants was as financial liabilities due to the cashless exercise feature included in the warrants. For more information, see Note - 3e - *Basis of Presentation and Material Accounting Policy Information- Restatement* of the 2023 annual financial statement. It is difficult to predict all of the ramifications to the Company from the restatement. The restatement process was time and resource-intensive and involved substantial attention from management and significant costs and expenses, including for professional advisors assisting with the restatement. Although the restatement is now completed, it is possible that the Company will receive inquiries from the SEC, Canadian securities regulators, TSX and/or Nasdaq regarding the restated financial statements or related matters, which could consume a significant amount of resources. Moreover, many companies that have been required to restate their historical financial statements have experienced volatility in stock prices and declines in stock prices and shareholder lawsuits, which can be expensive to defend and divert Management attention and resources. The Company may suffer similar consequences as a result of the restatement.

Lack of Comprehensive Accounting Guidance for Cryptocurrencies under IFRS Accounting Standards

Because there has been limited precedent set and a lack of specific accounting guidance for cryptocurrencies under certain applicable accounting standards, including, among other things, revenue recognition, it is unclear how Bitcoin miners (in particular, non-U.S. companies like the Company that utilize IFRS Accounting Standards) may be required to account for cryptocurrency operations, transactions and assets and related revenue recognition. A change in regulatory or financial accounting standards, or interpretations thereof by the SEC, particularly as they relate to the Company and the financial accounting of its Bitcoin-related operations, could result in changes in the Company's accounting policies. Further, unlike in the case of U.S. generally accepted accounting principles where the Financial Accounting Standards Board has recently issued ASU 2023-08, which addresses the accounting and disclosure requirements for certain crypto assets, no similar guidance has yet been issued in respect of IFRS Accounting Standards. In addition, the accounting policies of many Bitcoin mining companies are being subjected to heightened scrutiny by regulators and the public. More specifically, the Company received comments from the staff of the SEC's Division of Corporation Finance Office of Crypto Assets on the financial statements included in the Company's annual report on Form 40-F for the year ended December 31, 2022 filed with the SEC, which comments focused on the accounting of the Company's Bitcoin-related operations. Some of those comments have not yet been resolved.

It is possible that, as a result of the SEC's determinations as to the application of the relevant IFRS Accounting Standards and the resolution of the Company's SEC comments, the Company could be obligated in the future to restate historical financial statements. In connection with any such restatement, as well as the warrant accounting restatement, the market price of the Company's common shares could be adversely affected, and the Company could become subject to private litigation or to investigations or enforcement actions by the SEC or other regulatory authorities, all of which could require the Company's expenditure of additional financial and management resources. Furthermore, continued uncertainty with regard to financial accounting matters, particularly as they relate to the Company, the financial accounting of its bitcoin-related operations and the SEC comments the Company has received in respect of such matters, could negatively impact the Company's business, prospects, financial condition and results of operations and its ability to raise capital on terms acceptable to the Company or at all.

Internal Control Material Weakness

Under National Instrument 52-109 Certification of Disclosure in Issuers' Annual and Interim Filings and Section 404 of the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"), the Company is required to document and test its internal control procedures and prepare annual management assessments of the effectiveness of the Company's internal control over financial reporting. The Company's assessments must include disclosure of identified material weaknesses in its internal control over financial reporting. The existence of one or more material weaknesses could affect the accuracy and timing of the Company's financial reporting. Testing and maintaining internal control over financial reporting involves significant costs and could divert management's attention from other matters that are important to the Company's business. Additionally, the Company may not be successful in remediating any deficiencies that may be identified.

BITFARMS LTD. 2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Internal Control Material Weakness (Continued)

In the course of preparing the financial statements for the year ended December 31, 2023, Management identified a material weakness in the effectiveness of the Company's ICFR for each of the years ended December 31, 2021, 2022 and 2023 related to the classification of warrants as financial liabilities that resulted in the restatement of the Company's financial statements for the year ended December 31, 2022. For more information, including a description of the remediation efforts that the Company believes are required to address the identified material weakness, refer to the "Disclosure Controls and Procedures" and "Internal Control over Financial Reporting" sections in the MD&A. The Company cannot assure investors that the measures the Company has taken or, in the future, will take will in fact be sufficient to remediate the control deficiencies that led to the material weakness in its ICFR or that such measures will prevent or avoid potential future material weaknesses, and the Company's current controls and any new controls that it develops may become inadequate because of changes in conditions in the Company's business. Further, additional weaknesses in the Company's ICFR may be discovered in the future.

If the Company is unable to remediate its material weakness or any future material weaknesses and otherwise implement and maintain effective ICFR, there may be material misstatements in the Company's consolidated financial statements, the Company may be unable to comply with its reporting obligations on a timely basis, or the Company may fail to prevent or detect fraud. In any such case, the price of the Common Shares could be negatively impacted, and the Company could be unable to raise additional capital on terms acceptable to Management or at all. The lack of effective internal controls could thus materially adversely affect the Company's financial condition and ability to implement the Company's business plan.

Even if the Company were to conclude in the future that its ICFR provides reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with IFRS Accounting Standards, because of its inherent limitations, ICFR may not prevent or detect all instances of fraud or misstatements. Regardless of how well designed and operated a control system may be, it can only provide reasonable, not absolute, safeguards with respect to the reliability of financial reporting and financial statement preparation.

Political and Regulatory Risk

The Company's primary properties and assets are subject to changes in political conditions and regulations within the Province of Québec, Canada, the United States (including, in particular, the State of Washington), Paraguay and Argentina. Changes, if any, in Mining or investment policies or shifts in political attitude could adversely affect the Company's operations or profitability. Operations have been and, in the future, may be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on price controls, currency remittance, income taxes, consumption taxes, foreign investment, maintenance of claims, environmental matters, land use, electricity use and safety, as well as buying and selling cryptocurrency and other transactions involving cryptocurrency. See section 5.2 - *FUTURE GROWTH PLANS - ARGENTINA*

EXPANSION, for a discussion of recent changes in the Argentine regulatory environment that have adversely affected, and are currently adversely affecting, the Company's ability to pursue its expansion plans in Argentina. For example, cryptocurrency Mining involves considerable computing power, which is likely to increase. This computing power necessitates a high consumption of energy. Although a portion of the Company's energy costs are determined and controlled by various regulators, there is no certainty that any relevant regulator will not raise energy tariffs, which may reduce the profitability of Mining cryptographic currencies.

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Political and Regulatory Risk (Continued)

In the future, Canada, the United States, Paraguay and/or Argentina may also curtail or outlaw the acquisition, use or redemption of cryptocurrencies. Governments may also take regulatory action that may increase the cost, and/or subject cryptocurrency companies to additional regulation or prohibit or severely restrict the right, to acquire, own, hold, sell, use or trade cryptocurrencies or to exchange cryptocurrencies for fiat currency. By extension, future government actions may result in unfavorable conditions relating to the liquidity of and value of an investment in the Company's common shares, such as restrictions on the acquisition, ownership, holding, selling, use or trading in the Company's common shares or in the securities of companies in the Mining industry. Any such unfavorable conditions could result in the Company liquidating its cryptocurrency inventory at unfavorable prices and may adversely affect the Company's shareholders.

Ongoing and future regulatory changes or actions may alter the nature of an investment in the Company or restrict the use of cryptocurrencies in a manner that adversely affects the Company's operations. For example, novel or unique assets such as BTC and other digital assets may be classified as securities if they meet the definition of investment contracts under applicable securities laws. In recent years, the offer and sale of digital assets other than BTC, most notably Kik Interactive Inc.'s Kin tokens and Telegram Group Inc.'s TON tokens, have been deemed to be investment contracts by the U.S. Securities and Exchange Commission (the "SEC"). While the Company believes that BTC is unlikely to be considered an investment contract and, thus, the BTC it holds is unlikely to be considered a security under the investment contract definition, the Company cannot provide any assurances that digital assets that it earns or otherwise acquires or holds for its own account, including BTC, will never be classified as securities under applicable securities laws. If BTC is considered a security, the Company may be required to register as an investment company under the U.S. Investment Company Act of 1940, as amended (the "1940 Act"), and comply with other requirements applicable to investment companies, which would, in turn, cause the Company to incur significant expenses, thereby materially and adversely impacting an investment in the Company. In addition, registration as an investment company may not be possible under the 1940 Act or may require meaningful corporate changes to effectuate, which, in turn, may have a material adverse effect on the Company's business, financial condition and results of operations. The effect of any future such regulatory change on the Company or any cryptocurrency that the Company may earn is impossible to predict, but any such change could be substantial and adverse to the Company.

The attitude toward and regulations applicable to foreign investment and the cryptocurrency Mining industry in each of the jurisdictions in which the Company operates may also change, including changes that are adverse, rapid and unexpected. The Company's operations may be affected in varying degrees by government regulation with respect to restrictions on production, price controls, export and import controls, foreign exchange controls, income taxes, consumption taxes and environmental legislation, depending upon the nature of any such government regulation.

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Political and Regulatory Risk (Continued)

On June 22, 2023, the Canadian Department of Finance released the Budget Implementation Act, Bill c.47, a set of legislation to implement certain tax measures. These tax measures include restricting the ability of cryptocurrency Mining companies to claim back the consumption taxes they incur on purchases of goods and services made in Canada and imports into Canada with a date of enactment of February 5, 2022. As currently enacted, the legislation imposes restrictions on the Company's ability to claim back its consumption taxes, namely the Goods and Services Tax, Harmonized Sales Tax and Quebec Sales Tax, which apply at combined rates from 5% to 14.975% on the cost of goods and services, could significantly add to the Company's ongoing operating costs and the costs of its capital expenditures and imports into Canada. The Company does not currently accrue for the recovery of these taxes. The Company is currently in discussions with Canadian tax authorities to determine whether the exemption provisions included in the legislation are applicable to relieve the Company of this potential financial burden. The timing for resolution of those discussions as well as the likelihood of a favorable outcome to the Company is currently unknown.

Similarly, various branches, departments and agencies of the federal government in the U.S. as well as certain U.S. state governments have enacted legislation and/or regulations, solicited comments and initiated procedures to consider further regulating cryptocurrency and Mining operations, including through proposed taxes on Mining operations and policy statements and guidance to companies in the cryptocurrency industry, as well as third parties that do business with those companies. The Company will continue to monitor for developments in U.S. federal and state-level legislation, guidance or regulations applicable to the Company and its operations.

Further, the global supply of Miners is unpredictable and presently heavily dependent on manufacturers from Asia, which was severely affected and may continue to be affected by the COVID-19 pandemic. The Company currently utilizes several types of Miners as part of its Mining operations, all of which are produced in Asia. Geopolitical matters may impact the Company's ability to import Miners in the future, and the Company may not be able to obtain adequate replacement parts for its existing Miners or obtain additional Miners from manufacturers in other jurisdictions on a timely basis.

Given the difficulty of predicting the outcomes of ongoing and future regulatory actions and legislative and geopolitical developments, it is possible that any legislative, regulatory or geopolitical change could have a material adverse effect on the Company's business, prospects or operations, the magnitude and duration of which cannot be predicted.

Permits and Licenses

The current and future operations of the Company, including development activities and Mining operations on its properties, may require permits from various federal, provincial or territorial and local governmental authorities, and such operations are and will be governed by laws and regulations governing prospecting, exports, taxes, labour standards, occupational health, and other matters. There can be no assurance that all permits which the Company may require for its operations will be obtained on reasonable terms, on a timely basis, or at all, or otherwise maintained or that applicable laws and regulations will not have an adverse effect on any Mining projects or related activities that the Company might undertake.

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Server or Internet Failures

At any time, the servers or central processing units utilized by the Company could experience a severe malfunction and/or collapse. Although the Company works to reduce this risk by employing a team of experts with many years of experience in building and managing data centers as well as a hardware team that focuses, among other things, on Miner repair and the daily evaluation of the technical condition of the server farms that the Company operates, including through software (developed by its management) that facilitates, among other things, control, management and reporting of malfunctions in real time or any server crashes or failures, even if quickly addressed, may interrupt the Company's operations and cause significant economic harm to the Company.

In addition, Internet disruptions or failures may adversely affect the Mining and use of cryptocurrencies, including BTC. Generally, cryptocurrencies and the Company's business of Mining BTC are dependent upon the Internet. A significant disruption or failure of Internet connectivity, including of the Company's backup Internet connection, could disrupt the network operations of cryptocurrencies until the disruption is resolved and have an adverse effect on the price of BTC and the Company's ability to mine BTC.

Tax Consequences

Existing and prospective shareholders should consult their own tax advisors with respect to any tax considerations that may be relevant to an investment in the Company.

Environmental Regulations

The Company's operations are subject to environmental regulations, which are evolving in each of the jurisdictions where the Company has a presence. Any modification of existing environmental regulations, or the imposition of new environmental regulations, may lead to stricter standards, more diligent enforcement and heavier fines and penalties for non-compliance. The cost of compliance due to changes in, or the imposition of new, environmental regulations has the potential to reduce the profitability of the Company's operations, cause delays in the development of its Mining projects or, in extreme cases, lead to the Company not being able to operate fully or at all in one or more of the jurisdictions in which it currently has operations.

Environmental Liability

The Company may be subject to potential risks and liabilities associated with pollution of the environment through its use of electricity to produce computational power. As of the date of this AIF, approximately 74% of the Company's energy requirements are met by hydro-electricity. In addition, environmental hazards may exist on a property in which the Company directly or indirectly holds an interest that are unknown to the Company at present and have been caused by previous or existing owners or operators of the property which may result in environmental pollution. If any of those environmental hazards is deemed to violate existing rules and regulations in the relevant jurisdiction, the Company may become subject to fines and penalties.

To the extent the Company is subject to environmental liabilities, the payment of such liabilities or the costs that it may incur to remedy environmental pollution would reduce funds otherwise available to it and could have a material adverse effect on the Company. If the Company is unable to fully remedy an environmental problem, it might be required to suspend operations or enter into interim compliance measures pending completion of the required remedy. The Company's potential financial exposure for such matters may be significant and could have a material adverse effect on the Company.

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Adoption of ESG Practices and the Impacts of Climate Change

Companies across many industries, including cryptocurrency Mining, are facing scrutiny related to their environmental, social, and governance ("ESG") practices. Investor advocacy groups, certain institutional investors, investment funds and other influential investors are also increasingly focused on ESG practices and in recent years have placed increasing importance on the non-financial impacts of their investments. Enhanced public awareness and concern regarding environmental risks, including global climate change, may result in increased public scrutiny of the Company's business and the cryptocurrency Mining industry in general. As a result, the Company's Management's time and energy may be diverted from executing on the Company's strategic goals towards responding to such scrutiny and addressing and enhancing the Company's ESG practices, which may not enhance the value of the Company's common shares or positively impact shareholder return.

In addition, the impacts of climate change may affect the availability and cost of materials, natural resources and sources and supplies of energy, which may increase the cost of the Company's operations. Other factors which may impact the Company's profitability include, but are not limited to, demand for BTC and other cryptocurrencies, insurance and other operating costs, and damage incurred as a result of extreme weather events. New environmental laws, regulations or industry standards may be adopted with little or no notice to the Company and may impose significant operational restrictions and compliance requirements on the Company's operations. The cost of compliance with changes in government regulations has the potential to reduce the profitability of the Company's operations or cause delays in the development of new Mining projects.

Emerging Legislation and Scrutiny Regarding Human Rights Issues

Emerging legislation in multiple jurisdictions is intensifying investor, stakeholder and public scrutiny on human rights issues that include, among other matters, forced labour, child labour and other slavery-like practices; displacement of local communities; discrimination by race, age, gender, sexuality and other protected attributes; and underpayment

for labour or services provided. Although the Company does not tolerate slavery, forced labor, or human trafficking in any form and will not knowingly work with third-parties who engage in these practices or permit their subcontractors to engage in these practices, the Company conducts business on a global scale and interacts with a number of different parties. Accordingly, the failure to identify and respond to human rights issues can lead to costly and disruptive legal action, investor divestment, negative publicity, reputational damage and significant financial loss.

In force since January 1, 2024, Canada's Fighting Against Forced Labour and Child Labour in Supply Chains Act introduces a statutory requirement to report on the steps taken by in-scope entities, including the Company, to prevent and reduce the risk that forced labour or child labour is used at any step in the production of goods in Canada or goods that are imported into Canada. Although the Company does not anticipate that this legislation will have a material impact on its operations, it is impossible to predict how additional legislation or increased scrutiny from human rights groups regarding the cryptocurrency industry and related supply chains may affect the Company going forward, particularly in the complex socio-economic and socio-political jurisdictions in which the Company conducts its business.

The Company is committed to protecting human rights and has adopted a Code of Business Conduct and Ethics, along with other policies, to support such commitment, including its own Vendor and Suppliers Due Diligence process in order to mitigate third party-risks. Such policies and procedures may not minimize or prevent human rights issues. Any future failure to identify and respond to human rights issues, despite our efforts, may lead to costly and disruptive legal action, investor divestment, negative publicity, reputational damage and significant financial loss.

BITFARMS LTD.

2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Erroneous Transactions and Human Error

Cryptocurrency transactions are irreversible. Improper or compromised transfers are also generally irreversible and irrevocable. Such errors may be the result of computer or human error despite internal controls the Company has adopted to mitigate this risk. To the extent that the Company is unable to seek a corrective transaction with the third party or is incapable of identifying the third party that has received the Company's cryptocurrencies through error or theft, the Company will be unable to revert or otherwise recover incorrectly transferred cryptocurrencies. The Company may also be unable to convert or recover cryptocurrencies transferred to uncontrolled accounts.

The use of cryptocurrencies to, among other things, buy and sell goods and services and complete other transactions is part of a new and rapidly evolving industry that employs digital assets based upon a computer-generated mathematical and/or cryptographic protocol. The growth of this industry in general, and the use of cryptocurrencies in particular, is subject to a high degree of uncertainty, and the slowing or stopping of the development or acceptance of developing protocols may adversely affect Bitfarms' operations. The factors affecting the further development of the industry, include, but are not limited to:

- Continued worldwide growth in the adoption and use of cryptocurrencies;
- Governmental and quasi-governmental regulation of cryptocurrencies and their use, or restrictions on or regulation of access to and operation of the network or similar cryptocurrency systems;
- Changes in consumer demographics and public tastes and preferences;
- The maintenance and development of the open-source software protocol of the network;
- The availability and popularity of other forms or methods of buying and selling goods and services, including new means of using fiat currencies;
- General economic conditions and the regulatory environment relating to digital assets; and
- Negative consumer sentiment and perception of BTC specifically and cryptocurrencies generally.

Facility Developments

The continued development of existing and planned facilities is subject to risks that may cause such development plans to be delayed or otherwise adversely affected, including factors beyond the Company's control such as delays in the delivery or installation of equipment by suppliers, difficulties in integrating new equipment into existing infrastructure, shortages in materials or labour, defects in design or construction, diversion of Management resources, insufficient funding, or other resource constraints. Actual costs for development may also exceed the Company's planned budget. Delays, cost overruns, changes in market circumstances and other factors may result in different outcomes than those intended. If any development projects are delayed or more expensive than contemplated, the Company's operations may be adversely impacted, and the Company may not realize, or may be delayed in realizing, the benefits of such projects. See Section 5 - *FUTURE GROWTH PLANS*, for a discussion of the status of the Company's various development efforts, including, in particular, in Argentina and Paraguay.

BITFARMS LTD.

2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Insurance risks

Where considered practical to do so, the Company maintains, and intends to continue maintaining, insurance against risks in the operation of its business and in amounts that it believes to be reasonable. Such insurance, however, contains, and may in the future contain, exclusions and limitations on coverage. There can be no assurance that such insurance will continue to be available, will be available at economically acceptable premiums or will be adequate to cover any resulting liability. The novelty of the cryptocurrency industry has impaired and may continue to impair the ability of the Company to acquire adequate insurance coverage for risks associated with its operations. The occurrence of an event that is not covered, in full or in part, by insurance may cause substantial economic damage to the Company. In some cases, such as with respect to environmental risks, coverage is not available or considered by Management to be too expensive relative to the perceived risk.

The Company's BTC, which is held in custody by Coinbase Custody and Anchorage Digital, is not insured. Although Coinbase Custody maintains an insurance policy of \$320 million for its cold storage and Anchorage Digital maintains an insurance policy of an aggregate of \$50 million for its cold and hot storage, the full limits of those policies may not be available to the Company or, if available, may not be sufficient to make the Company whole for any BTC that are lost or stolen from the Company's accounts. Therefore,

a loss may be suffered with respect to the Company's BTC that is not covered by insurance and for which no person is liable in damages.

Any losses incurred by the Company that are not adequately covered by insurance or for which insurance coverage is not available or has not been obtained could adversely impact the Company, including its financial condition and results of operations.

Competition

The Company's business is in an intensely competitive industry, and the Company competes with other Mining companies, some of which have, or may in the future have, greater resources and experience. A fundamental property of Mining associated with many cryptocurrencies is that the computational complexity of the Mining algorithm increases over time. This factor, along with new industry entrants, price volatility and, with respect to BTC, any future BTC Halvings, may make certain cryptocurrencies relatively unprofitable to mine compared to others.

Regulation of cryptocurrency in certain jurisdictions has led some Mining companies to consider Paraguay as an attractive jurisdiction in which to operate, which may increase competition with the Company and its expansion efforts in Paraguay. Despite the Company's strategic planning and expected advantages over certain of its competitors, the Company may face unexpected competition in the form of new entrants in the marketplace. Such competition could erode the Company's expected market share and could adversely impact the Company's profitability. Increased competition could result in increased network computing resources and consequently increased hash difficulty.

If the award of coins for solving blocks and any related transaction fees are not sufficiently high, Mining companies may not have an adequate incentive to continue Mining and may cease their Mining operations. As the number of coins awarded for solving a block in the blockchain decreases, the incentive for Mining companies to continue to contribute processing power to the network may transition from a set reward to transaction fees.

58 | Page

BITFARMS LTD.

2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Competition (Continued)

In order to incentivize Mining companies to continue to contribute processing power to the network, the network may either formally or informally transition from a set reward to transaction fees earned upon solving for a block. This transition could be accomplished either by Mining companies independently electing to record on the blockchains they solve only those transactions that include payment of a transaction fee or by the network adopting software upgrades that require the payment of a minimum transaction fee for all transactions. If transaction fees paid for the recording of transactions in the blockchain become too high, the marketplace may be reluctant to accept the network as a means of payment, and existing users may be motivated to switch between cryptocurrencies or back to fiat currency. Decreased use and demand for BTC may adversely affect their value and result in a reduction in the market price of BTC, which could adversely impact the value of the Company's cryptocurrency holdings and investments. If Miners choose to cease operations, there would be a reduction in collective processing power, which would adversely affect the confirmation process for transactions (i.e., decreasing the speed at which blocks are added to the blockchain until the next scheduled adjustment in difficulty for blockchain solutions) and make the network more vulnerable to a malicious actor or botnet obtaining control in excess of 50 percent of the processing power. Any reduction in confidence in the confirmation process or processing power of the network may adversely impact the Company's Mining activities, the value of its inventory of coins and future investment strategies.

Uncertainty of acceptance and/or Widespread Use of Cryptocurrencies

Currently, cryptocurrencies are not widely used in the retail and commercial marketplaces in comparison to purchases of overall cryptocurrencies worldwide. Cryptocurrency payment methods have not been widely adopted as a means of a payment for goods and services by major retail and commercial outlets. A significant portion of cryptocurrency demand may be attributable to speculation.

The failure of individuals to widely utilize currently available, and/or the failure of retail and commercial marketplaces to adopt, cryptocurrency payment methods may result in increased volatility and/or a reduction in market prices, either of which may adversely impact the market price of the Company's cryptocurrency holdings and the profitability of its Mining operations.

Hazards Associated with High-voltage Electricity Transmission and Industrial Operations

The operations of the Company are subject to typical hazards associated with high-voltage electricity transmission and the supply of utilities to the facilities of the Company at an industrial scale including explosions, fires, inclement weather, natural disasters, flooding, mechanical failure, unscheduled downtime, equipment interruptions, remediation, chemical spills, discharges or releases of toxic or hazardous substances or gases and other environmental risks. These hazards can cause personal injury and loss of life, severe damage to or destruction of property and equipment and environmental damage, and may result in suspension of operations and the imposition of civil or criminal penalties.

Corruption

Fraud, bribery and corruption are more common in some jurisdictions than in others. Doing business in international developing markets brings with it inherent risks associated with enforcement of obligations, fraud, bribery and corruption. The Company currently has operations in Argentina and Paraguay, which are jurisdictions perceived as having relatively high levels of corruption. While the Company uses its best efforts to prevent the occurrence of fraud, bribery and corruption, it may not be possible to detect or prevent every instance of fraud, bribery and corruption in every jurisdiction in which its employees, agents or contractors are located. The Company may therefore be subject to civil and criminal penalties and to reputational damage if any fraud, bribery or corruption is perpetrated by or on behalf of the Company. See "*The Company conducts operations in countries known to experience high levels of corruption, and any violation of anti-corruption laws could subject us to penalties and other adverse consequences.*"

Instances of fraud, bribery and corruption, and violations of laws and regulations in the jurisdictions in which the Company operates could have a material adverse effect on its business, prospects, financial condition or results of operations. In addition, as a result of the Company's anti-corruption policies and other safeguards, there is a risk that the Company could be at a commercial disadvantage and may fail to secure contracts within jurisdictions that have been allocated a low score on the Corruption Perceptions Index, to the benefit of other companies who may not have or comply with such anti-corruption safeguards.

59 | Page

BITFARMS LTD.

2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

US Foreign Corrupt Practices Act and Similar Legislation

The Foreign Corrupt Practices Act (United States), the Corruption of Foreign Public Officials Act (Canada) and anti-bribery laws in other jurisdictions generally prohibit companies and their intermediaries from making improper payments for the purpose of obtaining or retaining business or other commercial advantages. The Company's policies mandate compliance with applicable anti-bribery laws, which laws, if violated, often provide for the levy of substantial penalties against offending parties. The Company operates in jurisdictions that have experienced governmental and private sector corruption to varying degrees, and, in certain circumstances, strict compliance with anti-bribery laws may conflict with certain local customs and practices. There can be no assurance that the Company's internal control policies and procedures will always protect it from reckless or other inappropriate acts committed by the Company's affiliates, employees, agents or companies acquired by or merged with the Company. Violations of these laws, or allegations of such violations, could have a material adverse effect on the Company's reputation, as well as its business, financial position and results of operations, and could cause the market value of the Company's common shares to decline. Investigations by governmental authorities could also have a material adverse effect on the business, consolidated results of operations and consolidated financial condition of the Company.

The Company has policies in place to minimize the risk of corruption or bribery, which includes enforcement of policies against giving or accepting money or gifts in certain circumstances; namely the Company's Code of Business Conduct and Ethics, Anti-Bribery and Anti-Corruption Policy and Whistleblower Policy. The Company uses its best efforts to prevent the occurrence of fraud, bribery and corruption, but it may not be possible to detect or prevent every instance of fraud, bribery and corruption in every jurisdiction in which its employees, agents or contractors are located. The Company, or any of its employees or contractors, could be charged with bribery or corruption as a result of the actual or perceived unauthorized actions of its employees or contractors. If the Company is found guilty of such a violation, which could include a failure to take effective steps to prevent or address corruption by its employees or contractors, the Company could be subject to onerous penalties and reputational damage. A mere investigation could lead to significant corporate disruption, high legal costs and forced settlements (such as the imposition of an internal monitor). Any government investigations or other allegations against the Company or its directors, officers, employees or contractors, or a finding of involvement in corruption or other illegal activity by such persons, could significantly damage the Company's reputation and its ability to do business and could have a material adverse effect on the Company's business, results of operations and financial condition.

Political Instability

The Company operates in multiple jurisdictions, including in geographic regions which may be subject to a greater risk of political instability, geopolitical upheaval and social unrest. The Company's ability to carry on its business in the normal course may be adversely affected by political and economic considerations such as civil unrest, war (including in neighbouring states), terrorist actions, labour disputes, corruption, sovereign risk (including coup d'état), political instability, the failure of foreign parties or governments to honour contractual relations, consents, rejections or waivers granted, changing government regulations with respect to cryptocurrency Mining, including environmental requirements, taxation, foreign investments, income repatriation and capital recovery (which changes may be arbitrary and with little or no notice), severe fluctuations in currency exchange and inflation rates, import and export restrictions, problems renewing licenses and permits, opposition to cryptocurrency Mining from non-governmental organizations, increased financing costs, instability due to economic under-development, inadequate infrastructure and the expropriation of property interests. The occurrence of any of the foregoing could result in conditions that have a material adverse impact on the Company and its operations.

60 | Page

BITFARMS LTD.

2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.19 RISK FACTORS (continued)

Third-party Supplier Risks

The Company enters into contracts with a limited number of third-party suppliers to procure Mining hardware. If any of those suppliers is unable to or otherwise does not fulfill, or does not fulfill in a timely manner, its obligations to the Company for any reason (including, but not limited to, bankruptcy, computer or other technological interruptions or failures, personnel loss, negative regulatory actions, or acts of God) or engages in fraud or other misconduct during the course of such relationship, the Company may need to seek alternative third-party suppliers, or discontinue using certain Miners or otherwise alter its operations and may encounter delays. In addition, the Company may in the future be held directly or indirectly responsible, or be otherwise subject to liability, for actions or omissions of third parties undertaken in connection with the Company's arrangements with such third parties. Any such responsibility or liability in the future may have a material adverse effect on the Company's business, financial condition and results of operations.

Potential of Bitfarms Being Classified as a Passive Foreign Investment Company

Generally, if for any taxable year 75% or more of the Company's gross income is passive income, or at least 50% of the average quarterly value of the Company's assets are held for the production of, or produce, passive income, the Company would be characterized as a passive foreign investment company ("PFIC") for U.S. federal income tax purposes. The Company does not believe it was a PFIC for 2023 and does not expect to be a PFIC for 2024. However, PFIC status is determined annually, and whether the Company will be a PFIC for any future taxable year is uncertain. Moreover, the Company is not committing to determine whether it is or is not a PFIC on an annual basis. If the Company is characterized as a PFIC, United States holders of the Company's shares may suffer adverse tax consequences, including the treatment of gains realized on the sale of the Company's shares as ordinary income, rather than as capital gain, the loss of the preferential income tax rate applicable to dividends received on the Company's shares by individuals who are United States holders, and the addition of interest charges to the tax on such gains and certain distributions. A United States shareholder of a PFIC generally may mitigate these adverse U.S. federal income tax consequences by making a Qualified Electing Fund ("QEF") election, or, to a lesser extent, a mark-to-market election. The Company does not intend to provide the information necessary for United States shareholders to make a QEF election if the Company is classified as a PFIC for any year.

Pandemic and Infectious Disease Risk

Pandemic risk is the risk of large-scale outbreaks of infectious diseases that can greatly increase morbidity and mortality over a wide geographic area and cause significant social and economic disruption. Pandemics, epidemics or outbreaks of an infectious disease could have an adverse impact on the global economy, the economies of the jurisdictions where the Company operates and the Company's business, including adverse changes to the way the Company and its counterparties operate and the ability of the Company to execute on its strategic goals and expansion plans in a timely manner or at all, and on the Company's financial condition and results of operations.

61 | Page

BITFARMS LTD.

4. DESCRIPTION OF BUSINESS (continued)**4.20 SUPPLY OF ELECTRICAL POWER, ELECTRICITY RATES, TERMS OF SERVICE AND THE RÉGIE DE L'ÉNERGIE**

The Company's operations are dependent on its ability to maintain reliable and economical sources of power to run its cryptocurrency Mining assets. The Company conducts Mining operations in the Province of Québec, Washington State, Paraguay and Argentina. The Company's current and future operations and anticipated growth, and the sustainability of hydro-electricity and natural gas at economical prices for the purposes of cryptocurrency Mining in multiple locations, poses certain risks. These risks as well as the supply of electrical power, electricity rates, terms of service and regulatory regimes are summarized as follows:

Currently, the Company sources its energy from Hydro-Québec, Hydro-Sherbrooke, Hydro-Magog, the city of Baie-Comeau, Grant PUD, CLYFSA and Generación Mediterranea S.A. Regulated power suppliers may be subject to public policy initiatives and economic development programs which may or may not support the crypto mining industry. There can be no assurance that electricity will continue to be provided in the future or not curtailed to accommodate other users, or otherwise made available on terms which are economic for the Company's current and future operations, anticipated growth, and sustainability. Any suspension or cessation of power supply, failure of electrical networks, or changes in cost structure which are not economic, in the jurisdictions where the Company utilizes power for its operations, could result in a material adverse effect on the Company.

Quebec

The Company's operations are dependent on its ability to maintain reliable and economical sources of power to run its cryptocurrency Mining assets. Until the adoption of Bill-2, on February 15, 2023, the Province of Québec mandated electrical service providers to supply their customers under the obligation to serve power delivery regime; however, Bill-2 amended the Act respecting the *Régie de l'énergie du Québec* (the "Régie") by giving the Government of Québec the power to determine by regulation the cases in which Hydro-Québec, or any other electrical service provider, may be exempt from their obligation to provide electricity to industrial clients in the Province of Québec.

The price of electricity supplied directly by Hydro-Québec is set by a provincial administrative tribunal, the Régie. Hydro-Québec supplies power to certain of the Company's facilities, and to the Municipal Electrical Networks for the Magog, Baie-Comeau and Sherbrooke facilities. The rates imposed on Hydro-Québec by the Régie are subject to change. Although power is supplied by Municipal Networks to the Company, the rates in those contracts are adjusted in response to tariff changes imposed by the Régie. Modifications to the rates are set pursuant to the Hydro-Québec Act by operation of law on April 1st each year, by a rate corresponding to the annual change in the overall average Québec consumer price index, on a tariff class basis such that any adjustment would apply equally to all industrial clients, which includes CB tariff users (for Cryptocurrency Mining), M tariff users or LG tariff users regardless of end use. There is no assurance that future electricity rates will remain stable or economical. In particular, on June 14, 2018, Hydro-Québec requested the Régie to set rates and service conditions specifically for enterprises involved in cryptocurrency Mining as a result of increased electricity demand from cryptocurrency Miners. The Régie has undertaken regulatory proceedings, to which the Company has participated as an intervenor, to establish a framework for the provision of electricity for cryptocurrency Mining in Québec in three Steps:

- Step 1: On July 13, 2018, the Régie provisionally ordered that a new tariff be established for cryptocurrency Miners, and, on July 19, 2018, the Régie approved a provisional tariff of CAD\$0.15/kWh on cryptocurrency Mining facilities built after that date. Under Step 1, the new tariff cannot be applied to any cryptocurrency contracts entered into prior to June 7, 2018, or facilities constructed prior to July 19, 2018. Therefore, Step 1 didn't have an impact on the Company's pre-existing operations and secured existing rates until the completion of Phase 3.

BITFARMS LTD.**2023 Annual Information Form****4. DESCRIPTION OF BUSINESS** (continued)**4.20 SUPPLY OF ELECTRICAL POWER, ELECTRICITY RATES, TERMS OF SERVICE AND THE RÉGIE DE L'ÉNERGIE**(continued)*Quebec* (Continued)

- Step 2: On April 29, 2019, the Régie rendered its decision on Step 2 of the request filed by Hydro-Québec. The Régie decided to create a new class of energy consumers called Electricity consumer class for cryptographic use applied to blockchain. It decided to allocate to this new class an aggregate supply of 300 megawatts of electricity, with the requirement to curtail electricity use during peak hours at Hydro-Québec's request (up to a maximum of 300 hours a year). Cryptocurrency Mining projects would be required to submit tenders to consume electricity from the 300 megawatt block based exclusively on economic development and environmental criteria. The Régie rejected Hydro-Québec's proposal to launch a tariff auction as part of the call for tenders. It decided to create a new tariff applicable to the crypto Mining industry, the CB tariff, and determined that the applicable tariff of the energy component, in ¢/kWh, will correspond to the M or LG tariff in force, as the case may be. In order for the Company to be able to procure electricity for future Québec expansion projects, it would be required to participate in the call for tenders process. However, the Régie's decision also meant that the Company's pre-existing operations in the Province of Québec would remain subject to the M or LG tariff in force, as the case may be, and they were exempt from the tender process as well as the provisional tariff of CAD\$0.15/kWh which had been requested by Hydro-Québec. The provisional tariff would apply to energy consumption not previously authorized under cryptocurrency contracts, to those cryptocurrency contracts entered into after June 7, 2018 and to any substitution of use or any increase of capacity for crypto Miners not already under authorized cryptocurrency contracts. The decision of the Régie did impose the potential requirement to curtail electricity use (of up to 95%) during peak hours at Hydro-Québec's request (up to a maximum of 300 hours a year) under all cryptocurrency contracts including those at the Company's pre-existing operations at the already operating Facilities in Québec. A shut down of 95% of operations for the maximum of 300 hours could result in a revenue decrease of approximately 3.4%.
- Step 3: On January 28, 2021, the Régie rendered its decision on Step 3 of the request filed by Hydro-Québec. The Régie decided that the existing subscriptions on the Hydro-Québec network were to be subject to non-firm service, starting in Winter 2021-2022. The non-firm service applies for a maximum of 300 hours/year, without any monetary compensation. In considering the financial consequences of this conclusion, the Régie requested that Hydro-Québec implement the non-firm service for existing clients during a three-year period through progressive implementation. The Régie did not provide any guidance to Hydro-Québec on how to proceed. The Régie provided the following reasons to justify this conclusion:
 - (1) existing clients, such as the Company, had already executed agreements with municipal electricity networks with non-firm service (without financial compensation) for at least 300 hours per year;
 - (2) new clients entering the market through the call for tenders process would be subject to non-firm service without financial compensation. The treatment of those new clients must be fair and equitable with existing clients; and
 - (3) load shedding for 300 hours was estimated to represent only 3.4% of the 8,760 hours in a year. The Régie did not consider this request unreasonable considering the risks that cryptocurrency clients represent for Hydro-Québec.

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.20 SUPPLY OF ELECTRICAL POWER, ELECTRICITY RATES, TERMS OF SERVICE AND THE RÉGIE DE L'ÉNERGIE(continued)

Quebec (Continued)

On November 17, 2021, in Step 3 of the Régie's regulatory proceedings, the Régie ratified the process for allocating the balance of the 300 MW block reserved for crypto Miners that was not already allocated pursuant to the call for tenders approved in Step 2. The allocation process of the balance of the 300 MW block would be based on a "first come, first serve" process, without any reference to economic development condition and environmental criteria.

On April 6, 2022, the Régie rendered a decision confirming the decision rendered in Step 3, resulting in the application of the non-firm service to the Company's facilities in Québec.

On May 30, 2022, the Company filed with the Régie an administrative complaint against Hydro-Québec requesting information regarding the process for the allocation of the balance of the 300 MW block. The filing of this complaint was justified by the fact that Hydro-Québec, at the time of filing and more than 6 months after the decision rendered by the Régie in Step 3, had still not put in place the allocation process approved by the Régie.

On June 30, 2022, Hydro-Québec responded to the Company's administrative complaint confirming that the allocation process of the 300 MW block would be opened in September 2022.

On November 1, 2022, Hydro-Québec submitted to the Régie its Supply Plan for the period 2023 to 2032 and requested the Régie authorize the suspension of the allocation process for the granting of the balance of the 300 MW reserved block and to reassess the amount of MWs to be allocated to crypto Miners for future operations. The Company has actively participated in the regulatory process on the approval, by the Régie, of the Supply Plan and has challenged Hydro-Québec's request to suspend the allocation of the 300 MW block.

On January 10, 2023, the Régie rendered its decision on Hydro-Québec's request to suspend the allocation process for the granting of the 300 MW reserved block. The Régie decided to suspend the allocation process while it assessed the Supply Plan submitted by Hydro-Québec. The Company did not challenge this decision but has strongly challenged Hydro-Québec's request to reduce the amount of power allocated to zero.

On September 9, 2023, the Régie approved the reduction to zero MW for the remaining quantity of the reserved block, which totaled approximately 270MW at the time. In addition, the Régie decided to maintain the 32.6 MW of the reserved block that had already been allocated to CB tariff clients. The Régie considered that the potential reallocation of the quantities currently held by these customers in case of their subscriptions being abandoned or cancelled could enable certain companies to continue their development or a few new CB tariff customers to be served. The Régie requested Hydro-Québec to amend the *Conditions of Service for Cryptographic Use Applied to Blockchains* and propose a new process for the eventual reallocation of the MW that could become available from the 32.6 MW reserved block already allocated. Hydro-Québec requested, and the Régie accepted, that such new process be presented on or before January 31, 2024. The hearing is expected to be held between May 13 and June 21, 2024.

In November 2023, the Company's complaint was suspended at the request of the parties while the Company and Hydro-Québec entered into direct discussions. On January 17, 2024, after settlement discussions proved to be unsuccessful, the Company requested the reactivation of the complaint and that a date of hearing be fixed.

BITFARMS LTD.
2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.20 SUPPLY OF ELECTRICAL POWER, ELECTRICITY RATES, TERMS OF SERVICE AND THE RÉGIE DE L'ÉNERGIE(continued)

Quebec (Continued)

Electricity supplied by Hydro-Québec and the Municipal Electrical Networks may be set at preferential rates in an effort to encourage investment and development in particular regions. Hydro-Québec and Municipal Electrical Networks may offer a discretionary preferential rate to certain customers, such rate being lower than the rate set by the Régie, notwithstanding that Hydro-Québec and the Municipal Electric Networks may suffer a financial loss on the supply of electricity to those customers. If a preferential rate is changed or no longer available to the Company, the Company's operations and profitability may experience a material adverse effect. In addition, although power is supplied by the Municipal Networks to the Company under the power contracts, the rates in those contracts are adjusted in response to tariff changes imposed by the Régie. Currently, the Cowansville Facility is subject to a preferential rate of 5% on its first 5 MW of power; and the Farnham Facility is subject to a preferential rate of 20% on its first 10 MW of power.

Washington State

On November 9, 2021, the Company completed the acquisition of a cryptocurrency Mining facility in Washington State. The facility is powered by the Grant County Power Utility District ("Grant PUD"). Grant PUD was established in 1938 and is a public utility district that owns and operates hydro-electric plants capable of generating more than 2,000 MW of electricity. Grant PUD establishes rate schedules for different categories of customers at the discretion of its publicly elected Board of Commissioners. The Company operates its cryptocurrency Mining activities in several different buildings with their own power meters not exceeding 5 MW each; thus, for the year 2022, the Company was classified in Schedule 7. The applicable rates for Schedule 7 are a demand charge of \$4.96 per KW of billing demand plus a variable component of USD 2.100¢ per kWh for the first 50,000 kWh of consumption and USD 1.857¢ per additional kWh of consumption. Historically, rates for Schedule 7 have increased by an annual average of 1.27% per year. Effective February 1, 2023, Grant PUD's commissioners authorized the addition of cryptocurrency Mining into the Evolving Industry Rate Schedule 17 ("Schedule 17"). The applicable rates for Schedule 17 are a demand charge for \$28.18 per kW plus a variable component of 0.389¢ per kWh of consumption. Grant PUD may

adjust the rate pricing with approval from its Board of Commissioners. An increase in the rates applicable to the Company's electricity consumption in its operations in Washington State may adversely impact its profitability.

Paraguay

In December 2021, the Company completed the construction of a 10 MW facility in Paraguay (Villarrica). The facility is powered by CLYFSA. CLYFSA is the only private energy distribution company in Paraguay which purchases energy from ANDE, the operator of Paraguay's national electricity grid, and provides power to almost 15,000 residential and commercial customers in Villarrica.

The Company entered into a power purchase agreement with CLYFSA securing 10 MW of hydro-electric energy with a demand charge of \$15.90 per KW of billing demand plus a variable component of 1.422¢ per kWh of consumption for the current one-year renewal period. The power purchase agreement stipulates that CLYFSA can pass on any modifications to pricing by ANDE to Backbone Paraguay. A rate increase could adversely impact the profitability of the Company's operations in Paraguay.

BITFARMS LTD.

2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.20 SUPPLY OF ELECTRICAL POWER, ELECTRICITY RATES, TERMS OF SERVICE AND THE RÉGIE DE L'ÉNERGIE(continued)

Paraguay (Continued)

On September 16, 2022, the executive branch of the Paraguayan government issued decree No. 7824/22 by which ANDE was requested to adopt complementary and temporary regulatory measures to adjust the variables corresponding to the electricity rates aimed at special intensive consumption sectors, including crypto asset Mining activities. In response, ANDE created the Special Intensive Consumption Group, which controls the supply of high and medium voltage and imposes rate tariffs in effect until at least December 2027. While these tariffs have no impact on our current activities in Paraguay as our contract is with the local supplier CLYFSA as detailed above, they may be relevant to future new operations in that territory.

In July 2023, the Company entered into two power purchase agreements in Paraguay for up to 150 MW of hydro power until December 31, 2027: up to 50 MW in Villarrica, in close proximity to the Company's existing operations in Paraguay, and up to 100 MW in Yguazu, a new location close to the Itaipú dam, the third largest hydro-electric dam in the world. Hydro power at both locations will be provided by ANDE at a contracted cost of approximately \$0.039 per kWh, before VAT, until December 31, 2027, and is not subject to annual inflationary adjustments.

Argentina

In 2021, the Company commenced the construction of a 56 MW facility in Argentina (Rio Cuarto - Cordoba). Construction concluded during Q3 2022, and the site started operations gradually by adding 10MW modules at a time until September 2023, when it became fully operational. The facility receives electricity from Generacion Mediterranea S.A. ("GMSA"), one of the subsidiaries of Grupo Albanesi. Grupo Albanesi is an Argentine private corporate group focused on the energy market which provides natural gas and electrical energy to its clients from its multiple facilities.

The terms of the electricity supplied by GMSA in Argentina are included in the Company's power contract, which establishes a rate of \$0.02 per kWh, up to a maximum amount of 1,103,760 megawatt hours per year. The annual maximum megawatt hours the Company can draw at \$0.02 per kilowatt hour is further subject to pro-rata adjustments based on the Company's actual power draw relative to the total 210 MW. The agreement stipulates that GMSA may provide the Company with power in excess of the 1,103,760 megawatt hours, or such adjusted quantity of megawatt hours based on the pro-rata calculation described above, at a price that will be negotiated by the Company and GMSA. The price to be negotiated between the Company and GMSA will likely be impacted by the cost of natural gas and currency exchange rates in Argentina, among other factors.

66 | Page

BITFARMS LTD.

2023 Annual Information Form

4. DESCRIPTION OF BUSINESS (continued)

4.20 SUPPLY OF ELECTRICAL POWER, ELECTRICITY RATES, TERMS OF SERVICE AND THE RÉGIE DE L'ÉNERGIE(continued)

Argentina (Continued)

The agreement also allows for GMSA to renegotiate the \$0.02 per kWh rate if the ratio of the exchange rate under the blue-chip swap mechanism (refer to section 8d *Net financial income* of the MD&A) used in Argentina to the official exchange rate is less than 1.50. The \$0.02 per kWh rate and applicable adjustments described above are in effect for the first four years of the contract. The kilowatt hour price for the remaining four years of the contract will be determined by a formula based mainly on changes in gas costs and currency exchange rates. The contract also specifies certain situations where the Company's supply of electricity can be interrupted, including:

- Regulatory intervention preventing GMSA from providing the Company with electricity, or directing GMSA to reroute its electricity to the wholesale market;
- Scheduled and unscheduled maintenance required to service the power plant or related equipment; and
- Regulatory intervention limiting GMSA's supply of natural gas.

The Company's contract with GMSA also includes certain megawatt hour consumption thresholds and pro-rata adjustments. The Company's operations in Argentina can be materially adversely impacted if the Company is unable to exploit the contractually secured MW capacity on a full-time basis or if the cost of energy negotiated under the pro-rata calculation or calculated using the defined formula in effect for the second four years of the contract, both primarily driven by natural gas prices and foreign currency rates, are not economically viable.

An increase in the Company's electricity costs, cost of natural gas, changes in currency exchange rates in Argentina or regulatory changes in the energy regimes in the jurisdictions in which the Company operates may adversely impact the Company's profitability.

In November 2023, the Company entered into an agreement with GMSA to receive power at its facility in Rio Cuarto at a fixed rate of 2.1 cents per kWh for the months of November through April 2024, which is expected to lower the Company's blended cost of power over a full year of operations at approximately 2.5 cents per kWh plus taxes.

4.21 SPECIALIZED SKILL KNOWLEDGE

Nicolas Bonta, Emiliano J. Grodzki, Ben Gagnon and Benoit Gobeil have been engaged in both small and commercial-scale cryptocurrency mining for several years prior to joining the Company. See *DIRECTORS AND OFFICERS*.

67 | Page

BITFARMS LTD.

2023 Annual Information Form

5. FUTURE GROWTH PLANS

The Company has described its recently completed and future expansion plans below under the sections, “*Argentina Expansion*”, “*Paraguay Expansion*”, “*Washington Expansion*” and “*Canada Expansion*”.

The estimated costs and timelines to achieve Future Growth plans may change based on, among other factors, the prevailing price of Bitcoin, network difficulty, supply of cryptocurrency mining equipment, supply of electrical and other supporting infrastructure equipment, construction materials, currency exchange rates, and the Company’s ability to fund the initiatives. The Company’s future growth plans are reliant on a consistent supply of electricity at cost-effective rates, see Section 4.20 - *SUPPLY OF ELECTRICAL POWER, ELECTRICITY RATES, TERMS OF SERVICE AND THE RÉGIE DE L’ÉNERGIE* of this AIF for further details.

5.1 CAUTIONARY STATEMENTS

Estimates in this section are based on, among other factors, the estimated size of facilities, the planned capital expenditures associated with the project, the number of Miners which may be configured within the facility, and prevailing economic circumstances and currency exchange rates. In the event that the assumptions used to project the impact of new server farms, including the still pending Company’s expansion plans described above, prove to be inaccurate or incorrect, there can be no guarantee that the new servers will increase the Company’s computing power as projected. Among other factors, there can be no guarantee that the Company will be able to obtain a continued supply of electricity to power its new facilities at commercially attractive rates. See Section 4.20 - *DESCRIPTION OF BUSINESS - SUPPLY OF ELECTRICAL POWER, ELECTRICITY RATES, TERMS OF SERVICE AND THE RÉGIE DE L’ÉNERGIE*.

Furthermore, there can be no assurance that the Company’s facilities can be operated on a profitable basis. The foregoing information is forward-looking information for the purposes of applicable securities laws in Canada and readers are cautioned that actual results may vary from those described. See Section 1.4 *CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS* and 4.19 - *RISK FACTORS* of this AIF.

5.2 ARGENTINA EXPANSION

In April 2021, the Company entered into an eight-year power purchase agreement for up to 210 MW with a private Argentinian power producer in the city of Rio Cuarto, Province of Cordoba (the “**Power Producer**”), with an electricity cost of US\$0.02 per kilowatt-hour for the first four years, up to a maximum amount of 1,103,760 megawatt hours per year (on a pro-rata basis for a consumption of 210 MW), and is subject to certain adjustments, variable pricing components and consumption limitations. The pricing on the remaining four years of the eight-year energy contract will be determined by a formula that is largely dependent on natural gas prices. The agreement also allows for the Power Producer to renegotiate the rate if the ratio of the exchange rate under the blue-chip mechanism used in Argentina to the official exchange rate is less than 1.50. For further details, refer to Section 4.20 - *DESCRIPTION OF BUSINESS - SUPPLY OF ELECTRICAL POWER, ELECTRICITY RATES, TERMS OF SERVICE AND THE RÉGIE DE L’ÉNERGIE*.

In July 2021, the Company entered into an eight-year lease agreement, comprising annual payments of approximately \$0.1 million, with the Power Producer to lease land within the Power Producer’s property for the mining facility’s construction and operation in the Province of Cordoba (the “**Rio Cuarto Facility**”).

68 | Page

BITFARMS LTD.

2023 Annual Information Form

5. FUTURE GROWTH PLANS (continued)

5.2 ARGENTINA EXPANSION (continued)

In September 2021, the Company entered into a contract with PROA to provide engineering, procurement, and construction services for the Argentina facility. PROA specializes in utility-grade electrical infrastructure and civil construction with relevant expertise in the design and construction of electrical interconnections, high voltage electrical lines, and transformers needed for operations of the size of the planned Argentina facility. Pursuant to an agreement signed with LPZ Hosting S.A.S (“**LPZ**”), LPZ is responsible for the detail engineering, purchasing management and execution of louvers, sound and noise system, electric installation, data network installation, air conditioning system, air extraction and filter systems, racks, closed-circuit television (“**CCTV**”), fire detection and extinguisher system as well as installation of all low voltage works. Ingenia Grupo Consultor and Gieco S.A. (“**Ingenia**”) were retained as a consortium group responsible for the construction of the provisional high voltage powerline and transformer station as well as the expansion of the 132 KW public bars of the power plant. Ingenia, under the supervision of LPZ, was also selected to carry out electrical data and CCTV assembly work for the first warehouse. The Company has also engaged Dreicon S.A. as an independent engineering firm to oversee construction, quality control and project milestones for the Company’s projected buildout schedule.

The Rio Cuarto Facility, if fully developed, is expected to be built as four separate warehouse style buildings with a capacity to accommodate over 55,000 new generation Miners and be capable of producing approximately 5.5 EH/s. The first warehouse, which was included in the capacity needed to reach the corporate 5.0 EH/s target for 2022, represents approximately 50 MW of incremental infrastructure capacity.

On September 19, 2022, the Company announced it has initiated production in the first 10 MW module of the First Warehouse at the Rio Cuarto Facility, increasing the total number of farms operated by the Company to ten, and the total operational hashrate to 4.1 EH/s.

On November 1, 2022, the Company reported that Argentina was wrestling with high inflation, currency devaluation and a significant debt burden. To alleviate concerns about

a drain on the Argentina Central Bank's foreign currency reserves, trade approval for the importation of most goods, including Mining and IT equipment, had been imposed in the Country, adversely affecting the Company's ability to import in Argentina the additional Miners needed to operate the first warehouse at its full capacity of 50 MW. Additionally, it was also announced that the Power Producer was awaiting approval of its final operation permit. In the meantime, the Rio Cuarto Facility was drawing power during the start-up and commissioning phase from the provincial electrical utility at a higher cost than the expected contracted cost of power under the agreement with the Power Producer. As at December 31, 2022, the adverse impact of recent geopolitical events on natural gas prices, as well as new importation restrictions, are leading the Company to revise the timing to fully utilize the infrastructure built in the first 50 MW warehouse and to reassess the timing of its build-out and deployment of further production facilities at the Rio Cuarto location.

On January 3, 2023, the Company announced that it had completed construction of the first 50 MW warehouse in the Rio Cuarto Facility and expected it to be fully commissioned during the first six months of 2023.

In February 2023, Management elected to postpone the development of additional infrastructure in Argentina until (i) the private Argentinian power producer obtains an increased power permit, (ii) certain political and economic uncertainties in Argentina have been resolved or become attenuated and (iii) natural gas prices stabilize at an acceptable level.

In April 2023, in anticipation of the power permit approval, the Company, using credits and cash, purchased over 6,200 new Bitmain and MicroBT Miners to fill out an additional 22 MW in the Argentinian facility. Those new Miners were installed in the third quarter of 2023 and improved the overall W/TH efficiency and increased the hashrate of the facility.

BITFARMS LTD.
2023 Annual Information Form

5. FUTURE GROWTH PLANS (continued)

5.2 ARGENTINA EXPANSION (continued)

In April 2023, the Company confirmed the receipt of the necessary power permits by the private Argentinian power producer to expand production at its Argentina facility. The current permits in place allow up to 100 MW of power capacity. The Company completed testing of its Rio Cuarto substation and began to draw power from the private power producer. The Company installed 2,100 new Miners that were delivered in March and April 2023. Energizing those miners and ending underclocking of previously installed miners in line with improved economics increased the active capacity to 18 MW and the Company's operational hashrate to over 5.0 EH/s.

Drawing power from the private Argentinian power producer enabled the Company to commence purchasing low-cost power under its purchase agreement at approximately \$0.03 per kWh, before VAT, on an annualized basis, or possibly less as the Company reaches full capacity at the facility. The Company's cost of BTC earned at that farm decreased substantially as it actively scaled up operations at the facility.

In June 2023, 1,650 Bitmain S19 Pro Miners were purchased for Argentina at an average direct cost of \$12.98/TH, in addition to the 6,200 Miners purchased in April 2023. In addition, 2,900 MicroBT Miners were delivered, installed and energized, contributing an additional 290 PH/s and driving the Company's operational hashrate to 5.3 EH/s as of June 30, 2023.

In August and September 2023, approximately 1,300 new M50 WhatsMiner miners, 700 new S19j Pro Antminer Miners and 5,500 new S19j Pro+ Antminer Miners were imported and installed, increasing the warehouse's capacity to 51 MW and operational hashrate to 1.5 EH/s. Approximately 600 additional M50 WhatsMiner miners were installed in October 2023, further increasing the warehouse's capacity to 54 MW and operational hashrate to 1.6 EH/s.

In November 2023, the Company entered into a prepaid contract with its Argentinian private power producer, to receive power at the Rio Cuarto facility at the rate of 2.1 cents per kWh plus VAT for the months of November 2023 through April 2024. This contract is expected to significantly lower the Company's blended cost of power to an average of 2.5 cents per kWh plus VAT for the first year of full operations at that facility.

On December 10, 2023, the newly elected President, Javier Milei, took office. Self-described as right-wing libertarian, his agenda includes pro-market policies with an aim to address budget deficits and combat high inflation rates and currency devaluation. Furthermore, the new administration has announced measures to ease import restrictions and provide an incentive to attract foreign direct investments. It is also believed President Milei is receptive to the overall crypto industry.

Position as of December 31, 2023

As of December 31, 2023, the Company had placed deposits of \$4.0 million with suppliers for existing and additional construction work. Overall, in Argentina, the Company has also acquired \$63.3 million of property, plant and equipment, incurred \$0.3 million of expenditures relating to design and feasibility studies and recorded cumulative gains on the disposition of marketable securities of \$70.0 million associated with the mechanism to convert funds into Argentine Pesos for disbursements.

2024 plan

The Company expects to upgrade its current fleet of miners in Rio Cuarto during Q4 2024 with new T21 Miners, which is expected to increase the online hashrate from 1.6 EH/s to 2.4 EH/s by December 31, 2024, assuming the Purchase Option is exercised.

The Company retains the option, subject to the receipt of additional government approvals, to expand the Rio Cuarto operation to the full contracted amount of 210 MW. Due to the ongoing political and economic uncertainty, the Company is not yet in a position to determine when or if construction of additional infrastructure in Argentina will commence. The Company will monitor general macroeconomic conditions and the evolution of the new administration's economic program in assessing its expansion plans in the country.

As of December 31, 2023, the Company employed 31 team members in Argentina.

5. FUTURE GROWTH PLANS (continued)

5.3 PARAGUAY EXPANSION

During the year ended December 31, 2021, the Company entered into an annually renewable 10 MW power purchase agreement with the city of Villarrica electricity distribution company, Compañía Luz y Fuerza S.A. (“CLYFSA”), at an effective electricity cost of \$0.036 per kilowatt hour. The Company also entered into a five-year lease agreement with a third party, consisting of monthly payments of \$20,000, beginning August 1, 2021, to lease land where the Villarrica Facility was constructed. The construction of the facility, at a cost of \$1.1 million, was completed in December 2021.

In January 2022 2,900 of the Company’s older generation Miners were installed at the Villarrica Facility, capable of producing approximately 125 PH/s.

On July 18, 2022, the Paraguayan Congress approved a bill regulating the mining, trading, intermediation, exchange, transfer, custody and administration of crypto-assets and instruments that would allow control of crypto-assets. The proposed legislation aimed to create an attractive regulatory environment within the country through the establishment of a straightforward licensing regime that clearly establishes the requirements to operate crypto-assets activities in the Country. Approved by both chambers, the law was submitted to the executive branch, where the President has the power to approve or veto it. On August 30, 2022, the law was vetoed by the President and was returned to the congress to be discussed again. It is unknown if a new law will be approved and when. The absence of specific law regarding crypto assets has not impacted the Company’s current operations in the country.

On September 16, 2022, the executive branch issued decree No. 7824/22 by which the National Electricity Administration (“ANDE”) was requested to adopt complementary and temporary regulatory measures to adjust the variables corresponding to the electricity rates aimed at special intensive consumption sectors. In this context, ANDE, through resolution No. 7824/22, dated October 4, 2022, created the Special Intensive Consumption Group, which includes supplies at very high voltage (220 kV), high voltage (66 kV), medium voltage (23 kV) at the substation and at the line, and set up the tariffs until December 2027. This Special Intensive Consumption group applies, among others, to crypto asset mining activities. While the new ANDE tariffs have no impact on our current activities at Villarrica as our contract is with the local supplier CLYFSA as detailed above, the ANDE tariff will apply to the Paso Pe facility currently under construction, and the projected Yguazu facility as detailed below.

During December 2022, ANDE, as part of a local development plan, installed a new transformer in the city of Villarrica which was operational in the first half of 2023. The new transformer is intended to help ensure fewer energy curtailments to the Company’s facility as well as to nearby residents.

In January 2023, all of the older generation Miners at the Villarrica facility were replaced with approximately 2,900 new M30S WhatsMiner Miners generating approximately 290 PH/s, a 165 PH/s increase, or 132%, compared to the hashrate that was being produced by the older generation Miners. During the three months ended March 31, 2023, the Company sold the older generation Miners to a third party for approximately \$0.2 million.

In July 2023, the Company acquired two power purchase agreements in Paraguay for up to 150 MW of eco-friendly hydro power: up to 50 MW in Villarrica, in close proximity to the Company’s existing operations in Paraguay, and up to 100 MW in Yguazu, a new location close to the Itaipú dam, the third largest hydro-electric dam in the world. The new facility in Villarrica is referred to as the Paso Pe facility. At Yguazu, the Company has the opportunity to develop a new farm with up to 100 MW of Mining capacity at a site that is in close proximity to a newly constructed substation with 1,200 MW of capacity. Hydro power at both locations will be provided at a contracted cost of approximately \$0.039 per kWh, before VAT, until December 31, 2027 and is not subject to annual inflationary adjustments.

71 | Page

BITFARMS LTD.

2023 Annual Information Form

5. FUTURE GROWTH PLANS (continued)

5.3 PARAGUAY EXPANSION (continued)

Paso Pe facility

In August 2023, the Company placed orders using vendor credits for eight 2.4 MW hydro containers and approximately 1,900 M53S hydro-cooling Miners capable of producing approximately 675 PH/s once installed.

In September 2023, construction commenced as planned at the Paso Pe facility, beginning with the substation, followed by building-out a Mining facility consisting of 50 MW (originally 30 MW before the amended contract described below) of air-cooled warehouses and the 20 MW of hydro containers, expected to be completed during the first quarter of 2024. The construction is progressing as planned with the finalization of underground cable connections in March 2024. The transformer was delivered in March 2024.

In December 2023, the Company amended the contract for an additional 20 MW of energy at the Paso Pe facility, enabling a larger expansion at the site from 50 MW to 70 MW.

The revised cost of developing the expanded 50 MW of air-cooled warehouse, constructing the substation capable of accommodating the total energy requirement, and the installation of the high voltage lines, is estimated to range from \$25.0 million to \$28.0 million excluding the cost of the power purchase agreement guarantees required by Administración Nacional de Electricidad (“ANDE”), the operator of Paraguay national electricity grid, for securing monthly electricity purchase payment obligations.

Position as of December 31, 2023

As of December 31, 2023, the Company had placed deposits of \$3.2 million and \$2.4 million with suppliers for construction costs and for electrical components, respectively. As of December 31, 2023, property, plant and equipment includes \$2.5 million related to the Paso Pe facility, including warehouse and infrastructure equipment costs.

Yguazu facility

In January 2024, the Company purchased the land for the 100 MW Yguazu facility. The Company expects construction to begin in March 2024 and to complete the facility during the second half of 2024. The cost of developing the 100 MW facility and the installation of the high voltage lines is estimated to range from \$34.0 million to \$37.0 million, excluding the cost of the power purchase agreement guarantees required by ANDE.

2024 plan

The Company expects to complete construction of its Paso Pe and Yguazu facilities and install its new T21 Miners and WhatsMiner M53S Miners during 2024, which will increase the Paraguay online hashrate from 0.3 EH/s to 3.6 EH/s by June 30, 2024, and, provided that the Purchase Option is exercised, 6.9 EH/s by December 31, 2024.

72 | Page

5. FUTURE GROWTH PLANS (continued)

5.4 WASHINGTON EXPANSION

On November 9, 2021, the Company completed the acquisition of a facility in Washington State consisting of 12 MW of hydro-electric power purchase agreements, an additional 9 MW of in-process applications for expanded power-purchase agreements, transformers with 17 MW of capacity, land, buildings, electrical distribution equipment and a below market lease for a 5 MW facility expiring on November 8, 2022. In October 2022, the Company renewed the lease for a period of 23 months with similar terms.

For consideration of the purchase of the Washington State facility, the Company transferred approximately \$23.0 million in cash and 414,508 common shares with a value of \$3.7 million on the closing date of November 9, 2021. The net identifiable assets acquired include: electrical distribution equipment valued at \$6.0 million, buildings valued at \$0.7 million, land valued at \$0.1 million and a favourable lease valued at \$2.0 million. The acquisition resulted in the Company recording goodwill of \$17.9 million, which was determined as of June 30, 2022 to be fully impaired as a result of the decrease in the price of BTC.

On July 28, 2022, the Company announced the addition of 3 MW of low-cost hydropower that went online at the Washington State facility. The added 3 MW facility brought the total production from the Washington State farm to 20 MW. The Company is currently operating the majority of its Antminer S19j Pro Miners generating approximately 600 PH/s in this facility. The Company's power supplier has provided preliminary indication that the first 6 MW of in-process applications are expected to be installed in March 2024, while another 3 MW of in-process applications are estimated to be energized in the next four (4) years due to transmission being at capacity in relation to the nearby substation.

In April 2023, the Company received approval from the power supplier for a 6 MW that is estimated to be energized in the first quarter of 2024. The Company began constructing an additional production facility on Company-owned land in June 2023 with an estimated cost of \$2.1 million, including \$0.9 million paid in Q2 2023 to the power supplier for establishing the connection. In connection with the new facility, in January 2024, the Company elected to cancel the lease of a 5 MW facility in Washington State in order to transfer Miners from the leased facility to the newly constructed 6 MW facility with completion expected in March 2024. The cancellation of the lease will take effect in April 2024. In February 2024, the power supplier established the electricity connection allowing the Company, subject to the completion of the civil work, to access 6 MW of hydro power capacity.

In July 2023, the Company de-energized its 2 MW immersion cooling pilot project as the equipment did not perform to the Company's expectations of performance and operating costs. The 2 MW of hydro-electricity remains available to the Company for future use.

In September 2023, the Company upgraded ventilation and cooling systems, increasing average uptime.

2024 plan

The Company expects to upgrade a portion of its current fleet of miners in Washington during Q1 2024 with new T21 Miners, which will increase the online hashrate from 0.6 EH/s to 0.7 EH/s by March 31, 2024.

As of December 31, 2023, the Company employed 14 team members in the United States of America.

5. FUTURE GROWTH PLANS (continued)

5.5 CANADA EXPANSION

Baie-Comeau background

In April 2023, the Company entered into agreements to acquire shares of a Company that owns the right to consume 22 MW of hydro power capacity in Baie-Comeau, Quebec, and to lease a site to install the infrastructure to operate the acquired capacity. When fully utilized, the 22 MW is expected to add over 600 PH/s. The Baie-Comeau area is home to five hydro-electricity generation facilities with over 5.4 Gigawatts of nameplate capacity.

In July 2023, the Company completed the acquisition. The consideration transferred at closing totaled \$2.0 million (CAD\$2.6 million), of which \$0.6 million (CAD\$0.8 million) was paid in cash and \$1.4 million (CAD\$1.8 million) was paid through the issuance of 820,837 common shares of the Company. The lease agreement is for an industrial site in Baie-Comeau for an initial term of 10 years and provides the Company with the option to purchase the site for \$2.2 million (CAD \$3.0 million) with an annual adjustment at the lesser of (i) the change in the Consumer Price Index and (ii) 3% throughout the lease term.

Baie-Comeau 2023 and 2024 plan

Following the closing of the acquisition, the Company immediately commenced production at Baie-Comeau with an initial 3 MW online. In connection with the acquisition, the Company increased its total hashrate target to 6.3 EH/s, which was achieved on October 20, 2023.

The Company plans to minimize development-related and build-out expenditures by relocating miners from other facilities to Baie-Comeau and by applying infrastructure equipment repurposed from the December 2022 sale of the former De La Pointe facility. In June and August 2023, approximately 2,500 WhatsMiner M31S+ miners were redeployed from Magog and installed at the Baie-Comeau facility.

The Company fully energized the 11 MW facility on October 20, 2023, and is planning to commission the remaining 11 MW during the second half of 2024 after local grid infrastructure improvements have been completed. The cost of electrical infrastructure and leasehold improvements for the first 11 MW of the facility totaled \$2.8 million.

The Company plans to continue to lease the property and complete the physical improvements for the second 11 MW by the third quarter of 2024. The Company expects the total cost to be approximately \$9.2 million, including \$3.9 million for the leasehold improvements, which will include construction of a new building and \$2.5 million for the electrical infrastructure.

As of December 31, 2023, the Company has \$5.0 million of property, plant and equipment at the Baie-Comeau facility, including infrastructure equipment that was repurposed from other facilities.

Canada 2024 plan

As part of the Miner upgrade and expansion initiatives, the Company expects to install new Miners in Canada during 2024 with new T21 Miners and WhatsMiner M53S Miners, which will increase the online hashrate from 4.0 EH/s to 6.1 EH/s by June 30, 2024 and, provided that the Purchase Option is exercised, 7.0 EH/s by December 31, 2024.

As of December 31, 2023, the Company employed 91 team members in Canada.

BITFARMS LTD.

2023 Annual Information Form

6. DIVIDENDS

Bitfarms has neither declared nor paid any dividends on its common shares since incorporation. When permitted to do so, the Board may declare dividends at its discretion but does not anticipate paying dividends in the near future. The Board will determine if, and when, to declare and pay dividends in the future from funds properly applicable to the payment of dividends based on Bitfarms' financial position at the relevant time. The Board expects to retain earnings to finance future growth of Bitfarms and its subsidiaries. All of the Bitfarms shares are entitled to an equal share in any dividends declared and paid on a per share basis.

7. DESCRIPTION OF CAPITAL STRUCTURE

Bitfarms' authorized share capital consists of an unlimited number of Bitfarms shares. As of March 6, 2024, there are 339,274,441 issued and outstanding Bitfarms shares. Each Bitfarms share entitles the holder to one vote per Bitfarms share and to receive equally any dividends declared by Bitfarms and the remaining property and assets of Bitfarms in the event Bitfarms undergoes a liquidation, dissolution, or winding up.

On February 4, 2020, shareholders approved an amendment to the articles of incorporation of the Company to authorize the issuance of class A preferred shares. As of March 6, 2024, there were nil preferred shares outstanding.

8. MARKET FOR SECURITIES

8.1 TRADING PRICE AND VOLUME

The Bitfarms Shares are traded on the TSX and Nasdaq under the symbol "BITF". The following table sets out the price range and aggregate volumes traded or quoted monthly on the TSX and the Nasdaq Exchange for the year ended December 31, 2023.

Month	TSX			Nasdaq		
	High (CAD)	Low (CAD)	Volume	High (US\$)	Low (US\$)	Volume
January 2023	1.68	0.57	35,388,200	1.26	0.42	121,378,900
February 2023	1.64	1.15	30,441,600	1.23	0.86	92,200,800

Notes:

- (1) Information about principal occupation, business or employment, not being within the knowledge of the Company, has been furnished by respective persons set forth above. The information with respect to the Common Shares beneficially owned, controlled or directed is not within the direct knowledge of the Company and has been obtained from the System for Electronic Disclosure by Insiders (“SEDI”) or furnished by the respective individuals. This table does not include Common Shares underlying unexercised stock options and warrants.
- (2) Member of the Audit Committee.
- (3) Chair of the Audit Committee.

9. DIRECTORS AND OFFICERS (continued)

9.1 NAME, OCCUPATION AND SECURITY HOLDING (continued)

As of March 6, 2024, the directors and executive officers of the Company, as a group, beneficially owned, directly or indirectly, or exercised control or direction over 15,742,540 common shares, representing 4.64% of the total issued and outstanding common shares before giving effect to the exercise of rights, options, or warrants to purchase or otherwise receive Common Shares held by such directors and executive officers. The statement as to the number of Common Shares beneficially owned, directly or indirectly, or over which control or direction is exercised by the directors and executive officers of the Company as a group is based upon information furnished by the directors and executive officers themselves.

9.2 BIOGRAPHY

Nicolas Bonta

Nicolas Bonta serves as the Chairman of the Board. Mr. Bonta is an Argentinian hotelier, real estate investor and a co-founder of the Company. In 1998, he founded one of the first boutique hotel companies in Argentina named “Own Hotels” which has grown to six locations in the cities of Buenos Aires and Montevideo, Uruguay. Mr. Bonta has a bachelor’s degree in hospitality from Glion Institute of Higher Education in Switzerland.

Brian Howlett

Brian Howlett serves as the Lead Director of the Company, is the Chair of the Audit Committee, and is a member of the Governance and Nominating Committee, the Compensation Committee, and the Environmental and Social Responsibility Committee. Mr. Howlett is a seasoned financial professional with over thirty years of senior management experience. He is currently the President, Chief Executive Officer and Director of Hemlo Explorers Inc. Mr. Howlett also serves on the Board for several junior mining companies and has formerly served as C-Executive and board members in several publicly listed companies, including Dundee Sustainable Technologies Inc. and Superior Copper Corporation, among others. Mr. Howlett graduated in 1982 with a B. Comm. in finance from Concordia University and received his CPA/CMA designation in 1989.

Emiliano J. Grodzki

Emiliano J. Grodzki serves as Director of the Company and is a member of the Compensation Committee and the Environmental and Social Responsibility Committee. Mr. Grodzki is an Argentinian entrepreneur, businessman and a co-founder of the Company. He has been a business builder and innovator since his early teens, founding, incubating, and exiting interdisciplinary ventures in the design, food, and construction industries. In 2016, he entered the space of cryptocurrencies and began to invest in and mine cryptocurrencies from Argentina. Mr. Grodzki has a construction degree from ORT in Buenos Aires, Argentina.

9. DIRECTORS AND OFFICERS (continued)

9.2 BIOGRAPHY (continued)

Andres Finkielstain

Andres Finkielstain serves as an Independent Director of the Company, Chair of the Compensation Committee, and a member of the Audit Committee and the Governance and Nominating Committee. Mr. Finkielstain is the Founding Managing Partner of FinkWald LLC, a private investment office specializing in private equity, real estate, media, and technology. He was also the co-head of the Special Situations division at Banco Industrial in Argentina where he analyzed and provided financing solutions to Argentinean-based companies and institutions from 2017 to 2023. Mr. Finkielstain previously served, until February 2018, as a portfolio manager and financial advisor for Soros Brothers Investments (“SBI”), a private investment office founded in 2011 by Alexander and Gregory Soros, sons of George Soros. Mr. Finkielstain worked at J.P. Morgan. During his tenure of over a decade at J.P. Morgan, Mr. Finkielstain served in various capacities within the asset management, including the role of Global Investment Opportunity and Emerging Markets Specialist. His group facilitate access to J. P. Morgan investment bank and offered capital market solutions for a select group of the wealthiest and most sophisticated individual investors and families globally. Mr. Finkielstain graduated with a BA in Economics from Bard College where he served as the President of a Latin American organization.

Edith M. Hofmeister

Edie Hofmeister serves as Independent Director of the Company and Chair of the Governance and Nominating Committee and the Environmental and Social Responsibility Committee and is a member of the Audit Committee. Ms. Hofmeister has advised large and small multi-national extractive companies on legal and environment, social and governance (“ESG”) matters for over twenty years. Most recently she has been appointed as director of STLLR. She also served as Executive Vice President Corporate Affairs and General Counsel for Tahoe Resources where she led the Legal, Sustainability and Government Affairs departments and helped grow Tahoe from a junior exploration company to a mid-cap precious metals producer, from 2010 to 2019. Since 2006, Ms. Hofmeister has worked alongside rural and indigenous communities in India, Peru, Guatemala, Mexico and Canada to enhance food, work and water security. Ms. Hofmeister serves as the Chair of the International Bar Association’s Business and Human Rights Committee, a group dedicated to promoting high ESG standards in multi-national corporations. Ms. Hofmeister received a Bachelor of Arts degree in international relations from UCLA, a Master of Arts degree in international peace studies from the University of Notre Dame and a Juris Doctor degree from the University of San Francisco.

L. Geoffrey Morphy

L. Geoffrey Morphy serves as Director, President and Chief Executive Officer of the Company. Previously he served as Executive Vice President, President and Chief Operating Officer of the Company. He was Co-CEO of Dundee Sarea Fund, a Canadian-based turnaround fund from December 2017 to November 2019. He was Vice-President, Corporate Development of Dundee Corporation (TSE: DC.A) from April 2016 to October 2019. In that capacity, he was part of the senior management team responsible for strategy, new investments and portfolio management. Since August 2016, Mr. Morphy is a director of Android Industries, L.L.C, a Michigan-based Tier One auto parts manufacturing company with global operations. In February 2021, he became a Trustee of R&R Real Estate Investment Trust (TSXV: RRR.UN). Mr. Morphy is a past director of Parq-Vancouver, Blue Goose Capital Corporation, and was previously Chairman of Montreal based Dundee Sustainable Technologies Inc. (CSE: DST) and Co-CEO of Dundee Sarea Fund. Mr. Morphy has decades of cross-border and international commercial and corporate strategy, structuring, operational and finance experience. He has occupied executive positions at financial advisory firms and banks, such as the Farber Financial Group between 2008 and 2016, ABN Amro Bank N.V. and LaSalle Bank between 2005 and 2008, as well as Comerica Bank, between 2000 and 2005. Mr. Morphy holds a Bachelor of Commerce from Dalhousie University, earned the designation of Certified Exit Planning Adviser from Chicago-based Exit Planning Institute in 2012, became an exempt market dealer representative in 2015, and was granted the designation of ICD.D from the Institute of Corporate Directors in 2019.

9.3 CEASE TRADE ORDERS, BANKRUPTCIES, PENALTIES OR SANCTIONS

No director or executive officer of the Company, is or was, within 10 years before March 6, 2024, a director, chief executive officer or chief financial officer of any company that:

- (a) while that person was acting in that capacity, was the subject of a cease trade order or similar order or an order that denied the relevant company access to any exemption under securities legislation for a period of more than 30 consecutive days; or
- (b) while that person was acting in that capacity, was subject to an event that resulted, after the director or executive officer ceased to be a director or executive officer, in the company being the subject of a cease trade or similar order or an order that denied the relevant company access to any exemption under securities legislation for a period of more than 30 consecutive days.

Except as described below, no director or executive officer of the Company and no shareholder holding a sufficient number of securities to affect materially the control of the Company is, as at March 6, 2024, or has been within the 10 years before March 6, 2024:

- (a) a director or executive officer of any company that, while that person was acting in that capacity, or within a year of that person ceasing to act in that capacity, became bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency or was subject to or instituted any proceedings, arrangement or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold its assets;
- (b) become bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency, or become subject to or instituted any proceedings, arrangement or compromise with creditors, or had a receiver, receiver manager or trustee appointed to hold the assets of the director, executive officer or shareholder; or

9. DIRECTORS AND OFFICERS (continued)

9.3 CEASE TRADE ORDERS, BANKRUPTCIES, PENALTIES OR SANCTIONS(continued)

- (c) has been subject to:
 - (i) any penalties or sanctions imposed by a court relating to securities legislation or by a securities regulatory authority or has entered into a settlement agreement with a securities regulatory authority since December 31, 2000 or before December 31, 2000 the disclosure of which would likely be important to a reasonable security holder in making an investment decision; or
 - (ii) any other penalties or sanctions imposed by a court or regulatory body that would likely be considered important to a reasonable security holder in making an investment decision.

Minto Metals Corporation was placed in receivership in July of 2023 by order of the British Columbia Supreme Court. Edith M. Hofmeister was a director on the Board of Minto Metals Corporation between November 2021 and February 2023.

9.4 CODE OF CONDUCT AND CONFLICTS OF INTEREST

The directors of Bitfarms are required by law to act honestly and in good faith with a view to the best interests of Bitfarms and to disclose any interests which they may have in any project or opportunity outside of Bitfarms. If a conflict of interest arises, any director in a conflict will disclose his interest and abstain from voting on such matter at a meeting of the Board. To the best of Bitfarms' knowledge, and other than as disclosed in this AIF, there are no known existing or potential conflicts of interest among Bitfarms, its directors and officers or other members of management of the Company or any proposed director, officer or other member of management as a result of their outside business interests, except that certain of the directors and officers serve as directors and officers of other companies, and therefore it is possible that a conflict may arise between their duties to Bitfarms and their duties as a director or officer of such other companies.

10. LEGAL PROCEEDINGS

Legal Proceedings

There are no pending legal material proceedings to which the Company is or was party to, or that any of its property is or was the subject of, and Bitfarms is not aware of any such proceedings known to be contemplated.

Regulatory Actions

No penalties or sanctions were imposed against the Company by a court relating to provincial and territorial securities legislation or by a securities regulatory authority since incorporation. No other penalties or sanctions have been imposed by a court or regulatory body against the Company necessary for this AIF to contain full, true and plain disclosure of all material facts. The Company has not entered into any settlement agreements before a court relating to provincial and territorial securities legislation or with a securities regulatory authority since incorporation.

BITFARMS LTD.
2023 Annual Information Form

11. INTEREST OF MANAGEMENT AND OTHERS IN MATERIAL TRANSACTIONS

Except as disclosed herein and elsewhere in this AIF, no directors, officers, principal shareholders of the Company, nor any Associate or Affiliate of the foregoing, have had any material interest, direct or indirect, in any transactions in which the Company has participated prior to March 6, 2024 that have materially affected or are reasonably expected to materially affect the Company or any subsidiary.

Transactions with Related Parties

There have been no transactions with related parties other than as disclosed below.

- The Company entered into consulting agreements with two of the Directors, Emiliano Joel Grodzki and Nicolas Bonta. As of December 31, 2022, Messrs. Grodzki and Bonta have resigned from their executive positions in the Company, the consulting agreements were terminated, and they only retain their positions of non-executive Directors, resulting in a total termination package of \$1.5 million.

	Year ended December 31,		
	2023	2022	2021
Consulting fees charged by the directors	\$ —	\$ 1.3 million	\$ 0.6 million
Termination package	\$ —	\$ 1.5 million	\$ —
	\$ —	\$ 2.8 million	\$ 0.6 million

- The Company was charged rent expense to companies controlled by certain directors.

	Year ended December 31,		
	2023	2022	2021
Rent expenses	\$ —	\$ 0.3 million	\$ 0.5 million

The above transactions were incurred in the normal course of operations. As at December 31, 2023, the Company no longer has transactions with related parties.

Other than as set forth in this AIF, the management of Bitfarms is not aware of any material interest, direct or indirect, of any director, executive officer, any Person or Company beneficially owning, controlling or directing, directly or indirectly, more than ten (10%) percent of Bitfarms' outstanding voting securities, or any Associate or Affiliate of the foregoing Persons, in any transaction in which Bitfarms has participated within the three years before March 6, 2024, that has materially affected or is reasonably expected to materially affect Bitfarms or any of its subsidiaries.

12. TRANSFER AGENT AND REGISTRAR

Bitfarms' registrar and transfer agent is TSX Trust Company, located at 100 Adelaide Street West, Suite 301, Toronto, Ontario M5H 4H1.

BITFARMS LTD.
2023 Annual Information Form

13. MATERIAL CONTRACTS

Except for contracts made in the ordinary course of business, the following are the only material contracts entered into by Bitfarms which are currently in effect and considered to be material as of March 6, 2024.

Material contracts

A custodial services agreement entered on April 21, 2021 between the Company and Coinbase Custody pursuant to which the Company appointed Coinbase to act as its provider of custodial services for the purpose of storing digital assets.

A custodial service agreement entered on August 1, 2023 between the Company and Anchorage Digital pursuant to which the Company appointed Anchorage Digital to act as provider of custodial services for the purpose of storing digital assets.

A Service Agreement entered on September 18, 2023 between the Company and Foundry USA Pool owned by Foundry Digital LLC ('Foundry'), pursuant to which Foundry shall provide a mining Pool Service to the Company.

An eight-year power purchase agreement entered on April 1, 2021 between the Company and Generacion Mediterranea S.A. (GMSA) pursuant to which the Company secured up to 210 MW of natural gas-powered energy. The agreement establishes that GMSA will supply the Company with power at a rate of \$0.02 per kilowatt hour for the first four years, up to a maximum amount of 1,103,760 megawatt hours, subject to certain pro-rata adjustments and requiring the Company and GMSA to negotiate in good faith the price of any energy that is excluded from the 1,103,760 megawatt hours, or the amount of megawatt hours determined after the pro-rata adjustments. The pricing on the remaining four years of the eight-year energy contract will be determined by a formula that is largely dependent on natural gas prices.

14. INTERESTS OF EXPERTS

The Company's independent registered public accounting firm is PricewaterhouseCoopers LLP, Chartered Professional Accountants, who have issued a Report of Independent Registered Public Accounting Firm dated March 6, 2024 in respect of the Company's consolidated financial statements as at December 31, 2023 and 2022 and for the years

PricewaterhouseCoopers LLP has advised that they are independent with respect to the Company within the meaning of the Chartered Professional Accountants of Ontario CPA Code of Professional Conduct and the rules of the US Securities and Exchange Commission and the requirements of the Public Company Accounting Oversight Board Rule 3520, Auditor Independence

No person or company whose profession or business gives authority to a report, valuation, statement or opinion and who is named as having prepared or certified a part of this AIF or as having prepared or certified a report or valuation described or included in this AIF holds or is to hold any beneficial or registered interest, direct or indirect, in any securities or property of Bitfarms or any associate or affiliate of Bitfarms or any subsidiaries thereof.

2023 Annual Information Form

15. COMMITTEES

The Bitfarms Board currently has four committees:

- Audit Committee;
- Governance and Nominating Committee;
- Compensation Committee; and
- Environmental and Social Responsibility Committee.

15.1 AUDIT COMMITTEE

The current members of the Audit Committee are Brian Howlett, who also acts as Committee chair, Andres Finkielsztain and Edie Hofmeister. All of the members are considered “independent” directors as defined in National Instrument 52-110 – Audit Committee (“**NI 52-110**”). Each member of the Audit Committee is considered to be “financially literate” within the meaning of **NI 52-110**, which includes the ability to read and understand a set of financial statements that present a breadth and level of complexity of accounting issues that are generally comparable to the breadth and complexity of the Company’s financial statements. The full text of the charter of the Audit Committee (the “**Audit Committee Charter**”) is attached as Schedule “A”.

Relevant Education and Experience

The relevant education and experience of each of the members of the Audit Committee is as follows:

Name of Member	Education	Experience
Brian Howlett ⁽¹⁾	Bachelor of Commerce from Concordia University (1982). CMA designation (1989).	Mr. Howlett is currently the President, Chief Executive Officer and Director of Hemlo Explorers Inc. Mr. Howlett recently served as the President, Chief Executive Officer and a Director of Dundee Sustainable Technologies Inc. He also formerly served as the President and Chief Financial Officer of Superior Copper Corporation. Prior to that, Mr. Howlett spent twelve years with ELI Eco Logic Inc., including six years as Chief Financial Officer.
Andres Finkielsztain	Bachelor of Economics from Bard College, New York (1999)	Mr. Finkielsztain is the Founding Managing Partner of FinkWald LLC, a private investment office specializing in private equity, real estate, media, and technology. He was also the co-head of the Special Situations division at Banco Industrial in Argentina, where he analyzed and provided financing solutions to Argentinean-based companies and institutions. Until February 2018, Mr. Finkielsztain as portfolio manager and financial advisor for Soros Brothers Investments (“SBI”), a private investment office founded in 2011 by Alexander and Gregory Soros. Mr. Finkielsztain also worked at J.P. Morgan for over 10 years in various capacities within Asset Management, including the role of Global Investment Opportunity and Emerging Markets Specialist.
Edith Margaret Hofmeister	Juris Doctor degree from the University of San Francisco	Ms. Hofmeister is an Attorney and C-suite executive who has advised large and small multi-national extractive companies on legal and ESG matters for over twenty years, where she reviewed and prepared disclosure documents, acted as the point person for SEC communications, oversaw internal controls and SOX compliance, anti-corruption, whistleblower and governance programs and audits, and acted as corporate secretary to audit and risk committees of NYSE-listed companies. She has also served as Executive Vice President Corporate Affairs and General Counsel for Tahoe Resources where she led the Legal, Sustainability and Government Affairs departments and helped grow Tahoe from a junior exploration company to a mid-cap precious metals producer from 2010 to 2019. Ms. Hofmeister also received a Bachelor of Arts degree in international relations from UCLA and a Master of Arts degree in international peace studies from the University of Notre Dame.

Notes:

(1) Chair of the Audit Committee.

BITFARMS LTD.
2023 Annual Information Form

15. COMMITTEES (continued)

15.1 AUDIT COMMITTEE (continued)

Audit Committee Oversight

Since the commencement of the Company's most recently completed financial year, there has not been a recommendation of the Audit Committee to nominate or compensate an external auditor which was not adopted by the Board.

Pre-Approval Policies and Procedures

The Audit Committee is required to pre-approve all audit and non-audit services not prohibited by law to be provided by the independent auditors of the Company.

External Auditor Service Fees

The following table provides details in respect of audit, audit related, tax and other fees billed by the Company's independent registered public accounting firm, in US\$, during the fiscal years ended December 31, 2023 and December 31, 2022.

	Year ended December 31,	
	2023	2022
Audit Fees ⁽¹⁾	\$ 444,000	\$ 651,000
Audit Related Fees ⁽²⁾	\$ 287,000	\$ 310,000
Tax Fees ⁽³⁾	\$ —	\$ 23,000
All Other Fees	\$ —	\$ —
Total	\$ 731,000	\$ 984,000

Notes:

- (1) Aggregate fees billed for professional services rendered by the auditor for the audit of the Company's annual financial statements.
- (2) Aggregate fees billed for professional services rendered by the auditor and consisted primarily of file quality review fees and fees for the review of quarterly financial statements, related documents and consent letters.
- (3) Aggregate fees billed for tax compliance, tax advice and tax planning professional services. These services included reviewing tax returns and assisting in responses to government tax authorities.

15.2 GOVERNANCE AND NOMINATING COMMITTEE

The Board maintains a governance and nominating committee (the "**Governance and Nominating Committee**"). The Governance and Nominating Committee is responsible for: (i) assisting management in developing responsible corporate governance policies and practices for the Company; (ii) overseeing adherence to corporate governance rules, policies and principles; (iii) identifying individuals qualified to be nominated as members of the Board; (iv) the structure and composition of Board committees; (v) evaluating the performance and effectiveness of the Board and its committees; and (vi) overseeing compliance with the Company's Code of Business Conduct and Ethics. The current members of the Governance and Nominating Committee are Edie Hofmeister as Committee chair, Brian Howlett and Andrés Finkielstain.

BITFARMS LTD.

2023 Annual Information Form

15. COMMITTEES (continued)

15.3 COMPENSATION COMMITTEE

The Company's Compensation Committee is responsible for ensuring that Bitfarms has in place an appropriate plan for executive compensation and for making recommendations with respect to the compensation of the Company's executive officers. The Board ensures that compensation paid to named executive officers (NEOs) and executives is fair, reasonable, and consistent with Bitfarms' compensation policies and best practices. The current members of the Compensation Committee are Andres Finkielstain as Committee Chair, Brian Howlett and Emiliano Grodzki.

From time to time the Board reviews, and may approve, recommendations from management regarding compensation for employees senior management and directors. A combination of fixed and variable compensation is used to motivate executive officers and to achieve overall corporate goals. The three basic components of Bitfarms' executive compensation program are:

- Base Salary;
- Short-Term Incentive Plans (bonus); and
- Long-Term Incentive Plans (stock options and restricted share unit-based compensation).

15.4 ENVIRONMENTAL AND SOCIAL RESPONSIBILITY COMMITTEE

The Company's Environmental and Social Responsibility Committee's primary mandate is to assist the Board of Directors in overseeing the Company's programs, policies and practices relating to health and safety, environmental sustainability and corporate social responsibility. The current members of the Environmental and Social Responsibility Committee are Edie Hofmeister as Committee chair, Brian Howlett and Emiliano Grodzki.

The Company has instituted an ESG Steering Committee, comprised of Vice Presidents and managerial-level employees, tasked with the responsibility of formulating, sustaining, and enhancing the Company's initiatives, policies, practices, and disclosures pertaining to ESG. The committee comprises officers and employees from various departments, including Sustainability, Legal, Human Resources, Communications, Information Technology, Finance, and Global Risk Management.

Environment commitment

The Company's current operating facilities, except for Argentina, use primarily renewable, clean energy provided by Hydro-Québec, Hydro-Sherbrooke (Quebec), Hydro-Magog (Quebec), Hydro-Baie-Comeau (Quebec), Grant County Public Utility District (Washington State) and Compañía de Luz y Fuerza Sociedad Anónima "CLYFSA" (Paraguay). To the best of the Company's knowledge, the Company will not incur significant costs or investments in order to comply with provisions relating to environmental protection on its current facilities, besides maintaining the procedures currently applied by it. The Company's facility described in Section 5.2 - ARGENTINA EXPANSION uses natural gas.

15.5 RISK COMMITTEE

The purpose of the Risk Committee is to oversee the activities of the Company in the area of Financial Risk Management and for establishing standards for the risk management processes within the Company.

The Risk Committee is responsible for identifying and assessing market risks, legal risk, liquidity risk, accounting risk, tax risk, operational risk, regulatory risk, compliance risk, technology risk and reputational risk (the "Risks") in connection with the conduct of market operations and the implementation of its strategies.

BITFARMS LTD.

2023 Annual Information Form

15. COMMITTEES (continued)

15.5 RISK COMMITTEE (continued)

Risk capacity, risk appetite, risk tolerance and risk targets and parameters (such as the hedge ratio) are articulated by the Risk Committee and presented to the Board for review and approval.

The Risk Committee is responsible for defining the strategy to address the Risks outlined above within the risk parameters approved by the Board. The Risk Committee is also responsible for operationalizing the strategy and conducting its open market operations competently.

"Financial Risk Management" means, without being limited to, the strategy and processes for implementing hedges to mitigate the risk introduced by the volatility of bitcoin to the Company's operating cash flows and its mining assets.

16. PROMOTERS

The following table sets forth the promoters ("Promoters") of the Company:

Name	Class of Securities Owned	Quantity of Securities Owned	% of Class ⁽¹⁾	Options	Option average exercise price in CAD	RSUs ⁽²⁾
Emiliano Joel Grodzki	Common Shares	6,698,443	2%	2,314,900	\$ 2.12	150,000
Nicolas Bonta	Common Shares	8,625,452	3%	2,304,900	\$ 2.13	66,666
Total		15,323,895		4,619,800		216,666

Note:

- As of March 6, 2024 a total of 339,274,441 Common shares are issued and outstanding.
- Restricted share units ("RSUs")

Certain Promoters have entered into certain non-arm's length transactions with the Company. See Section 11 - INTEREST OF MANAGEMENT AND OTHERS IN MATERIAL TRANSACTIONS - Transactions with Related Parties.

No Promoter was within 10 years before the date of this AIF, a director, chief executive officer, or chief financial officer of any person or company that: (a) was subject to an order that was issued while the Promoter was acting in the capacity as director, chief executive officer or chief financial officer; or (b) was subject to an order that was issued after the Promoter ceased to be a director, chief executive officer or chief financial officer and which resulted from an event that occurred while the Promoter was acting in the capacity as director, chief executive officer or chief financial officer.

No Promoter has: (a) been within the 10 years before the date of this AIF, a director or executive officer of any person or company that, while the Promoter was acting in that capacity, or within a year of that person ceasing to act in that capacity, became bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency or was subject to or instituted any proceedings, arrangement or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold its assets, state the fact; or (b) become bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency, or became subject to or instituted any proceedings, arrangement or compromise with creditors, or had a receiver, receiver manager or trustee appointed to hold the assets of the promoter, state the fact.

No Promoter has been subject to: (a) any penalties or sanctions imposed by a court relating to provincial and territorial securities legislation or by a provincial and territorial securities regulatory authority or has entered into a settlement agreement with a provincial and territorial securities regulatory authority; or (b) any other penalties or sanctions imposed by a court or regulatory body that would be likely to be considered important to a reasonable investor in making an investment decision.

BITFARMS LTD.

2023 Annual Information Form

17. REGULATORY COMPLIANCE

The Company has engaged legal counsel in each jurisdiction in which it maintains operations to monitor changes to the laws and regulations of such jurisdiction and to advise how it can maintain compliance with such laws and regulations. Legal counsel reports directly to the President and CEO. The following is a description of regulatory compliance considerations specific to each such jurisdiction:

Argentina

The Company operates one 54 MW server farm located in Cordoba, Argentina (with an electrical infrastructure capacity of 55 MW). Refer to Section 7 -*Expansion Projects - A. Argentina Expansion* of the MD&A and this AIF under Section 5.2 - *FUTURE GROWTH PLANS - ARGENTINA EXPANSION*.

There are no material restrictions in Argentina on the business of operating a server farm or conducting the business of the Company as described herein and in this AIF and, as of the date of this AIF, the Company has not received any material notices or statements from regulatory authorities in Argentina that would negatively impact its operations in Argentina. The Company is not relying on any registrations, exemptions, or “no action” letters to conduct its business in Argentina.

Paraguay

The Company operates one 10 MW server farm located in Villarrica, Paraguay. Refer to Section 7 - *Expansion Projects - B. Paraguay Expansion* of the MD&A and this 2023 AIF under Section 5.3 - *FUTURE GROWTH PLANS - PARAGUAY EXPANSION*.

There are no material restrictions in Paraguay on the business of operating a server farm or conducting the business of the Company as described herein and in this AIF and, as of the date of this AIF, the Company has not received any material notices or statements from regulatory authorities in Paraguay that would negatively impact its operations in Paraguay. The Company is not relying on any registrations, exemptions, or “no action” letters to conduct its business in Paraguay.

Washington

The Company operates one 18 MW server farm located in the State of Washington in the United States. Refer to Section 7 -*Expansion Projects - C. Washington Expansion* of the MD&A and this AIF under the Section 5.4 - *FUTURE GROWTH PLANS - WASHINGTON EXPANSION*.

There are no material restrictions in Washington on the business of operating a server farm or conducting the business of the Company as described herein and in this AIF and, as of the date of this AIF, the Company has not received any material notices or statements from regulatory authorities in Washington that would negatively impact its operations in Washington. The Company is not relying on any registrations, exemptions, or “no action” letters to conduct its business in Washington.

Québec

The Company operates a total of eight server farms with an aggregate power capacity of 158 MW located in the Province of Québec, Canada. Refer to Section 7 -*Expansion Projects - D. Canada Expansion* of the MD&A and this AIF under the Section 5.5 - *FUTURE GROWTH PLANS - CANADA EXPANSION*.

There are no material restrictions in Québec or Canada on the business of operating a server farm or conducting the business of the Company as described herein and in this AIF and, as of the date of this AIF, the Company has not received any material notices or statements from regulatory authorities in the Québec or Canada that would negatively impact its operations in Québec or Canada. The Company is not relying on any registrations, exemptions, or “no action” letters to conduct its business in Québec or Canada.

18. ADDITIONAL INFORMATION

Additional information relating to the Company, including financial information in the Company’s Financial Statements and MD&A for Fiscal 2023, is available on SEDAR+ at www.sedarplus.ca and on and on the U.S. Securities and Exchange Commission’s EDGAR website at www.sec.gov/edgar. Moreover, additional information, including directors’ and officers’ remuneration and indebtedness, principal holders of the Company’s securities and securities authorized for issuance under equity compensation plans, if applicable, is contained in the Company’s information circular for its most recent annual meeting of security holders.

BITFARMS LTD. 2023 Annual Information Form

SCHEDULE A

BITFARMS LTD. AUDIT COMMITTEE CHARTER

This charter (the “**Charter**”) sets forth the purpose, composition, responsibilities and authority of the Audit Committee (the “**Committee**”) of the Board of Directors (the “**Board**”) of Bitfarms Ltd. (“**Bitfarms**” or the “**Corporation**”).

1. Mandate

The Committee shall:

assist the Board in its oversight role with respect to the quality and integrity of the Corporation’s financial statements, financial reporting processes, and systems of internal controls and disclosure controls regarding risk management, finance, accounting and legal and regulatory compliance;

- a) assess the effectiveness of the Corporation’s risk management and compliance practices;
- b) assess the independent auditor’s performance, qualifications and independence;
- c) assess the performance of the Corporation’s internal audit function; review the periodic audits performed by the independent auditor and the Corporation’s internal accounting department;
- d) review the Corporation’s financial statements, management discussion and analysis and annual and interim earnings press release before the Corporation publicly discloses such information;
- e) ensure the Corporation’s compliance with legal and regulatory requirements; and
- f) prepare all filings and disclosure documents required to be prepared by the Committee and/or the Board pursuant to all applicable federal, provincial and state securities legislation and the rules and regulations of all securities commissions having jurisdiction over the Corporation.

Despite the foregoing, it is not the duty of the Committee to plan or conduct audits, or to determine that the Company's financial statements are complete and accurate or in accordance with generally accepted accounting principles, accounting standards or applicable laws and regulations. This is the responsibility of the Corporation's management, internal accounting department and independent auditors. The primary function of the Committee is oversight, and it is therefore entitled to rely on the expertise, skills and knowledge of the Corporation's management, internal accounting department, independent auditors and other external advisors and the integrity and accuracy in information provided by such persons or entities. Nothing in this Charter is intended to change or in any way limit the responsibilities and duties of the Corporation's management, internal accounting department, or independent auditors.

2. Composition and Membership

The committee shall be composed of not less than three members, each of whom shall be a director of the Corporation. All members of the Committee shall not be an officer or employee of the Corporation, and shall satisfy the applicable independence and experience requirements of the laws governing the Corporation, the applicable stock exchanges on which the Corporation's securities are listed and applicable securities regulatory authorities.

Each member of the Committee shall be financially literate as such qualification is interpreted by the Board in its business judgment. At least one member of the Committee will qualify as an audit committee financial expert as defined by the U.S. Securities and Exchange Commission (the "SEC").

90 | Page

BITFARMS LTD. 2023 Annual Information Form

Members of the Committee shall be appointed or reappointed at the annual meeting of the Corporation and, in the normal course of business, will serve a minimum of three years. Each member shall continue to be a member of the Committee until a successor is appointed, unless the member resigns, is removed, ceases to be a director or ceases to meet the requirements established by any applicable securities regulatory authority, including but not limited to the Ontario Securities Commission and the Securities and Exchange Commission of the United States of America. The Board may fill a vacancy that occurs in the Committee at any time.

The Board or, in the event of its failure to do so, the members of the Committee, shall appoint or reappoint, at the annual meeting of the Corporation, a Chair among their number. The Chair shall not be a former Officer of the Corporation. Such Chair shall serve as a liaison between members and senior management.

The time and place of meetings of the Committee and the procedure at such meetings shall be determined from time to time by the members provided that:

- a) a quorum for meetings shall be a majority of the members, present in person or by telephone or other telecommunication device that permits all persons participating in the meeting to speak or hear each other;
- b) the Committee shall meet at least quarterly;
- c) notice of the time and place of every meeting shall be given in writing or by telephone, facsimile, email or other electronic communication to each member of the Committee at least 24 hours in advance of such meeting;
- d) the Committee shall direct management to maintain minutes or other records of meetings and activities of the Committee and shall ensure minutes are kept in sufficient detail to convey the substance of all discussions held. Upon approval of the minutes by the Committee, the minutes shall be circulated to members of the Board; and
- e) The independent auditor is entitled to attend and be heard at each Committee meeting, and in addition, the Committee may invite to a meeting any officers or employees of the Corporation, legal counsel, advisors and other persons whose attendance it considers necessary or desirable in order to carry out its responsibilities;

The Committee may act by unanimous written consent in lieu of a meeting.

The Committee shall report to the Board on its activities after each of its meetings. The Committee shall review and assess the adequacy of this charter annually and, where necessary, recommend changes to the Board for its approval. The Committee shall undertake and review with the Board an annual performance evaluation of the Committee, which shall assess the performance of the Committee against the requirements of this charter. The performance evaluation by the Committee shall be conducted in such manner as the Committee deems appropriate. The report to the Board of Directors may take the form of an oral report by the chairperson of the Committee or any other designated member of the Committee.

3. Duties and Responsibilities

3.1 Oversight of the Independent Auditor

- a) Sole authority to recommend to the Board for its approval, the appointment or replacement of the independent auditor and its compensation (subject to shareholder ratification) and responsibility for the oversight of the work of the independent auditor (including resolution of disagreements between company management ("Management") and the independent auditor regarding financial reporting) for the purpose of preparing or issuing an audit report or related work. The independent auditor shall report directly to the Committee;

91 | Page

BITFARMS LTD. 2023 Annual Information Form

- b) Sole authority to pre-approve all audit services as well as non-audit services (including the fees, terms and conditions for the performance of such services) to be performed by the independent auditor;
- c) Evaluate the qualifications, performance and independence of the independent auditor, including (i) reviewing and evaluating the lead partner on the independent auditor's engagement with the Corporation, and (ii) considering whether the auditor's quality controls are adequate and the provision of permitted non-audit services is compatible with maintaining the auditor's independence;

- d) Obtain and review a report from the independent auditor at least annually regarding: the independent auditor's internal quality-control procedures; any material issues raised by the most recent internal quality-control review, or peer review, of the firm, or by any inquiry or investigation by governmental or professional authorities within the preceding five years respecting one or more independent audits carried out by the firm; any steps taken to address any such issues; and all relationships between the independent auditor and the Corporation;
- e) Review and discuss with Management and the independent auditor prior to the annual audit the scope, planning and staffing of the annual audit;
- f) Ensure the rotation of the lead (or coordinating) audit partner having primary responsibility for the audit and the audit partner responsible for reviewing the audit as required by law; and
- g) Review as necessary policies for the Corporation's hiring of partners, employees or former partners and employees of the independent auditor.

3.2 Financial Reporting

- a) Review and discuss with Management and the independent auditor the annual audited financial statements prior to the publication of earnings.
- b) Review and discuss with Management the Corporation's annual and quarterly disclosures made in Management's Discussion and Analysis. The Committee shall approve any reports for inclusion in the Corporation's Annual Information Form, as required by applicable law.
- c) Review and discuss with Management and the independent auditor Management's report on its assessment of internal controls over financial reporting and the independent auditor's attestation report on Management's assessment, if required.
- d) Review and discuss with Management the Corporation's quarterly financial statements prior to the publication of earnings.
- e) Review and discuss with Management and the independent auditor at least annually significant financial reporting issues and judgments made in connection with the preparation of the Corporation's financial statements, including any significant changes in the Corporation's selection or application of accounting principles, any major issues as to the adequacy of the Corporation's internal controls and any special steps adopted in light of material control deficiencies.
- f) Review and discuss with Management and the independent auditor at least annually reports from the independent auditors on: critical accounting policies and practices to be used; significant financial reporting issues, estimates and judgments made in connection with the preparation of the financial statements; alternative treatments of financial information within generally accepted accounting principles that have been discussed with Management, ramifications of the use of such alternative disclosures and treatments, and the treatment preferred by the independent auditor; and other material written communications between the independent auditor and Management, such as any management letter or schedule of unadjusted differences.
- g) Discuss with the independent auditor at least annually any "Management" or "internal control" letters issued or proposed to be issued by the independent auditor to the Corporation.

BITFARMS LTD.

2023 Annual Information Form

- h) Review and discuss with Management and the independent auditor at least annually any significant changes to the Corporation's accounting principles and practices suggested by the independent auditor, internal audit personnel or Management.
- i) Discuss with Management the Corporation's earnings press releases, including the use of "pro forma" or "adjusted" non-GAAP information, as well as financial information and earnings and revenue guidance (if any) provided to analysts and rating agencies.
- j) Review and discuss with Management and the independent auditor at least annually the effect of regulatory and accounting initiatives as well as off-balance sheet structures on the Corporation's financial statements.
- k) Review and discuss with the Chief Executive Officer and the Chief Financial Officer the procedures undertaken in connection with the Chief Executive Officer and Chief Financial Officer certifications for the annual filings with applicable securities regulatory authorities.
- l) Review disclosures made by the Corporation's Chief Executive Officer and Chief Financial Officer during their certification process for the annual filing with applicable securities regulatory authorities about any significant deficiencies in the design or operation of internal controls which could adversely affect the Corporation's ability to record, process, summarize and report financial data or any material weaknesses in the internal controls, and any fraud involving Management or other employees who have a significant role in the Corporation's internal controls.
- m) Discuss with the Corporation's Corporate Secretary at least annually any legal matters that may have a material impact on the financial statements, operations, assets or compliance policies and any material reports or inquiries received by the Corporation or any of its subsidiaries from regulators or governmental agencies.

3.3 Oversight of Risk Management

- a) Review and approve periodically Management's risk philosophy and risk management policies.
- b) Review with Management at least annually reports demonstrating compliance with risk management policies.
- c) Review with Management the quality and competence of Management appointed to administer risk management policies.
- d) Review reports from the independent auditor at least annually relating to the adequacy of the Corporation's risk management practices together with Management's responses.
- e) Discuss with Management at least annually the Corporation's major financial risk exposures and the steps Management has taken to monitor and control such exposures, including the Corporation's risk assessment and risk management policies.

3.4 Oversight of Regulatory Compliance

- a) Establish procedures for the receipt, retention and treatment of complaints received by the Corporation regarding accounting, internal accounting controls or auditing matters, and the confidential, anonymous submission by employees of concerns regarding questionable accounting or auditing matters.
- b) Discuss with Management and the independent auditor at least annually any correspondence with regulators or governmental agencies and any published reports which raise material issues regarding the Corporation's financial statements or accounting.
- c) Meet with the Corporation's regulators, according to applicable law.
- d) Exercise such other powers and perform such other duties and responsibilities as are incidental to the purposes, duties and responsibilities specified herein and as may from time to time be delegated to the Committee by the Board.

BITFARMS LTD.
2023 Annual Information Form

4. Funding for the Independent Auditor and Retention of Other Independent Advisors

The Corporation shall provide for appropriate funding, as determined by the Committee, for payment of compensation to the independent auditor for the purpose of issuing an audit report and to any advisors retained by the Committee. The Committee shall also have the authority to retain and, at

Bitfarms' expense, to set and pay the compensation for such other independent counsel and other advisors as it may from time to time deem necessary or advisable for its purposes. The Committee also has the authority to communicate directly with internal and external auditors.

5. Procedures for Receipt of Complaints and Submissions Relating to Accounting Matters

- a) The Corporation has adopted a Whistleblower Policy (the "**Whistleblower Policy**"), copies of which shall be made available to directors, officers, employees, consultants and contractors of the Company, either directly or by posting to the Bitfarms website at www.bitfarms.com. The Corporation shall inform employees on the Corporation's intranet, if there is one, or via a newsletter or e-mail that is disseminated to all employees at least annually, about the Whistleblower Policy. Pursuant to the Whistleblower Policy, any person with a complaint or concern regarding a financial matter (or other matter relating to the Corporation) may submit anonymous complaints or concerns via an independent third-party platform (the "**Complaints Platform**") available at <http://bitfarms.ethicspoint.com/> or <http://bitfarmsmobile.ethicspoint.com/> or by telephone at 1-844-992-4862 toll-free, within the United States, Guam, Puerto Rico and Canada which are accessible 24 hours a day, 7 days a week.
- b) The Committee will ensure the Whistleblower Policy provides review procedures for: (a) the receipt, retention and resolution of complaints received by the listed issuer regarding accounting, internal accounting controls, or auditing matters; and (b) The confidential, anonymous submission by employees of concerns regarding questionable accounting or auditing matters.
- c) Upon receipt of a report from through the Whistleblower reporting mechanism, the Committee shall discuss the report and take such steps as the Committee may deem appropriate. Any reports so received will be kept confidential and the identity of employees making complaints or submissions shall only be communicated to the Committee or the Chair of the Committee.
- d) Such reports or submissions shall be reported to the Committee as frequently as the Committee deems appropriate, but in any event no less frequently than on a quarterly basis prior to the quarterly meetings of the Committee called to approve interim and annual financial statements of the Corporation.
- e) The Committee will inform the Board of the filed complaints or concerns at regularly scheduled meetings (unless they are unfounded or unless the materiality of the complaint requires earlier action).
- f) The Chair of the Committee, or other person designated by such, shall retain a record of complaint or submission received for a period of six years following resolution of the complaint or submission.

6. Procedures for Approval of Non-Audit Services

6.1 The Corporation's external auditors shall be prohibited from performing for the Corporation the following categories of non-audit services:

- a) bookkeeping or other services related to the Corporation's accounting records or financial statements;
- b) financial information systems design and implementation;
- c) appraisal or valuation services, fairness opinion or contributions-in-kind reports;
- d) actuarial services;

BITFARMS LTD.
2023 Annual Information Form

- e) internal audit outsourcing services;
- f) management functions;
- g) human resources;

- h) broker or dealer, investment adviser or investment banking services;
 - i) legal services;
 - j) expert services unrelated to the audit; and
 - k) any other service that the Canadian Public Accountability Board determines is impermissible.
- 6.2 In the event that the Corporation wishes to retain the services of the Corporation's external auditors for tax compliance, tax advice or tax planning, the Chief Financial Officer of the Corporation shall consult with the Chair of the Committee, who shall have the authority to approve or disapprove on behalf of the Committee, such non-audit services. All other non-audit services shall be approved or disapproved by the Committee as a whole.
- 6.3 The Chief Financial Officer of the Corporation shall maintain a record of non-audit services approved by the Chair of the Committee or the Committee for each fiscal year and provide a report to the Committee no less frequently than on a quarterly basis.

7. Reporting

The Chair will report to the Board at each Board meeting on the Committee's activities since the last Board meeting. The Committee will annually review and approve the Committee's report for inclusion in the Annual Information Form. The Secretary will circulate the minutes of each meeting of the Committee to the members of the Board.

8. Access to Information and Authority

The Committee will be granted unrestricted access to all information regarding Bitfarms that is necessary or desirable to fulfill its duties and all directors, officers and employees will be directed to cooperate as requested by Members.

9. Review of Charter

The Committee will annually review and assess the adequacy of this Charter and recommend any proposed changes to the Board for consideration.

BITFARMS LTD.
REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Bitfarms Ltd.

Opinion on the Financial Statements

We have audited the accompanying consolidated statements of financial position of Bitfarms Ltd. and its subsidiaries (together, the Company) as of December 31, 2023 and 2022, and the related consolidated statements of profit or loss and comprehensive profit or loss, changes in equity and cash flows for the years then ended, including the related notes (collectively referred to as the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and its financial performance and its cash flows for the years then ended in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Restatement of Previously Issued Financial Statements

As discussed in Note 3(e) to the consolidated financial statements, the Company has restated its 2022 financial statements to correct errors.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these consolidated financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 1: NATURE OF OPERATIONS

Bitfarms Ltd. was incorporated under the Canada Business Corporations Act on October 11, 2018 and continued under the Business Corporations Act (Ontario) on August 27, 2021. The consolidated financial statements of the corporation comprise the accounts of Bitfarms Ltd. and its wholly-owned subsidiaries (together referred to as the “Company” or “Bitfarms”). The common shares of the Company are listed on the Nasdaq Stock Market and the Toronto Stock Exchange (NASDAQ/TSX: BITF). Its registered office is located on 110 Yonge Street, Suite 1601, Toronto, Ontario, Canada, M5C 1T4.

The activities of the Company mainly consist of selling its computational power used for hashing calculations for the purpose of cryptocurrency mining in multiple jurisdictions as described in Note 29 “Geographical Information”. The Company’s operations are currently located in Canada, the United States, Argentina and Paraguay. Volta, a wholly-owned subsidiary of the Company, assists the Company in building and maintaining its server farms and provides electrician services to both commercial and residential customers in Quebec.

Bitfarms owns and operates server farms comprised of computers (referred to as “Miners”) designed for the purpose of validating transactions on the Bitcoin Blockchain (referred to as “Mining”). Bitfarms generally operates its Miners 24 hours a day, which produce computational power used for hashing calculations (measured by hashrate) that Bitfarms sells to a Mining Pool under a formula-driven rate commonly known in the industry as Full Pay Per Share (“FPPS”). Under FPPS, Mining Pools compensate Mining companies for their computational power used for hashing calculations, measured through hashrate, based on what the Mining Pool would expect to generate in revenue for a given time period if there was no randomness involved. The fee paid by a Mining Pool to Bitfarms for its computational power used for hashing calculations may be in cryptocurrency, U.S. dollars, or another currency. However, the fees are generally paid to the Company in BTC on a daily basis. Bitfarms accumulates the cryptocurrency fees it receives or exchanges them for U.S. dollars through reputable and established cryptocurrency trading platforms.

Terms and definitions

In these financial statements, the terms below have the following definitions:

	Term	Definition
1	Backbone	Backbone Hosting Solutions Inc.
2	Volta	9159-9290 Quebec Inc.
3	Backbone Argentina	Backbone Hosting Solutions SAU
4	Backbone Paraguay	Backbone Hosting Solutions Paraguay SA
5	Backbone Mining	Backbone Mining Solutions LLC
6	Orion	Orion Constellation Technologies Inc.
7	BTC	Bitcoin
8	BVVE	Blockchain Verification and Validation Equipment (primarily Miners)
9	CAD	Canadian Dollars
10	USD	U.S. Dollars
11	ARS	Argentine Pesos

8 | Page

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2: LIQUIDITY

Bitfarms is primarily engaged in the cryptocurrency Mining industry, a highly volatile industry subject to significant inherent risk. Declines in the market prices of cryptocurrencies, an increase in the difficulty of BTC mining, delays in the delivery of Mining equipment, changes in the regulatory environment and adverse changes in other inherent risks can significantly and negatively impact the Company's operations and cash flows and its ability to maintain sufficient liquidity to meet its financial obligations. Adverse changes to the factors mentioned above have impacted the recoverability of the Company's digital assets and property, plant and equipment, resulting in impairment losses being recorded.

The Company's current operating budget and future estimated cash flows indicate that the Company will generate positive cash flow in excess of the Company's cash commitments within the twelve-month period. These analyses are based on BTC market factors including price, difficulty and network hashrate, for the twelve-month period following the date these consolidated financial statements were authorized for issuance.

A BTC Halving is scheduled to occur once every 210,000 blocks, or roughly every four years, until the total amount of BTC rewards issued reaches 21 million, which is expected to occur around 2140. The next BTC Halving is expected to occur in April 2024, at which time BTC block rewards will decrease from 6.25 BTC per block to 3.125 BTC per block. Once 21 million BTC are generated on or about the year 2140, the network will stop producing more BTC, and the industry will then need to rely on transaction fees and/or other sources of revenue. While BTC prices have had a history of significant fluctuations around BTC Halving events, there is no guarantee that the price change will be favorable or would compensate for the reduction in Mining rewards and the compensation from Mining Pools.

At current BTC prices, the Company's existing cash resources and the proceeds from any sale of its BTC treasury and BTC earned may not be sufficient to fund capital investments to support its growth objectives. If the proceeds from the sale of BTC are not sufficient, the Company would be required to raise additional funds from external sources to meet these requirements. There is no assurance that the Company will be able to raise such additional funds on acceptable terms, if at all.

If the Company raises additional funds by issuing securities, existing shareholders may be diluted. If the Company is unable to obtain financing from external sources or issuing securities, or if funds from operations and proceeds from any sale of the Company's BTC holdings are negatively impacted by the BTC price, the Company may have difficulty meeting its payment obligations.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION

The following accounting policies have been applied consistently in the consolidated financial statements for all periods presented unless otherwise stated.

a. Basis of presentation of the financial statements

The consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards"). These consolidated financial statements were approved and authorized for issue by the Board of Directors on March 6, 2024.

The consolidated financial statements have been prepared on a cost basis, except for derivative financial instruments and digital assets that are measured at fair value. The consolidated financial statements are presented in U.S. dollars and all values are rounded to the nearest thousand, except where otherwise indicated.

b. Material accounting policy information

Presentation of profit and loss

The Company has elected to present the profit or loss items using the function of expense method.

The operating cycle

The operating cycle of the Company is to exchange computational power used for hashing calculations for digital assets and then routinely deposit them into custody, or convert them to fiat currency as needed. The Company's activities have a one-year operating cycle. Accordingly, the assets and liabilities are classified in the statement of financial position as current assets and liabilities based on the Company's operating cycle.

Consolidated financial statements

These financial statements consolidate the Company's subsidiaries from the date of acquisition until the date that control is lost. The subsidiaries are controlled by the Company, where control is achieved when the Company is exposed to or has the right to variable returns from its involvement with the investee and has the current ability to direct the activities of the investee that significantly affect the investee's returns.

The financial statements of the Company and its subsidiaries are prepared as of the same dates and periods. The consolidated financial statements are prepared using uniform accounting policies by all subsidiaries of the Company. Significant intercompany balances and transactions and gains or losses resulting from intercompany transactions are eliminated in full in the consolidated financial statements.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

b. Material accounting policy information (Continued)

Goodwill

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interests and any previous interest held over the fair value of the net identifiable assets acquired and liabilities assumed).

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Company's cash-generating units ("CGUs") or group of CGUs that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A CGU or group of CGUs to which goodwill has been allocated are tested for impairment annually or more frequently when there is an indication that the CGU or group of CGUs may be impaired. If the recoverable amount of the CGU or group of CGUs is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the CGU or group of CGUs and then to the other assets of the CGU or group of CGUs on a pro-rata basis of the carrying amount of each asset in the CGU or group of CGUs. An impairment loss recognized for goodwill is not reversed in a subsequent period. The Company has designated December 31 as the date for its annual impairment test.

Foreign currency translation

i. Functional currency and presentation currency

The financial statements are presented in U.S. Dollars, which is the functional currency of the parent company, as well as the functional currency of Backbone, Backbone Argentina, Backbone Paraguay, Backbone Mining and Orion. The functional currency is the currency that best reflects the economic environment in which the Company operates and conducts its transactions.

The Company determines the functional currency of each subsidiary. Volta, a Canadian subsidiary, has a Canadian functional currency, and, as such, assets and liabilities are translated using the exchange rate in effect at each reporting date. Revenues and expenses are translated using the average exchange rates in effect for all periods presented. The resulting translation differences are included in other comprehensive income. The translation differences on foreign currency translation of Volta were immaterial for the years ended December 31, 2023 and December 31, 2022.

ii. Transactions, assets and liabilities in foreign currency

Transactions in foreign currency are initially recorded at the exchange rate in effect on the transaction date. Monetary assets and liabilities in foreign currency are subsequently translated into the functional currency at the exchange rate in effect at each reporting date. Exchange rate differences, other than those capitalized to qualifying assets or carried to equity in hedging transactions, are included in profit or loss. Non-monetary assets and liabilities in foreign currency stated at cost are translated at the exchange rate in effect at the transaction date. Non-monetary assets and liabilities in foreign currency carried at fair value are translated at the exchange rate at the date on which the fair value was determined.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

b. Material accounting policy information (Continued)

Revenue recognition

Revenue from contracts with customers is recognized when control over the goods or services is transferred to the customer. The transaction price is the amount of the consideration that is expected to be received based on the contract terms, excluding amounts collected on behalf of third parties (such as taxes). The following are the specific revenue recognition criteria which must be met before revenue is recognized:

i. Revenues from sale of computational power used for hashing calculations

The Company has entered into arrangements with a Mining pool and has undertaken the performance obligation of providing computing power used for hashing calculations to the Mining pool in exchange for non-cash consideration in the form of cryptocurrency, which is variable consideration. The cryptocurrency earnings are calculated based on a formula which, in turn, is based on the hashrate contributed by the Company's provided computing power used for hashing calculations allocated to the Mining pool, assessed over a 24-hour period, and distributed daily based on the FPPS methodology. The Company assesses the estimated amount of the variable non-cash consideration to which it expects to be entitled for providing computational power used for hashing calculations at contract inception and subsequently measures if it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur. The uncertainties regarding the daily variable consideration to which the Company is entitled for providing its computational power used for hashing calculations are no longer constrained at 23:59:59 UTC regardless of the timing of the BTC received. The amount earned is calculated based on the Company's computing power used for hashing calculations provided to the Mining pool and the estimated (i) block subsidies and (ii) daily average transaction fees which the Mining Pool expects to earn, less (iii) a Mining pool discount.

(i) Block subsidies refers to the block reward that are expected to be generated on the BTC network as a whole. The fee earned by the Company is first calculated by dividing (a) the total amount of hashrate the Company provides to the Mining pool operator, by (b) the total BTC network's implied hashrate (as determined by the BTC network difficulty), multiplied by (c) the total amount of block subsidies that are expected to be generated on the BTC network as a whole.

(ii) Transaction fees refers to the total fees paid by users of the network to execute transactions. The fee paid out by the Mining pool operator to the Company is further calculated by dividing (a) the total amount of transaction fees that are actually generated on the BTC network as a whole less the 3 largest and 3 smallest transactions per block, by (b) the total amount of block subsidies that are actually generated on the BTC network as a whole, multiplied by (c) the Company's fee earned as calculated in (i) above. The Company is entitled to its relative share of consideration even if a block is not successfully added to the blockchain by the mining pool.

(iii) Mining pool discount refers to the discount applied to the total FPPS payout otherwise attributed to computing power service providers for their sale of computing power used for hashing calculations as defined in the rate schedule of the agreement with the Mining pool operator.

The Company is entitled to the fee from the Mining Pool as calculated above regardless of the actual performance of the Mining Pool operator. Therefore, even if the Mining Pool does not successfully add any block to the blockchain in a given contract period, the fee remains payable by the Mining Pool to the Company. Accordingly, the Company is not sharing in the earnings of the Mining pool operator.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

b. Material accounting policy information (Continued)

Revenue recognition (Continued)

i. Revenues from sale of computational power used for hashing calculations (Continued)

The Company's agreements with the Mining pool operator provide the Mining pool operator and the Company with the enforceable right to terminate the contract at any time without substantively compensating the other party for the termination. Upon termination, the Mining pool operator is required to pay the Company the amount due related to previously satisfied performance obligations. As a result, the Company has determined that the duration of the contract is less than 24 hours and the contract is continuously renewed throughout the day. The Company has also determined that the Mining pool operator's renewal right is not a material right as the terms, conditions, and compensation amounts are at then-current market rates.

The cryptocurrency earned is received in full and can be paid in fractions of cryptocurrency. Revenues from providing cryptocurrency computational power used for hashing calculations are recognized upon delivery of the service over a 24-hour period, which generally coincides with the receipt of crypto assets in exchange for the provision of computational power used for hashing calculations and the contract inception date. The Company updates the estimated transaction price of the non-cash consideration received at its fair market value. Management estimates fair value daily based on the quantity of cryptocurrency received multiplied by the price quoted from Coinbase Inc. ("Coinbase") on the day it was received. Management considers the prices quoted on Coinbase to be a level 1 input under IFRS 13, *Fair Value Measurement*.

ii. Revenue from electrical services

The Company, through Volta, sells electrical components and provides electrician installation of those components as well as repair and maintenance services. Revenues are recognized according to the stage of completion of the transaction as of the balance sheet date. The stage of completion is estimated based on the costs incurred for the transaction compared to the estimated cost of completion for the project. Under this method, revenues are recognized in the reporting period in which the services are provided. In the event that the outcome of the contract cannot be measured reliably, the revenues are recognized to the extent of the recoverable expenses incurred.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

b. Material accounting policy information (Continued)

Digital assets

Cryptocurrency on hand at the end of a reporting period, if any, is classified as digital assets, and is accounted for under IAS 38, *Intangible Assets*, as an intangible asset with an indefinite useful life initially measured at cost, deemed to be the fair value upon receipt as described above, and subsequently measured under the revaluation model. Under the revaluation model, increases in the cryptocurrency's carrying amount, determined as the excess of fair value on revaluation over the weighted average cost, are recognized in other comprehensive income, except to the extent that they reverse a revaluation decrease previously recognized in profit or loss. Decreases are recognized in profit or loss, except to the extent that they reverse a revaluation increase previously recognized in other comprehensive income. Once the cryptocurrency is sold, the revaluation increase related to it is transferred from revaluation surplus to retained earnings. The Company revalues its cryptocurrency on hand on a monthly basis and following any significant fair value fluctuations. The fair value of cryptocurrency on hand at the end of the reporting period is calculated as the quantity of cryptocurrency on hand multiplied by the price quoted on Coinbase as of the reporting date.

The Company reports cryptocurrency on hand at the end of the reporting period as digital assets, which are classified as current assets as Management has determined that the cryptocurrency on hand at the end of the reporting period has markets with sufficient liquidity to allow conversion within the Company's normal operating cycle and the Company expects to realize the digital asset within twelve months after the reporting period. The Company presents cryptocurrency pledged as collateral separate from unencumbered cryptocurrency.

Income tax

The income tax expense for the year comprises current and deferred taxes. These taxes are recognized in profit or loss except to the extent they relate to items which are recognized in other comprehensive income or loss or directly in shareholders' equity.

i. Current taxes

The current tax liability is measured using the tax rates and tax laws that have been enacted or substantively enacted by the reporting date as well as adjustments required in connection with tax liabilities in respect of previous years.

ii. Deferred taxes

Deferred taxes are computed in respect of temporary differences between the carrying amounts in the financial statements and the amounts attributed for tax purposes. Deferred taxes are measured at the tax rate that is expected to apply when the asset is realized, or the liability is settled, based on tax laws that have been enacted or substantively enacted by the reporting date.

Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is not probable they will be utilized. Deductible carryforward losses and temporary differences for which deferred tax assets had not been recognized are reviewed at each reporting date and a respective deferred tax asset is recognized to the extent that their utilization is probable.

Taxes that would apply in the event of the disposal of investments in investees have not been taken into account in computing deferred taxes as long as the disposal of the investments in investees is not probable in the foreseeable future.

BITFARMS LTD.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)**b. Material accounting policy information (Continued)****Leases**

The Company assesses at contract inception whether a contract is, or contains, a lease. The determination is based on whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Company as a lessee applies a single recognition and measurement approach for all leases except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets ("ROU assets") representing the right to use the underlying assets.

i. ROU assets

The Company recognizes ROU assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). ROU assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of ROU assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. ROU assets are depreciated over the shorter of the lease term and the estimated useful lives of the assets, as follows:

Asset Class	Depreciation Method	Depreciation period
Leased premises	Straight-line	4-10 years
Vehicles and other	Straight-line	3-5 years
BVVE and Electrical components	Sum of years	5 years

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, the asset is depreciated over the estimated useful life of the asset and is classified with property plant and equipment. Refer to the accounting policies of property, plant and equipment in this note. The ROU assets are also subject to impairment. Refer to the accounting policies of Impairment of non-financial assets in this note.

BITFARMS LTD.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)**b. Material accounting policy information (Continued)****Leases (Continued)***ii. Lease liabilities*

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii. Short-term leases and leases of low value assets

The Company applies the short-term lease recognition exemption to its short-term leases of machinery, equipment and farming facilities (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). The Company also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognized as an expense on a straight-line basis over the lease term.

Assets held for sale

Non-currents assets or a disposal group are classified as held for sale if their carrying amount is expected to be recovered principally through a sale transaction rather than through continuing use. For this to be the case, the assets must be available for immediate sale in their present condition, the Company must be committed to their sale, there must be a program to locate a buyer, and it is highly probable that a sale will be completed within one year from the date of classification. From the date of such initial classification, the assets are no longer depreciated and are presented separately as current assets at the lower of their carrying amount and fair value less costs to sell. The gain or loss on disposition of assets held for sale will be presented separately in other comprehensive income (loss) only when it qualifies as part of discontinued operations.

When an entity no longer plans to sell an asset in a sale transaction, it ceases the classification of the asset as held for sale and measures it at the lower of its carrying amount had it not been classified as held for sale or the recoverable amount of the asset on the date of the decision not to sell the asset.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

b. Material accounting policy information (Continued)

Property, plant and equipment

Property, plant and equipment are carried at cost, including directly attributable costs, less accumulated depreciation, accumulated impairment losses and any related investment grants, and excluding day-to-day servicing expenses. Cost includes spare parts and auxiliary equipment that are used in connection with plant and equipment. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which the item is located.

Property, plant and equipment are depreciated as follows:

Asset Class	Depreciation Method	Depreciation period
BVVE	Sum of years	5 years
Mineral assets *	N/A	N/A
Electrical equipment	Sum of years	5 years
Leasehold improvements	Straight-line	Shorter of the lease term and the expected life of the improvement
Buildings	Declining balance	4%
Vehicles	Declining balance	30%

* From the acquisition of mineral assets in 2018 until their disposal during the year ended December 31, 2023, there has been no production.

The useful life, depreciation method and residual value of an asset are reviewed at least each year-end and any changes are accounted for prospectively as a change in accounting estimate. Depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale and the date that the asset is derecognized.

The sum of years depreciation method is calculated as follows:

	Year 1	Year 2	Year 3	Year 4	Year 5
Rate	5/15	4/15	3/15	2/15	1/15
Percentage	33.33%	26.67%	20.00%	13.33%	6.67%

Intangible assets

Intangible assets consist of acquired software, access rights to electricity, and a below market lease acquired in a business combination used in the Company's cryptocurrency Mining operations. Intangible assets acquired separately are initially measured at cost plus direct acquisition costs. Intangible assets acquired in business combinations are measured at their fair value as of the acquisition date.

Intangible assets, other than access rights to electricity and favorable lease, with a finite useful life are amortized over their useful lives using the sum of years method. Access rights to electricity and favorable leases are amortized using the straight-line method over the lease term of the facility or the access rights period. Intangible assets are reviewed for impairment whenever there is an indication that the asset may be impaired. The amortization period and the amortization method for an intangible asset are reviewed at least at each year end.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

b. Material accounting policy information (Continued)

Intangible assets (Continued)

Intangible assets are amortized as follows:

Asset Class	Amortization Method	Amortization period
Systems software	Sum of years	5 years
Access rights to electricity	Straight-line	Lease term of the facility or the access rights period
Favorable lease	Straight-line	Lease term

i. Systems software

The Company's assets include computer systems comprised of hardware and software. Certain hardware comes pre-installed with firmware. Without this firmware, the hardware could not function and therefore both the hardware and firmware are classified within property, plant and equipment. In contrast, stand-alone software that adds functionality to the hardware is classified as an intangible asset.

The sum of years amortization method for systems software is calculated as follows:

	Year 1	Year 2	Year 3	Year 4	Year 5
Rate	5/15	4/15	3/15	2/15	1/15
Percentage	33.33%	26.67%	20.00%	13.33%	6.67%

ii. Access rights to electricity

The Company's access rights to electricity were obtained from the acquisitions of assets described in Note 5.

Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker, who is responsible for allocating resources and assessing the performance of the operating segments, and which has been identified as the Management team that makes strategic decisions.

Impairment of non-financial assets

The Company evaluates the need to record an impairment of non-financial assets whenever events or changes in circumstances indicate that the carrying amount is not recoverable. If the carrying amount of non-financial assets exceeds their recoverable amount, the assets are reduced to their recoverable amount. The recoverable amount is the higher of fair value less costs of sale and value in use. In measuring value in use, the expected future cash flows are discounted using a pre-tax discount rate that reflects the risks specific to the asset. The recoverable amount of an asset that does not generate independent cash flows is determined for the CGU to which the asset belongs. Impairment losses are recognized in profit or loss.

An impairment loss of an asset, other than goodwill, is reversed only if there have been changes in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. Reversal of an impairment loss, as noted above, shall not be increased above the lower of the carrying amount that would have been determined (net of depreciation or amortization) had no impairment loss been recognized for the asset in prior years and its recoverable amount. The reversal of impairment loss of an asset presented at cost is recognized in profit or loss.

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

b. Material accounting policy information (Continued)

Financial instruments

i. Financial assets

Initial recognition and measurement

Financial assets are initially measured at fair value plus transaction costs that can be directly attributed to the acquisition of the financial asset, except in the case of a financial asset measured at fair value through profit or loss in respect of which transaction costs are charged to profit or loss.

Subsequent measurement

Financial assets presented at amortized cost are subsequently measured using the effective interest rate method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired. The Company's financial assets at amortized cost includes trade receivables and certain items included in other assets. Net changes in financial assets measured at fair value are recognized in the statement of profit or loss. The Company's financial assets at fair value include derivative assets.

Impairment

The Company recognizes an allowance for expected credit losses ("ECLs") for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For trade receivables, the Company applies a simplified approach in calculating ECLs. Therefore, the Company does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date.

The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

b. Material accounting policy information (Continued)

Financial instruments (Continued)

ii. Financial liabilities

Initial recognition and measurement

Financial liabilities are classified at initial recognition at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. The Company's financial liabilities include trade payables, accrued liabilities, warrant liabilities and long-term debt.

Subsequent measurement

Financial liabilities are either measured at fair value through profit or loss or at amortized cost. Financial liabilities measured at fair value through profit or loss included warrant liabilities relating to the private placement described in Note 3e, 10 and 21. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate ("EIR") method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as financial expenses in the statement of profit or loss. This category generally applies to interest-bearing loans and borrowings.

iii. Derecognition of financial assets

Financial assets are derecognized when the contractual rights to receive the cash flows from the financial asset expire, or when the Company transfers the contractual rights to a third party to receive the cash flows from the financial asset or assumes an obligation to pay the cash flows received in full to a third party without significant delay.

iv. Derecognition of financial liabilities

Financial liabilities are derecognized when they are extinguished, which occurs when the obligation defined in the contract is fulfilled, cancelled or expires. A financial liability is fulfilled when the debtor repays the liability by paying cash, providing other financial assets, goods or services, or is otherwise legally released from the liability.

v. Cash flow hedges

The company entered into BTC option contracts to reduce the risk of variability of cash flows resulting from future sales of digital assets. Each BTC option contract meets the definition of a cash flow hedge as per IFRS 9, *Financial Instruments* ("IFRS 9"). IFRS 9 provides a non-compulsory accounting policy choice of hedge accounting. The Company elected to not apply hedge accounting on BTC option contracts. The changes in the fair value of the derivatives are recognized in profit or loss.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

b. Material accounting policy information (Continued)

Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Fair value measurement is based on the assumption that the transaction will take place in the asset's or the liability's principal market, or in the absence of a principal market, in the most advantageous market. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. Fair value measurement of non-financial assets takes into account the ability of a market participant to derive economic benefits from the asset through its best use, or by selling it to another market participant capable of using the asset to its best use.

Assets and liabilities measured at fair value, or whose fair value is disclosed are classified into categories within the fair value hierarchy, based on the lowest level input that is significant to the overall fair value measurement:

Level	Definition
Level 1	Unadjusted quoted prices in an active market of identical assets and liabilities
Level 2	Non-quoted prices included in Level 1 that are either directly or indirectly observable
Level 3	Data that is not based on observable market information, such as valuation techniques without the use of observable market data

Provisions

Provisions represent liabilities to the Company for which the amount or timing is uncertain. Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligations and the amounts can be reliably estimated. When the Company expects that part or all of the expense will be refunded, such as an insurance claim, the refund will be recognized as a separate asset only on the date when there is certainty of receiving the asset. The expense will be recognized in the statement of profit or loss net of the expected refund.

Asset retirement provisions

These provisions relate to Backbone and Backbone Argentina's legal obligation, in relation to its leased properties, to restore the properties to their original condition at the end of the lease period. The provisions are calculated at the present value of the expected costs to settle the obligations using estimated future cash flows discounted at a rate that reflects the risks specific to the obligations. Changes in the estimated future costs, or in the discount rate applied, are recorded as an adjustment of the cost of the related asset.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

b. Material accounting policy information (Continued)

Share-based transactions

Transactions settled with equity instruments

The cost of employee services paid in equity instruments is measured at the fair value of the equity instruments as of the grant date. The fair value is determined using a generally accepted option pricing model. Equity settled transactions with other services providers are measured at the fair value of the goods or services received in return for the equity instruments. The cost of equity-settled transactions is recognized in profit or loss together with a corresponding increase in contributed surplus during the period in which the performance and/or service conditions are to be satisfied and ending on the date on which the relevant employees become entitled to the award ("the vesting period"). The cumulative expense recognized for equity-settled transactions at the end of each reporting period until the vesting date reflects the extent to which the vesting period has expired and Management's best estimate of the number of equity instruments that will ultimately vest.

Expenses related to grants that do not vest are not recognized. Grants where the fair value is determined at the date of the grant based on non-vesting market conditions are treated as vested, assuming all other vesting conditions (service and/or performance) are met.

When the Company modifies the terms of equity-settled transactions, an additional expense is recognized on the date of the modification and is calculated as the increase in the fair value of the compensation granted in excess of the original expense. Cancellation of equity settlement that has not vested is treated as if it had vested on the date of cancellation, with the unrecognized expense recognized immediately. However, if the cancellation is subsequently replaced by a new agreement and is designated as an alternative settlement, then it is treated as a modification of the original agreement as described above.

Earnings per share

Earnings per share is calculated by dividing the net income attributable to the Company's shareholders by the weighted average number of common shares outstanding during the period. Potential common shares are included in the calculation of diluted earnings per share if their effect dilutes earnings per share from continuing operations. Potential common shares that were converted during the period are included in diluted earnings per share only up to the conversion date, and from that date are included in basic earnings per share.

Share capital and issue of a unit of securities

Share capital represents the amount received on the issuance of shares, less issuance costs (net of tax).

The issue of a unit of securities involves the allocation of the proceeds received before issue expenses to the securities issued in the unit based on the following order: financial derivatives and other financial instruments measured at fair value in each period. Fair value is then determined for financial liabilities that are measured at amortized cost. The proceeds allocated to equity instruments are determined to be the residual amount. Issue costs are allocated to each component pro rata to the amounts determined for each component in the unit.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

c. New accounting amendments issued and adopted by the Company

The following amendments to existing standards were adopted by the Company as of January 1, 2023:

Amendments to IAS 1, *Presentation of Financial Statements* ("IAS 1")

Amendments to IAS 1 change the requirements in IAS 1 with regard to disclosure of accounting policies. Applying the amendments, an entity discloses its material accounting policy information instead of its significant accounting policies. Further amendments to IAS 1 explain how an entity can identify material accounting policy information.

Amendments to IAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors* ("IAS 8")

Amendments to IAS 8 replace the definition of a change in accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty."

The adoption by the Company of the amendments listed above did not have a significant impact on the Company's Financial Statements.

d. New accounting amendments issued to be adopted at a later date

The following amendments to existing standards have been issued and are applicable to the Company for its annual period beginning on January 1, 2024:

Amendments to IFRS 16, *Leases* ("IFRS 16")

Amendments to IFRS 16 require a seller-lessee to subsequently measure lease liabilities arising from a leaseback in a manner that does not recognize any amount of the gain or loss that relates to the right-of-use retained. The new requirements do not prevent a seller-lessee from recognizing in profit or loss any gain or loss relating to the partial or full termination of a lease.

Amendments to IAS 1

Amendments to IAS 1 clarify how to classify debt and other liabilities as current or non-current. The amendments help to determine whether, in the consolidated financial statements, debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current. The amendments also include clarifying the classification requirements for debt that an entity might settle by converting into equity.

Amendments to IAS 1 specify that covenants to be complied with after the reporting date do not affect the classification of debt as current or non-current at the reporting date. Instead, the amendments require information about these covenants be disclosed in the notes to the financial statements.

Amendments to IAS 7, *Statement of Cash Flows* ("IAS 7") and IFRS 7, *Financial Instruments: Disclosures* ("IFRS 7")

Amendments to IAS 7 and IFRS 7 introduce disclosure requirements to enhance the transparency of supplier finance arrangements and their effects on an entity's liabilities, cash flows and exposure to liquidity risk.

The Company is currently evaluating the impact of adopting the amendments on the Company's consolidated financial statements.

NOTE 3: BASIS OF PRESENTATION AND MATERIAL ACCOUNTING POLICY INFORMATION (Continued)

e. 2022 Restatement

During the year ended December 31, 2023, the Company identified errors in its accounting for warrants issued in connection with certain private placement financings in

2021. The warrants are convertible for a fixed number of common shares of the Company but have a contingent cashless exercise clause, which results in a classification as a financial liability and measurement at fair value through profit and loss, not equity.

The effects of the restatement on the affected financial statement line items for the prior periods are as follow:

Consolidated statements of financial position extract as of January 1, 2022 - Restatement

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 4: SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of the consolidated financial statements requires Management to undertake judgments, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. These judgments and estimates are based on Management's best knowledge of the events or circumstances and actions the Company may take in the future. The actual results may differ from these assumptions and estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to assumptions and estimates are recognized in the period in which the assumption or estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods. Information about the significant judgments, estimates and assumptions that have the most significant effect on the recognition and measurement of assets, liabilities, income and expenses are discussed below.

a. Judgements***Going concern***

The Company has exercised judgment and used assumptions to determine that it will continue to operate as a going concern. Judgments and estimates were used to determine the Company's future estimated cash flows for the twelve-month period following December 31, 2023, based on BTC market factors, including price, difficulty and network hashrate. Due to the sensitivity of cash flows to market conditions, small changes in these assumptions may give rise to the determination that there are material uncertainties.

Revenue recognition

There is currently no specific guidance for cryptocurrencies under IFRS Accounting Standards. However, judgement is still required due to the particular characteristics of mining cryptocurrencies. The Company applies judgement to account for the revenue recognition from cryptocurrency mining. In the event that new guidance is issued by the International Accounting Standards Board, the Company may be required to change its accounting policies, which could have a material effect on the Company's financial statements.

Digital assets

There is currently no specific guidance for cryptocurrencies under IFRS Accounting Standards. However, judgement is still required due to the particular characteristics of holding cryptocurrencies. The Company applies judgement to account for the subsequent remeasurement of cryptocurrencies held under IAS 38, *Intangible Assets*. In the event that new guidance is issued by the International Accounting Standards Board, the Company may be required to change its accounting policies, which could have a material effect on the Company's financial statements.

b. Estimates and assumptions***Leases***

The application of IFRS 16 requires the Company to make judgments and estimates that affect the valuation of the lease liabilities and the valuation of ROU assets. These include the determination of contracts in scope of IFRS 16, the lease term and the interest rate used for discounting future cash flows.

The Company measures the lease liability at the present value of the lease payments using the implicit interest rate in the lease at the commencement of a new lease or when a lease is modified. If the rate cannot be readily determined, the Company evaluates its incremental borrowing cost using assumptions and estimates.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 4: SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES (Continued)

b. Estimates and assumptions (Continued)***Leases (Continued)***

The Company determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease if it is reasonably certain not to be exercised. The Company has the option under some of its leases to lease the assets for additional terms of three to ten years. The Company applies judgement in evaluating whether it is reasonably certain to exercise the option to renew and it considers all relevant factors that create an economic incentive for it to exercise the renewal.

After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise (or not to exercise) the option to renew (e.g., a change in business strategy). The Company includes the renewal period as part of the lease term for leases of most farming facilities due to the significance of those assets to its operations. The Company has not included renewal periods for farming facilities when the lease term exceeds 10 years from the commencement of the lease.

Property, plant and equipment and intangible assets

Estimates of useful lives, residual values and methods of depreciation are reviewed annually. Any changes based on additional available information are accounted for prospectively as a change in accounting estimate.

Goodwill

Determining whether goodwill is impaired requires an estimation of the recoverable amount of the CGU or group of CGUs. Such recoverable amount corresponds, for the purpose of impairment assessment, to the higher of the value in use or the fair value less costs of disposal of the CGU or group of CGUs to which goodwill has been allocated.

The value in use calculation requires Management to estimate future cash flows expected to arise from the CGU or group of CGUs and a suitable discount rate to calculate present value. The key assumptions required for the value in use estimation are the revenue per terahash, energy prices, discount rate and the terminal value.

For the value in use approach, the values assigned to key assumptions reflect past experience and external sources of information that are deemed accurate and reliable. The value in use is categorized as Level 3 in the fair value hierarchy described under IFRS 13, *Fair Value Measurement*, as one or more key assumptions used is based on unobservable data requiring the use of judgement.

When using the value in use approach, cash flows for each CGU or group of CGUs are derived from the budget for the upcoming year, which is approved on an annual basis by members of the Company's Board of Directors, and a long-term forecast prepared by Management which covers an additional period from 4 to 5 years. The discount rate

is derived from the Company's pre-tax weighted average cost of capital and is adjusted, where applicable, to take into account any specific risks. When applicable, Management estimated the terminal value of the Miners included in the CGU for the purposes of the impairment testing based on the daily revenue per Terahash in effect at the end of the value in use calculation multiplied by the ending hashrate for a period of time.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 4: SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES (Continued)

b. Estimates and assumptions (Continued)

Impairment and reversal of impairment of non-financial assets

The Company reviews the need for recording impairment of mineral assets, as detailed in Note 12, for which purpose it engaged an independent external appraiser to assist in determining the value of the assets. The fair value was determined through the use of the market approach, which includes analyzing similar and comparable mineral properties and making adjustments for differences between those properties and the subject property among certain identifiable parameters.

Management exercises significant judgement in estimating the inputs used to determine the value in use of its equipment and construction prepayments, property, plant and equipment, right-of-use assets and intangible assets. When there is any indication that any tangible and intangible assets other than goodwill have incurred an impairment loss, the determination of the recoverable amount of such tangible and intangible assets other than goodwill requires Management to estimate cash flows expected to arise from those assets and a suitable discount rate in order to calculate the present value in a manner described above for goodwill.

Contingent Liability

Contingent liability is an existing condition, situation, or set of circumstances involving uncertainty as to a possible loss that will ultimately be resolved when one or more future events occur or fail to occur. The Company is party to various legal proceedings, claims, and regulatory, tax or government inquiries and investigations that arise in the ordinary course of business. In assessing loss contingencies related to legal proceedings that are pending against the Company or unasserted claims that may result in such proceedings, the Company, with assistance from its legal counsels, evaluates the perceived merits of any legal proceedings or unasserted claims as well as the perceived merits of the amount of relief sought or expected to be sought. A provision for legal claims against the Company is recorded when the Company has a present legal or constructive obligation as a result of past events, and that is more likely than not to be settled with an outflow of economic resources that can be measured reliably.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 5: ACQUISITIONS OF ASSETS

a. Acquisition of assets in Baie-Comeau

On July 5, 2023, the Company acquired 100% of the shares of a corporation, referred to as Orion, that owns the right to 22 MW of hydro power capacity in Baie-Comeau, Quebec. The consideration transferred at closing totaled \$1,964 (CAD\$2,603), of which \$610 (CAD\$814) was paid in cash and \$1,354 (CAD\$1,789) was paid through the issuance of 821,000 common shares of the Company.

The acquisition of Orion does not meet the definition of a business combination under IFRS 3, *Business Combinations*, as Orion's primary assets consist mainly of a contractual right for up to 22 MW of hydro power capacity. Therefore, the transaction has been recorded as an acquisition of a group of assets.

The assets acquired and the liabilities assumed were recognized and measured by allocating the fair value of the consideration paid to their relative fair values at the closing date of the transaction. All financial assets acquired and financial liabilities assumed were recorded at fair value.

The purchase price and the net assets acquired are as follows:

	Notes	As of July 5, 2023
Purchase price		
Cash consideration		610
Value of 821,000 common shares transferred at closing		1,354
Transaction costs		218
		2,182
Net assets acquired		
Security deposits		241
Leasehold improvements		7
Trade payables and accrued liabilities		(174)
Customer deposit		(207)
Intangible - access rights to electricity	14	2,315
		2,182

In addition, the Company separately entered into a lease agreement with a third party for a site to install the infrastructure to operate the acquired capacity. Refer to Note 18.

BITFARMS LTD.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 5: ACQUISITIONS OF ASSETS (Continued)**b. Acquisitions of assets in Paraguay**

On July 14, 2023, the Company acquired 100% of the shares of two corporations that own the rights to 50 MW and 100 MW, respectively, of hydro power capacity in Villarrica (Paso Pe) and Yguazu, Paraguay, respectively. The cash considerations totaled \$1,095 and \$450, respectively.

The transactions have been recorded as acquisitions of a group of assets as the acquirees' primary assets consist mainly of contractual rights to electricity supply. The purchase prices and the net assets acquired as of July 14, 2023 are as follows:

	Notes	Villarrica (Paso Pe)	Yguazu
Purchase price			
Cash consideration paid at closing		95	250
Cash consideration payable		1,000	200
Transaction costs		17	4
		1,112	454
Net assets acquired			
Cash, cash equivalent and other current assets		17	27
Property, plant and equipment		30	6
Intangible - access rights to electricity	14	1,065	421
		1,112	454

CAD held in trust	—	78
ARS	183	1,297
	84,038	30,887

NOTE 7: TRADE RECEIVABLES

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Most trade receivables are derived from the sale of electrical components and services to external customers by the Company's wholly-owned subsidiary, Volta. Trade receivables are non-interest bearing and are generally on terms of 30 to 90 days.

Information about the credit risk exposure of the Company's trade receivables as of December 31, 2023 and December 31, 2022 is detailed in the trade receivables aging as follows:

	As of December 31, 2023	As of December 31, 2022
1 - 30 days	353	501
31 - 60 days	119	99
61 - 90 days	63	53
> 91 days	230	85

NOTE 9: DIGITAL ASSETS

BTC transactions and the corresponding values for the years ended December 31, 2023 and 2022 were as follows:

	Year ended December 31,			
	2023		2022	
	Quantity	Value	Quantity	Value
Balance of digital assets including digital assets pledged as collateral as of January 1,	405	6,705	3,301	152,856
BTC earned*	4,928	141,306	5,167	138,985
BTC purchased	—	—	1,000	43,237
BTC exchanged for cash and services	(4,529)	(129,309)	(9,063)	(179,729)
Realized gain (loss) on disposition of digital assets**	—	7,713	—	(150,810)
Change in unrealized gain on revaluation of digital assets**	—	7,556	—	2,166
Balance of digital assets including digital assets pledged as collateral as of December 31,	804	33,971	405	6,705
Less digital assets pledged as collateral as of December 31,***	(50)	(2,101)	(125)	(2,070)
Balance of digital assets excluding digital assets pledged as collateral as of December 31,	754	31,870	280	4,635

* Management estimates the fair value of BTC earned on a daily basis as the quantity of cryptocurrency received multiplied by the price quoted on Coinbase on the day it was received. Management considers the prices quoted on Coinbase to be a level 2 input under IFRS 13, *Fair Value Measurement*.

** A portion of the realized gain on disposition of digital assets and the change in unrealized gain on revaluation of digital assets is presented in other comprehensive income after reversing previously recorded revaluation loss on digital assets in the statement of profit or loss. For the year ended December 31, 2023, a gain of \$9,242, net of \$3,332 of deferred income tax expense, was presented in other comprehensive income (year ended December 31, 2022: nil).

*** Refer to Note 17 for details of the Company's long-term debt and BTC pledged as collateral.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 10: DERIVATIVE ASSETS AND LIABILITIES

BTC option contracts

Starting in the first quarter of 2023, the Company purchased BTC option contracts to which gave it the right, but not the obligation, to sell digital assets at a fixed price. Options contracts are used to reduce the risk of BTC price volatility and reduce the variability of cash flows resulting from future sales of digital assets. The Company did not apply hedge accounting on these contracts. There were no derivative asset and liability activities relating to BTC option contracts in 2022.

Reconciliation of the fair value measurement of derivatives (Level 2):

	Year ended December 31,	
	Derivative Assets	Derivative Liabilities
Balance as of January 1,	—	—
Remeasurement recognized in statement of profit or loss during the period	28	20
Purchases	1,253	366
Sales	—	(386)
Balance as of December 31,	1,281	—

The following gain or loss on derivatives are recognized in Net financial expenses (income) in the consolidated statements of profit or loss and comprehensive profit or loss:

	Year ended December 31,
	2023
Unrealized change in fair value of outstanding contracts	409
Realized loss on settled contracts	(361)
	48

Warrant liabilities

In November 2023, the Company completed a private placement which included 22,222,000 warrants and 3,000,000 broker warrants to purchase common shares, as described in Note 21. The warrants are convertible for a fixed number of common shares of the Company but have a contingent cashless exercise clause, which results in a classification as a financial liability and measurement at fair value through profit and loss recognized in Net financial expenses (income).

As of December 31, 2023, the Company had warrant liabilities in the amount of \$40,426, which includes \$34,276 relating to the November 2023 private placement and \$6,150 relating to the 2021 private placements (December 31, 2022: nil and \$169, respectively).

The Black-Scholes model and inputs below were used in determining the values of the warrants and broker warrants at initial recognition, prior to their derecognition as described in Note 21 and at period end.

a. Antminer S9 Miners

During 2021, the Company ceased using its Antminer S9 Miners. During the year ended December 31, 2022, 3,982 Antminer S9 Miners with a carrying amount of \$79 were disposed for net proceeds of \$101 resulting in a loss of \$678. The remaining Antminer S9 Miners were not sold within 12 months since being classified as held for sale in 2021 due to the decline of the BTC price during the year ended December 31, 2022. As a result, those Miners were fully written off and an impairment loss of \$432 was recognized.

NOTE 11: ASSETS HELD FOR SALE (Continued)

i. Miners held for sale (Continued)

b. Innosilicon T2T, Innosilicon T3, Canaan Avalon A10, Antminer T15 and Antminer S15 Miners

During 2022, the Company ceased using Innosilicon T2T Miners, Canaan Avalon A10 Miners, Antminer T15 Miners and Antminer S15 Miners with plans to dispose of them

within the next 12 months. During the year ended December 31, 2022, 207 Antminer T15 Miners with a carrying amount of \$22 were disposed for net proceeds of \$31 resulting in a gain of \$9. In addition, due to the decline of the BTC price during the year ended December 31, 2022, the remaining Canaan Avalon A10 Miners, Antminer T15 Miners and Antminer S15 Miners were written off and an impairment loss of \$113 was recognized.

During the year ended December 31, 2023, the Company ceased using its Innosilicon T3 Miners with plans to dispose of them within the next 12 months. Due to the performance of these Miners, they were fully written off along with the remaining Innosilicon T2T Miners and an impairment loss of \$388 was recognized.

c. MicroBT WhatsMiner M20S Miners

During 2022, the Company ceased using its MicroBT WhatsMiner M20S Miners and planned to dispose of them within the next 12 months. During the year ended December 31, 2022, the Company sold 1,559 MicroBT WhatsMiner M20S Miners with a carrying amount of \$748 and disposed of them for net proceeds of \$896 resulting in a gain of \$148.

During the year ended December 31, 2023, the Company sold 1,781 MicroBT WhatsMiner M20S Miners with carrying amount of \$714 and disposed of them for net proceeds of \$407 resulting in a loss of \$307. Management determined that the remaining MicroBT WhatsMiner M20S Miners continue to meet the criteria to be classified as held for sale as of December 31, 2023.

d. S19j Pro Bitmain Miners

During the year ended December 31, 2023, the Company ceased using 300 Bitmain S19j Pro Miners and planned to dispose of them within the next 12 months.

ii. Mining electrical components held for sale

During the year ended December 31, 2023, the Company de-energized its immersion cooling pilot project in Washington State, ceased using the electrical components used in the project with a carrying value of \$867, net of impairment charge of \$1,882, as described in Note 12, and planned to dispose of them within the next 12 months. The Company entered into an agreement to sell the immersion cooling electrical components in December 2023.

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 12: IMPAIRMENT (Continued)

a. 2023 impairment loss

Impairment on short-term prepaid deposits during the second quarter of 2023

i. Background

In 2022, the Company entered into agreements with external brokers to be able to proceed with the importation of its miners into Argentina. Under the agreements, the Company was required to make advance deposits to the external brokers, which were classified as short-term prepaid deposits on the consolidated statements of financial position. During the second quarter of 2023, the Company decided to terminate the importation agreements with the external brokers as of June 30, 2023.

ii. Impairment loss

The Company assumed the cost of terminating the importation agreements with the brokers in order to execute its new importation strategy, resulting in the Company forgoing a deposits balance of \$6,982. Accordingly, during the second quarter of 2023, the Company impaired \$6,982 of short-term prepaid deposits. This impairment is presented in the consolidated statements of profit or loss and comprehensive profit or loss under Impairment on short-term prepaid deposits, equipment and construction prepayments, property, plant and equipment and right-of-use assets.

Impairment on mineral assets during the second quarter of 2023

i. Background

The Suni mineral asset was acquired in connection with the reverse acquisition of Bitfarms Ltd (Israel) on April 12, 2018, and its value at the time was estimated at \$9,000 based on an independent appraiser's valuation. Suni is an iron ore deposit located in Canada that was held by the acquiree. Since its acquisition, following the presence of impairment indicators, the Suni mineral asset was written down to a net book value of \$3,000 as of December 31, 2022.

ii. Impairment loss

During the second quarter of 2023, in connection with the planned disposal of the Suni mineral asset, Management tested the cash-generating unit for impairment, resulting in a further impairment charge of \$3,000 and bringing the carrying amount to nil. This impairment charge is presented in the consolidated statements of profit or loss and comprehensive profit or loss under Impairment on short-term prepaid deposits, equipment and construction prepayments, property, plant and equipment and right-of-use assets. On July 27, 2023, the Company sold the Suni mineral asset for a nominal amount to a third party.

Impairment on electrical components during the fourth quarter of 2023

i. Background

During the third quarter of 2023, the Company de-energized its 2 MW immersion cooling pilot project in Washington State as the equipment did not perform to the Company's expectations of performance and costs. With the de-energization of the immersion cooling pilot project, the 2 MW of hydro-electricity remains available to the Company to use in the future.

ii. Impairment loss

During the fourth quarter of 2023, in connection with the planned disposal of the de-energized immersion cooling electrical components, Management tested those assets for impairment, resulting in an impairment charge of \$1,882 before being reclassified to assets held for sale. This impairment charge is presented in the consolidated statements of profit or loss and comprehensive profit or loss under Impairment on short-term prepaid deposits, equipment and construction prepayments, property, plant and equipment and right-of-use assets.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 12: IMPAIRMENT (Continued)

b. 2022 impairment loss and impairment loss reversal

i. Background

During the year ended December 31, 2022, as a result of the decline in the BTC price, the Company performed evaluations of the recoverable amount of the assets for operating the cryptocurrency mining facilities in Quebec, Washington State, Argentina and Paraguay separately. As the group of assets for each CGU do not generate cash inflows that are independent of each other, the recoverable amount was calculated for each CGU comprised of the property, plant and equipment, ROU assets, long-term electricity deposits, long-term construction and equipment prepayments and favorable lease used in the operating cryptocurrency mining facilities in Quebec, Washington State, Argentina and Paraguay.

ii. Impairment loss

The recoverable amount was calculated using the value in use model, which calculated the present value of the future cash flows expected to be derived from the Washington CGU and Argentina CGU, which were determined to be lower than their carrying amount. Based on its calculation, the Company determined that impairment losses should be recorded on its Washington CGU and Argentina CGU in the amount of \$24,414 and \$84,081, respectively, during the year ended December 31, 2022. The impairment losses were recognized in profit or loss under Impairment on short-term prepaid deposits, equipment and construction prepayments, property, plant and equipment and right-of-use assets and Impairment on goodwill.

iii. Reversal of impairment loss

The renegotiation of the 48,000 unit purchase agreements, as described in Note 15a, allowed the deployment of Miners intended for the Argentina CGU to be reassigned to the Quebec CGU and Paraguay CGU. As a result, a portion of the equipment prepayments in the Argentina CGU that were impaired during the third quarter of 2022 was allocated to the Quebec CGU and Paraguay CGU. The deposits were transferred to the Quebec CGU and Paraguay CGU at the impaired amount. After performing the evaluation of the recoverable amount of the assets for these CGUs, the impairment losses previously recognized on these deposits were reversed into the Quebec CGU and Paraguay CGU by \$11,641 and \$8,486, respectively. The impairment reversals were recognized in profit or loss under Impairment on short-term prepaid deposits, equipment and construction prepayments, property, plant and equipment and right-of-use assets.

iv. Suni mineral asset

In connection with the reverse acquisition of Bitfarms Ltd (Israel), the Company engaged an independent appraiser to determine the fair value as of the acquisition date, April 12, 2018, of Suni, an iron ore deposit located in Canada held by the acquiree. The appraiser's valuation report was based on the market comparison method and the analysis of similar assets. Following certain adjustments resulting from changes in the price of iron ore, among other variables, Suni's value at April 12, 2018 was estimated at \$9,000.

An independent appraiser was engaged to determine Suni's fair value as of September 30, 2022 due to the decline in the iron ore price during the third quarter of 2022. Using the same method as the previous independent appraiser, the new appraiser determined that the fair value of Suni was \$3,250, or \$3,000 after reflecting estimated costs to sell, compared to \$7,200 on December 31, 2021, which resulted in an impairment of \$4,200 during the third quarter of 2022 to Suni's mineral asset book value. There were no further impairment indicators as of December 31, 2022. The impairment loss was recognized in profit or loss under Impairment on short-term prepaid deposits, equipment and construction prepayments, property, plant and equipment and right-of-use assets.

Additions related to acquisitions of assets

During the year ended December 31, 2023, the Company made three acquisitions of groups of assets, resulting in additional access rights to electricity. The access rights represent a contractual right to hydro power capacity and are classified as intangible assets. The assets acquired, including the intangible assets, and the liabilities assumed were recognized and measured by allocating the fair value of the consideration paid to their relative fair values at the closing date of the transactions. Refer to Note 5 for more details. The following table summarizes the access rights:

Acquisitions	Additions to intangibles	Additional capacity	Term of contractual access rights	Amortization method and period
Baie-Comeau, Quebec	2,315	22 MW	No termination date	Straight-line over the lease term of the facility
Villarrica (Paso Pe), Paraguay	1,065	50 MW*	Ending in December 31, 2027	Straight-line over the access rights period
Yguazu, Paraguay	421	100 MW	Ending in December 31, 2027	Straight-line over the access rights period
	3,801	172 MW		

* In November 2023, the Company finalized an amendment to the existing contract for an additional 20 MW of energy capacity for a total capacity of 70 MW.

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 15: LONG-TERM DEPOSITS, EQUIPMENT PREPAYMENTS, COMMITMENTS AND OTHER

	As of December 31,	As of December 31,
	2023	2022
VAT receivable	—	2,083
Security deposits for energy, insurance and rent	4,901	3,872
Equipment and construction prepayments	a 39,813	32,230
	44,714	38,185

a. Equipment and construction prepayments

As of December 31, 2023, the Company has deposits for BVVE and electrical components in the amount of \$2,642, which includes \$17,561 of credits for orders placed at fixed prices, but not yet received, as described below, with a book value of \$11,330 due to previously recorded impairments of \$6,231. In addition, the Company has deposits for construction work and materials in the amount of \$7,171, mainly for the Paraguay expansion.

In December 2022, the Company renegotiated its previous purchase agreements for 48,000 Miners by extinguishing the outstanding commitments of \$45,350 without penalty and establishing a \$22,376 credit for deposits previously made. The Company received \$3,279 of Miners, reducing the outstanding credit balance to \$19,097, which was fully utilized during the year ended December 31, 2023 for the acquisition of hydro Miners and hydro containers. These items were not received as of December 31, 2023 and are scheduled to be received in 2024.

During the year ended December 31, 2023, the Company placed a firm purchase order for 35,888 Bitmain T21 Miners totaling \$95,462 with deliveries scheduled from March 2024 to May 2024 and made a non-refundable deposit of \$9,464. In addition, the Company secured a purchase option for an additional 28,000 Bitmain T21 Miners totaling \$74,480 and made a non-refundable deposit of \$7,448. This purchase option gives the Company the right, exercisable until December 31, 2024, but not the obligation, to purchase, in whole or in part, 28,000 additional Bitmain T21 Miners.

b. Commitments

The Company's remaining payment obligations in connection with the 35,888 Bitmain T21 Miners purchase order are outlined below:

	As of December 31,
	2023
Three months ending March 31, 2024	41,446
Three months ending June 30, 2024	44,551
	85,997

If the Company is unable to meet its payment obligations, it could result in the loss of equipment prepayments and deposits paid by the Company under the purchase order and remedial legal measures taken against the Company which may include damages and forced continuance of the contractual arrangement. Under such circumstances, the Company's growth plans and ongoing operations could be adversely impacted.

BITFARMS LTD.

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 15: LONG-TERM DEPOSITS, EQUIPMENT PREPAYMENTS, COMMITMENTS AND OTHER (continued)

c. Contingent liability

In 2021, the Company imported Miners into Washington State that the vendor located in China claimed originated in Malaysia. In early 2022, U.S. Customs and Border Protection challenged the origination of the Miners, asserting their manufacture in China, and notified the Company of a potential assessment of a U.S. importation duty of 25%.

During the third quarter of 2023, the Company submitted the supporting documentation to U.S. Customs and Border Protection in defense of its position that the Miners were manufactured outside China and the associated custom duties in the amount of \$9,424 do not apply. While the final outcome of this matter is uncertain at this time, Management has determined it is not probable that it will result in a future cash outflow for the Company and, as such, no provision was recorded as of December 31, 2023.

NOTE 16: TRADE PAYABLES AND ACCRUED LIABILITIES

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 17: LONG-TERM DEBT (Continued)

a. Equipment financing activity

Repayment of Foundry Loans #2, #3 and #4

In April and May 2021, the Company entered into four loan agreements for the acquisition of 2,465 WhatsMiner Miners referred to as “Foundry Loans #1, #2, #3 and #4.” During 2022, Foundry Loan #1 matured and was fully repaid. In January 2023, the principal amounts of the remaining Foundry Loans #2, #3 and #4 were fully repaid before their maturity date with forgiveness of prepayment penalties totaling \$829.

Settlement of the loan with BlockFi Lending LLC (“BlockFi”)

In February 2022, Backbone Mining entered into an equipment financing agreement for gross proceeds of \$2,000 collateralized by 6,100 Bitmain S19j Pro Miners referred to as the “BlockFi Loan”. The net proceeds received by the Company were \$30,994 after capitalizing origination, closing and other transaction fees of \$1,006.

In December 2022, Backbone Mining ceased making installment payments, which constituted a default under the loan agreement, and the BlockFi Loan was classified as current.

On February 8, 2023, BlockFi and the Company negotiated a settlement of the loan in its entirety with a then outstanding debt balance of \$0,330 for cash consideration of \$7,750, discharging Backbone Mining of all further obligations and resulting in a gain on extinguishment of long-term debt of \$2,580 recognized in Net financial expenses (income) in the consolidated statements of profit or loss and comprehensive profit or loss during the year ended December 31, 2023. Upon settlement, all of Backbone Mining’s assets, including the 6,100 Miners collateralizing the loan, were unencumbered.

NYDIG Loan

In June 2022, Backbone entered into an equipment financing agreement, referred to as the “NYDIG Loan”, for gross proceeds of \$36,860 collateralized by 10,395 WhatsMiner M30S Miners. The net proceeds received by the Company were \$36,123, net of origination and closing fees of \$737. As part of the agreement, the Company is required to maintain in a segregated wallet an approximate quantity of BTC whose value equates to at least one month of interest and principal payments on the outstanding loan. The Company pledged 50 BTC as collateral with a fair market value of \$2,101 as of December 31, 2023. The pledged BTC is held in a segregated Coinbase Custody account, which BTC is owned by the Company unless there is an event of default under the NYDIG Loan.

b. Summary of equipment financing

As of December 31, 2023, the Company’s equipment financing consisted only of the NYDIG Loan. The NYDIG Loan balance and the net book value (“NBV”) of its related collateral, as of December 31, 2023, are as follows:

	Maturity date	Stated rate	Effective rate*	Monthly repayment (\$)	Long-term debt balance (\$)	NBV of Collateral (\$)	Collateral**
NYDIG Loan	February 2024	12.0%	14.4%	2,043	4,022	21,840	10,395

*Represents the implied interest rate after capitalizing financing and origination fees.

**Represents the quantity of WhatsMiners received in connection with the equipment financing and pledged as collateral for the related loan.

During 2024, the NYDIG Loan balance was fully repaid, and the Company’s 10,395 Miners collateralizing the loan and BTC pledged as collateral became unencumbered.

Non-current portion of lease liabilities					14,215

a. 2023 lease activities

Reliz Lease

In February 2023, the Company negotiated a modification to its lease agreement with Reliz Ltd. (where BlockFi was the lender to Reliz Ltd.) in order to settle its outstanding lease liability of \$373 for a payment of \$118. Refer to Note 28 for more details.

Baie-Comeau

On July 5, 2023, in conjunction with the Baie-Comeau acquisition, the Company entered into a lease agreement with a third party for a site to install the infrastructure to operate the acquired capacity. The lease agreement is for an industrial site in Baie-Comeau for an initial term of 10 years at \$16 (CAD\$21) a month with an annual adjustment at the lesser of (i) the change in the Consumer Price Index and (ii) 3%. The lease agreement also provides the Company with the option to purchase the site for \$2,248 (CAD\$3,000) with an annual adjustment at the lesser of (i) the change in the Consumer Price Index and (ii) 3% throughout the lease term.

NOTE 18: LEASES (Continued)

b. 2022 lease activities

The Company maintained one lease agreement for Mining hardware, consisting of 3,000 WhatsMiner M31S+ Miners, with a net book value of approximately \$3,330, classified as property, plant and equipment under BVVE and electrical equipment as described in Note 13.

During the year ended December 31, 2022, the Company recognized an impairment loss of \$2,034 on the Company's ROU assets. Refer to Note 12 for more details.

NOTE 19: INCOME TAXES

Current and deferred income tax expense (recovery)

	Year ended December 31,	
	2023	2022
Current tax expense (recovery):		
Current year	2,679	(9,030)
Prior year	252	68
	2,931	(8,962)
Deferred tax expense (recovery):		
Current year	(4,703)	(8,446)
Prior year	1,371	(4)
	(3,332)	(8,450)
	(401)	(17,412)

The 2022 current tax recovery represents the expected tax refund as a result of losses realized in 2022 that will be carried back to offset prior period taxable income.

Effective tax rate

Year ended December 31,

		2023	2022 (restated - Note 3e)	
Income tax recovery at statutory rate of 26.5%	(27,676)	26.5%	(51,160)	26.5%
Increase (decrease) in taxes resulting from:				
Foreign tax rate differential	(103)	0.1%	1,070	(0.6)%
Prior year	1,623	(1.6)%	64	—%
Non-taxable warrant loss (gain) and other permanent differences	22,096	(21.2)%	(16,894)	8.8%
Deferred tax asset not recognized	3,659	(3.5)%	49,508	(25.6)%
	(401)	0.3%	(17,412)	9.1%

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 19: INCOME TAXES (Continued)

Deferred tax assets and liabilities

Deferred taxes are computed at a tax rate of 26.5% based on tax rates expected to apply at the time of realization. Deferred taxes relate primarily to the timing differences on recognition of expenses relating to the depreciation of fixed assets, loss carryforwards and professional fees relating to the Company's equity activity that are recorded as a reduction of equity. As at December 31, 2023, the Company has analyzed the recoverability of its deferred tax assets and has concluded that it is not more likely than not that sufficient taxable profit is expected to utilize these deferred tax assets.

Movement in deferred tax asset for the years ending December 31, 2023 and 2022, without taking into consideration the offsetting of balances within the same tax jurisdiction, is as follows:

	Operating losses carried forward	Lease liability	Asset Retirement provision	Financing fees	PPE	Reserves and other	Total
As of January 1, 2022	—	3,141	84	3,751	478	1,288	8,742
Credited to statements of profit or loss	43,713	1,020	42	144	15,855	11,335	72,109
Deferred tax asset derecognized in the statements of profit or loss	(43,713)	—	—	—	(5,795)	—	(49,508)
Deferred tax asset derecognized in the statements of equity	—	—	—	(3,895)	—	—	(3,895)
As of December 31, 2022	—	4,161	126	—	10,538	12,623	27,448
Credited to statements of profit or loss	52,743	(141)	14	3,332	(5,884)	(6,564)	43,500

50 | Page

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 20: ASSET RETIREMENT PROVISION

	As of December 31, 2023	As of December 31, 2022
Balance as of January 1,	1,979	239
Additions during the period	209	1,701

Accretion expense	214	93
Effect of change in the foreign exchange rate	12	(54)
Effect of change in discount rate	(598)	—
Balance as of period end	1,816	1,979

As of December 31, 2023, the Company estimated the costs of restoring its leased premises to their original state at the end of their respective lease terms to be \$3,326 (December 31, 2022: \$3,950), discounted to present value of \$1,816 (December 31, 2022: \$1,979) using annual discount rates between 7% and 17% (December 31, 2022: between 7% and 10%) over the lease periods, which were estimated to range from seven to ten years depending on the location.

The effect of change in discount rate was accounted for as a reduction of asset retirement provision totaling \$98 and a decrease of \$499 in the related property, plant and equipment. As the decrease in the asset retirement provision exceeded the carrying amount of the related property, plant and equipment, the excess of \$99 was recognized as a gain in the consolidated statements of profit or loss and comprehensive profit or loss under Net financial expenses (income).

NOTE 21: SHARE CAPITAL

Common shares

The Company's authorized share capital consists of an unlimited number of common shares without par value. As of December 31, 2023, the Company had 334,153,000 issued and outstanding common shares (December 31, 2022: 224,200,000).

Warrants

Details of the outstanding warrants are as follows:

	Year ended December 31,			
	2023		2022	
	Number of warrants	Weighted average exercise price (USD)	Number of warrants	Weighted average exercise price (USD)
Outstanding, January 1,	19,153,000	4.21	19,428,000	4.16
Granted	25,222,000	1.18	25,000	3.47
Exercised	(9,270,000)	1.18	—	—
Expired	—	—	(300,000)	1.19
Outstanding, December 31,	35,105,000	2.83	19,153,000	4.21

The weighted average contractual life of the warrants as of December 31, 2023 was 1.6 years (December 31, 2022: 1.4 years).

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 21: SHARE CAPITAL (Continued)

Significant transactions

i. Garlock Acquisition

In the first quarter of 2022, the Company acquired a building in Quebec referred to as "Garlock" in exchange for cash consideration of \$1,783 and the issuance of 25,000 warrants granted with a strike price of \$3.47 and a contractual life of 2 years.

ii. At-The-Market Equity Offering Program

Bitfarms commenced an at-the-market equity offering program (the "ATM program") on August 16, 2021, pursuant to which the Company may, at its discretion and from time-to-time, sell common shares of the Company, resulting in the Company receiving aggregate proceeds of up to \$500,000. The ATM program expired on September 12, 2023.

During the year ended December 31, 2023, the Company issued 52,121,000 common shares in the ATM program in exchange for gross proceeds of \$70,770 at an average share price of approximately \$1.36. The Company received net proceeds of \$68,504 after paying commissions of \$2,187 to the sales agent for the program and \$79 in other transaction costs.

During the year ended December 31, 2022, the Company issued 29,324,000 common shares in the ATM program in exchange for gross proceeds of \$55,960 at an average share price of approximately \$1.91. The Company received net proceeds of \$54,086 after paying commissions of \$1,791 to the sales agent and \$83 in other transaction costs.

iii. Stock Options

During the year ended December 31, 2023, option holders exercised stock options to acquire 3,047,000 common shares (year ended December 31, 2022: 70,000) resulting in proceeds of approximately \$1,999 (year ended December 31, 2022: \$21) being paid to the Company.

iv. 2023 private placement

In November 2023, the Company completed a private placement for total gross proceeds of \$43,799 (CAD\$60,000) in exchange for 44,444,000 common shares and 22,222,000 warrants to purchase common shares:

Closing Date	November 28, 2023
Gross proceeds (CAD)	60,000
Common shares issued	44,444,000
Warrants issued*	22,222,000
Warrant strike price (USD)	1.17
Warrant life (years)	3
Commission paid	7%
Broker warrants issued*	3,000,000
Broker warrant strike price (USD)	1.23
Broker warrant life (years)	3

BITFARMS LTD.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 21: SHARE CAPITAL (Continued)**Significant transactions** (Continued)*iv. 2023 private placement* (Continued)

In December 2023, 6,963,000 warrants and 2,307,000 broker warrants related to the private placement that closed on November 28, 2023, were exercised resulting in the issuance of 9,270,000 common shares for proceeds of approximately \$10,984.

The Black Scholes model and the inputs described in Note 10 were used in determining the values of the warrants and broker warrants prior to their derecognition, which resulted in a non-cash loss on revaluation of warrants of \$14,473 included in Net financial expenses (income).

NOTE 22: FINANCIAL INSTRUMENTS**a. Measurement categories and fair value**

Financial assets and financial liabilities have been classified into categories that determine their basis of measurement. The following tables show the carrying values and the fair value of assets and liabilities for each of the applicable categories:

		As of December 31, 2023	As of December 31, 2022 (restated - Note 3e)
	Measurement		
Financial assets at amortized cost			
Cash	Level 1	84,038	30,887
Trade receivables	Level 3	714	701
Other receivables	Level 3	689	108
Financial assets at fair value through profit and loss			
Derivative assets	Level 2	1,281	—
Total carrying amount and fair value		86,722	31,696
Financial liabilities at amortized cost			
Trade accounts payable and accrued liabilities	Level 3	9,077	12,897
Long-term debt	Level 2	4,022	47,147
Financial liabilities at fair value through profit and loss			
Warrant liabilities	Level 2	40,426	169
Total carrying amount and fair value		53,525	60,213
Net carrying amount and fair value		33,197	(28,517)

The carrying amounts of trade receivables, other receivables, trade payables and accrued liabilities and long-term debt presented in the table above are a reasonable approximation of their fair value.

BITFARMS LTD.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 22: FINANCIAL INSTRUMENTS (Continued)**a. Measurement categories and fair value** (Continued)

The fair value of option contracts is categorized as Level 2 in the fair value hierarchy and is presented under derivative assets and liabilities in the consolidated statements of financial position when there is an outstanding contract at period end. Their fair values are a recurring measurement. Fair value of derivative financial instruments generally reflects the estimated amounts that the Company would receive or pay, taking into consideration the counterparty credit risk or the Company's credit risk at each reporting date. The Company uses market data such as BTC option futures to estimate the fair value of option contracts at each reporting date.

Warrant liabilities related to the 2021 and 2023 private placements are classified as financial liabilities at fair value through profit or loss with the change in fair value recorded to Net financial expenses (income). The fair value measurement is categorized as Level 2 in the fair value hierarchy, is a recurring measurement and is calculated using a Black-Scholes pricing model at each reporting date.

b. Risk management policy

The Company is exposed to foreign currency risk, credit risk, counterparty risk, liquidity risk and concentration risk. The Company's senior Management monitors these risks. In addition, during 2023, the Company established a Risk Committee to monitor these risks.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company's

functional currency is the US Dollar as all of its cryptocurrency Mining revenues, most of its capital expenditures and most of its financing are primarily measured or transacted in US dollars. The Company is exposed to variability in the Canadian dollar and Argentine peso to US dollar exchange rates when making expenditures payable in Canadian dollars and Argentine pesos. The Company funds foreign currency transactions by buying the foreign currency at the spot rate when required. A 5% increase or decrease in the USD/CAD and USD/ARS exchange rates may have an impact of an increase or decrease of \$44 on retained earnings at December 31, 2023 (December 31, 2022: \$215).

Amounts denominated in Canadian dollars and Argentine pesos included in the consolidated statements of financial position, presented in thousands of U.S. dollars, are as follows:

	As a of December 31,		As a of December 31,	
	2023		2022	
	CAD	ARS	CAD	ARS
Cash	8,904	183	4,994	1,297
Trade receivables	714	—	609	—
Trade payables and accrued liabilities	(8,372)	(544)	(6,228)	(4,849)
Long-term debt	—	—	(126)	—
	1,246	(361)	(751)	(3,552)

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 22: FINANCIAL INSTRUMENTS (Continued)

b. Risk management policy (Continued)

Credit risk and counterparty risk

Credit risk is the risk of an unexpected loss if a third party fails to meet its contractual obligations, including cash and cash equivalents. The risk regarding cash is mitigated by holding the majority of the Company's cash with a Canadian chartered bank.

The Company is exposed to counterparty risk through the significant deposits it places with suppliers of Mining hardware to secure orders and delivery dates as well as deposits it places with construction companies and suppliers of electrical components and construction materials. The risk of a supplier failing to meet its contractual obligations may result in late deliveries or long-term deposits and equipment and construction prepayments that are not realized. The Company attempts to mitigate this risk by procuring Mining hardware from larger, more established suppliers and those with whom the Company has existing relationships and knowledge of their reputation in the market as well as by insuring deposits placed for construction work and materials.

The credit risk regarding trade receivables is derived mainly from sales to Volta's third-party customers. The Company performs ongoing credit evaluations of its customers. The Company maintains an allowance for expected credit losses to provide for the estimated amount of doubtful of collection. The allowance for expected credit losses is based on Management's assessment of a customer's credit quality as well as subjective factors and trends, including the aging of receivable balances.

Liquidity risk

Liquidity risk is a risk that the Company will not be able to pay its financial obligations when they are due. The Company's policy is to monitor its cash balances and planned cash flows generated from operations to ensure that it maintains sufficient liquidity in order to pay its projected financial liabilities. Refer to Note 2 for more details about the Company's liquidity.

The following are the undiscounted contractual maturities of financial liabilities with estimated future interest payments as of December 31, 2023:

	2024	2025	2026	2027	2028 and thereafter	Total
Trade accounts payable and accrued liabilities	9,077	—	—	—	—	9,077
Long-term debt	4,022	—	—	—	—	4,022
Lease liabilities	4,087	2,985	2,827	2,548	8,079	20,526
	17,186	2,985	2,827	2,548	8,079	33,625

The Company does not have any future cash payments associated with warrant liabilities, and accordingly, they are not included in the table above.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 22: FINANCIAL INSTRUMENTS (Continued)

b. Risk management policy (Continued)

Concentration risk

Concentration risk arises as a result of the concentration of exposures within the same category, whether it is geographical location, product type, industry sector or counterparty type. The cryptocurrency Mining industry is highly volatile with significant inherent risk. The Company also holds a portion of its working capital in BTC. A significant decline in the market prices of cryptocurrencies, an increase in the difficulty of cryptocurrency Mining, changes in the regulatory environment and adverse changes in other inherent risks can significantly negatively impact the Company's operations and the carrying value of its assets. Starting in the first quarter of 2023, the Company purchased BTC option contracts to which gave it the right, but not the obligation, to sell digital assets at a fixed price. Options contracts are used to reduce the risk of BTC price volatility and reduce the variability of cash flows resulting from future sales of digital assets. Refer to Note 10 for more details.

NOTE 23: TRANSACTIONS AND BALANCES WITH RELATED PARTIES

The following table details balances payable to related parties:

	As of December 31, 2023	As of December 31, 2022
Trade payables and accrued liabilities		
Directors' remuneration	112	1,522
Director and senior management incentive plan	1,567	95
	1,679	1,617

Amounts due to related parties are unsecured, non-interest bearing and payable on demand.

Transactions with related parties

During the year ended December 31, 2022, the Company made rent payments totaling approximately \$273 to companies controlled by certain directors of the Company. No such payments were made for the year ended December 31, 2023. The rent payments were classified as interest included in financial expenses and principal repayment of lease liabilities. During the year ended December 31, 2022, the Company's leases with companies controlled by directors were renewed with third parties.

In December 2022, the Company's consulting agreements with two of its executive officers were terminated, their roles and responsibilities were reduced and termination payments totaling \$1,466 were accrued and included in trade payables and accrued liabilities as at December 31, 2022 (as of December 31, 2023, balance accrued nil). The consulting fees totaled approximately \$1,466 for the year ended December 31, 2022 (for the year ended December 31, 2023: nil).

The transactions described above were incurred in the normal course of operations. These transactions are included in the consolidated statements of profit or loss and comprehensive profit or loss as follows:

	Year ended December 31,	
	2023	2022
General and administrative expenses	—	2,733
Net financial expenses	—	70
	—	2,803

BITFARMS LTD.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 23: TRANSACTIONS AND BALANCES WITH RELATED PARTIES (Continued)**Compensation of key management and directors**

The Company considers its Directors, Chief Officers and Vice Presidents to be key management personnel. The remuneration paid to directors and other members of key management personnel, to the extent that they are not included in the consulting agreements described above are as follows:

	Year ended December 31,	
	2023	2022
Short-term benefits	1,520	48
Termination payments	—	1,466
Share-based payments	9,169	19,077
	10,689	20,591

NOTE 24: CAPITAL MANAGEMENT POLICIES AND PROCEDURES

The Company's capital management objectives are to maximize the return to its shareholders. The Company's definition of capital includes all components of equity. Capital for the reporting period is summarized in Note 21 and in the consolidated statement of changes in equity. In order to meet its objectives, the Company monitors its capital structure and makes adjustments as required in light of changes in economic conditions and the risk characteristics of the underlying assets. These objectives will be achieved by maintaining a strong capital base so as to maintain investor confidence to sustain future development of the business, maintain a flexible capital structure that optimizes the cost of capital at acceptable risk and preserves the ability to meet financial obligations and ensuring sufficient liquidity to pursue organic growth. In order to maintain or adjust the capital structure, the Company may issue new common shares or debt.

NOTE 25: SUBSIDIARIES

In 2023, the Company acquired Orion and two corporations in Paraguay. Refer to note 5 for more details. The Company's significant subsidiaries as of December 31, 2023 are as follows:

Company name	Security type	Main place of business	Securities	Equity	Voting
Backbone	Common shares	CDA	100%	100%	100%
Backbone Argentina	Ordinary shares	ARG	100%	100%	100%
Backbone Paraguay	Ordinary shares	PAR	100%	100%	100%
Backbone Mining	Common shares	USA	100%	100%	100%
Orion	Common shares	CDA	100%	100%	100%
Volta	Common shares	CDA	100%	100%	100%

Substantially all of the assets, liabilities, revenues, expenses and cash flows in the consolidated financial statements are those of Backbone, Backbone Argentina, Backbone Paraguay, Backbone Mining, Orion and of Volta. Refer to Note 29 for geographic information of revenues and property, plant and equipment.

BITFARMS LTD.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 26: NET EARNINGS (LOSS) PER SHARE

For the years ended December 31, 2023 and 2022, potentially dilutive securities have not been included in the calculation of diluted earnings (loss) per share because their effect is anti-dilutive. The additional potentially dilutive securities that would have been included in the calculation of diluted earnings per share, had their effect not been anti-dilutive for the year ended December 31, 2023, would have totaled approximately 4,964,000 (year ended December 31, 2022: 1,748,000).

NOTE 27: SHARE-BASED PAYMENTS

The share-based payment expense related to stock options and restricted stock units ("RSU") for employees, directors, consultants and former employees received was as follows:

	Year ended December 31,	
	2023	2022
Equity-settled share-based payment plans	10,915	21,788

Options

On March 31, 2023, upon the voluntary surrender by option holders, the Company cancelled outstanding options exercisable for 10,535,000 common shares. The Company intended, but had no obligation, to the persons who formerly held the cancelled options to grant new options no less than 90 days after the cancellation date of the original options. As the options were cancelled without the concurrent grant of a replacement award, the cancellation was treated as a settlement for no consideration, and all remaining unrecognized share-based payment expense associated with the cancelled options was accelerated for an amount of \$914 during the first quarter of 2023.

During the year ended December 31, 2023, the Board of Directors approved stock option grants to purchase 3,156,000 common shares in accordance with the Long-Term Incentive Plan (the "LTIP Plan") adopted on May 18, 2021 (year ended December 31, 2022: 9,592,000 common shares). All options issued according to the LTIP Plan become exercisable when they vest and can be exercised for a maximum period of 5 years from the date of the grant.

Details of the outstanding stock options are as follows:

	Year ended December 31,			
	2023		2022	
	Number of Options	Weighted Average Exercise Price (\$CAD)	Number of Options	Weighted Average Exercise Price (\$CAD)
Outstanding, January 1,	21,804,000	3.47	12,547,000	4.86
Granted	13,156,000	2.58	9,592,000	1.68
Exercised	(3,047,000)	0.85	(70,000)	0.41
Forfeited	—	—	(205,000)	5.65
Cancelled	(10,634,000)	5.15	—	—
Expired	(340,000)	5.47	(60,000)	4.37
Outstanding, December 31,	20,939,000	2.41	21,804,000	3.47
Exercisable, December 31,	11,113,000	2.01	2,306,000	0.46

The weighted average contractual life of the stock options as of December 31, 2023 was 4.1 years (December 31, 2022: 4.0 years).

BITFARMS LTD.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 27: SHARE-BASED PAYMENTS (Continued)**Options (Continued)**

The inputs used to value the option grants using the Black-Scholes model are as follows:

Grant date	June 30, 2023	December 22, 2023
Dividend yield (%)	—	—
Expected share price volatility (%)	98%	91%
Risk-free interest rate (%)	4.49%	4.04%
Expected life of stock options (years)	3	3
Share price (CAD)	1.89	3.83
Exercise price (CAD)	1.89	3.83
Fair value of options (USD)	0.84	1.61
Vesting period (years)	1.5	1.5
Number of options granted	8,471,000	4,685,000

Restricted Share Units ("RSU")

Details of the RSUs are as follows:

	Year ended December 31,	
	2023	2022

	Number of RSUs	Weighted Average Grant Price (\$CAD)	Number of RSUs	Weighted Average Grant Price (\$CAD)
Outstanding, January 1,	400,000	3.73	200,000	5.01
Granted	475,000	3.83	200,000	2.45
Settled	(250,000)	3.13	—	—
Outstanding, December 31,	625,000	4.05	400,000	3.73

On December 22, 2023, the Board of Directors approved the grant of 475,000 RSUs (year ended December 31, 2022: 200,000 RSUs) to certain members of senior Management and to the Directors which vest 25% at the time of grant and an additional 25% every 6 months. The value of the RSUs on the grant date was \$2.89 per unit (year ended December 31, 2022: \$1.91 per unit).

NOTE 28: ADDITIONAL DETAILS TO THE STATEMENT OF PROFIT OR LOSS AND COMPREHENSIVE PROFIT OR LOSS

Cost of revenues

	Year ended December 31,	
	2023	2022

Interest on lease liabilities		1,391	1,451
Other financial (income) expenses		896	629
		32,308	(90,966)

a. Gain on disposition of marketable securities

During the year ended December 31, 2023 and 2022, the Company funded its expansion in Argentina through the acquisition of marketable securities and the in-kind contribution of those securities to the Company's subsidiary in Argentina. The subsequent disposition of those marketable securities in exchange for Argentine Pesos gave rise to a gain as the amount received in ARS exceeds the amount of ARS the Company would have received from a direct foreign currency exchange.

BITFARMS LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. dollars, except data relating to number of PPE, shares, warrants and digital assets - audited)

NOTE 28: ADDITIONAL DETAILS TO THE STATEMENT OF PROFIT OR LOSS AND COMPREHENSIVE PROFIT OR LOSS(Continued)**Net financial expenses (income)(Continued)****b. Gain on extinguishment of the BlockFi loan and Reliz lease liability**

In February 2023, the Company negotiated a settlement of its loan agreement with BlockFi with a then outstanding debt balance of \$20,330 for a payment of \$7,750. As a result, a gain on extinguishment of long-term debt was recognized in the amount of \$12,580 during the year ended December 31, 2023.

In February 2023, the Company modified its lease agreement with Reliz Ltd. in order to settle its outstanding lease liability of \$73 for a payment of \$118. As a result, a gain on extinguishment of lease liabilities was recognized in the amount of \$255 during the year ended December 31, 2023.

c. Provision expense on VAT receivable

Due to the political and economic uncertainties in Argentina, the Company is uncertain when, or if at all, the Argentine VAT receivable will be settled. As a result, the Company has recorded a provision to reduce the Argentine VAT receivable to nil. The provision is classified within Net financial expenses (income) during the year ended December 31, 2023. Previously, the Argentine VAT not expected to be settled within the next 12 months was classified as a long-term receivable in Note 15 with the short-term portion included in sales tax receivable in Note 8.

NOTE 29: GEOGRAPHICAL INFORMATION**Reportable segment**

The reporting segments are identified on the basis of information that is reviewed by the chief operating decision maker ("CODM") to make decisions about resources to be allocated and to assess performance. Accordingly, for Management purposes, the Company is organized into operating segments based on the products and services of its business units and has one material reportable segment, cryptocurrency Mining, which is the operation of server farms that support the validation and verification of transactions on the BTC blockchain, earning cryptocurrency for providing these services, as described in Note 1.

Revenues

Revenues* by country are as follows:

	Year ended December 31,	
	2023	2022
Canada	104,434	112,106
USA	15,966	25,095
Argentina	19,050	1,455
Paraguay	6,916	3,772
	146,366	142,428

*Revenues are presented based on the geographical contribution of computational power used for hashing calculations (measured by hashrate) or sales to external customers. During the years ended December 31, 2023 and 2022, the Company earned 97% and 98% of its revenues, respectively, from one Mining pool. The Company has the ability to switch Mining Pools or to mine independently at any time.

Management’s Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

1. INTRODUCTION

The following Management’s Discussion and Analysis (the “MD&A”) for Bitfarms Ltd. (together with its subsidiaries, the “Company” or “Bitfarms”) has been prepared as of March 6, 2024. This MD&A should be read in conjunction with the Company’s audited annual consolidated financial statements and its accompanying notes for the year ended December 31, 2023 (the “Financial Statements”). This MD&A should be read in conjunction with the Company’s Annual Information Form (“AIF”) dated March 6, 2024, which is available on SEDAR+ at www.sedarplus.ca and EDGAR at www.sec.gov/edgar.

The Company’s Financial Statements have been prepared in accordance with International Financial Reporting Standards (“IFRS Accounting Standards”) as issued by the International Accounting Standards Board (“IASB”). The Company’s Financial Statements and this MD&A are reported in thousands of US dollars and US dollars, respectively, except where otherwise noted.

Bitfarms’ management team (“Management”) is responsible for the preparation and integrity of the Financial Statements including the maintenance of appropriate information systems, procedures and internal controls. Management is also responsible for ensuring that information disclosed externally, including the Financial Statements and MD&A, is complete and reliable.

The Company utilizes a number of non-IFRS financial measures and ratios in assessing operating performance. Non-IFRS financial measures and ratios may exclude the impact of certain items and are used internally when analyzing operating performance. Refer to Section 10 - *Non-IFRS and Other Financial Measures and Ratios* and Section 23 - *Cautionary Note Regarding Non-IFRS and Other Financial Measures and Ratios* of this MD&A for more information.

This MD&A contains forward-looking statements. Refer to the risk factors described in Section 19 - *Risk Factors* of this MD&A and to Section 22 - *Cautionary Note Regarding Forward-Looking Statements* of this MD&A for more information. This MD&A contains various terms related to the Company’s business and industry which are defined in Section 25 - *Glossary of Terms* of this MD&A.

In this MD&A, the following terms shall have the following definitions:

Term	Definition
Q4 2023	Three months ended December 31, 2023
Q4 2022	Three months ended December 31, 2022
FY 2023	Twelve months ended December 31, 2023
FY 2022	Twelve months ended December 31, 2022

BITFARMS LTD.

Management’s Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

2. COMPANY OVERVIEW

Founded in 2017, Bitfarms (Nasdaq/TSX: BITF) is a global, publicly traded Bitcoin mining company. Bitfarms runs vertically integrated mining operations with an in-house management system and company-owned electrical engineering, installation service, and onsite technical repair. The Company’s proprietary data analytics system delivers best-in-class operational performance and uptime.

Bitfarms owns and operates server farms comprised of computers (referred to as “Miners”) designed for the purpose of validating transactions on the Bitcoin Blockchain (referred to as “Mining”). Bitfarms generally operates its Miners 24 hours a day, which produce computational power used for hashing calculations (measured by hashrate) that Bitfarms sells to a Mining Pool under a formula-driven rate commonly known in the industry as Full Pay Per Share (“FPPS”). Under FPPS, Mining Pools compensate Mining companies for their computational power used for hashing calculations, measured through hashrate, based on what the Mining Pool would expect to generate in revenue for a given time period if there was no randomness involved. The fee paid by a Mining Pool to Bitfarms for its computational power used for hashing calculations may be in cryptocurrency, U.S. dollars, or another currency. However, the fees are generally paid to the Company in bitcoin (“BTC”) on a daily basis. Bitfarms accumulates the cryptocurrency fees it receives or exchanges them for U.S. dollars through reputable and established cryptocurrency trading platforms.

Bitfarms currently has 11 operating Bitcoin Mining facilities and two under development, which are situated in four countries: Canada, the United States, Paraguay and Argentina. Powered predominately by environmentally friendly hydro-electric and long-term power contracts, Bitfarms is committed to using sustainable and often underutilized energy infrastructure.

The Company’s ability to operate and secure power through its production sites is summarized as follows:

Country	Operating power as of March 6, 2024	Contracted power as of March 6, 2024
Canada	158 MW	179 MW ^{1, 2}
United States	18 MW	21 MW ²
Paraguay	10 MW	180 MW ²
Argentina	54 MW	210 MW ²
	240 MW	590 MW

¹ The Company has secured the rights for 10 MW of hydro-electricity in the province of Quebec, but does not currently have an expansion plan for those 10 MW of power. Bitfarms is continuing its efforts to search for economically viable properties for the available 10 MW of hydro-electricity.

² Refer to section 7 - *Expansion Projects* for details on the timing of the remaining MW not yet operational.

Management’s Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

4. FOURTH QUARTER 2023 FINANCIAL RESULTS AND OPERATIONAL HIGHLIGHTS

Financial

- Revenues of \$46.2 million, gross profit of \$1.8 million (gross margin¹ of 4%) including non-cash depreciation and amortization expense of \$21.8 million, operating loss of \$12.7 million (operating margin¹ of negative 28%) and net loss of \$57.2 million;
- Gross Mining profit² of \$23.4 million (52% Gross Mining margin²); and
- Adjusted EBITDA² of \$14.0 million (30% Adjusted EBITDA margin²).

Operations

- Increased hashrate from 6.1 EH/s to 6.5 EH/s, an increase of 7%, through the installation of approximately 2,300 Miners;
- Earned 1,236 BTC at an average direct cost of \$16,200 per BTC² or an average total cash cost of \$25,200 per BTC² and held 804 BTC valued at approximately \$34.0 million as of December 31, 2023;
- Sold 1,135 BTC at an average price of \$36,600 per BTC for total proceeds of \$41.6 million, a portion of which was used to repay equipment-related indebtedness and pay capital expenditures; and
- Entered into a prepaid contract for the months of November 2023 through April 2024 with the Company's Argentinian private power producer to receive power at the Rio Cuarto facility at the rate of 2.1 cents per kWh plus value added tax.

Expansions

- Initiated a transformative fleet upgrade with the placement of a firm purchase order for 35,888 Bitmain T21 Miners and secured an option to purchase 28,000 additional T21 Miners with expected deliveries in 2024.

Argentina

- Installed approximately 600 new MicroBT M50 WhatsMiner Miners and 200 new Bitmain S19j Pro+ Antminer Miners, which increased capacity to 54 MW and added approximately 0.1 EH/s to the Rio Cuarto facility, bringing its total hashrate to approximately 1.6 EH/s.

Canada

- Energized an additional 6 MW in Baie-Comeau, Quebec, completing the first phase of the facility and increasing the total operating capacity to 11 MW; and
- Started the construction of the second 11 MW phase of the Baie-Comeau facility.

Paraguay

- Finalized an amendment to the existing contract for an additional 20 MW of hydro power capacity to support the expansion at the Paso Pe facility, bringing the facility's total hydro power capacity to 70 MW.

Financing

- Paid down \$5.9 million in equipment-related indebtedness, reducing the total outstanding balance to \$4.0 million as of December 31, 2023;
 - Raised \$40.6 million in net proceeds through the closing of a private placement; and
 - Initiated the Synthetic HODL™ strategy with the purchase of 135 long-dated BTC call options held by the Company as of December 31, 2023.
-
-

¹ Gross margin and Operating margin are supplemental financial ratios; refer to section 10 - *Non-IFRS and Other Financial Measures and Ratios*.

² Gross Mining profit, Gross Mining margin, Adjusted EBITDA, Adjusted EBITDA margin, Direct Cost per BTC and Total Cash Cost per BTC are non-IFRS measures or ratios; refer to section 10 - *Non-IFRS and Other Financial Measures and Ratios*.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

5. FULL YEAR 2023 RESULTS AND OPERATIONAL HIGHLIGHTS

Financial

- Revenues of \$146.4 million, gross loss of \$21.5 million (gross margin¹ of negative 15%) including non-cash depreciation and amortization expense of \$84.8 million, operating loss of \$72.1 million (operating margin¹ of negative 49%) including impairment loss of \$12.3 million, and net loss of \$104.0 million;
- Gross Mining profit² of \$62.4 million (44% Gross Mining margin²); and
- Adjusted EBITDA² of \$35.1 million (24% Adjusted EBITDA margin²).

Operations

- Increased hashrate from 4.5 EH/s to 6.5 EH/s, an increase of 44%, through the acquisition and installation of approximately 22,100 Miners;
- Improved the average watts/average TH efficiency from 39 watts/TH to 36 watts/TH, a change of 8%, through the acquisition and installation of more efficient Miners;
- Earned 4,928 BTC at an average direct cost of \$15,200 per BTC² or an average total cash cost of \$21,800 per BTC²;
- Held 804 BTC valued at approximately \$34.0 million as of December 31, 2023, compared to 405 BTC as of December 31, 2022, representing an increase in the quantity of BTC of 99%;
- Sold 4,529 BTC at an average price of \$28,600 per BTC for total proceeds of \$129.3 million, a portion of which was used to repay equipment-related indebtedness and pay capital expenditures;
- Became a self-importer in Argentina, reducing the expense and facilitating the importation of Miners, and terminated existing contracts with importation brokers, resulting in an impairment loss of \$7.0 million on short-term prepaid deposits; and
- Entered into a prepaid contract for the months of November 2023 through April 2024 with the Company's Argentinian private power producer to receive power at the Rio Cuarto facility at the rate of 2.1 cents per kWh plus value added tax.

Expansions

- Initiated a transformative fleet upgrade with the placement of a firm purchase order for 35,888 Bitmain T21 Miners and secured an option to purchase 28,000 additional T21 Miners with expected deliveries in 2024.

Argentina

- Imported and installed approximately 5,100 new MicroBT M30S WhatsMiner Miners, 1,900 new MicroBT M50 WhatsMiner Miners, 700 new Bitmain S19j Pro Antminer Miners and 5,700 new Bitmain S19j Pro+ Antminer Miners, which increased capacity to 54 MW and added approximately 1.4 EH/s to the Rio Cuarto facility, bringing its current hashrate to approximately 1.6 EH/s.

1 Gross margin and Operating margin are supplemental financial ratios; refer to section 10 - *Non-IFRS and Other Financial Measures and Ratios*.

2 Gross Mining profit, Gross Mining margin, Adjusted EBITDA, Adjusted EBITDA margin, Direct Cost per BTC and Total Cash Cost per BTC are non-IFRS measures or ratios; refer to section 10 - *Non-IFRS and Other Financial Measures and Ratios*.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

5. FULL YEAR 2023 RESULTS AND OPERATIONAL HIGHLIGHTS (Continued)

Expansions (Continued)

Canada

- Acquired 22 MW of hydro power capacity and leased a site in Baie-Comeau, Quebec;
- Installed approximately 2,500 Miners in Baie-Comeau, Quebec that were redeployed from Magog, Quebec, completing the first phase of the facility with 11 MW of total operating capacity; and
- Imported and installed approximately 2,900 new Antminer S19j Pro+ Miners in Magog, Quebec, bringing its total hashrate to approximately 0.3 EH/s.

Paraguay

- Imported and installed approximately 2,900 new M30s WhatsMiner Miners into Paraguay, which added a net 165 PH/s to the Villarrica facility after replacing the older generation Miners, and bringing its total hashrate to approximately 0.3 EH/s. The Company sold the older generation Miners to a third party for approximately \$0.2 million;
- Acquired two power purchase agreements for up to 50 MW and 100 MW of hydro power capacity in Paso Pe and Yguazu, respectively, and started construction at the Paso Pe facility. Subsequently, the power capacity at Paso Pe was increased by 20 MW, bringing the total hydro power capacity to 70 MW for the facility; and
- Fully utilized remaining Miner manufacturer credits of \$19.1 million for the purchase of nine MicroBT hydro containers, with a total capacity of 20 MW, and approximately 2,000 MicroBT M53S hydro Miners to be deployed mainly in Paraguay.

Financing

- Negotiated a discounted prepayment of the equipment financing with BlockFi Lending LLC ("BlockFi"), which had an outstanding balance of \$20.3 million as at February 8, 2023, for \$7.8 million, resulting in a gain on extinguishment of long-term debt of \$12.6 million;
- Paid down \$30.5 million in equipment-related indebtedness, including the negotiated \$7.8 million BlockFi loan settlement payment described above, reducing the total outstanding balance to \$4.0 million as of December 31, 2023;
- Raised \$40.6 million in net proceeds through the closing of a private placement;
- Raised \$68.5 million in net proceeds through the Company's at-the-market equity offering program;
- Launched hedging activities including entering into BTC option contracts with the objective of reducing the variability of future cash flows from sales of digital assets; and
- Initiated the Synthetic HODL™ strategy with the purchase of 135 long-dated BTC call options held by the Company as of December 31, 2023.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

6. PRODUCTION AND MINING OPERATIONS

Key Performance Indicators

	Three months ended December 31,			Year ended December 31,		
	2023	2022	% Change	2023	2022	% Change
Total BTC earned	1,236	1,434	(14)%	4,928	5,167	(5)%
Average Watts/Average TH efficiency*	35	38	(8)%	36	39	(8)%
BTC sold	1,135	3,093	(63)%	4,529	9,063	(50)%

* Average Watts represents the average energy consumption of deployed Miners

Q4 2023 v. Q4 2022

- 1,236 BTC earned in Q4 2023, compared to 1,434 BTC earned in Q4 2022, representing a decrease of 14% as a result of an 80% increase in average network difficulty, partially offset by an increase in hashrate from the Company's expansions and certain upgrades to its Miner fleet;
- 35 average Watts/average TH efficiency in Q4 2023, compared to 38 average Watts/average TH efficiency in Q4 2022, representing an improvement of 8% due to the Company upgrading its fleet with more efficient Miners; and
- 1,135 BTC sold in Q4 2023, compared to 3,093 BTC in Q4 2022. In Q4 2023, the proceeds were used in part to fund operations and repay equipment financing indebtedness, whereas in Q4 2022, the proceeds were mainly used to repay part of the BTC backed credit facility for \$23.1 million, fund operations and to manage liquidity.

FY 2023 v. FY 2022

- 4,928 BTC earned during FY 2023, compared to 5,167 BTC earned during FY 2022, representing a decrease of 5% from the previous year;
- 36 average Watts/average TH efficiency during FY 2023, compared to 39 average Watts/average TH efficiency during FY 2022, an improvement of 8% due to the Company upgrading its fleet with more efficient Miners; and
- 4,529 BTC sold in FY 2023, compared to 9,063 BTC in FY 2022. The proceeds were used for the same purposes as those explained in the Q4 2023 v. Q4 2022 section above.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

6. PRODUCTION AND MINING OPERATIONS (Continued)**Key Performance Indicators (Continued)***FY 2023 v. FY 2022 (Continued)*

	As of December 31,		
	2023	2022	% Change
Period-end operating EH/s	6.5	4.5	44%
Period-end operating capacity (MW)	240	188	28%
Hydro power (MW)	186	178	4%
Hydro power proportion of period-end operating capacity	78%	95%	(17)%

As of December 31, 2023 v. as of December 31, 2022

- 6.5 EH/s online as of December 31, 2023, compared to 4.5 EH/s online as of December 31, 2022, an increase of 44%, as a result of the Company's expansions in Sherbrooke (Quebec), Baie-Comeau (Quebec) and Rio Cuarto (Argentina) as well as the upgrade of its Miner fleet;
- 240 MW operating capacity as of December 31, 2023, compared to 188 MW operating capacity as of December 31, 2022, an increase of 28%, as a result of the installation of approximately 13,400 Miners in Rio Cuarto, Argentina from Q2 to Q4 2023 (resulting in an additional 44 MW) and the expansion in Baie-Comeau (resulting in an additional 11 MW); and
- 186 MW hydro power as of December 31, 2023, compared to 178 MW hydro power as of December 31, 2022, an increase of 4% as a result of the Company's expansion in Baie-Comeau, and representing 78% of the Company's total operating energy capacity at December 31, 2023.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

7. EXPANSION PROJECTS

The Company has described its expansion plans below under the sections entitled "Argentina Expansion", "Paraguay Expansion", "Washington Expansion" and "Canada Expansion". These expansion projects only include updates for 2023. For background or historical information on these expansions, refer to the Company's MD&A for the year ended December 31, 2022, dated March 20, 2023.

As of December 31, 2023, the Company operated 6.5 EH/s, an increase of 0.4 EH/s and 2.0 EH/s compared to Q3 2023 and Q4 2022, respectively, with the installation of additional Miners in Baie-Comeau, Quebec, and Rio Cuarto, Argentina. On November 27, 2023, the Company placed a firm purchase order for 35,888 Bitmain T21 Miners totaling \$95.5 million, or \$14/TH, with deliveries scheduled from March 2024 to May 2024. In addition, the Company secured a purchase option for an additional 28,000 Bitmain T21 Miners (the "Purchase Option") for an aggregate purchase price of \$74.5 million, or \$14/TH. With the deployment of this transformative fleet upgrade, the Company expects to increase its hashrate and improve its fleet efficiency to 12.0 EH/s and 25 W/TH, respectively, in Q2 2024, and to 17.0 EH/s and 23 W/TH, respectively, by December 31, 2024 if the Company exercises the Purchase Option. Including the redeployment of the current Miners in use, the Company expects to reach 21.0 EH/s before the end of 2024. With the next BTC halving expected to occur in April 2024, the Company continues to prudently explore further opportunities to expand its infrastructure and improve its Mining hardware to increase the Company's hashrate, provided such opportunities are accretive based on current macro factors and expected specific operating performance. As of March 6, 2024, the Company paid \$50.8 million towards the purchase order, paid \$7.4 million towards the Purchase Option and has sufficient liquidity to complete the purchase obligations of the 35,888 T21 Miners.

The estimated costs and timelines to achieve these expansion plans may change based on, among other factors, the supply and cost of cryptocurrency Mining equipment, the ability to import equipment into countries in a cost-effective manner, the supply of electrical and other supporting infrastructure equipment, the availability of construction materials, currency exchange rates, the impact of geopolitical events or global health related issues such as pandemics on the supply chains described above, and the Company's ability to fund its initiatives. Adding reliable, environmentally-friendly hydro power is a preferred part of the Company's strategy to expand cost-effectively its operating footprint. The Company's expansion plans rely on a consistent supply of electricity at cost-effective rates; refer to Section 18 - *Risk Factors (Section Economic Dependence on Regulated Terms of Service and Electricity Rates Risks)* of this MD&A for further details, including a description of these and other factors.

A. Argentina Expansion**2023 update**

In February 2023, Management elected to postpone the development of additional infrastructure in Argentina until (i) the private Argentinian power producer obtains an increased power permit, (ii) certain political and economic uncertainties in Argentina have been resolved or become attenuated and (iii) natural gas prices stabilize at an acceptable level.

In April 2023, in anticipation of the power permit approval, the Company, using credits and cash, purchased over 6,200 new Bitmain and MicroBT Miners to fill out an additional 22 MW in the Argentinian facility. Those new Miners were installed in the third quarter of 2023 and improved the overall W/TH efficiency and increased the hashrate of the facility.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

7. EXPANSION PROJECTS (Continued)**A. Argentina Expansion (Continued)****2023 update (Continued)**

In April 2023, the Company confirmed the receipt of the necessary power permits by the private Argentinian power producer to expand production at its Argentina facility. The current permits in place allow up to 100 MW of power capacity. The Company completed testing of its Rio Cuarto substation and began to draw power from the private power producer. The Company installed 2,100 new Miners that were delivered in March and April 2023. Energizing those miners and ending underlocking of previously installed miners in line with improved economics increased the active capacity to 18 MW and the Company's operational hashrate to over 5.0 EH/s.

Drawing power from the private Argentinian power producer enabled the Company to commence purchasing low-cost power under its purchase agreement at approximately \$0.03 per kWh, before VAT, on an annualized basis, or possibly less as the Company reaches full capacity at the facility. The Company's cost of BTC earned at that farm decreased substantially as it actively scaled up operations at the facility.

In June 2023, 1,650 Bitmain S19 Pro Miners were purchased for Argentina at an average direct cost of \$12.98/TH, in addition to the 6,200 Miners purchased in April 2023. In addition, 2,900 MicroBT Miners were delivered, installed and energized, contributing an additional 290 PH/s and driving the Company's operational hashrate to 5.3 EH/s as of June 30, 2023.

In August and September 2023, approximately 1,300 new M50 WhatsMiner miners, 700 new S19j Pro Antminer Miners and 5,500 new S19j Pro+ Antminer Miners were imported and installed, increasing the warehouse's capacity to 51 MW and operational hashrate to 1.5 EH/s. Approximately 600 additional M50 WhatsMiner miners were installed in October 2023, further increasing the warehouse's capacity to 54 MW and operational hashrate to 1.6 EH/s.

In November 2023, the Company entered into a prepaid contract with its Argentinian private power producer, to receive power at the Rio Cuarto facility at the rate of 2.1 cents per kWh plus VAT for the months of November 2023 through April 2024. This contract is expected to significantly lower the Company's blended cost of power to an average of 2.5 cents per kWh plus VAT for the first year of full operations at that facility.

On December 10, 2023, the newly elected President, Javier Milei, took office. Self-described as right-wing libertarian, his agenda includes pro-market policies with an aim to address budget deficits and combat high inflation rates and currency devaluation. Furthermore, the new administration has announced measures to ease import restrictions and provide an incentive to attract foreign direct investments. It is also believed President Milei is receptive to the overall crypto industry.

Position as of December 31, 2023

As of December 31, 2023, the Company had placed deposits of \$4.0 million with suppliers for existing and additional construction work. Overall, in Argentina, the Company has also acquired \$63.3 million of property, plant and equipment, incurred \$0.3 million of expenditures relating to design and feasibility studies and recorded cumulative gains on the disposition of marketable securities of \$70.0 million associated with the mechanism to convert funds into Argentine Pesos for disbursements.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

7. EXPANSION PROJECTS (Continued)**A. Argentina Expansion (Continued)****2024 plan**

The Company expects to upgrade its current fleet of miners in Rio Cuarto during Q4 2024 with new T21 Miners, which is expected to increase the online hashrate from 1.6 EH/s to 2.4 EH/s by December 31, 2024, assuming the Purchase Option is exercised.

The Company retains the option, subject to the receipt of additional government approvals, to expand the Rio Cuarto operation to the full contracted amount of 210 MW. Due to the ongoing political and economic uncertainty, the Company is not yet in a position to determine when or if construction of additional infrastructure in Argentina will commence. The Company will monitor general macroeconomic conditions and the evolution of the new administration's economic program in assessing its expansion plans in the country.

B. Paraguay Expansion**2023 update**

In January 2023, all of the older generation Miners at the Villarrica facility were replaced with approximately 2,900 new M30S WhatsMiner Miners generating approximately 290 PH/s, a 165 PH/s increase, or 132%, compared to the hashrate that was being produced by the older generation Miners. During the three months ended March 31, 2023, the Company sold the older generation Miners to a third party for approximately \$0.2 million.

In July 2023, the Company acquired two power purchase agreements in Paraguay for up to 150 MW of eco-friendly hydro power: up to 50 MW in Villarrica, in close proximity to the Company's existing operations in Paraguay, and up to 100 MW in Yguazu, a new location close to the Itaipú dam, the third largest hydro-electric dam in the world. The new facility in Villarrica is referred to as the Paso Pe facility. At Yguazu, the Company has the opportunity to develop a new farm with up to 100 MW of Mining capacity at a site that is in close proximity to a newly constructed substation with 1,200 MW of capacity. Hydro power at both locations will be provided at a contracted cost of approximately \$0.039 per kWh, before VAT, until December 31, 2027 and is not subject to annual inflationary adjustments.

Paso Pe facility

In August 2023, the Company placed orders using vendor credits for eight 2.4 MW hydro containers and approximately 1,900 M53S hydro-cooling Miners capable of

producing approximately 675 PH/s once installed.

In September 2023, construction commenced as planned at the Paso Pe facility, beginning with the substation, followed by building-out a Mining facility consisting of 50 MW (originally 30 MW before the amended contract described below) of air-cooled warehouses and the 20 MW of hydro containers, expected to be completed during the first quarter of 2024. The construction is progressing as planned with the finalization of underground cable connections in March 2024. The transformer was delivered in March 2024.

In December 2023, the Company amended the contract for an additional 20 MW of energy at the Paso Pe facility, enabling a larger expansion at the site from 50 MW to 70 MW.

The revised cost of developing the expanded 50 MW of air-cooled warehouse, constructing the substation capable of accommodating the total energy requirement, and the installation of the high voltage lines, is estimated to range from \$25.0 million to \$28.0 million, excluding the cost of the power purchase agreement guarantees required by Administración Nacional de Electricidad (“ANDE”), the operator of Paraguay national electricity grid, for securing monthly electricity purchase payment obligations.

BITFARMS LTD.

Management’s Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

7. EXPANSION PROJECTS (Continued)

B. Paraguay Expansion (Continued)

Position as of December 31, 2023

As of December 31, 2023, the Company had placed deposits of \$3.2 million and \$2.4 million with suppliers for construction costs and for electrical components, respectively. As of December 31, 2023, property, plant and equipment includes \$2.5 million related to the Paso Pe facility, including warehouse and infrastructure equipment costs.

Yguazu facility

In January 2024, the Company purchased the land for the 100 MW Yguazu facility. The Company expects construction to begin in March 2024 and to complete the facility during the second half of 2024. The cost of developing the 100 MW facility and the installation of the high voltage lines is estimated to range from \$34.0 million to \$37.0 million, excluding the cost of the power purchase agreement guarantees required by ANDE.

2024 plan

The Company expects to complete construction of its Paso Pe and Yguazu facilities and install its new T21 Miners and WhatsMiner M53S Miners during 2024, which will increase the Paraguay online hashrate from 0.3 EH/s to 3.6 EH/s by June 30, 2024, and, provided that the Purchase Option is exercised, 6.9 EH/s by December 31, 2024.

C. Washington Expansion

2023 update

In April 2023, the Company received approval from the power supplier for a 6 MW expansion that is estimated to be energized in the first quarter of 2024. The Company began constructing an additional production facility on Company-owned land in June 2023 with an estimated cost of \$2.1 million, including \$0.9 million paid in Q2 2023 to the power supplier for establishing the connection. In connection with the new facility, in January 2024, the Company elected to cancel the lease of a 5 MW facility in Washington State in order to transfer Miners from the leased facility to the newly constructed 6 MW facility with completion expected in March 2024. The cancellation of the lease will take effect in April 2024. In February 2024, the power supplier established the electricity connection allowing the Company, subject to the completion of the civil work, to access 6 MW of hydro power capacity.

In July 2023, the Company de-energized its 2 MW immersion cooling pilot project as the equipment did not perform to the Company’s expectations of performance and operating costs. The 2 MW of hydro-electricity remains available to the Company for future use.

In September 2023, the Company upgraded ventilation and cooling systems, increasing average uptime.

2024 plan

The Company expects to upgrade a portion of its current fleet of miners in Washington during Q1 2024 with new T21 Miners, which will increase the online hashrate from 0.6 EH/s to 0.7 EH/s by March 31, 2024.

BITFARMS LTD.

Management’s Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

7. EXPANSION PROJECTS (Continued)

D. Canada Expansion

Baie-Comeau background

In April 2023, the Company entered into agreements to acquire shares of a Company that owns the right to consume 22 MW of hydro power capacity in Baie-Comeau, Quebec, and to lease a site to install the infrastructure to operate the acquired capacity. When fully utilized, the 22 MW is expected to add over 600 PH/s. The Baie-Comeau area is home to five hydro-electricity generation facilities with over 5.4 Gigawatts of nameplate capacity.

In July 2023, the Company completed the acquisition. The consideration transferred at closing totaled \$2.0 million (CAD\$2.6 million), of which \$0.6 million (CAD\$0.8 million) was paid in cash and \$1.4 million (CAD\$1.8 million) was paid through the issuance of 821,000 common shares of the Company. The lease agreement is for an industrial site in Baie-Comeau for an initial term of 10 years and provides the Company with the option to purchase the site for \$2.2 million (CAD \$3.0 million) with an annual adjustment at the lesser of (i) the change in the Consumer Price Index and (ii) 3% throughout the lease term.

Baie-Comeau 2023 and 2024 plan

Following the closing of the acquisition, the Company immediately commenced production at Baie-Comeau with an initial 3 MW online. In connection with the acquisition, the Company increased its total hashrate target to 6.3 EH/s, which was achieved on October 20, 2023.

The Company plans to minimize development-related and build-out expenditures by relocating miners from other facilities to Baie-Comeau and by applying infrastructure equipment repurposed from the December 2022 sale of the former De La Pointe facility. In June and August 2023, approximately 2,500 WhatsMiner M31S+ miners were redeployed from Magog and installed at the Baie-Comeau facility.

The Company fully energized the 11 MW facility on October 20, 2023, and is planning to commission the remaining 11 MW during the second half of 2024 after local grid infrastructure improvements have been completed. The cost of electrical infrastructure and leasehold improvements for the first 11 MW of the facility totaled \$2.8 million.

The Company plans to continue to lease the property and complete the physical improvements for the second 11 MW by the third quarter of 2024. The Company expects the total cost to be approximately \$9.2 million, including \$3.9 million for the leasehold improvements, which will include construction of a new building and \$2.5 million for the electrical infrastructure.

As of December 31, 2023, the Company has \$5.0 million of property, plant and equipment at the Baie-Comeau facility, including infrastructure equipment that was repurposed from other facilities.

Canada 2024 plan

As part of the Miner upgrade and expansion initiatives, the Company expects to install new Miners in Canada during 2024 with new T21 Miners and WhatsMiner M53S Miners, which will increase the online hashrate from 4.0 EH/s to 6.1 EH/s by June 30, 2024 and, provided that the Purchase Option is exercised, 7.0 EH/s by December 31, 2024.

8. FINANCIAL PERFORMANCE (Continued)

A. Revenues

Q4 2023 v. Q4 2022

Revenues were \$46.2 million in Q4 2023, compared to \$27.0 million in Q4 2022, an increase of \$19.2 million, or 71%.

The most significant factors impacting the increase in Bitfarms' revenues in Q4 2023, compared to Q4 2022, are presented in the table below. Revenues increased mostly due to the increase in average Bitfarms' BTC hashrate and average BTC price, partially offset by lower BTC earned as a result of the increase in network difficulty.

(U.S. \$ in thousands except where indicated)	Note	BTC	\$	% Change
BTC and revenues, including Volta, for the three months ended December 31, 2022		1,434	27,037	—
Impact of increase in network difficulty during Q4 2023 as compared to Q4 2022	1	(799)	(28,346)	(105)%
Impact of increase in average Bitfarms' BTC hashrate during Q4 2023 as compared to Q4 2022	2	601	23,480	87%
Impact of difference in average BTC price in Q4 2023 as compared to Q4 2022	3		23,822	88%
Other Mining variance and change in Volta			318	1%
BTC and revenues for the three months ended December 31, 2023		1,236	46,311	71%

Notes

- 1 Calculated as the difference in BTC earned in Q4 2023 compared to Q4 2022, based on the change in network difficulty, multiplied by Q4 2023 average BTC price
- 2 Calculated as the difference in BTC earned in Q4 2023 compared to Q4 2022, based on the change in Bitfarms' average BTC hashrate, multiplied by Q4 2023 average BTC price
- 3 Calculated as the difference in average BTC price in Q4 2023 compared to Q4 2022 multiplied by BTC earned in Q4 2022

The following tables summarize the Company's revenues and average hashrate by country:

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

8. FINANCIAL PERFORMANCE (Continued)

A. Revenues (Continued)

Q4 2023 v. Q4 2022 (Continued)

The Company's Canadian operations accounted for a smaller portion of total revenues in Q4 2023 largely due to the expansion of operations in Argentina. Bitfarms earned the majority of its revenues from its Canadian operations in Q4 2023, which accounted for 66% of total revenues, compared to 80% in Q4 2022. The Argentina, U.S. and Paraguay operations accounted for 21%, 9% and 4% of total revenues in Q4 2023, respectively, compared to 5%, 13% and 2% in Q4 2022, respectively. The average hashrate increase of the Canada, Argentina and Paraguay operations of 0.5 EH/s, or 15%, 1.0 EH/s, or 500%, and 0.2 EH/s, or 200%, respectively, and the increase in average BTC price, partially offset by the increase in network difficulty, resulted in Q4 2023 higher revenues from the Company's operations in those jurisdictions increasing by \$8.7 million, \$8.5 million

and \$1.1 million, respectively, compared to Q4 2022. Revenues from the USA operations increased by \$0.8 million in Q4 2023 as compared to Q4 2022 due to the increase in average BTC price, partially offset by the impact of the increase in network difficulty.

FY 2023 v. FY 2022

Revenues were \$146.4 million in FY 2023, compared to \$142.4 million in FY 2022, an increase of \$3.9 million, or 3%.

The most significant factors impacting the increase in Bitfarms' revenues in FY 2023, compared to FY 2022, are presented in the table below. Revenues increased mostly due to the increase in average BTC price and the increase in average Bitfarms' hashrate, partially offset by the increase in network difficulty.

(U.S. \$ in thousands except where indicated)	Note	BTC	\$	% Change
BTC and revenues, including Volta, for the year ended December 31, 2022		5,167	142,428	—
Impact of increase in network difficulty during FY 2023 as compared to FY 2022	1	(3,093)	(88,667)	(62)%
Impact of increase in average Bitfarms' BTC hashrate during FY 2023 as compared to FY 2022	2	2,854	81,814	58%
Impact of difference in average BTC price in FY 2023 as compared to FY 2022	3		9,110	6%
Other Mining variance and change in Volta			1,751	1%
BTC and revenues for the year ended December 31, 2023		4,928	146,436	3%

Notes

- 1 Calculated as the difference in BTC earned in FY 2023 compared to FY 2022, based on the change in network difficulty, multiplied by FY 2023 average BTC price
- 2 Calculated as the difference in BTC earned in FY 2023 compared to FY 2022, based on the change in Bitfarms' average BTC hashrate, multiplied by FY 2023 average BTC price
- 3 Calculated as the difference in average BTC price in FY 2023 compared to FY 2022 multiplied by BTC earned in FY 2022

8. FINANCIAL PERFORMANCE (Continued)

A. Revenues (Continued)

FY 2023 v. FY 2022 (Continued)

The following tables summarize the Company's revenues and average hashrate by country:

(U.S.\$ in thousands except where indicated)	Year ended December 31,			
	2023	2022	\$ Change	% Change
Canada	104,434	112,106	(7,672)	(7)%
USA	15,966	25,095	(9,129)	(36)%
Argentina	19,050	1,455	17,595	nm
Paraguay	6,916	3,772	3,144	83%
	146,366	142,428	3,938	3%

nm: not meaningful

(Average hashrate in EH/s except where indicated)	Year ended December 31,			
	2023	2022	Change	% Change
Canada	3.6	2.6	1.0	38%
USA	0.6	0.6	—	—%
Argentina	0.7	0.1	0.6	600%
Paraguay	0.3	0.1	0.2	200%
	5.2	3.4	1.8	53%

The Company's Canadian operations accounted for a smaller proportion of total revenues in FY 2023 largely due to the expansion of operations in Argentina. Bitfarms earned the majority of its revenues from its Canadian operations in FY 2023, which accounted for 71% of total revenues, compared to 78% in FY 2022. The Argentina, USA and Paraguay operations accounted for 13%, 11% and 5% of total revenues in FY 2023, respectively, compared to 1%, 18% and 3% in FY 2022, respectively. For the Company's Canadian operations, the impact of the increase in network difficulty was partially offset by the increase in average BTC price and the average hashrate increase of 1.0 EH/s, or 38%, which resulted in revenues decreasing by \$7.7 million during FY 2023 as compared to FY 2022. Revenues from the Company's U.S. operations decreased by \$9.1 million during FY 2023 as compared to FY 2022 due to the increase in network difficulty, partially offset by the increase in average BTC price. The average hashrate increase of the Argentina and Paraguay operations of 0.6 EH/s, or 500%, and 0.2 EH/s, or 200%, respectively, resulted in FY 2023 revenues increasing by \$17.6 million and \$3.1 million, respectively, compared to FY 2022.

Q4 2023 v. Q4 2022

Bitfarms' cost of revenues for Q4 2023 was \$44.5 million compared to \$39.1 million for Q4 2022. The increase in cost of revenues was mainly attributable to:

- A \$4.2 million, or 24%, increase in energy and infrastructure expenses, mainly due to the Company adding new Miners, which increased energy utilization to an average of 218 MW during Q4 2023 versus 169 MW for the same period in 2022, partially offset by lower average energy rates in Q4 2023, resulting in an increase in total electricity costs of \$3.6 million. The availability and pricing of energy may be negatively affected by governmental or regulatory changes in energy policies in the countries, provinces and states where the Company operates.
- A \$1.0 million increase in non-cash depreciation and amortization expense as the Company added new Miners and electrical infrastructure.

These increases were partially offset by:

- A decrease in rent expense of \$0.5 million, mainly due to the capitalization of the leased Washington facility, which was renewed in Q4 2022.

FY 2023 v. FY 2022

Bitfarms' cost of revenues was \$167.9 million for FY 2023 compared to \$131.9 million for FY 2022. The increase in cost of revenues was mainly due to:

- A \$22.5 million, or 40%, increase in energy and infrastructure expenses, mainly due to the Company adding new Miners and upgrading its fleet, which increased energy utilization to an average of 193 MW during FY 2023 compared to 137 MW for the same period in 2022, and higher energy rates in 2023, resulting in an increase in electricity costs of \$23.5 million.
- A \$12.4 million increase in non-cash depreciation and amortization expense as the Company added new Miners and electrical infrastructure.

These increases were partially offset by:

- A decrease in rent expense of \$1.8 million, mainly due to the capitalization of the leased Washington facility which was renewed in Q4 2022.

Q4 2023 v. Q4 2022

Bitfarms' general and administrative ("G&A") expenses were \$13.4 million in Q4 2023, compared to \$12.0 million for Q4 2022. The increase of \$1.4 million, or 12%, in G&A expense was largely due to:

- A \$2.5 million increase in salaries and wages due to the increase in the Company's headcount in 2023 compared to 2022 to support the global expansion as well as merit, market-based adjustments and cost of living salary increases.

The increase was partially offset by:

- A \$1.3 million decrease in professional services mainly due to the termination payments to two executive officers whose consulting agreements were terminated and executive responsibilities transferred to other existing employees in December 2022.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

8. FINANCIAL PERFORMANCE (Continued)

C. General & Administrative Expenses (Continued)

FY 2023 v. FY 2022

For FY 2023, Bitfarms' G&A expenses were \$39.3 million, compared to \$51.5 million for the same period in 2022. The decrease of \$12.2 million, or 24%, in G&A expenses was mainly due to:

- A \$10.9 million decrease in non-cash share-based payment expense in connection with:
 - Stock options granted in 2021 with fair values between \$3.16 to \$5.97 had a higher share-based payment expense in FY 2022 than FY 2023 due to the time-based vesting method, which resulted in an accelerated recognition of share-based expense in earlier periods.
 - The majority of those 2021 stock options were fully vested or cancelled at the end of the first quarter of 2023, which resulted in accelerated share-based payment expense of \$0.9 million during FY 2023. Refer to Note 27 to the Financial Statements for more details. The Company only incurred the share-based payment expense for those cancelled options during the first 3 months of FY 2023, compared to the graded vesting expense in FY 2022.
- A \$2.4 million decrease in professional fees mainly due to the termination of consulting agreements with two executive officers in the fourth quarter of 2022 and with the previous owner of the Company's Mining facility in Washington State in the first quarter of 2023.
- A \$2.0 million decrease in the Company's insurance expense mostly due to refunds from insurers and lower premiums reflecting lower asset values, particularly Miners, due to general market conditions, partially offset by a larger number of Miners.
- The inclusion of \$1.8 million of shipping costs and duties in FY 2022 from transferring older generation Miners from the Company's facilities in Canada to the Villarrica, Paraguay facility, which did not occur in FY 2023.

The decrease was partially offset by:

- A \$5.0 million increase in salaries and wages as a result of hiring additional employees in FY 2023 compared to FY 2022 to support the global expansion as well as merit, market-based adjustments and cost of living salary increases.

Q4 2023 v. Q4 2022

Bitfarms' net financial expenses were \$44.8 million for Q4 2023, compared to net financial income of \$7.1 million for Q4 2022. The \$51.9 million change was primarily related to:

- A \$41.6 million change in loss (gain) on revaluation of warrants due to the increase in the fair value of the warrant liabilities for the 2021 and 2023 private placements in Q4 2023 compared to the decrease of the fair value of the warrant liabilities for the 2021 private placements in Q4 2022.
- A \$6.3 million decrease in the gain on disposition of marketable securities due to less funds being sent to Argentina in Q4 2023 compared to Q4 2022 as the capital expenditures related to the first facility were mostly paid in 2022. The Company has been utilizing a mechanism since Q3 2021 to fund its Argentina expansion through the acquisition of marketable securities and in-kind contribution of those securities to its wholly-owned Argentinian subsidiary that it controls. The subsequent disposition of those marketable securities in exchange for Argentine Pesos gave rise to a gain as the equivalent amount received in Argentine Pesos exceeded the amount of Argentine Pesos the Company would have received from a direct foreign currency exchange.
- A \$3.4 million increase in provision expense on VAT receivable due to the provision recorded in Q4 2023 to reduce the Argentine VAT receivable to nil as a result of the political and economic uncertainties in Argentina.
- A \$1.7 million increase in loss on foreign exchange due to the revaluation of the Company's net monetary assets denominated in foreign currencies following the weakening of the Argentine Pesos at the end of Q4 2023 compared to the end of Q4 2022.
- A \$2.0 million increase in warrant issuance costs for the 2023 private placements in Q4 2023 compared to no warrants issued in Q4 2022.

¹ Prior year figures are derived from restated financial statements. Refer to Section 15 - Restatement.

8. FINANCIAL PERFORMANCE (Continued)**D. Net financial expenses (income)**(Continued)**Q4 2023 v. Q4 2022** (Continued)

The decrease was partially offset by:

- A \$2.6 million decrease in interest expense due to (i) the \$100 million credit facility that commenced on December 30, 2021 and was fully repaid and extinguished in December 2022, (ii) the BlockFi Loan that commenced on February 18, 2022 and was extinguished in February 2023 as described below and (iii) the NYDIG Loan that commenced on June 15, 2022. The NYDIG Loan is classified as long-term debt in the statements of financial position.

FY 2023 v. FY 2022

Bitfarms' net financial expenses were \$32.3 million for FY 2023, compared to net financial income of \$91.0 million for FY 2022. The \$123.3 million change was mainly due to:

- A \$101.5 million change in loss (gain) on revaluation of warrants due to the increase in the fair value of the warrant liabilities for the 2021 and 2023 private placements in FY 2023 compared to the decrease in the fair value of the warrant liabilities for the 2021 private placements in FY 2022.
- A \$39.4 million decrease in gain on disposition of marketable securities due to less funds being sent to Argentina during FY 2023 compared to FY 2022. The Company utilizes a mechanism beginning in Q3 2021 in which its Argentina expansion was funded as explained in the Q4 2023 v. Q4 2022 section above.
- A \$4.9 million increase in loss on foreign exchange due to the revaluation of the Company's net monetary assets denominated in foreign currencies following the weakening of the Argentine Pesos at the end of Q4 2023 compared to the end of Q4 2022.
- A \$2.0 million increase in warrant issuance costs for the 2023 private placements in FY 2023 compared to no warrants issued in FY 2022.

The decrease was partially offset by:

- A \$12.8 million gain on extinguishment of long-term debt and lease liabilities during FY 2023. In February 2023:
 - BlockFi and the Company negotiated a settlement of the loan in its entirety for cash consideration of \$7.8 million, resulting in a gain on extinguishment of long-term debt of \$12.6 million; and
 - The Company negotiated a modification to its lease agreement with Reliz Ltd. (where BlockFi was the lender to Reliz Ltd.) in order to settle its outstanding lease liability of \$0.4 million for a payment of \$0.1 million. As a result, a gain on extinguishment of lease liabilities was recognized in the amount of \$0.3 million.
- A \$10.1 million decrease in interest expense due to the same factors explained in the Q4 2023 v. Q4 2022 section above.

8. FINANCIAL PERFORMANCE (Continued)**E. Impairment**

The impairment loss on short-term prepaid deposits, equipment and construction prepayments, property, plant and equipment and right-of-use assets recorded in Q4 2023 amounted to \$2.3 million, compared to a net impairment reversal of \$8.9 million in Q4 2022. The net impairment loss recorded in FY 2023 amounted to \$12.3 million, compared to \$93.1 million in FY 2022.

Impairment on short-term prepaid deposits during the second quarter of 2023

In 2022, the Company entered into agreements with external brokers to be able to proceed with the importation of its miners into Argentina. Under the agreements, the Company was required to make advance deposits to the external brokers, which were classified as short-term prepaid deposits on the consolidated statements of financial position.

In October 2022, the Argentinian government changed the importations system previously in place and imposed additional controls on imports into Argentina as a means of limiting the outflow of U.S. dollars from the country. In the first quarter of 2023, the Company was able to apply for a self-importation license based on its extended operating history in Argentina and successfully became a self-importer in Argentina to reduce the importation expenses and facilitate the importation of Miners and related equipment. Accordingly, the Company terminated all pending importation agreements with external brokers as of June 30, 2023.

The Company assumed the cost of terminating the importation agreements with the brokers in order to execute its new importation strategy, resulting in the Company forgoing a deposits balance of \$7.0 million. Accordingly, during the second quarter of 2023, the Company impaired \$7.0 million of short-term prepaid deposits. This impairment is presented in the consolidated statements of profit or loss and comprehensive profit or loss under Impairment on short-term prepaid deposits, equipment and construction prepayments, property, plant and equipment and right-of-use assets.

Impairment on mineral assets during the second quarter of 2023

The Suni mineral asset was acquired in connection with the reverse acquisition of Bitfarms Ltd (Israel) on April 12, 2018, and its value at the time was estimated at \$9.0 million based on an independent appraiser's valuation. Suni is an iron ore deposit located in Canada that was held by the acquiree. Since its acquisition, following the presence of impairment indicators, the Suni mineral asset was written down to a net book value of \$3.0 million as of December 31, 2022.

During the second quarter of 2023, in connection with the planned disposal of the Suni mineral asset, Management tested the cash-generating unit for impairment, resulting in a further impairment charge of \$3.0 million and bringing the carrying amount to nil. This impairment charge is presented in the consolidated statements of profit or loss and comprehensive profit or loss under Impairment on short-term prepaid deposits, equipment and construction prepayments, property, plant and equipment and right-of-use assets. On July 27, 2023, the Company sold the Suni mineral asset for a nominal amount to a third party.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

8. FINANCIAL PERFORMANCE (Continued)**E. Impairment (Continued)****Impairment on electrical components during the fourth quarter of 2023**

During the third quarter of 2023, the Company de-energized its 2 MW immersion cooling pilot project in Washington State as the equipment did not perform to the Company's expectations of performance and costs. With the de-energization of the immersion cooling pilot project, the 2 MW of hydro-electricity remains available to the Company to use in the future.

During the fourth quarter of 2023, in connection with the planned disposal of the de-energized immersion cooling electrical components, Management tested those assets for impairment, resulting in an impairment charge of \$1.9 million before being reclassified to assets held for sale. This impairment charge is presented in the consolidated statements of profit or loss and comprehensive profit or loss under Impairment on short-term prepaid deposits, equipment and construction prepayments, property, plant and equipment and right-of-use assets.

Although the BTC Mining industry experiences volatility, it is not generally subject to seasonality or seasonal effects. Seasonal fluctuations in energy supply, however, may impact the Company's operations. The majority of the Company's operations during the above periods was in Quebec, where power was sourced directly from Hydro-Quebec, Hydro-Magog, Hydro-Sherbrooke and the City of Baie-Comeau. The Company also had operations in Washington State that were powered by the Grant County Power Utility District as well as operations in Paraguay that were powered by Compañía de Luz y Fuerza S.A ("CLYFSA"). In Q3 2022, the Company began operations in Argentina. The production facility in Argentina was temporarily connected to the power grid until the private power producer obtained the requisite permits to provide power directly to the Company in April 2023. Energy rates in Argentina increase during winter months of May through September, after which they return to their regular rates. Among other phenomena, changing weather in Quebec, Washington State, Paraguay or Argentina may impact seasonal electricity needs, and periods of extreme cold or extreme hot weather may contribute to service interruptions in cryptocurrency Mining operations. Changes to supply and/or demand of electricity may result in curtailment of electricity to the Company's cryptocurrency Mining operations. The Company's geographical diversification reduces the risk and extent of extreme weather and other external factors unduly affecting the Company's overall performance.

¹ EBITDA, EBITDA margin, Adjusted EBITDA and Adjusted EBITDA margin are non-IFRS measures or ratios; refer to section 10 - *Non-IFRS and Other Financial Measures and Ratios*.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

10. NON-IFRS AND OTHER FINANCIAL MEASURES AND RATIOS

Non-IFRS financial measures

The Company utilizes a number of non-IFRS financial measures and ratios in assessing operating performance. Non-IFRS financial measures and ratios may exclude the impact of certain items and are used internally when analyzing operating performance. Refer to Section 23 - *Cautionary Note Regarding Non-IFRS and Other Financial Measures and Ratios* of this MD&A.

Measures	Definition	Purpose
Gross Mining profit	Gross Profit adjusted to exclude: (i) non-Mining revenues; (ii) depreciation and amortization; (iii) purchase of electrical components and other expenses; and (iv) electrician salaries and payroll taxes.	<ul style="list-style-type: none"> To assess profitability after power costs in cryptocurrency production and other infrastructure costs. Power costs are the largest variable expense in Mining. To provide the users of the MD&A the ability to assess the gross profitability of the Company's core digital asset Mining operations.
EBITDA	Net income (loss) adjusted to exclude: (i) interest expense; (ii) income tax expense; and (iii) depreciation and amortization.	<ul style="list-style-type: none"> To assess profitability before the impact of different financing methods, income taxes, depreciation of capital assets and amortization of intangible assets. To provide the users of the MD&A with additional information to assist them in understanding components of its financial results, including a more complete understanding of factors and trends affecting the Company's performance. Used by Management to facilitate comparisons of operating performance from period to period and to prepare annual operating budgets and forecasts.
Adjusted EBITDA	EBITDA adjusted to exclude: (i) share-based payment; (ii) non-cash finance expenses; (iii) asset impairment charges; (iv) realized gains or losses on disposition of digital assets and (reversal of) revaluation loss on digital assets; (v) gain on disposition of marketable securities, gains or losses on derivative assets and liabilities and discount expense on VAT receivable; (vi) loss (gain) on revaluation of warrants and warrant issuance costs; (vii) loss on currency exchange; and (viii) other non-recurring items that do not reflect the core performance of the Company.	<ul style="list-style-type: none"> To assess profitability before the impact of all of the items in calculating EBITDA in addition to certain other non-cash expenses. To provide the users of the MD&A a consistent comparable metric for profitability of the Company's core performance across time periods. Used by Management to facilitate comparisons of operating performance from period to period and to prepare annual operating budgets and forecasts.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

11. LIQUIDITY AND CAPITAL RESOURCES

As discussed below, the Company's current financing strategy involves (a) selling the BTC it earns and the BTC it holds in treasury and (b) utilizing short-term debt, long-term debt and equity instruments to fund its expansion activities, operating expenses and debt service requirements. The Company anticipates requiring additional funds to complete its growth plans discussed in Section 7 - Expansion Projects of this MD&A.

Although the Company operates through its subsidiaries, there are no material legal restrictions and generally no practical restrictions on the ability of the subsidiaries to transfer funds to the Company, except that the Company may be subject to practical limitations on transferring funds from its Argentinian subsidiary. Beginning in the second half of 2019, the Argentine government instituted certain foreign currency exchange controls that could restrict the Company's Argentinian subsidiary's access to foreign currency, including the US dollar, for making payments abroad or transferring funds to its parent without prior authorization from the Argentine Central Bank. These regulations have continued to evolve and may become more stringent depending on the Argentine government's perception of the availability of sufficient national foreign currency reserves. Further, recent changes, as well as any future changes, in national and provincial leadership may result in changing governmental perceptions and actions surrounding importation policies and the availability of foreign currency reserves for commerce. In late 2023, Argentina held a presidential election, resulting in the election of a new president, for which the implications for economic and monetary policy, and its impact on Bitfarms, cannot be ascertained as of the issuance date of this MD&A.

The Company sends funds periodically to its Argentinian subsidiary to fund its expansion based on supplier invoices that are paid by the Argentinian subsidiary. The Argentinian subsidiary provides Mining services for a market-based fee to its Canadian parent which owns and records revenue from the BTC earned in Argentina and, accordingly, the Argentinian subsidiary is not structured or contemplated to generate substantial cash flows above its internal requirements. The Argentinian subsidiary earns a market-based return on the services it provides to its Canadian parent.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

11. LIQUIDITY AND CAPITAL RESOURCES(Continued)**A. Cash Flows** (Continued)**Cash Flows from Operating Activities**

Cash flows from operating activities decreased by \$12.7 million during FY 2023 compared to FY 2022, primarily driven by:

- A decrease in proceeds from sale of digital assets earned of \$29.4 million as a result of selling less BTC in FY 2023 compared to FY 2022; and
- Higher energy and infrastructure costs of \$22.4 million as explained in Section 8B -*Financial Performance - Cost of Revenues* of this MD&A.

The decrease was partially offset by:

- A decline in income taxes paid, with \$15.0 million paid during FY 2022, compared to \$11.6 million refunded during FY 2023;
- Lower interest and financial expenses paid of \$5.6 million;
- Other favorable working capital variances totaling \$5.2 million that are explained in Section 12 -*Financial Position* of this MD&A; and
- Lower cash G&A expenses of \$1.3 million.

Cash Flows used in Investing Activities

Cash flows used in investing activities decreased by \$96.7 million during FY 2023 compared to FY 2022.

The decrease in cash flow used in investing activities is driven primarily by:

- \$45.3 million of net additions of property, plant and equipment ("PPE") during FY 2023, compared to \$142.6 million for the same period in 2022, primarily due to the acquisition of Miners and infrastructure build-out;
- \$22.9 million in advance payments mainly for the Paraguay expansions during FY 2023, compared to \$41.8 million in advanced payments made on new PPE mainly for the Argentina expansion during FY 2022; and
- The acquisition of 1,000 BTC for \$43.2 million during FY 2022, compared to nil in FY 2023. Refer to Section 11B -*Liquidity and Capital Resources (capital resources - digital asset management program)* of this MD&A.

The decrease was partially offset by:

- \$12.2 million of net proceeds received in FY 2023 from the purchase and disposition of marketable securities to fund the Argentina expansion activities, compared to \$51.6 million of net proceeds for the same period in 2022, as described in Note 28 - *Additional Details to the Statement of Profit or Loss and Comprehensive Profit or Loss* to the Financial Statements;
- Proceeds of \$21.1 million from the sale of digital assets purchased in FY 2022, compared to nil in FY 2023; and
- The acquisition of assets in Baie-Comeau, Quebec, and in Paraguay for \$2.4 million, as described in Note 5 -*Acquisitions of Assets* of the Financial Statements, compared to nil in FY 2022.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

11. LIQUIDITY AND CAPITAL RESOURCES(Continued)**A. Cash Flows** (Continued)**Cash Flows from Financing Activities**

Cash flows from financing activities increased by \$63.9 million from \$24.0 million for FY 2022 to \$87.9 million for FY 2023.

FY 2023

- The Company raised \$68.5 million of net proceeds from its at-the-market equity offering program, \$40.6 million of net proceeds from the private placement completed in November 2023, and \$13.0 million of net proceeds from the exercise of stock options and warrants. The amounts raised were partially offset by scheduled and one-time payments relating to long-term debt and lease liabilities of approximately \$30.5 million and \$3.6 million, respectively.
- The long-term debt repayments included:
 - The settlement of the BlockFi Loan on February 8, 2023 for cash consideration of \$7.8 million, as discussed below;
 - Principal repayments of \$22.2 million towards the NYDIG loan that reduced the outstanding balance to \$4.0 million as of December 31, 2023; and
 - The full repayment of the principal amount of the remaining Foundry Loans #2, #3 and #4, as defined in the Financial Statements, before maturity and without prepayment penalty, for \$0.8 million.
- The lease repayments included:
 - The Company's modification in February 2023 of its lease agreement with Reliz Ltd. (where BlockFi was the lender to Reliz Ltd.) in order to settle its outstanding lease liability of \$0.4 million for a payment of \$0.1 million.

FY 2022

- During FY 2022, the Company raised \$67.2 million of net proceeds from long-term debt, received \$40.0 million of proceeds from the credit facility (which was fully repaid in the fourth quarter of 2022), and \$54.1 million of net proceeds from the Company's at-the-market equity offering program; and
- During FY 2022, these proceeds were partially offset by repayments towards the credit facility, long-term debt, and lease liabilities of \$100.0 million, \$31.2 million and \$6.1 million, respectively.

BlockFi Loan

On February 18, 2022, Bitfarms' subsidiary, Backbone Mining Solutions Inc. ("Backbone Mining"), entered into a \$32.0 million equipment financing facility with BlockFi, which was classified as long-term debt in the statement of financial position. Backbone Mining owns or leases the assets of Bitfarms' 20-megawatt active crypto Mining facilities in the State of Washington. The BlockFi loan was recourse only against Backbone Mining, and the loan was secured by its Miners and, in the event of default, BTC

produced by those Miners.

On February 8, 2023, BlockFi and the Company negotiated a settlement of the loan in its entirety for cash consideration of \$7.8 million, discharging Backbone Mining of all further obligations and resulting in a gain on extinguishment of long-term debt of \$12.6 million. Upon settlement, all of Backbone Mining's assets, including 6,100 Miners collateralizing the loan, became unencumbered.

Cash Flows from Financing Activities (Continued)

At-The-Market Equity Offering Program

Bitfarms commenced an at-the-market equity offering program (the "ATM program") on August 16, 2021, by means of a prospectus supplement dated August 16, 2021, to the Company's short form base shelf prospectus dated August 12, 2021, and U.S. registration statement on Form-F-10, which included a prospectus supplement related to the ATM.

The ATM program expired on September 12, 2023. Over the course of the ATM program, the Company issued 105,368,000 common shares in exchange for gross proceeds of \$277.0 million at an average share price of approximately \$2.63. The Company received net proceeds of \$268.3 million after paying commissions of \$8.5 million to the sales agent for the ATM program and \$0.3 million in other transaction costs.

Q4 2023 v. Q4 2022

During the three months ended December 31, 2023, the ATM program was not active, and no common shares related to the ATM program were issued. During the three months ended December 31, 2022, the Company issued 8,489,000 common shares in exchange for gross proceeds of \$5.8 million at an average share price of approximately \$0.68. The Company received net proceeds of \$5.6 million after paying commissions of \$0.2 million to the sales agent.

FY 2023 v. FY 2022

During FY 2023, the Company issued 52,121,000 common shares in the ATM program in exchange for gross proceeds of \$70.8 million at an average share price of approximately \$1.36. The Company received net proceeds of \$68.5 million after paying commissions of \$2.2 million to the sales agent, in addition to \$0.1 million of other transaction fees. During FY 2022, the Company issued 29,324,000 common shares in the ATM program in exchange for gross proceeds of \$56.0 million at an average share price of approximately \$1.91. The Company received net proceeds of \$54.1 million after paying commissions of \$1.8 million to the sales agent, in addition to \$0.1 million of other transaction fees.

A. Cash Flows (Continued)

Cash Flows from Financing Activities (Continued)

Use of Proceeds

The Company has used the proceeds from the ATM Program that expired on September 12, 2023 to support the growth and development of the Company's Mining operations, as described in Section 7 - *Expansion Projects* of this MD&A, as well as for working capital and general corporate purposes. Described below are the actual use of proceeds from the commencement of the ATM equity offering program through September 30, 2023:

Categories	Use of proceeds from August 16, 2021 to September 30, 2023
MicroBT Miners (completed in 2023)	126,313
Bitmain Miners (completed in 2023)	29,298
Washington Expansion	27,181
Sherbrooke Expansion (completed in 2022)	22,201
Argentina Expansion, net of gain on disposition of marketable securities	50,898
Cowansville Expansion (completed in 2022)	573
Paraguay Expansion (completed in 2023)	3,230
Baie-Comeau Expansion	3,988
Paso Pe (Paraguay) Expansion	4,628
	268,310

Private Placement

In November 2023, the Company completed a private placement for total gross proceeds of \$43.8 million (CAD\$60.0 million) in exchange for 44,444,000 common shares and 22,222,000 warrants to purchase common shares. The Company plans to use the proceeds of the private placement to meet payment commitments on the purchase order of 35,888 T21 Miners expected to be delivered in 2024.

Q4 2023 v. Q4 2022

During the three months ended December 31, 2023, the Company received from the private placement completed in November 2023 net proceeds of \$40.6 million after paying commissions and other fees of \$3.2 million to the broker. In addition, 6,963,000 warrants and 2,307,000 broker warrants related to the private placement that closed on November 28, 2023, were exercised, resulting in the issuance of 9,270,000 common shares for proceeds of approximately \$11.0 million. During the three months ended December 31, 2022, there were no new private placements or exercises of warrants from previous private placements completed by the Company.

FY 2023 v. FY 2022

During FY 2023, the Company received total net proceeds of \$51.6 million compared to nil in FY 2022 for the same reasons explained in the Q4 2023 v. Q4 2022 section above.

BITFARMS LTD.

Management’s Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

11. LIQUIDITY AND CAPITAL RESOURCES(Continued)

B. Capital Resources

Bitfarms’ capital management objective is to provide the financial resources that will enable the Company to maximize the return to its shareholders while optimizing its cost of capital and still ensuring the Company has sufficient liquidity to fund its normal operating activities. In order to achieve this objective, the Company monitors its capital structure and makes adjustments as required in light of the Company’s funding requirements, changes in economic conditions, the cost of providing financing, and the risks to which the Company is exposed. The Company’s financing strategy is to maintain a flexible capital structure that optimizes the cost of capital at an acceptable level of risk, to preserve its ability to meet financial obligations as they come due, and to ensure the Company has sufficient financial resources to fund its organic and acquisitive growth.

Based on the current capital budget and BTC prices, the Company currently anticipates that additional financing will be required to complete construction of additional facilities in Argentina, if the Company elects to do so, and to fund expansion activities in Canada and Paraguay to achieve its published hashrate targets. In order to achieve its business objectives, the Company may sell or borrow against the BTC that have been accumulated as of the date hereof as well as BTC received from its ongoing operations, which may or may not be possible on commercially attractive terms. Bitfarms intends to continue to manage its capital structure by striving to reduce operating expenses and unnecessary capital spending, disposing of inefficient or underutilized assets, obtaining short-term and long-term debt financing and issuing equity.

A BTC Halving is scheduled to occur once every 210,000 blocks, or roughly every four years, until the total amount of BTC rewards issued reaches 21 million, which is expected to occur around 2140. The next BTC Halving is expected to occur in April 2024, at which time BTC block rewards will decrease from 6.25 BTC per block to 3.125 BTC per block. Once 21 million BTC are generated on or about the year 2140, the network will stop producing more BTC, and the industry will then need to rely on transaction fees and/or other sources of revenue. While BTC prices have had a history of significant fluctuations around BTC Halving events, there is no guarantee that the price change will be favorable or would compensate for the reduction in Mining rewards and the compensation from Mining Pools.

Digital Asset Management Program

In early January 2021, the Company implemented a digital asset management program under which it holds BTC for its intrinsic value and as a source of liquidity. The Company has internal controls over the management of its digital assets, which it evaluates and, as appropriate, enhances on a quarterly basis. Pursuant to the digital asset management program, the Company added 3,301 BTC to its balance sheet during the year ended December 31, 2021.

In January 2022, the Board of Directors (the “BOD”) authorized Management to purchase 1,000 BTC. During the second quarter of 2022, following the BOD approval, the Company sold 3,000 BTC in collateral to repay part of the Credit Facility and 350 BTC in treasury to manage liquidity levels. During the third quarter of 2022, the Company sold 670 BTC in collateral to repay part of the Credit Facility and 1,925 BTC in treasury to maintain sufficient liquidity levels. On August 1, 2022, Management received approval from the BOD to sell daily production, in addition to any sale of up to 1,000 BTC from treasury, should market conditions be justified in its discretion. During Q4 2022, the Company sold 1,359 BTC in collateral to repay the remaining balance of the Credit Facility in full and 1,734 BTC in treasury to manage liquidity levels. Since January 2022, the Company has not purchased any BTC.

BITFARMS LTD.

Management’s Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

11. LIQUIDITY AND CAPITAL RESOURCES(Continued)

B. Capital Resources (Continued)

Digital Asset Management Program (Continued)

Presented below are the total BTC sold and proceeds per quarter in FY 2023, a portion of which was used to repay equipment-related indebtedness, with the remaining portion used to fund operations and expansion plans:

(U.S. \$ in thousands except where indicated)	Three months ended			
	December 31, 2023	September 30, 2023	June 30, 2023	March 31, 2023
Quantity of BTC sold	1,135	1,018	1,109	1,267
Total proceeds	41,585	28,354	30,886	28,483

The sale of BTC as described above, while the Company continued to earn BTC, resulted in total holdings of 804 BTC as of December 31, 2023, valued at approximately \$34.0 million based on a BTC price of approximately \$42,300, as of December 31, 2023.

Custody of digital assets

The Company’s BTC received from the Mining Pool for its computational power used for hashing calculations is delivered to multi-signature wallets that the Company controls

or directs to external third-party custodians. On a regular basis, the Company transfers BTC from its multi-signature wallets to external third-party custodians, Coinbase Custody Trust Company, LLC (“Coinbase Custody”) and Anchorage Digital Bank National Association (“Anchorage Digital”). Coinbase Custody provides custody and related services for clients’ digital assets as a fiduciary pursuant to the New York State Department of Financial Services under Section 100 of the New York Banking Law. Anchorage Digital is the only federally chartered crypto bank in the U.S., serves as a custodian for digital assets, and is licensed and regulated by the Office of the Comptroller of the Currency. Currently, Coinbase Custody and Anchorage Digital provide only custodial services to the Company and do not use a sub-custodian. Coinbase Custody and Anchorage Digital are not related parties to the Company.

The Company has internal controls in place to evaluate its custodians on a quarterly basis. The Company can transfer digital assets between custodians and has its own multi-signature wallets as a contingency plan that would have a minimal impact on the Company’s operations.

As of March 6, 2024, the Company has 807 BTC, valued at \$54.1 million on its balance sheet. As of the date of this MD&A, 100% of the Company’s BTC are held in custody with Coinbase Custody and Anchorage Digital.

BITFARMS LTD.

Management’s Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

11. LIQUIDITY AND CAPITAL RESOURCES(Continued)

B. Capital Resources (Continued)

Custody of Digital assets (Continued)

Coinbase Custody maintains an insurance policy of \$320 million for its cold storage, and Anchorage Digital maintains an insurance policy of \$50 million for its cold and hot storage; however, the Company cannot ensure that the full limits of those policies would be available to the Company or, if available, would be sufficient to make the Company whole for any BTC that are lost or stolen. The Company is unaware of: (i) any security breaches involving Coinbase Custody or Anchorage Digital which have resulted in the Company’s crypto assets being lost or stolen, or (ii) anything with regards to Coinbase Custody’s or Anchorage Digital’s operations that would adversely affect the Company’s ability to obtain an unqualified audit opinion on its audited financial statements. The Company’s crypto assets held in custody with Coinbase or Anchorage Digital may not be recoverable in the event of bankruptcy by Coinbase, Anchorage Digital or their affiliates. In Coinbase’s annual report, on Form 10-K, filed with the U.S. Securities Exchange Commission on February 15, 2024, Coinbase disclosed that, in the event of a bankruptcy, custodially held crypto assets could be considered to be the property of the bankruptcy estate and that the crypto assets held in custody could be subject to bankruptcy proceedings with Coinbase Custody’s customers being treated as general unsecured creditors. Further, regardless of efforts made by the Company to securely store and safeguard assets, there can be no assurance that the Company’s cryptocurrency assets will not be defalcated through hacking or other forms of theft.

Hedging program of digital assets

The Company’s hedging strategy aims to reduce the risk associated with the variability of cash flows resulting from future disposals of digital assets and in consideration of the volatility and adverse price movements of the digital assets in the prior months. In March 2023, the BOD approved a hedging program and authorized Management, through a risk management committee specifically created for this purpose, to implement hedges using BTC option contracts for up to 20% of the Company’s BTC compensation per month and up to three months of future BTC compensation. In April 2023, the BOD authorized Management to increase the BTC option contracts to up to 50% of the Company’s BTC compensation per month and up to six months of expected future BTC compensation. As of March 6, 2024, the risk management committee has not engaged in hedging to the full extent approved by the BOD. The Company has a hedge in place of 160 BTC of expected future BTC compensation.

During the three and twelve months ended December 31, 2023, the Company secured BTC option contracts to sell digital assets which resulted in a loss of \$0.3 million and \$0.5 million, respectively, mainly related to premiums paid for the option contracts hedging the potential risk of the BTC price decreasing and protecting the Company’s margins. Refer to Note 22 to the Financial Statements for more details.

Synthetic HODL program of digital assets

Alongside the hedging program, and with the intent to manage a more capital-efficient portfolio, in June 2023, the BOD approved a HODL strategy, referred to as a synthetic HODL strategy, which allows up to 20% of the Company’s BTC exposure to be replicated using BTC call options. In October 2023, the Company initiated its Synthetic HODL strategy with the purchase of long-dated BTC call options. The primary objective of the Synthetic HODL is to allow the Company to accumulate BTC in treasury and increase BTC exposure in a manner that is risk-managed and capital efficient. As of March 6, 2024, the Company has active call option contracts providing the right to buy up to 135 BTC. It remains within the risk management committee’s discretion to dynamically adjust Bitfarms’ hedge and Synthetic HODL ratios within the risk limits approved by the BOD to more adequately respond to market factors that are beyond the Company’s operational control. During the three and twelve months ended December 31, 2023, the Company purchased long-dated BTC call options which resulted in an unrealized gain of \$0.5 million for both periods primarily attributable to the increase in the BTC price over the respected periods.

BITFARMS LTD.

Management’s Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

11. LIQUIDITY AND CAPITAL RESOURCES(Continued)

C. Contractual obligations

The following are the contractual maturities of financial liabilities and gross lease liabilities (non-financial liabilities) with estimated future interest payments, as applicable, as of December 31, 2023:

(U.S. \$ in thousands)	2024	2025	2026	2027	2028 and thereafter	Total
Trade accounts payable and accrued liabilities	9,077	—	—	—	—	9,077
Long-term debt	4,022	—	—	—	—	4,022
Lease liabilities	4,087	2,985	2,827	2,548	8,079	20,526

D. Commitments

As of December 31, 2023, the Company’s remaining payment obligations in connection with the 35,888 Bitmain T21 Miners purchase order are outlined below:

	As of December 31,
(U.S. \$ in thousands)	2023
Three months ending March 31, 2024	41,446
Three months ending June 30, 2024	44,551
	85,997

With the Company’s recent private placement closed during the year ended December 31, 2023, as disclosed in Note 21 of the Financial Statements, the Company anticipates having sufficient liquidity to complete the payment obligations included in the table above.

E. Contingent liability

In 2021, the Company imported Miners into Washington State that the vendor located in China claimed originated in Malaysia. In early 2022, U.S. Customs and Border Protection challenged the origination of the Miners, asserting their manufacture in China, and notified the Company of a potential assessment of a U.S. importation duty of 25%. Since the request for information by U.S. Customs and Border Protection, the Company has been working with the vendor to validate their origination outside of China by visiting contract manufacturer sites and by examining and documenting the manufacture and assembly of the Miners by the vendor and its third-party contractors.

During the third quarter of 2023, the Company submitted the supporting documentation to U.S. Customs and Border Protection in defense of its position that the Miners were manufactured outside China and the associated custom duties in the amount of \$9.4 million do not apply. While the final outcome of this matter is uncertain at this time, Management has determined it is not probable that it will result in a future cash outflow for the Company and, as such, no provision was recorded as of December 31, 2023.

BITFARMS LTD.

Management’s Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

12. FINANCIAL POSITION

A. Working Capital

	As of December 31,	As of December 31,	\$ Change	% Change
(U.S. \$ in thousands)	2023	2022 ⁽¹⁾		
Total Current Assets	129,984	69,088	60,896	88%
Total Current Liabilities	69,154	67,413	1,741	3%
Working Capital	60,830	1,675	59,155	nm

With the next halving event currently anticipated to occur in April 2024, the Company places, and continues to place, importance on maintaining sufficient liquidity to manage the uncertainty and capitalize upon suitable opportunities the halving event may present. As of December 31, 2023, Bitfarms had working capital of \$60.8 million, compared to \$1.7 million as of December 31, 2022. The increase in working capital was mostly due to:

- A \$53.2 million increase in cash, mainly related to the issuance of (i) 52,121,000 common shares from the ATM program, for net proceeds of \$68.5 million, (ii) 44,444,000 common shares from the private placement completed in November 2023, for net proceeds of \$40.6 million, and (iii) 12,317,000 common shares from the exercise of stock options and warrants, for total proceeds of \$13.0 million. The liquidity raised was partially used for expansion projects during FY 2023, with the remainder intended for future payments for T21 Miners and general working capital purposes.
- A \$27.3 million increase in total digital assets, including the digital assets pledged as collateral, resulting from the increase of the Company’s treasury by 399 BTC and the appreciation of the BTC price during FY 2023.
- The extinguishment of the BlockFi loan in Q1 2023, which had an outstanding balance of \$20.0 million on December 31, 2022, for a payment of \$7.8 million, resulting in an increase of \$12.2 million in working capital. Refer to section 11A - *Liquidity and Capital Resources* for details on the extinguishment of the BlockFi loan.
- Scheduled capital repayments of \$22.2 million towards the NYDIG loan. The effect on working capital is nil as the repayments decreased the cash balance and the loan balance by corresponding amounts.

The increases in working capital was partially offset by:

- An increase in warrant liabilities of \$40.3 million due to the closing of the November 2023 private placements and the subsequent fair value revaluation of the warrants for the 2021 and the November 2023 private placements.
- A decrease in short-term prepaid deposits of \$6.5 million, mainly related to an impairment loss of \$7.0 million during FY 2023. Refer to section 8E - *Financial Performance (Impairment)*.
- A decrease in taxes receivable of \$12.1 million following the receipt of tax refunds during FY 2023.

¹ Prior year figures are derived from restated financial statements. Refer to Section 15 - *Restatement*.

BITFARMS LTD.

Management’s Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

12. FINANCIAL POSITION (Continued)

B. Property, plant and equipment

The net book value of PPE by country is as follows:

(U.S. \$ in thousands)	As of December 31,		\$ Change	% Change
	2023	2022		
Canada	101,454	142,654	(41,200)	(29)%
USA	18,154	32,664	(14,510)	(44)%
Argentina	54,657	31,927	22,730	71%
Paraguay	11,747	12,183	(436)	(4)%
	186,012	219,428	(33,416)	(15)%

As of December 31, 2023, Bitfarms had PPE of \$186.0 million, compared to \$219.4 million as of December 31, 2022. The decrease of \$33.4 million, or 15%, was primarily due to the \$41.2 million decrease of PPE in Canada, mainly related to depreciation expense. PPE in the USA and Paraguay decreased by \$14.5 million and \$0.4 million, respectively, mostly due to depreciation expense incurred on Miners. These decreases were partially offset by the \$22.7 million increase in Argentina PPE primarily due to the delivery of approximately 13,400 Miners in FY 2023.

C. Intangible assets

As of December 31, 2023, Bitfarms had intangible assets of \$3.7 million, compared to \$33,000 as of December 31, 2022. The \$3.7 million increase is mainly due to the Company's three acquisitions of groups of assets in Quebec and Paraguay during the year ended December 31, 2023, net of \$0.1 million of amortization. Each of those acquisitions of groups of assets resulted in contractual access rights to hydro power electricity.

The following table summarizes those access rights:

(U.S.\$ in thousands except where indicated)	Additions to intangibles	Additional capacity	Term of contractual access rights	Amortization method and period
Baie-Comeau, Quebec	2,315	22 MW	No termination date	Straight-line over the lease term of the facility
Villarrica (Paso Pe), Paraguay	1,065	50 MW*	Ending on December 31, 2027	Straight-line over the access rights period
Yguazu, Paraguay	421	100 MW	Ending on December 31, 2027	Straight-line over the access rights period
	3,801	172 MW		

* In November 2023, the Company finalized an amendment to the existing contract for an additional 20 MW of energy capacity for a total capacity of 70 MW.

Refer to Notes 5 and 14 to the Financial Statements for more details.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

13. FINANCIAL INSTRUMENTS

The Company discloses information on the classification and fair value of its financial instruments, as well as on the nature and extent of risks arising from financial instruments, and related risk management in Note 22 to the Financial Statements. Risks are related to foreign currency, credit, counterparty, liquidity, and concentration.

14. RELATED PARTY TRANSACTIONS

The Company discloses information on its related party transactions, as defined in IAS 24, *Related Party Disclosures*, in Note 23 to the Financial Statements.

15. RESTATEMENT

In the Financial Statements, the Company has restated its consolidated statements of financial position as of December 31, 2022 and January 1, 2022, its consolidated statements of profit or loss and comprehensive profit or loss for the year ended December 31, 2022 and its consolidated statements of cash flows for the year ended December 31, 2022, which were previously filed on SEDAR+ and EDGAR. Subsequent to the original issuance of those financial statements, Management, with the assistance of outside counsel, conducted a review of the private placement financings which closed in 2021 ("2021 private placements") to determine if the warrants issued should be recognized as financial liabilities and accounted for at fair value through profit and loss rather than as equity instruments.

The 2021 private placement financings were comprised of common shares and warrants. The warrants are convertible for a fixed number of common shares of the Company but have a contingent cashless exercise clause (i.e., there was a contingent variability provision). In accordance with IAS 32, *Financial Instruments: Presentation*, variability in the number of its own shares delivered upon exercise of the warrants would result in a financial liability.

In 2023, the Company concluded that the proper accounting classification of the warrants was as financial liabilities and accounted for at fair value through profit and loss. Although the conditional settlement provisions attached to the warrants are unlikely to occur, they are deemed to be genuine and, accordingly, the warrants should be recognized as financial liabilities.

The Company has made adjustments to the figures reported in the previously mentioned financial statements periods and present the warrants issued in connection with the private placement financings as financial liabilities as shown in the restated audit consolidated financial statements for the years ended December 31, 2023 and December 31, 2022.

For additional information on the financial statements restatement, please refer to Note 3e of the Financial Statements.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

16. INTERNAL CONTROLS OVER FINANCIAL REPORTING

A. Disclosure Controls and Procedures

Management, under the supervision of the Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”) of the Company, has designed or caused to be designed under their supervision, disclosure controls and procedures (“DC&P”) to provide reasonable assurance that:

- i) material information relating to the Company is made known to them by others, particularly during the period in which the annual filings are being prepared; and
- ii) information required to be disclosed by the Company in its annual filings, interim filings or other reports filed or submitted by the Company under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation.

Management, under the supervision of the Company’s CEO and CFO, has evaluated, or caused to be evaluated, the effectiveness of the Company’s DC&P as defined in National Instrument 52-109 - *Certification of Disclosure in Issuer’s Annual and Interim Filings* as of December 31, 2023. As a result of this evaluation, the Company’s CEO and CFO have concluded that the Company’s DC&P were not effective as of December 31, 2023, and that the design and operating of the Company’s DC&P were not effective to provide reasonable assurance that all material information relating to the Company was reported as required because material weaknesses in the current operation of the Company’s internal control over financial reporting were identified, as described below.

B. Management’s annual report on internal control over financial reporting

Management, under the supervision of the CEO and CFO, is also responsible for establishing and maintaining adequate internal controls over financial reporting (“ICFR”). Management, under the supervision of the CEO and CFO, has designed ICFR, or caused them to be designed under their supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS Accounting Standards.

Management, under the supervision of the CEO and CFO of the Company, has evaluated the effectiveness of its ICFR as of December 31, 2023, as defined in National Instruments 52-109 - *Certification of Disclosure in Issuer’s Annual and Interim Filings*. The evaluation was based on the *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). Based on this assessment, Management concluded that, as of December 31, 2023, the Company’s ICFR was not effective because a material weakness existed.

Management’s Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

16. INTERNAL CONTROLS OVER FINANCIAL REPORTING (Continued)

B. Management’s annual report on internal control over financial reporting (Continued)

Identified material weaknesses

A material weakness is a deficiency, or a combination of deficiencies, such that there is a reasonable possibility that a material misstatement of the Company’s annual or interim financial statements will not be prevented or detected on a timely basis.

In conjunction with the preparation of the Company’s financial statements for the year ended December 31, 2023, and specifically, in connection with the accounting for private placement warrants that were issued in the fourth quarter of 2023, Management identified an error in its accounting for previously issued warrants that were issued in connection with certain private placement financings in 2021. Management has determined that the control over accounting for complex financing transactions did not operate effectively in 2021 as the warrants issued in 2021 should have been classified as a financial liability and accounted for at fair value through profit and loss, and not as equity instruments. The restatement to correct the classification and subsequent accounting for those warrants impacted the consolidated financial statements of the company for the year ended December 31, 2022, which has been reflected in the restated comparative periods (including an opening balance sheet as of January 1, 2022) presented in the consolidated financial statements for the year ended December 31, 2023.

Refer to Section 15 for more details about the material errors and related restatements. Management considers these restatements to constitute a material weakness that requires remediation, and Management is in the process of implementing remediation measures to address the material weakness.

Status of remediation plan

Remediation efforts to date comprise expanding the finance team to include more Chartered Professional Accountants (CPAs) with technical expertise and experience in evaluating more complex areas of IFRS Accounting Standards, involving the Company’s legal counsel on evaluating complex agreements involving financial instruments and engaging third-party consultants to assist with assessing the accounting for complex financial instruments and review of financial statements. Management’s efforts are ongoing and its remediation plan is expected to be completed during 2024.

If these remedial measures are insufficient to address the material weakness described above, or are not implemented timely, or additional deficiencies arise in the future, material misstatements in our interim or annual financial statements may occur in the future and could have the effects described in the “Risk Factors” section of this MD&A.

C. Changes in internal control over financial reporting

With the exception of the items identified above, there have been no changes in the Company’s ICFR that have materially affected, or are reasonably likely to materially affect, the Company’s ICFR during the period beginning on October 1, 2023 and ended December 31, 2023.

D. Limitation of DC&P and ICFR

All control systems contain inherent limitations, regardless of how well designed. As a result, Management acknowledges that its internal control over financial reporting will not prevent or detect all misstatements due to error or fraud. In addition, Management’s evaluation of controls can provide only reasonable, not absolute, assurance that all control issues that may result in material misstatements, if any, have been detected.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

17. SHARE CAPITAL

As of the date of this MD&A, the Company has 339,274,000 common shares outstanding, 12,177,000 vested and 8,647,000 unvested stock options, 29,898,000 warrants outstanding and 625,000 restricted stock units. There are no preferred shares or any other classes of shares outstanding.

18. REGULATORY COMPLIANCE

The Company has engaged legal counsel in each jurisdiction in which it maintains operations to monitor changes to the laws and regulations of such jurisdiction and to advise how it can maintain compliance with such laws and regulations. Legal counsel reports directly to the President and CEO. The following is a discussion of regulatory compliance considerations specific to each such jurisdiction:

Argentina

The Company operates one 54 MW server farm located in Cordoba, Argentina (with an electrical infrastructure capacity of 55 MW). Refer to Section 7 -*Expansion Projects - A. Argentina Expansion* of this MD&A and the 2023 AIF under Section 5.2 - *FUTURE GROWTH PLANS - ARGENTINA EXPANSION*.

There are no material restrictions in Argentina on the business of operating a server farm or conducting the business of the Company as described herein and in the 2023 AIF, and as of the date of this MD&A, the Company has not received any material notices or statements from regulatory authorities in Argentina that would negatively impact its operations in Argentina. The Company is not relying on any registrations, exemptions, or "no action" letters to conduct its business in Argentina.

Paraguay

The Company operates one 10 MW server farm located in Villarrica, Paraguay. Refer to Section 7 -*Expansion Projects - B. Paraguay Expansion* of this MD&A and the 2023 AIF under Section 5.3 - *FUTURE GROWTH PLANS - PARAGUAY EXPANSION*.

There are no material restrictions in Paraguay on the business of operating a server farm or conducting the business of the Company as described herein and in the 2023 AIF, and as of the date of this MD&A, the Company has not received any material notices or statements from regulatory authorities in Paraguay that would negatively impact its operations in Paraguay. The Company is not relying on any registrations, exemptions, or "no action" letters to conduct its business in Paraguay.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

18. REGULATORY COMPLIANCE (Continued)**Washington State**

The Company operates one 18 MW server farm located in the State of Washington in the United States. Refer to Section 7 -*Expansion Projects - C. Washington Expansion* of this MD&A and the 2023 AIF under the Section 5.4 - *FUTURE GROWTH PLANS - WASHINGTON EXPANSION*.

There are no material restrictions in Washington on the business of operating a server farm or conducting the business of the Company as described herein and in the 2023 AIF, and as of the date of this MD&A, the Company has not received any material notices or statements from regulatory authorities in Washington that would negatively impact its operations in Washington. The Company is not relying on any registrations, exemptions, or "no action" letters to conduct its business in Washington.

Québec

The Company operates a total of eight server farms with an aggregate power capacity of 158 MW located in the Province of Québec, Canada. Refer to Section 7 -*Expansion Projects - D. Canada Expansion* of this MD&A and the 2023 AIF under the Section 5.5 - *FUTURE GROWTH PLANS - CANADA EXPANSION*.

There are no material restrictions in Québec or Canada on the business of operating a server farm or conducting the business of the Company as described herein and in the 2023 AIF, and as of the date of this MD&A, the Company has not received any material notices or statements from regulatory authorities in the Québec or Canada that would negatively impact its operations in Québec or Canada. The Company is not relying on any registrations, exemptions, or "no action" letters to conduct its business in Québec or Canada.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS

The following discussion summarizes the principal risk factors that apply to the Company's business and that may have a material adverse effect on the Company's business, financial condition and results of operations, and/or the trading price of the Company's shares. Due to the nature of the Company's business, the legal and economic climate in which it operates and its present stage of development and proposed operations, the Company is subject to significant risks. These risk factors are not a definitive list of all risk factors associated with an investment in the Company or in connection with its operations. Additional risks and uncertainties not presently known to the Company, or that are currently deemed immaterial, may also impair its operations. If any such risks actually occur, the financial condition, liquidity and results of operations of the Company could be materially adversely affected. Investors should carefully consider the risks, factors, and uncertainties described below, together with the other information contained in this MD&A, as well as the risk factors, uncertainties, and other information disclosed in the Company's other public filings before making an investment decision regarding the

Bitcoin Halving Event

The BTC reward for solving a block is subject to periodic incremental halving. Halving is a process designed to control the overall supply and reduce the risk of inflation in BTC using a proof of work consensus algorithm. At a predetermined block, the Mining reward is cut in half, hence the term "halving". The BTC blockchain has undergone halvings three times since its inception. Most recently, in May 2020, the BTC Block Reward decreased from 12.5 to 6.25 BTC per block (a "BTC Halving"), and, consequently, the number of new BTC issued to Miners as a subsidy decreased to approximately 900 per day, excluding transaction fees.

The May 2020 BTC Halving had a significant negative impact on the Company's profitability for several months following the BTC Halving. It took approximately six months for the Company's revenue per terahash to return to the level experienced prior to the May 2020 Bitcoin Halving. Given that profitability is required for self-acting agents to perform Mining to continue to support the validation of transactions, the expected impact of the BTC Halving is that market variables of BTC price will adjust over time to ensure that Mining remains profitable. The period of market normalization after the next BTC Halving to incentivize profitability levels is unknown.

A BTC Halving is scheduled to occur once every 210,000 blocks, or roughly every four years, until the total amount of BTC rewards issued reaches 21 million, which is expected to occur around 2140. Once 21 million BTC are generated, the network will stop producing more. The next BTC Halving is expected to occur in April 2024, at which time BTC Block Rewards will decrease from 6.25 BTC per block to 3.125 BTC per block. While BTC prices have had a history of price fluctuations around BTC Halving events, there is no guarantee that the price change will be favorable or would compensate for the reduction in Mining reward and the corresponding decrease in the compensation the Company receives from the Mining Pool(s) in which it participates.

If BTC price and difficulty do not maintain or continue their trend of adjusting to pre-BTC Halving profitability levels over time, or the period of market normalization after the BTC Halving to pre-BTC Halving profitability levels is too long, there is a risk that a future BTC Halving will render the Company unprofitable for a sustained time period such that it could be unable to continue as a going concern.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Insolvency, Bankruptcy, or Cessation of Operations of Mining Pool Operator

Over the past five years, Bitfarms has both mined independently and been a member of multiple third-party Mining Pools; however, as of the date hereof, it participates in only one Mining Pool, being Foundry Pool. Foundry Pool is owned indirectly by Digital Currency Group, which also owns Genesis Global Capital ("Genesis"). On January 19, 2023, Genesis filed for U.S. bankruptcy protection. In the event that Foundry Pool (or any other Mining Pool in which the Company participates) ceases making payments to Bitfarms for whatever reason, including bankruptcy, insolvency or cessation of its operations, or for no reason, Bitfarms would expect to immediately cease contributing its Hash power to such Mining Pool and either: (i) join a different Mining Pool; or (ii) commence Mining independently. The Company estimates that such a switch would take approximately one day in either scenario. Given that Foundry Pool pays the Company on a daily basis, the cost of switching, if such a switch is ever deemed necessary by the Company, is expected to be the lost revenues the Company would have earned had it been Mining during that approximate one day period (and one additional day in the case Foundry Pool failed to pay the Company for its work, causing the decision to leave the Mining Pool). In the event that the Company is unable to make such a switch of its operations in a timely manner and its Mining operations experience significant down time, it may experience a material adverse change.

Reliance on Foreign Mining Pool Operator

Bitfarms participates in a single Mining Pool, being Foundry Pool. Consequently, the Company's operations are substantially reliant on Foundry Pool and the terms of services and other terms and conditions that govern its relationship with Foundry Pool. Foundry Pool has the right to unilaterally modify the service agreement between it and the Company at any time without notice. This includes the right to modify the payout methodology or Mining Pool fees. In the event that any such modifications are unattractive or unacceptable to the Company, it may: (i) join a different Mining Pool; or (ii) commence Mining independently, either of which may cause a material adverse change. See risk factor *Insolvency, Bankruptcy, or Cessation of Operations of Mining Pool Operator* above.

As a control measure, on a monthly basis, the Company calculates the revenues it should earn based on its theoretical Hashrate and compares it to the payments the Company received from Foundry Pool. As of the date hereof, the Company has not identified any material discrepancies between its calculations and payments actually received from Foundry Pool. In the event that the Company identifies a material difference, the Company may have to engage in litigation and/or cease its relationship with Foundry Pool, either of which may have a material adverse effect on the Company.

Mining Pool Agreements Governed by Foreign Laws

The agreement between the Company and Foundry Pool is governed by the laws of the State of New York. Furthermore, the Mining Pool agreement contains an arbitration provision that requires any dispute arising out of or relating to the Company's agreement with Foundry Pool, or the breach thereof, to be finally resolved by arbitration administered by the American Arbitration Association under its Commercial Arbitration Rules, or such arbitration body as required by law, rule or regulation, and judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction. Any such arbitration will be conducted in the English language before a single arbitrator in the City of New York, New York. The Company may be required to expend significant costs in order to undertake and complete any such arbitration, and there can be no guarantee of any successful outcome of such arbitration. In such a case, the Company may experience a material adverse change.

Independent Mining Risks

In the event the Company decides to cease participating in a Mining Pool and conduct Mining operations independently, it may be exposed to certain risks. Refer to Section 2 - *Company Overview*. The primary risk of conducting independent Mining is that the Company could experience a protracted period of failing to solve any blocks, causing a disruption in its revenue stream. In such a circumstance, the Company may need to borrow or raise additional capital to continue operations. There can be no guarantee that the Company could obtain any such financing on commercially attractive terms, or at all, and, consequently, the Company could experience a material adverse change.

Indemnification of Mining Pool

Pursuant to the terms and conditions of the Foundry Pool to which the Company is subject, the Company has agreed to release, indemnify and hold Foundry Pool harmless from any and all losses, damages, and expenses, including reasonable attorneys' fees, rights, claims, actions of any kind and injury (including death), arising out of or relating to the Company's participation in Foundry Pool. In the event of any such losses, damages, or expenses, the Company may experience a material adverse change.

BITFARMS LTD.

Management's Discussion & Analysis

19. RISK FACTORS (Continued)

Reliance on Manufacturing in Foreign Countries and the Importation of Equipment to the Jurisdictions in Which the Company Operates

The Company relies on third party manufacturers in foreign jurisdictions for its Miners. As a result, the Company's business is subject to risks associated with doing business in such foreign jurisdictions, including, but not limited to: trade protection measures such as the imposition of or increase in tariffs, import and export licensing and control requirements; potentially negative consequences from changes in tax laws (both foreign and domestic); difficulties associated with transacting business with parties in a foreign jurisdiction, including increased costs and uncertainties associated with enforcing contractual obligations; and unexpected or unfavorable changes in other regulations and applicable regulatory requirements.

For example, in 2018 and 2019, the U.S. enacted tariffs (or increased existing tariffs) on certain items imported from other countries. Following their enactment, the tariffs sparked an international trade war in which other countries enacted tariffs on imports of U.S. goods. Subsequently, the U.S. and various countries subject to those tariffs have engaged in trade negotiations and, in some instances, agreed to suspend or terminate certain tariffs. It is uncertain whether treaties or other trade policies like those will be enacted or modified by the U.S. or any other government or trade organization in the future. Future changes to trade or investment policies, treaties and tariffs, fluctuations in exchange rates, or the perception that these changes could occur could adversely affect third party manufacturers on which the Company relies, as well as the future of the Company's relationships with those third-party manufacturers, which could have an adverse impact on the Company's business, financial condition and results of operations. In addition, actions by foreign markets to implement further trade policy changes, including limiting foreign investment or trade, increasing regulatory scrutiny or taking other actions that apply to the jurisdictions in which the Company operates or in which third parties with which the Company does business operate, could negatively impact the Company's business, financial condition and results of operations.

Emerging markets

Investing in a company with operations in emerging markets entails certain inherent risks.

The Company conducts Mining operations in various jurisdictions, including in Argentina and Paraguay, which are emerging markets. Investing in a company with operations in emerging markets involves inherent risks, which may include: (i) expropriation or nationalization of property; (ii) changes in laws or policies or increasing legal and regulatory requirements of particular countries, including those relating to taxation, imports, exports, duties, currency, or other claims by government entities, including retroactive claims and/or changes in the administration of laws, policies and practices; (iii) uncertain political and economic environments, war, terrorism, sabotage and civil disturbances; (iv) lack of certainty with respect to legal systems, corruption and other factors that are inconsistent with the rule of law; (v) delays in obtaining or the inability to obtain or maintain necessary governmental permits or to operate in accordance with such permits or regulatory requirements; (vi) import and export regulations, including restrictions on the import of miners and other equipment relevant to the Company's Mining operations; (vii) limitations on the repatriation of earnings and other forms of currency controls, monetary restrictions and limitations under economic policies; (viii) underdeveloped industrial or economic infrastructure; (ix) internal security issues; (x) increased financing costs; (xi) renegotiation, cancellation or forced modification of existing contracts; and (xii) risk of loss due to disease, and other potential medical endemic or pandemic issues, as a result of the potential related impact to employees, disruption to operations, supply chain delays, trade restrictions and impact on economic activity in affected countries or regions.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Emerging markets (Continued)

Investing in a company with operations in emerging markets entails certain inherent risks. (Continued)

There can be no guarantee that one or more of the events described above will not occur in the future, and the impact of such event or events on the Company's operations cannot be accurately predicted at this time. The occurrence of one or more such events may have a material adverse effect on the Company's operations in the affected jurisdiction or jurisdictions, including, but not limited to, disruptions to its operations, the loss of property, unprofitability of its operations, protracted legal and regulatory proceedings, and other penalties or sanctions, which, in turn, may have a material adverse effect on the Company's overall business, financial condition and results of operations, and/or the trading price of the Company's shares.

Argentina and/or Paraguay may experience economic volatility and other challenges that could affect the Company's business, financial condition and result of operations.

The profitability of the Company's Mining operations in Argentina and Paraguay and the Company's ability to continue such operations depend in part upon local economic, social and/or political conditions, which, in turn, may affect the Company's business, financial position and results of operations. Adverse external economic factors; inconsistent fiscal and monetary policies; dependence of governments on external financing; changes in governmental economic policies; high levels of inflation; abrupt changes in currency values; high interest rates; volatility of exchange rates; political and social tensions; exchange controls; wage and price controls; the imposition of trade barriers; and trade shock are examples of economic and social conditions over which the Company has no control and which may have an adverse effect on the Company's operations in those geographies and, given the materiality to the Company of such operations, may adversely affect the Company's business, financial condition, results of operations, cash flows and prospects.

The economies of Argentina and Paraguay are vulnerable to external shocks caused by significant economic difficulties of their respective trading partners or by more general "contagion" effects.

Weak, flat or negative economic growth or changes in international trade policy of the major trading partners of Argentina and Paraguay could adversely affect their balance of payments and, consequently, their respective economic growth.

Argentina in particular has experienced significant political and social economic instability in the past and may experience further instability in the future. For instance, in 2001 and 2002, Argentina suffered a major political, economic and social crisis, which resulted in institutional instability and a severe contraction of the economy with significant increases in unemployment and poverty rates. Among other consequences, the crisis caused a large currency devaluation and led to the government of Argentina defaulting on its external debt. In response, the government of Argentina implemented a series of emergency measures, including strict foreign exchange restrictions and monthly limits on bank withdrawals, which affected public companies and other sectors of Argentina's economy. Despite a brief recovery from that crisis, growth stagnated starting in 2012, and Argentina has struggled to curb strong inflationary pressures since, with inflation spiking in 2023. In particular, Argentina's annual inflation rate for 2023 ended at 211.4%, the highest since the early 1990s, and it currently has one of the highest rates of inflation in the world. Argentina's high rate of inflation may adversely impact the Company's business, results of operation and financial condition in the future. Due to the political and economic uncertainties in Argentina, the Company is uncertain when, or if, the Argentine VAT receivable will be settled.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)**Emerging markets (Continued)**

The economies of Argentina and Paraguay are vulnerable to external shocks caused by significant economic difficulties of their respective trading partners or by more general "contagion" effects. (Continued)

The economic conditions of Argentina and Paraguay are dependent on a variety of factors, including, but not limited to, the following: (i) international demand for Argentina's and Paraguay's principal exports; (ii) international prices for Argentina's and Paraguay's principal commodity exports; (iii) stability and competitiveness of the currencies of Argentina and Paraguay compared to foreign currencies; (iv) competitiveness and efficiency of domestic industries and services; (v) levels of domestic consumption and foreign and domestic investment and financing; and (vi) the rate of inflation. Any difficulties faced by the economies of Argentina and Paraguay or challenging or deteriorating financial condition of the same could have a material adverse effect on companies operating in Argentina and Paraguay, including the Company.

The Company conducts operations in countries known to experience high levels of corruption, and any violation of anti-corruption laws could subject us to penalties and other adverse consequences.

The Company is subject to anti-corruption, anti-bribery, anti-money laundering and other international laws and regulations and is required to comply with the applicable laws and regulations of each jurisdiction in which the Company operates. In general, those laws prohibit improper payments or offers of payments to governments and their officials, political parties, state-owned or controlled enterprises, and/or private entities and individuals for the purpose of obtaining or retaining business. In addition, the Company is subject to economic sanctions regulations that restrict its dealings with certain sanctioned countries, individuals and entities.

The Company has operations in Argentina and Paraguay, which are jurisdictions perceived as having relatively high levels of corruption. The Company's activities in those countries increase the risk of, or potential for, unauthorized payments or offers of payments by one of the Company's employees, contractors, or agents that could be in violation of various laws, including anti-bribery laws applicable to the Company. In addition, the Company's ability to secure permits, renewals or other government approvals required to maintain its operations could be negatively impacted by corruption in one or more governmental institutions in Argentina and Paraguay.

The Company has adopted various measures that mandate compliance with applicable anti-corruption, anti-bribery and anti-money laundering laws, and has implemented training programs, compliance controls and procedures, and reviews and audits to ensure compliance with such laws; however, there can be no assurance that the Company's internal controls and procedures will be sufficient to prevent or detect all inappropriate practices, fraud or violations of such laws, regulations and requirements by the Company's affiliates, employees, directors, officers, partners, agents and service providers, or that any such persons will not take actions in violation of the Company's policies and procedures, for which the Company may be ultimately responsible.

Any violations of anti-bribery and anti-corruption laws or sanctions regulations by the Company, or otherwise committed on its behalf, including by its employees, directors, or other agents, could have a material adverse effect on the Company's business, reputation, results of operations and financial condition. The Company cannot predict the nature, scope or effect of future anti-corruption regulatory requirements to which its operations might be subject, the manner in which existing laws might be administered or interpreted or the impact on the Company of any violation of the same.

55 | Page

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)**Emerging markets (Continued)**

The Company's operations in Argentina are subject to frequent and unpredictable changes in tax rates, capital controls, and foreign exchange restrictions, which may restrict or affect the profitability of the Company's operations.

The imposition and application of federal, provincial and other local taxation to which businesses located in Argentina are subject may change frequently and without notice. If any taxation authority takes a position or adopts an interpretation that differs from those adopted by the Company, the Company could become subject to unanticipated tax liabilities and cost increases, which could negatively affect its financial condition and results of operations.

For instance, in 2018, the government of Argentina introduced a decree imposing a temporary tax on all exports from Argentina. The tax was introduced as an emergency measure due to the significant devaluation of the Argentinean peso during 2018. In December 2019, the government of Argentina approved a law delaying a scheduled corporate tax rate decrease from 30% to 25% to the end of 2020, following which the government submitted a bill in order to maintain the 30% rate until the end of 2021 and to extend the temporary export tax introduced in September 2018 to the end of 2021. Furthermore, the decree suspended the increase in the dividend withholding tax from 7% to 13% until January 2021. In June 2021, the National Government passed an amendment to the corporate income tax rate, increasing it from a flat rate of 25% to a progressive scale, with a maximum rate of 35% for certain types of companies.

Changes in taxes, capital controls, and foreign exchange regulations in Argentina and the other jurisdictions in which the Company operates are beyond the Company's control. Increased tax rates, or the imposition of stricter capital controls or foreign exchange regulations, could increase the operating costs at the Company's Mining facilities, prevent or restrict development and production at new or contemplated facilities and constrain the Company's ability to receive distributions from its subsidiaries in those jurisdictions.

Valuation and Price Volatility of Cryptocurrencies

The profitability of the Company's operations has been and will continue to be significantly affected by changes in the spot price of cryptocurrencies, specifically BTC. Cryptocurrency prices (and BTC prices in particular) are highly volatile, fluctuating due to numerous factors beyond the Company's control, including speculation and incomplete information, rapidly changing investor sentiment, changes in technology, regulatory changes, fraudulent or malicious actors, media coverage of cryptocurrency, inflation, and political or economic events, as well as market acceptance and demand for cryptocurrency. The market price of one BTC, in the Company's principal market, ranged from approximately \$16,600 to \$44,700 during the year ended December 31, 2023 and ranged from approximately \$15,600 to \$48,100 during the year ended December 31, 2022. Although the Company partially hedges its investment in BTC, such hedging practices may not adequately protect the Company from BTC's price volatility and surrounding risks.

56 | Page

19. RISK FACTORS (Continued)**Valuation and Price Volatility of Cryptocurrencies (Continued)**

Currently, the Company does not use a formula or specific methodology to determine whether or when it will sell BTC that it holds, or the number of BTC it will sell. Rather, decisions to hold or sell BTC are currently determined by Management by analyzing forecasts and monitoring the market in real time. Such decisions, however well-informed, may result in untimely sales and even losses, adversely affecting an investment in the Company. Further, some of the business decisions (e.g., purchases of Miners and debt financing) the Company has made, and may in the future make, were or will be tied to the price of BTC at the time of each of those decisions. For example, in 2021, the Company made purchase commitments in respect of a significant number of new Miners to be delivered and paid for during the year 2022, when BTC and Miner prices were much lower than at the time of such purchase. Although the Company was successful in renegotiating the agreement and canceling some of those purchase commitments, it may not be able to do so in the future. If cryptocurrency spot prices decline and remain at low market levels for a sustained period while network difficulty does not decrease proportionally, the Company's results of operations and financial condition, as well as the trading price of the Company's common shares, could be materially adversely affected.

Cryptocurrencies and related mining equipment may be subject to momentum pricing, which is typically associated with growth stocks and other assets whose valuation, as determined by the investing public, accounts for anticipated future appreciation in value. Further, the price of mining equipment is often tied to the price of cryptocurrencies and other cryptocurrency economics, such as mining difficulty and the value of corresponding rewards. Cryptocurrency market prices are determined primarily using data from various exchanges, over-the-counter markets and derivative platforms. Momentum pricing may have resulted, and may continue to result, in speculation regarding future appreciation in the value of cryptocurrencies, inflating their market prices and making those market prices more volatile. As a result, cryptocurrency market prices may be more likely to fluctuate due to changing investor confidence in future appreciation (or depreciation) in their market prices, which could adversely affect the trading price of the Company's common shares.

In addition, the securities markets have from time to time experienced significant price and volume fluctuations that are unrelated to the operating performance of particular companies. Specifically, the trading price of the Company's common shares is, and, in the future, is likely to continue to be, highly correlated to the trading price of BTC. BTC Mining companies' stock have shown volatility relative to BTC, with many such stocks outperforming BTC in 2020 and 2021 but underperforming relative to BTC in 2022. For example, the closing price of the Company's common shares on December 31, 2022 was \$0.44 and the closing price of BTC was approximately \$16,500 and, as of December 30, 2023, the closing price of the Company's common shares was \$2.91 and the closing price of BTC was approximately \$42,300.

The Company's operating results and financial condition have been and may continue to be adversely affected by declines in cryptocurrency market prices. In addition, the Company has made, and may continue to make, decisions concerning the execution of its business plan, including the development of its facilities and expansion into new markets, purchases of new Miners (or exercising any options it has to purchase new Miners) and incurrence of indebtedness, when BTC prices were, or may be, significantly higher or lower than they currently are, resulting in plans and obligations that the Company reassesses and likely will continue to reassess, particularly in light of potential general declines in cryptocurrency market prices, to determine the practicality, profitability and timeline of such plans and commitments.

Volatility may have an impact on the value of the Company's inventory of cryptocurrencies and could result in margin calls on the Company's long-term debt collateral BTC with NYDIG as described in Note 17 - *Long-term Debt* to the Financial Statements.

19. RISK FACTORS (Continued)**Share Price Fluctuations**

In recent years, the securities markets have experienced a high level of price and volume volatility, and the market price of securities of many companies, particularly those in cryptocurrency-focused businesses, have experienced wide fluctuations in price. The market price of the Company's common shares ranged from \$0.42 to \$3.56 on Nasdaq and CAD\$0.57 to CAD\$4.68 on the Toronto Stock Exchange from January 1, 2023 to December 31, 2023. The market price of the Company's common shares fluctuates significantly in response to a number of factors, most of which the Company cannot control and many of which have not necessarily been related to the operating performance, underlying asset values or prospects of the Company. In particular, the trading price of the Company's common shares is in many cases directly tied to the price of BTC. Refer to "*Valuation and Price Volatility of Cryptocurrencies and Mining Equipment*" above for more details. Other factors that may impact the trading price of the Company's common shares include, but are not limited to:

- variations in the Company's financial results between periods or as compared to the Company's projections or the projections or actual results companies that are perceived to be similar to the Company;
- actions by the Company, its competitors, or others in the cryptocurrency industry, such as acquisitions, bankruptcies or restructurings;
- additions or departures of key management personnel;
- legal proceedings involving the Company, the cryptocurrency industry or both;
- legislative or regulatory actions;
- changes in market valuations of companies similar to the Company;
- the prospects of and changes affecting participants in the cryptocurrency industry;
- actions by the Company's shareholders;
- speculation or reports by the press or investment community with respect to the Company or the cryptocurrency industry in general;
- changes in the pricing or availability of hydro-electricity, natural gas and other sources of energy;
- general economic, regulatory, market and political conditions; and
- other risks, uncertainties and factors described in these risk factors or otherwise not currently known to the Company.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)**Share Price Fluctuations (Continued)**

The stock markets in general have often experienced volatility that has sometimes been unrelated or disproportionate to the operating performance of particular companies. These broad market fluctuations have, in the past, caused, and may, in the future, cause, the trading price of the Company's common shares to decline. A continuation or worsening of the levels of market disruption and volatility seen in the past could have an adverse effect on the Company's ability to access capital, on its business, financial condition, results of operations, cash flow and prospects and on the market price of its common shares. In the past, following periods of volatility in the market price of a company's securities, securities class-action litigation has often been brought against that company. The Company may become the subject of that type of litigation in the future, which litigation may be expensive to defend and may divert Management's attention and resources from the operation of the Company's business.

In addition, the Company must comply with the continued listing requirements of the Toronto Stock Exchange, Nasdaq or any other securities exchange on which its securities are listed in the future to avoid its securities being delisted. A delisting from the Toronto Stock Exchange and/or Nasdaq would result in the Company's common shares being eligible for quotation on the over-the-counter (OTC) market, which is generally considered to be a less efficient system than listing on a national exchange, such as the Toronto Stock Exchange and Nasdaq, because of the OTC's lower trading volumes, transaction delays and reduced security analyst and news media coverage. These factors could contribute to lower prices and larger spreads in the bid and ask prices for the Company's common shares.

Future Capital Needs, Uncertainty of Additional Financing and Dilution

As of December 31, 2023, the Company had cash of \$84.0 million, compared to \$30.9 million as of December 31, 2022. The Company expects to continue to depend upon selling BTC earned and in treasury and utilizing short-term debt, long-term debt and equity instruments to fund its ongoing expansion activities, operating expenses and debt service requirements. Further, the Company expects that it will need to raise additional capital in the future to fund more rapid expansion, respond to competitive pressures, acquire complementary businesses or technologies or take advantage of unanticipated opportunities, and it may seek to do so through public or private financing, strategic relationships or other arrangements. The ability of the Company to secure any required financing will depend in part upon prevailing capital market conditions and business success. There can be no assurance that the Company will be successful in its efforts to secure any additional financing on terms satisfactory to Management or at all. Even if such funding is available, the Company cannot predict the size of future issues of common shares or securities convertible into common shares or the effect, if any, that future issues and sales of common shares will have on the price of the Company's common shares.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)**Future Capital Needs, Uncertainty of Additional Financing and Dilution (Continued)**

If the Company raises additional capital through the issuance of equity securities, the percentage ownership of the Company's existing shareholders may be reduced, and such existing shareholders may experience additional dilution in net book value per share. Any such newly-issued equity securities may also have rights, preferences or privileges senior to those of the holders of the common shares. If additional funds are raised through the incurrence of indebtedness, such indebtedness may involve restrictive covenants that impair the ability of the Company to pursue its growth strategy and other aspects of its business plan, expose the Company to greater interest rate risk and volatility, require the Company to dedicate a substantial portion of its cash flow from operations to payments on its indebtedness, thereby reducing the availability of its cash flow to fund working capital and capital expenditures, increase the Company's vulnerability to general adverse economic and industry conditions, place the Company at a competitive disadvantage compared to its competitors that have less debt, limit the Company's ability to borrow additional funds, and otherwise subject the Company to the risks discussed under "Indebtedness" below and heighten the possible effects of the other risks discussed in these risk factors. In connection with any such future capital raising transaction, whether involving the issuance of equity securities or the incurrence of indebtedness, the Company may be required to accept terms that restrict its ability to raise additional capital for a period of time, which may limit or prevent the Company from raising capital at times when it would otherwise be opportunistic to do so.

If adequate funds are not available on acceptable terms or at all, the Company may be unable to develop or enhance its business, take advantage of future opportunities or respond to competitive pressures, any of which could have a material adverse effect on the Company's business, financial condition and operating results.

Indebtedness

The Company is party to various arrangements with short-term lenders as described in more detail in this MD&A, and the Company may become party to additional debt financing arrangements in the future. The Company's ability to generate and maintain a level of cash flows from operating activities to make scheduled payments on any debt obligations, or to refinance its debt obligations, will depend on, among other things, its future financial and operating performance, which is subject to prevailing economic and competitive conditions, and to various financial, business, regulatory and other factors, some of which are beyond the Company's control. If the Company is unable to fulfill its debt service obligations, it may be forced to reduce or delay capital expenditures or sell assets, seek additional capital or seek to restructure or refinance its indebtedness. Further, any such indebtedness may impair the Company's ability to obtain additional financing for working capital, capital expenditures, debt service requirements, restructuring, acquisitions or general corporate purposes.

In addition, any agreements governing the Company's debt obligations may contain financial covenants and covenants that restrict the Company's and its subsidiaries' ability to:

- incur additional indebtedness or issue equity securities;
- create liens on the Company's assets;
- pay dividends or make other equity distributions;
- repurchase the Company's equity securities;
- make certain investments;
- sell assets; and
- consolidate, merge, sell or otherwise dispose of all or substantially all of the Company's assets.

19. RISK FACTORS (Continued)**Indebtedness (Continued)**

As a result of any such restrictive covenants, the Company could be limited in the manner in which it conducts its business, and it may be unable to engage in favorable business activities or finance future operations or capital needs. In addition, the indebtedness may contain affirmative covenant obligations (e.g., debt to equity ratios, EBITDA requirements, etc.) that may constrain the Company's financing opportunities and business activities. Any violation by the Company of any of such restrictive or affirmative covenants or failure by the Company to meet payment obligations (as was the case in early 2023 in respect of the Company's strategic decision to delay the making of principal and interest payments on its previously outstanding loan from BlockFi) could provide the lender with the ability to accelerate the maturity of the indebtedness and exercise a variety of remedies, including foreclosing on any collateral securing the debt. The occurrence of any such violation by the Company and the exercise by its lenders of remedies with respect to any such violation could have a material adverse effect on the Company's business, financial condition and results of operations.

Hedges

The Company actively engages in hedging practices with respect to its cryptocurrency holdings to lessen the impact of BTC volatility on the Company's results of operations and financial condition and to optimize cryptocurrency monetization. Although the Company undertakes hedging activities on a risk adjusted basis, there can be no certainty that such activities will be profitable, and these activities could result in significant losses.

In addition, hedging practices involve transactions with third parties. Any settlement delay or failure, security breach, incurred cost or loss of digital assets associated with the use of a counterparty could materially and adversely affect the execution of hedging strategies and result in significant losses. Although the Company maintains rigorous controls on the implementation and monitoring of hedging strategies, including its involvement with counterparties, there can be no assurance that such controls will be effective or timely or sufficient in operation to avoid or even reduce losses.

Global Financial Conditions

Global financial conditions over the last few years have been characterized by volatility, which has contributed to the bankruptcy of several financial institutions in the United States or the rescue thereof by governmental authorities. The continuation of such adverse economic conditions and other related factors may affect the ability of the Company to obtain equity or debt financing in the future on terms favorable to it, or at all, and may cause decreases in asset values that are deemed to be other than temporary, which may result in impairment losses. If such levels of volatility and market turmoil continue, the financial condition of the Company may suffer and the price of the Company's common shares may be adversely affected.

19. RISK FACTORS (Continued)**Global Financial Conditions (Continued)**

The Company currently engages in hedging practices with respect to its cryptocurrency holdings to lessen the impact of BTC volatility, and, in the future, the Company may enter into additional hedging transactions to mitigate its exposure to aspects of the economy or specific economic conditions that are particularly volatile, such as interest rates. Although hedging is expected to reduce the impact of these aforementioned risks, entering into hedging transactions may expose the Company to risks associated with such transactions. Hedging against a decline in the values of the Company's assets caused by interest rate risk or volatile BTC market prices does not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of such positions decline for other reasons. Such hedging transactions may also limit the opportunity for gain if the values of the portfolio investments should increase. Moreover, it may not be possible to hedge against a particular fluctuation that is so generally anticipated by the markets that a hedging transaction at an acceptable price is unavailable. In light of these and other factors, the Company may not be successful in mitigating its exposure to volatile economic conditions through any hedging transactions it undertakes.

Possibility of BTC Mining Algorithms Transitioning to Proof of Stake Validation

Proof of stake is an alternative method of validating cryptocurrency transactions. If BTC shifts from a proof of work validation method to a proof of stake validation method, Mining would require less energy and may render any company that maintains advantages in the current climate (e.g., lower priced electricity, processing, real estate or hosting) less competitive. In September 2022, another prominent cryptocurrency, Ether, shifted from proof of work to a proof of stake validation method. If BTC switches to proof of stake validation in the future, Bitfarms, as a result of its efforts to optimize and improve the efficiency of its BTC Mining operations, may be exposed to the risk of losing the benefit of its capital investments and the competitive advantage Bitfarms hopes to gain from this as a result and may otherwise be negatively impacted. Such events could have a material adverse effect on Bitfarms' ability to continue as a going concern or to profitably pursue its current growth strategy, which could have a material adverse effect on Bitfarms' business, prospects or operations and potentially the value of any BTC that Bitfarms earns or otherwise acquires or holds for its own account.

Limited Operating History

The Company has only a limited operating history upon which an evaluation of the Company and its prospects, as well as an investment in the Company's common shares, can be based. The Company is subject to many risks common to venture enterprises, including under-capitalization, potential cash shortages and limitations with respect to personnel, financial and other resources. Although the Company has achieved profitable quarters in the past, to date, it has not maintained consistent profitability from period to period, and no assurances can be made that the Company will achieve consistent profitability in the near future, if ever. For the year ended December 31, 2023, the Company had a net loss from continuing operations of \$104.0 million, which net losses were generated as the Company executed its business plan and expands its bitcoin mining activities as bitcoin prices have at times been in a bear market. There is no assurance that the Company will be successful in achieving a return on shareholders' investment or meeting other metrics of success, which is dependent on bitcoin prices, among other factors.

19. RISK FACTORS (Continued)

Employee Retention and Growth

The Company depends on a number of key employees including, in particular, the members of the Company's Management, the departure, death, disability or other extended loss of services of any of whom, particularly with little or no notice, could cause delays on projects, frustrate the Company's growth prospects and have an adverse impact on the Company's industry relationships, project exploration and development programs, other aspects of its business and its financial condition, results of operations, cash flow and prospects. The Company has not historically purchased, and, in the future, does not expect to purchase, key person insurance on such individuals, which insurance would provide the Company with insurance proceeds in the event of their death.

The growth and development of the business of the Company also depends on its ability to attract and retain highly qualified management and Mining personnel while maintaining its corporate culture and technical standards. The Company faces competition for personnel from other employers. If the Company is unable to attract or retain qualified personnel as required, it may not be able to adequately manage and implement its business plan. There can be no assurance that the Company will be able to manage such growth effectively or that its Management, personnel or systems will be adequate to support the Company's operations.

Cybersecurity Threats and Hacking

Malicious actors may seek to exploit vulnerabilities within cryptocurrency programming codes. Several errors and defects have been found and corrected, including those that disabled some functionality for users and exposed users' information. Discovery of flaws in or exploitations of the source code that allow malicious actors to take or create cryptocurrency or money occur somewhat regularly. For example, hackers have been able to gain unauthorized access to digital wallets and cryptocurrency exchanges.

The computer network operated by the Company may be vulnerable to intrusions by hackers who could interfere with and introduce defects into the Company's Mining operations. Private keys which enable holders to transfer funds may also be lost or stolen, resulting in irreversible losses of cryptocurrencies.

Limited History of De-centralized Financial System

Compared to traditional and existing centralized financial systems, the cryptocurrency financial system is relatively new and has a limited history. Online cryptocurrency exchanges and trades therein operate with comparatively little regulation and are particularly susceptible to platform failures and fraudulent activities, which may have an adverse effect on the underlying prices of cryptocurrencies. In fact, many of the largest online cryptocurrency exchanges have been compromised by hackers.

In light of these and other factors, traditional banks and other banking institutions may limit or refuse the provision of banking services to businesses that supply cryptocurrencies as payment and may refuse to accept money derived from cryptocurrency-related businesses. This may make the establishment and management of bank accounts held by companies operating in the industry difficult or impossible. The Company has experienced and may in the future experience such banking challenges, which could have a material adverse effect on the Company's business, prospects or operations and potentially the value of any BTC or other cryptocurrencies the Company earns or otherwise acquires or holds for its own account.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Risk Related to Technological Obsolescence and Difficulty in Obtaining Hardware

To remain competitive, the Company will continue to monitor the state of available technology and invest in hardware and equipment required for maintaining and, as applicable, enhancing its operations. The Company has in the past replaced, and, in the future, may be required to replace, obsolete hardware and software, which required, and, in the future, may require, substantial capital investments by the Company. There can be no assurance that Mining hardware will be readily available, whether at a price that is commercially acceptable to the Company or at all, when the need is identified. Moreover, there can be no assurance that new and unforeseeable technology, either hardware-based or software-based, will not disrupt the existing cryptocurrency industry. For example, the arrival of quantum computers, which are capable of solving certain types of mathematical problems fundamental to cryptocurrency more quickly and efficiently than traditional computers may have a significant effect on the cryptocurrency industry.

Cryptocurrency Network Difficulty and Impact of Increased Global Computing Power

Network difficulty is a measure of how difficult it is to solve the cryptographic hash that is required to validate a block of transactions and earn a cryptocurrency reward from Mining. As Mining companies produce more hashrate and the BTC network hashrate is increased, the BTC network difficulty is adjusted upwards by requiring more hashrate to be deployed to solve a block. Thus, Mining companies are further incentivized to grow their hashrate to maintain or improve their chance of earning new BTC rewards. In theory, these dual processes should continually replicate themselves until the supply of available BTC is exhausted. In response, Mining companies have attempted to achieve greater hashrate by deploying increasingly sophisticated, powerful and expensive Miners in ever greater quantities. If the price of BTC is not sufficiently high to allow the Company to fund its desired hashrate growth, including through new Miner acquisitions, and if it is otherwise unable to access additional capital to acquire Miners, the Company's hashrate may stagnate and fall behind its competitors, potentially resulting in a decline in its revenues, which would have a material adverse effect on the Company's results of operations and financial condition.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Economic Dependence on Regulated Terms of Service and Electricity Rates Risks

The Company's operations are dependent on its ability to maintain reliable and economical sources of power to run its cryptocurrency Mining assets. The Company conducts Mining operations in the Province of Québec, Washington State, Paraguay and Argentina. The Company's current and future operations and anticipated growth, and the sustainability of hydro-electricity and natural gas at economical prices for the purposes of cryptocurrency Mining in multiple locations, poses certain risks. These risks as well as the supply of electrical power, electricity rates, terms of service and regulatory regimes are summarized as follows:

Currently, the Company sources its energy from Hydro-Québec, Hydro-Sherbrooke, Hydro-Magog, the city of Baie-Comeau, Grant PUD, CLYFSA and Generación

Mediterranea S.A. Regulated power suppliers may be subject to public policy initiatives and economic development programs which may or may not support the crypto mining industry. There can be no assurance that electricity will continue to be provided in the future or not curtailed to accommodate other users, or otherwise made available on terms which are economic for the Company's current and future operations, anticipated growth, and sustainability. Any suspension or cessation of power supply, failure of electrical networks, or changes in cost structure which are not economic, in the jurisdictions where the Company utilizes power for its operations, could result in a material adverse effect on the Company.

Quebec

The Company's operations are dependent on its ability to maintain reliable and economical sources of power to run its cryptocurrency Mining assets. Until the adoption of Bill-2, on February 15, 2023, the Province of Québec mandated electrical service providers to supply their customers under the obligation to serve power delivery regime; however, Bill-2 amended the Act respecting the *Régie de l'énergie du Québec* (the "Régie") by giving the Government of Québec the power to determine by regulation the cases in which Hydro-Québec, or any other electrical service provider, may be exempt from their obligation to provide electricity to industrial clients in the Province of Québec.

The price of electricity supplied directly by Hydro-Québec is set by a provincial administrative tribunal, the Régie. Hydro-Québec supplies power to certain of the Company's facilities, and to the Municipal Electrical Networks for the Magog, Baie-Comeau and Sherbrooke facilities. The rates imposed on Hydro-Québec by the Régie are subject to change. Although power is supplied by Municipal Networks to the Company, the rates in those contracts are adjusted in response to tariff changes imposed by the Régie. Modifications to the rates are set pursuant to the Hydro-Québec Act by operation of law on April 1st each year, by a rate corresponding to the annual change in the overall average Québec consumer price index, on a tariff class basis such that any adjustment would apply equally to all industrial clients, which includes CB tariff users (for Cryptocurrency Mining), M tariff users or LG tariff users regardless of end use. There is no assurance that future electricity rates will remain stable or economical. In particular, on June 14, 2018, Hydro-Québec requested the Régie to set rates and service conditions specifically for enterprises involved in cryptocurrency Mining as a result of increased electricity demand from cryptocurrency Miners. The Régie has undertaken regulatory proceedings, to which the Company has participated as an intervenor, to establish a framework for the provision of electricity for cryptocurrency Mining in Québec in three Steps:

- Step 1: On July 13, 2018, the Régie provisionally ordered that a new tariff be established for cryptocurrency Miners, and, on July 19, 2018, the Régie approved a provisional tariff of CAD\$0.15/kWh on cryptocurrency Mining facilities built after that date. Under Step 1, the new tariff cannot be applied to any cryptocurrency contracts entered into prior to June 7, 2018, or facilities constructed prior to July 19, 2018. Therefore, Step 1 didn't have an impact on the Company's pre-existing operations and secured existing rates until the completion of Phase 3.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Economic Dependence on Regulated Terms of Service and Electricity Rates Risks(Continued)

Quebec (Continued)

- Step 2: On April 29, 2019, the Régie rendered its decision on Step 2 of the request filed by Hydro-Québec. The Régie decided to create a new class of energy consumers called Electricity consumer class for cryptographic use applied to blockchain. It decided to allocate to this new class an aggregate supply of 300 megawatts of electricity, with the requirement to curtail electricity use during peak hours at Hydro-Québec's request (up to a maximum of 300 hours a year). Cryptocurrency Mining projects would be required to submit tenders to consume electricity from the 300 megawatt block based exclusively on economic development and environmental criteria. The Régie rejected Hydro-Québec's proposal to launch a tariff auction as part of the call for tenders. It decided to create a new tariff applicable to the crypto Mining industry, the CB tariff, and determined that the applicable tariff of the energy component, in ¢/kWh, will correspond to the M or LG tariff in force, as the case may be. In order for the Company to be able to procure electricity for future Québec expansion projects, it would be required to participate in the call for tenders process. However, the Régie's decision also meant that the Company's pre-existing operations in the Province of Québec would remain subject to the M or LG tariff in force, as the case may be, and they were exempt from the tender process as well as the provisional tariff of CAD\$0.15/kWh which had been requested by Hydro-Québec. The provisional tariff would apply to energy consumption not previously authorized under cryptocurrency contracts, to those cryptocurrency contracts entered into after June 7, 2018 and to any substitution of use or any increase of capacity for crypto Miners not already under authorized cryptocurrency contracts. The decision of the Régie did impose the potential requirement to curtail electricity use (of up to 95%) during peak hours at Hydro-Québec's request (up to a maximum of 300 hours a year) under all cryptocurrency contracts including those at the Company's pre-existing operations at the already operating Facilities in Québec. A shut down of 95% of operations for the maximum of 300 hours could result in a revenue decrease of approximately 3.4%.
- Step 3: On January 28, 2021, the Régie rendered its decision on Step 3 of the request filed by Hydro-Québec. The Régie decided that the existing subscriptions on the Hydro-Québec network were to be subject to non-firm service, starting in Winter 2021-2022. The non-firm service applies for a maximum of 300 hours/year, without any monetary compensation. In considering the financial consequences of this conclusion, the Régie requested that Hydro-Québec implement the non-firm service for existing clients during a three-year period through progressive implementation. The Régie did not provide any guidance to Hydro-Québec on how to proceed. The Régie provided the following reasons to justify this conclusion:
 - (a) existing clients, such as the Company, had already executed agreements with municipal electricity networks with non-firm service (without financial compensation) for at least 300 hours per year;
 - (b) new clients entering the market through the call for tenders process would be subject to non-firm service without financial compensation. The treatment of those new clients must be fair and equitable with existing clients; and
 - (c) load shedding for 300 hours was estimated to represent only 3.4% of the 8,760 hours in a year. The Régie did not consider this request unreasonable considering the risks that cryptocurrency clients represent for Hydro-Québec.

In accordance with the Step 3 decision, the Company's operations are on a non-firm service basis for a maximum of 300 hours per year. Consequently, the main difference between the CB tariff and the M or LG tariff is the curtailment obligation applicable to the CB tariff.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Economic Dependence on Regulated Terms of Service and Electricity Rates Risks(Continued)

Quebec (Continued)

On November 17, 2021, in Step 3 of the Régie’s regulatory proceedings, the Régie ratified the process for allocating the balance of the 300 MW block reserved for crypto Miners that was not already allocated pursuant to the call for tenders approved in Step 2. The allocation process of the balance of the 300 MW block would be based on a “first come, first serve” process, without any reference to economic development condition and environmental criteria.

On April 6, 2022, the Régie rendered a decision confirming the decision rendered in Step 3, resulting in the application of the non-firm service to the Company’s facilities in Québec.

On May 30, 2022, the Company filed with the Régie an administrative complaint against Hydro-Québec requesting information regarding the process for the allocation of the balance of the 300 MW block. The filing of this complaint was justified by the fact that Hydro-Québec, at the time of filing and more than 6 months after the decision rendered by the Régie in Step 3, had still not put in place the allocation process approved by the Régie.

On June 30, 2022, Hydro-Québec responded to the Company’s administrative complaint confirming that the allocation process of the 300 MW block would be opened in September 2022.

On November 1, 2022, Hydro-Québec submitted to the Régie its Supply Plan for the period 2023 to 2032 and requested the Régie authorize the suspension of the allocation process for the granting of the balance of the 300 MW reserved block and to reassess the amount of MWs to be allocated to crypto Miners for future operations. The Company has actively participated in the regulatory process on the approval, by the Régie, of the Supply Plan and has challenged Hydro-Québec’s request to suspend the allocation of the 300 MW block.

On January 10, 2023, the Régie rendered its decision on Hydro-Québec’s request to suspend the allocation process for the granting of the 300 MW reserved block. The Régie decided to suspend the allocation process while it assessed the Supply Plan submitted by Hydro-Québec. The Company did not challenge this decision but has strongly challenged Hydro-Québec’s request to reduce the amount of power allocated to zero.

On September 9, 2023, the Régie approved the reduction to zero MW for the remaining quantity of the reserved block, which totaled approximately 270MW at the time. In addition, the Régie decided to maintain the 32.6 MW of the reserved block that had already been allocated to CB tariff clients. The Régie considered that the potential reallocation of the quantities currently held by these customers in case of their subscriptions being abandoned or cancelled could enable certain companies to continue their development or a few new CB tariff customers to be served. The Régie requested Hydro-Québec to amend the *Conditions of Service for Cryptographic Use Applied to Blockchains* and propose a new process for the eventual reallocation of the MW that could become available from the 32.6 MW reserved block already allocated. Hydro-Québec requested, and the Régie accepted, that such new process be presented on or before January 31, 2024. The hearing is expected to be held between May 13 and June 21, 2024.

In November 2023, the Company’s complaint was suspended at the request of the parties while the Company and Hydro-Quebec entered into direct discussions. On January 17, 2024, after settlement discussions proved to be unsuccessful, the Company requested the reactivation of the complaint and that a date of hearing be fixed.

BITFARMS LTD.

Management’s Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Economic Dependence on Regulated Terms of Service and Electricity Rates Risks(Continued)

Quebec (Continued)

Electricity supplied by Hydro-Québec and the Municipal Electrical Networks may be set at preferential rates in an effort to encourage investment and development in particular regions. Hydro-Québec and Municipal Electrical Networks may offer a discretionary preferential rate to certain customers, such rate being lower than the rate set by the Régie, notwithstanding that Hydro-Québec and the Municipal Electric Networks may suffer a financial loss on the supply of electricity to those customers. If a preferential rate is changed or no longer available to the Company, the Company’s operations and profitability may experience a material adverse effect. In addition, although power is supplied by the Municipal Networks to the Company under the power contracts, the rates in those contracts are adjusted in response to tariff changes imposed by the Régie. Currently, the Cowansville Facility is subject to a preferential rate of 5% on its first 5 MW of power; and the Farnham Facility is subject to a preferential rate of 20% on its first 10 MW of power.

Washington State

On November 9, 2021, the Company completed the acquisition of a cryptocurrency Mining facility in Washington State. The facility is powered by the Grant County Power Utility District (“Grant PUD”). Grant PUD was established in 1938 and is a public utility district that owns and operates hydro-electric plants capable of generating more than 2,000 MW of electricity. Grant PUD establishes rate schedules for different categories of customers at the discretion of its publicly elected Board of Commissioners. The Company operates its cryptocurrency Mining activities in several different buildings with their own power meters not exceeding 5 MW each; thus, for the year 2022, the Company was classified in Schedule 7. The applicable rates for Schedule 7 are a demand charge of \$4.96 per KW of billing demand plus a variable component of USD 2.100¢ per kWh for the first 50,000 kWh of consumption and USD 1.857¢ per additional kWh of consumption. Historically, rates for Schedule 7 have increased by an annual average of 1.27% per year. Effective February 1, 2023, Grant PUD’s commissioners authorized the addition of cryptocurrency Mining into the Evolving Industry Rate Schedule 17 (“Schedule 17”). The applicable rates for Schedule 17 are a demand charge for \$28.18 per kW plus a variable component of 0.389¢ per kWh of consumption. Grant PUD may adjust the rate pricing with approval from its Board of Commissioners. An increase in the rates applicable to the Company’s electricity consumption in its operations in Washington State may adversely impact its profitability.

Paraguay

In December 2021, the Company completed the construction of a 10 MW facility in Paraguay (Villarrica). The facility is powered by CLYFSA. CLYFSA is the only private energy distribution company in Paraguay which purchases energy from ANDE, the operator of Paraguay’s national electricity grid, and provides power to almost 15,000 residential and commercial customers in Villarrica.

The Company entered into a power purchase agreement with CLYFSA securing 10 MW of hydro-electric energy with a demand charge of \$15.90 per KW of billing demand plus a variable component of 1.422¢ per kWh of consumption for the current one-year renewal period. The power purchase agreement stipulates that CLYFSA can pass on any modifications to pricing by ANDE to Backbone Paraguay. A rate increase could adversely impact the profitability of the Company’s operations in Paraguay.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Economic Dependence on Regulated Terms of Service and Electricity Rates Risks(Continued)

Paraguay (Continued)

On September 16, 2022, the executive branch of the Paraguayan government issued decree No. 7824/22 by which ANDE was requested to adopt complementary and temporary regulatory measures to adjust the variables corresponding to the electricity rates aimed at special intensive consumption sectors, including crypto asset Mining activities. In response, ANDE created the Special Intensive Consumption Group, which controls the supply of high and medium voltage and imposes rate tariffs in effect until at least December 2027. While these tariffs have no impact on our current activities in Paraguay as our contract is with the local supplier CLYFSA as detailed above, they may be relevant to future new operations in that territory.

In July 2023, the Company entered into two power purchase agreements in Paraguay for up to 150 MW of hydro power until December 31, 2027: up to 50 MW in Villarrica, in close proximity to the Company's existing operations in Paraguay, and up to 100 MW in Yguazu, a new location close to the Itaipú dam, the third largest hydro-electric dam in the world. Hydro power at both locations will be provided by ANDE at a contracted cost of approximately \$0.039 per kWh, before VAT, until December 31, 2027, and is not subject to annual inflationary adjustments.

Argentina

In 2021, the Company commenced the construction of a 56 MW facility in Argentina (Rio Cuarto - Cordoba). Construction concluded during Q3 2022, and the site started operations gradually by adding 10MW modules at a time until September 2023, when it became fully operational. The facility receives electricity from Generacion Mediterranea S.A. ("GMSA"), one of the subsidiaries of Grupo Albanesi. Grupo Albanesi is an Argentine private corporate group focused on the energy market which provides natural gas and electrical energy to its clients from its multiple facilities.

The terms of the electricity supplied by GMSA in Argentina are included in the Company's power contract, which establishes a rate of \$0.02 per kWh, up to a maximum amount of 1,103,760 megawatt hours per year. The annual maximum megawatt hours the Company can draw at \$0.02 per kilowatt hour is further subject to pro-rata adjustments based on the Company's actual power draw relative to the total 210 MW. The agreement stipulates that GMSA may provide the Company with power in excess of the 1,103,760 megawatt hours, or such adjusted quantity of megawatt hours based on the pro-rata calculation described above, at a price that will be negotiated by the Company and GMSA. The price to be negotiated between the Company and GMSA will likely be impacted by the cost of natural gas and currency exchange rates in Argentina, among other factors.

69 | Page

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Economic Dependence on Regulated Terms of Service and Electricity Rates Risks(Continued)

Argentina (Continued)

The agreement also allows for GMSA to renegotiate the \$0.02 per kWh rate if the ratio of the exchange rate under the blue-chip swap mechanism (refer to section 8d *Net financial income*) used in Argentina to the official exchange rate is less than 1.50. The \$0.02 per kWh rate and applicable adjustments described above are in effect for the first four years of the contract. The kilowatt hour price for the remaining four years of the contract will be determined by a formula based mainly on changes in gas costs and currency exchange rates. The contract also specifies certain situations where the Company's supply of electricity can be interrupted, including:

- Regulatory intervention preventing GMSA from providing the Company with electricity, or directing GMSA to reroute its electricity to the wholesale market;
- Scheduled and unscheduled maintenance required to service the power plant or related equipment; and
- Regulatory intervention limiting GMSA's supply of natural gas.

The Company's contract with GMSA also includes certain megawatt hour consumption thresholds and pro-rata adjustments. The Company's operations in Argentina can be materially adversely impacted if the Company is unable to exploit the contractually secured MW capacity on a full-time basis or if the cost of energy negotiated under the pro-rata calculation or calculated using the defined formula in effect for the second four years of the contract, both primarily driven by natural gas prices and foreign currency rates, are not economically viable.

An increase in the Company's electricity costs, cost of natural gas, changes in currency exchange rates in Argentina or regulatory changes in the energy regimes in the jurisdictions in which the Company operates may adversely impact the Company's profitability.

In November 2023, the Company entered into an agreement with GMSA to receive power at its facility in Rio Cuarto at a fixed rate of 2.1 cents per kWh for the months of November through April 2024, which is expected to lower the Company's blended cost of power over a full year of operations at approximately 2.5 cents per kWh plus taxes.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Increases in Commodity Prices or Reductions in the Availability of Such Commodities

The Company uses and intends to continue using certain commodities in its current and future cryptocurrency Mining operations, including hydro-electricity and natural gas.

Unexpected, sudden or prolonged price increases in those commodities, whether as a result of geopolitical events, natural disasters or otherwise, have caused and, in the future, may cause a reduction in the Company's profits where beneficial fixed-priced contracts do not exist or unfavorable fixed-price contracts cannot be modified. There also may be curtailment in electricity or natural gas supply. In particular, the Russia-Ukraine conflict has had an inflationary effect on the cost of natural gas, the duration and future magnitude of which are difficult to predict given the fluidity of the military conflict, the novelty of sanctions against Russia and the possibility of yet harsher sanctions as well as other related developments. The realization or continuation of any of the foregoing risks with respect to commodity prices could increase the Company's operating costs, reduce its profitability and, depending upon the duration and extent of the impact, have a material adverse effect on its financial condition.

Future Profits/Losses and Production Revenues/Expenses

Further development and acquisitions of server farms, and the ongoing operation of the Company's existing Mining farms, will require additional capital to fund expenses. The Company's operating expenses and capital expenditures may also increase in future years as it adds consultants, personnel and equipment associated with the maintenance of its Mining farms and any other Mining farms the Company may acquire or develop, potentially leading to a decrease in the Company's profits if its revenues do not increase correspondingly. The Company may not be successful in obtaining the required financing for these or other purposes, including for general working capital.

Fraud and Failure of Cryptocurrency Exchanges, Custodians and Other Trading Venues

Cryptocurrency market prices depend, directly or indirectly, on the prices set on exchanges and other trading venues. As compared to traditional securities, derivatives and currency exchanges, cryptocurrency exchanges, custodians and other trading venues are relatively new and, in most cases, largely unregulated, which may make them more susceptible to fraud and failure. The fraud and failure of several cryptocurrency platforms and other actors in the industry, including recent and ongoing bankruptcies of several large cryptocurrency exchanges in the second half of 2022 and into early 2023 (namely, FTX Trading Ltd., Celsius Network LLC, BlockFi, Voyager Digital Ltd., Three Arrows Capital, and Genesis Global Holdco LLC), has impacted and may continue to impact the broader cryptocurrency ecosystem, including the Company. In response to these events, the digital asset markets, including the market for BTC specifically, have experienced extreme price volatility and several other entities in the digital asset industry have been, and may continue to be, negatively affected, further undermining confidence in the digital asset markets and in BTC. These events have also negatively impacted the liquidity of the digital asset markets and, in turn, the market price of shares of companies in the cryptocurrency industry, including the Company, as certain entities affiliated with bankrupt cryptocurrency exchanges engaged in significant trading activity. If the liquidity of the digital asset markets continues to be negatively impacted by these events, digital asset prices (including the price of BTC) may continue to experience significant volatility and confidence in the digital asset markets may be further undermined. These and similar events are ongoing and may occur with respect to other participants in the digital asset ecosystem in the future to develop, and it is not possible to predict at this time all of the risks that such events may pose to the Company, its service providers, the other third parties with which it does business or the digital asset industry as a whole.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Fraud and Failure of Cryptocurrency Exchanges, Custodians and Other Trading Venues(Continued)

Although the Company had no direct exposure to any of the above-mentioned cryptocurrency companies (other than BlockFi prior to the repayment by the Company of indebtedness under its equipment financing arrangement with BlockFi, as discussed in this MD&A) nor any material assets that may not be recovered or may otherwise be lost or misappropriated due to the bankruptcies, the failure or insolvency of large exchanges may cause the price of BTC to fall and decrease confidence in the larger ecosystem, which could adversely affect an investment in the Company. Such market volatility has had a material and adverse effect on the Company's results of operations and financial condition, and the Company expects its results of operations to continue to be affected by the price of BTC as the results of its operations are significantly tied to the price of BTC.

These and similar events have had, and, in the future, may have, an adverse impact on the profitability of the Company's BTC Mining operations and the Company's financial condition and results of operations.

To the extent that cryptocurrency exchanges or other trading venues are involved in fraud or experience security failures or other operational issues in the future, cryptocurrency prices could be suddenly and adversely impacted. Furthermore, fraud or failure of the current and future custodians of the Company's BTC or exchanges can result in a direct loss of the Company's cryptocurrency and fiat currency assets, which loss may not be recoverable by the Company, whether under any insurance policies it has in place or otherwise.

Significant costs and demands upon Management and accounting and finance resources as a result of complying with the laws and regulations affecting public companies

As a public company, the Company incurs significant administrative, legal, accounting and other burdens and expenses beyond those of a private company, including public company reporting obligations and Toronto Stock Exchange and Nasdaq listing requirements. In particular, the Company has needed, and continues to need, to enhance and supplement its internal accounting resources with additional accounting and finance personnel with the requisite technical and public company experience and expertise to enable the Company to satisfy such reporting obligations.

Expense and impact of restatement of the Company's historical financial statements

The Company restated certain historical financial statements to reflect a correction to its accounting for warrants issued in the 2021 private placements. Specifically, the Company had previously accounted for the warrants as equity instruments; however, in connection with the preparation of its financial statements for the year ended December 31, 2023, Management concluded that the proper accounting classification of the warrants was as financial liabilities due to the cashless exercise feature included in the warrants. For more information, see Section 15 - *Restatement* in this MD&A. It is difficult to predict all of the ramifications to the Company from the restatement. The restatement process was time and resource-intensive and involved substantial attention from management and significant costs and expenses, including for professional advisors assisting with the restatement. Although the restatement is now completed, it is possible that the Company will receive inquiries from the SEC, Canadian securities regulators, TSX and/or Nasdaq regarding the restated financial statements or related matters, which could consume a significant amount of resources. Moreover, many companies that have been required to restate their historical financial statements have experienced volatility in stock prices and declines in stock prices and shareholder lawsuits, which can be expensive to defend and divert Management attention and resources. The Company may suffer similar consequences as a result of the restatement.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Lack of Comprehensive Accounting Guidance for Cryptocurrencies under IFRS Accounting Standards

Because there has been limited precedent set and a lack of specific accounting guidance for cryptocurrencies under certain applicable accounting standards, including, among other things, revenue recognition, it is unclear how Bitcoin miners (in particular, non-U.S. companies like the Company that utilize IFRS Accounting Standards) may be required to account for cryptocurrency operations, transactions and assets and related revenue recognition. A change in regulatory or financial accounting standards, or interpretations thereof by the SEC, particularly as they relate to the Company and the financial accounting of its Bitcoin-related operations, could result in changes in the Company's accounting policies. Further, unlike in the case of U.S. generally accepted accounting principles where the Financial Accounting Standards Board has recently issued ASU 2023-08, which addresses the accounting and disclosure requirements for certain crypto assets, no similar guidance has yet been issued in respect of IFRS Accounting Standards. In addition, the accounting policies of many Bitcoin mining companies are being subjected to heightened scrutiny by regulators and the public. More specifically, the Company received comments from the staff of the SEC's Division of Corporation Finance Office of Crypto Assets on the financial statements included in the Company's annual report on Form 40-F for the year ended December 31, 2022 filed with the SEC, which comments focused on the accounting of the Company's Bitcoin-related operations. Some of those comments have not yet been resolved.

It is possible that, as a result of the SEC's determinations as to the application of the relevant IFRS Accounting Standards and the resolution of the Company's SEC comments, the Company could be obligated in the future to restate historical financial statements. In connection with any such restatement, as well as the warrant accounting restatement, the market price of the Company's common shares could be adversely affected, and the Company could become subject to private litigation or to investigations or enforcement actions by the SEC or other regulatory authorities, all of which could require the Company's expenditure of additional financial and management resources. Furthermore, continued uncertainty with regard to financial accounting matters, particularly as they relate to the Company, the financial accounting of its bitcoin-related operations and the SEC comments the Company has received in respect of such matters, could negatively impact the Company's business, prospects, financial condition and results of operations and its ability to raise capital on terms acceptable to the Company or at all.

Internal Control Material Weakness

Under National Instrument 52-109 Certification of Disclosure in Issuers' Annual and Interim Filings and Section 404 of the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"), the Company is required to document and test its internal control procedures and prepare annual management assessments of the effectiveness of the Company's internal control over financial reporting. The Company's assessments must include disclosure of identified material weaknesses in its internal control over financial reporting. The existence of one or more material weaknesses could affect the accuracy and timing of the Company's financial reporting. Testing and maintaining internal control over financial reporting involves significant costs and could divert management's attention from other matters that are important to the Company's business. Additionally, the Company may not be successful in remediating any deficiencies that may be identified.

73 | Page

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Internal Control Material Weakness (Continued)

In the course of preparing the financial statements for the year ended December 31, 2023, Management identified a material weakness in the effectiveness of the Company's ICFR for each of the years ended December 31, 2021, 2022 and 2023 related to the classification of warrants as financial liabilities that resulted in the restatement of the Company's financial statements for the year ended December 31, 2022. For more information, including a description of the remediation efforts that the Company believes are required to address the identified material weakness, refer to the "Disclosure Controls and Procedures" and "Internal Control over Financial Reporting" sections in this MD&A. The Company cannot assure investors that the measures the Company has taken or, in the future, will take will in fact be sufficient to remediate the control deficiencies that led to the material weakness in its ICFR or that such measures will prevent or avoid potential future material weaknesses, and the Company's current controls and any new controls that it develops may become inadequate because of changes in conditions in the Company's business. Further, additional weaknesses in the Company's ICFR may be discovered in the future.

If the Company is unable to remediate its material weakness or any future material weaknesses and otherwise implement and maintain effective ICFR, there may be material misstatements in the Company's consolidated financial statements, the Company may be unable to comply with its reporting obligations on a timely basis, or the Company may fail to prevent or detect fraud. In any such case, the price of the Common Shares could be negatively impacted, and the Company could be unable to raise additional capital on terms acceptable to Management or at all. The lack of effective internal controls could thus materially adversely affect the Company's financial condition and ability to implement the Company's business plan.

Even if the Company were to conclude in the future that its ICFR provides reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with IFRS Accounting Standards, because of its inherent limitations, ICFR may not prevent or detect all instances of fraud or misstatements. Regardless of how well designed and operated a control system may be, it can only provide reasonable, not absolute, safeguards with respect to the reliability of financial reporting and financial statement preparation.

Political and Regulatory Risk

The Company's primary properties and assets are subject to changes in political conditions and regulations within the Province of Québec, Canada, the United States (including, in particular, the State of Washington), Paraguay and Argentina. Changes, if any, in Mining or investment policies or shifts in political attitude could adversely affect the Company's operations or profitability. Operations have been and, in the future, may be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on price controls, currency remittance, income taxes, consumption taxes, foreign investment, maintenance of claims, environmental matters, land use, electricity use and safety, as well as buying and selling cryptocurrency and other transactions involving cryptocurrency. See section 7b - *Argentina Expansion*, for a discussion of recent changes in the Argentine regulatory environment that have adversely affected, and are currently adversely affecting, the Company's ability to pursue its expansion plans in Argentina. For example, cryptocurrency Mining involves considerable computing power, which is likely to increase. This computing power necessitates a high consumption of energy. Although a portion of the Company's energy costs are determined and controlled by various regulators, there is no certainty that any relevant regulator will not raise energy tariffs, which may reduce the profitability of Mining cryptographic currencies.

74 | Page

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Political and Regulatory Risk (Continued)

In the future, Canada, the United States, Paraguay and/or Argentina may also curtail or outlaw the acquisition, use or redemption of cryptocurrencies. Governments may also take regulatory action that may increase the cost, and/or subject cryptocurrency companies to additional regulation or prohibit or severely restrict the right, to acquire, own, hold, sell, use or trade cryptocurrencies or to exchange cryptocurrencies for fiat currency. By extension, future government actions may result in unfavorable conditions relating to the liquidity of and value of an investment in the Company's common shares, such as restrictions on the acquisition, ownership, holding, selling, use or trading in the Company's common shares or in the securities of companies in the Mining industry. Any such unfavorable conditions could result in the Company liquidating its cryptocurrency inventory at unfavorable prices and may adversely affect the Company's shareholders.

Ongoing and future regulatory changes or actions may alter the nature of an investment in the Company or restrict the use of cryptocurrencies in a manner that adversely affects the Company's operations. For example, novel or unique assets such as BTC and other digital assets may be classified as securities if they meet the definition of investment contracts under applicable securities laws. In recent years, the offer and sale of digital assets other than BTC, most notably Kik Interactive Inc.'s Kin tokens and Telegram Group Inc.'s TON tokens, have been deemed to be investment contracts by the U.S. Securities and Exchange Commission (the "SEC"). While the Company believes that BTC is unlikely to be considered an investment contract and, thus, the BTC it holds is unlikely to be considered a security under the investment contract definition, the Company cannot provide any assurances that digital assets that it earns or otherwise acquires or holds for its own account, including BTC, will never be classified as securities under applicable securities laws. If BTC is considered a security, the Company may be required to register as an investment company under the U.S. Investment Company Act of 1940, as amended (the "1940 Act"), and comply with other requirements applicable to investment companies, which would, in turn, cause the Company to incur significant expenses, thereby materially and adversely impacting an investment in the Company. In addition, registration as an investment company may not be possible under the 1940 Act or may require meaningful corporate changes to effectuate, which, in turn, may have a material adverse effect on the Company's business, financial condition and results of operations. The effect of any future such regulatory change on the Company or any cryptocurrency that the Company may earn is impossible to predict, but any such change could be substantial and adverse to the Company.

The attitude toward and regulations applicable to foreign investment and the cryptocurrency Mining industry in each of the jurisdictions in which the Company operates may also change, including changes that are adverse, rapid and unexpected. The Company's operations may be affected in varying degrees by government regulation with respect to restrictions on production, price controls, export and import controls, foreign exchange controls, income taxes, consumption taxes and environmental legislation, depending upon the nature of any such government regulation.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Political and Regulatory Risk (Continued)

On June 22, 2023, the Canadian Department of Finance released the Budget Implementation Act, Bill c.47, a set of legislation to implement certain tax measures. These tax measures include restricting the ability of cryptocurrency Mining companies to claim back the consumption taxes they incur on purchases of goods and services made in Canada and imports into Canada with a date of enactment of February 5, 2022. As currently enacted, the legislation imposes restrictions on the Company's ability to claim back its consumption taxes, namely the Goods and Services Tax, Harmonized Sales Tax and Quebec Sales Tax, which apply at combined rates from 5% to 14.975% on the cost of goods and services, could significantly add to the Company's ongoing operating costs and the costs of its capital expenditures and imports into Canada. The Company does not currently accrue for the recovery of these taxes. The Company is currently in discussions with Canadian tax authorities to determine whether the exemption provisions included in the legislation are applicable to relieve the Company of this potential financial burden. The timing for resolution of those discussions as well as the likelihood of a favorable outcome to the Company is currently unknown.

Similarly, various branches, departments and agencies of the federal government in the U.S. as well as certain U.S. state governments have enacted legislation and/or regulations, solicited comments and initiated procedures to consider further regulating cryptocurrency and Mining operations, including through proposed taxes on Mining operations and policy statements and guidance to companies in the cryptocurrency industry, as well as third parties that do business with those companies. The Company will continue to monitor for developments in U.S. federal and state-level legislation, guidance or regulations applicable to the Company and its operations.

Further, the global supply of Miners is unpredictable and presently heavily dependent on manufacturers from Asia, which was severely affected and may continue to be affected by the COVID-19 pandemic. The Company currently utilizes several types of Miners as part of its Mining operations, all of which are produced in Asia. Geopolitical matters may impact the Company's ability to import Miners in the future, and the Company may not be able to obtain adequate replacement parts for its existing Miners or obtain additional Miners from manufacturers in other jurisdictions on a timely basis.

Given the difficulty of predicting the outcomes of ongoing and future regulatory actions and legislative and geopolitical developments, it is possible that any legislative, regulatory or geopolitical change could have a material adverse effect on the Company's business, prospects or operations, the magnitude and duration of which cannot be predicted.

Permits and Licenses

The current and future operations of the Company, including development activities and Mining operations on its properties, may require permits from various federal, provincial or territorial and local governmental authorities, and such operations are and will be governed by laws and regulations governing prospecting, exports, taxes, labour standards, occupational health, and other matters. There can be no assurance that all permits which the Company may require for its operations will be obtained on reasonable terms, on a timely basis, or at all, or otherwise maintained or that applicable laws and regulations will not have an adverse effect on any Mining projects or related activities that the Company might undertake.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Server or Internet Failures

At any time, the servers or central processing units utilized by the Company could experience a severe malfunction and/or collapse. Although the Company works to reduce this risk by employing a team of experts with many years of experience in building and managing data centers as well as a hardware team that focuses, among other things, on Miner repair and the daily evaluation of the technical condition of the server farms that the Company operates, including through software (developed by its management) that facilitates, among other things, control, management and reporting of malfunctions in real time or any server crashes or failures, even if quickly addressed, may interrupt the Company's operations and cause significant economic harm to the Company.

In addition, Internet disruptions or failures may adversely affect the Mining and use of cryptocurrencies, including BTC. Generally, cryptocurrencies and the Company's business of Mining BTC are dependent upon the Internet. A significant disruption or failure of Internet connectivity, including of the Company's backup Internet connection, could disrupt the network operations of cryptocurrencies until the disruption is resolved and have an adverse effect on the price of BTC and the Company's ability to mine BTC.

Tax Consequences

Existing and prospective shareholders should consult their own tax advisors with respect to any tax considerations that may be relevant to an investment in the Company.

Environmental Regulations

The Company's operations are subject to environmental regulations, which are evolving in each of the jurisdictions where the Company has a presence. Any modification of existing environmental regulations, or the imposition of new environmental regulations, may lead to stricter standards, more diligent enforcement and heavier fines and penalties for non-compliance. The cost of compliance due to changes in, or the imposition of new, environmental regulations has the potential to reduce the profitability of the Company's operations, cause delays in the development of its Mining projects or, in extreme cases, lead to the Company not being able to operate fully or at all in one or more of the jurisdictions in which it currently has operations.

Environmental Liability

The Company may be subject to potential risks and liabilities associated with pollution of the environment through its use of electricity to produce computational power. As of the date of this MD&A, approximately 74% of the Company's energy requirements are met by hydro-electricity. In addition, environmental hazards may exist on a property in which the Company directly or indirectly holds an interest that are unknown to the Company at present and have been caused by previous or existing owners or operators of the property which may result in environmental pollution. If any of those environmental hazards is deemed to violate existing rules and regulations in the relevant jurisdiction, the Company may become subject to fines and penalties.

To the extent the Company is subject to environmental liabilities, the payment of such liabilities or the costs that it may incur to remedy environmental pollution would reduce funds otherwise available to it and could have a material adverse effect on the Company. If the Company is unable to fully remedy an environmental problem, it might be required to suspend operations or enter into interim compliance measures pending completion of the required remedy. The Company's potential financial exposure for such matters may be significant and could have a material adverse effect on the Company.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Adoption of ESG Practices and the Impacts of Climate Change

Companies across many industries, including cryptocurrency Mining, are facing scrutiny related to their environmental, social, and governance ("ESG") practices. Investor advocacy groups, certain institutional investors, investment funds and other influential investors are also increasingly focused on ESG practices and in recent years have placed increasing importance on the non-financial impacts of their investments. Enhanced public awareness and concern regarding environmental risks, including global climate change, may result in increased public scrutiny of the Company's business and the cryptocurrency Mining industry in general. As a result, the Company's Management's time and energy may be diverted from executing on the Company's strategic goals towards responding to such scrutiny and addressing and enhancing the Company's ESG practices, which may not enhance the value of the Company's common shares or positively impact shareholder return.

In addition, the impacts of climate change may affect the availability and cost of materials, natural resources and sources and supplies of energy, which may increase the cost of the Company's operations. Other factors which may impact the Company's profitability include, but are not limited to, demand for BTC and other cryptocurrencies, insurance and other operating costs, and damage incurred as a result of extreme weather events. New environmental laws, regulations or industry standards may be adopted with little or no notice to the Company and may impose significant operational restrictions and compliance requirements on the Company's operations. The cost of compliance with changes in government regulations has the potential to reduce the profitability of the Company's operations or cause delays in the development of new Mining projects.

Emerging Legislation and Scrutiny Regarding Human Rights Issues

Emerging legislation in multiple jurisdictions is intensifying investor, stakeholder and public scrutiny on human rights issues that include, among other matters, forced labour, child labour and other slavery-like practices; displacement of local communities; discrimination by race, age, gender, sexuality and other protected attributes; and underpayment for labour or services provided. Although the Company does not tolerate slavery, forced labor, or human trafficking in any form and will not knowingly work with third-parties who engage in these practices or permit their subcontractors to engage in these practices, the Company conducts business on a global scale and interacts with a number of different parties. Accordingly, the failure to identify and respond to human rights issues can lead to costly and disruptive legal action, investor divestment, negative publicity, reputational damage and significant financial loss.

In force since January 1, 2024, Canada's Fighting Against Forced Labour and Child Labour in Supply Chains Act introduces a statutory requirement to report on the steps taken by in-scope entities, including the Company, to prevent and reduce the risk that forced labour or child labour is used at any step in the production of goods in Canada or goods that are imported into Canada. Although the Company does not anticipate that this legislation will have a material impact on its operations, it is impossible to predict how additional legislation or increased scrutiny from human rights groups regarding the cryptocurrency industry and related supply chains may affect the Company going forward, particularly in the complex socio-economic and socio-political jurisdictions in which the Company conducts its business.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Emerging Legislation and Scrutiny Regarding Human Rights Issues(Continued)

The Company is committed to protecting human rights and has adopted a Code of Business Conduct and Ethics, along with other policies, to support such commitment, including its own Vendor and Suppliers Due Diligence process in order to mitigate third party-risks. Such policies and procedures may not minimize or prevent human rights issues. Any future failure to identify and respond to human rights issues, despite our efforts, may lead to costly and disruptive legal action, investor divestment, negative publicity, reputational damage and significant financial loss.

Erroneous Transactions and Human Error

Cryptocurrency transactions are irreversible. Improper or compromised transfers are also generally irreversible and irrevocable. Such errors may be the result of computer or human error despite internal controls the Company has adopted to mitigate this risk. To the extent that the Company is unable to seek a corrective transaction with the third party or is incapable of identifying the third party that has received the Company's cryptocurrencies through error or theft, the Company will be unable to revert or otherwise recover incorrectly transferred cryptocurrencies. The Company may also be unable to convert or recover cryptocurrencies transferred to uncontrolled accounts.

The use of cryptocurrencies to, among other things, buy and sell goods and services and complete other transactions is part of a new and rapidly evolving industry that employs digital assets based upon a computer-generated mathematical and/or cryptographic protocol. The growth of this industry in general, and the use of cryptocurrencies in particular, is subject to a high degree of uncertainty, and the slowing or stopping of the development or acceptance of developing protocols may adversely affect Bitfarms' operations. The factors affecting the further development of the industry, include, but are not limited to:

- Continued worldwide growth in the adoption and use of cryptocurrencies;
- Governmental and quasi-governmental regulation of cryptocurrencies and their use, or restrictions on or regulation of access to and operation of the network or similar cryptocurrency systems;
- Changes in consumer demographics and public tastes and preferences;
- The maintenance and development of the open-source software protocol of the network;
- The availability and popularity of other forms or methods of buying and selling goods and services, including new means of using fiat currencies;
- General economic conditions and the regulatory environment relating to digital assets; and
- Negative consumer sentiment and perception of BTC specifically and cryptocurrencies generally.

Facility Developments

The continued development of existing and planned facilities is subject to risks that may cause such development plans to be delayed or otherwise adversely affected, including factors beyond the Company's control such as delays in the delivery or installation of equipment by suppliers, difficulties in integrating new equipment into existing infrastructure, shortages in materials or labour, defects in design or construction, diversion of Management resources, insufficient funding, or other resource constraints. Actual costs for development may also exceed the Company's planned budget. Delays, cost overruns, changes in market circumstances and other factors may result in different outcomes than those intended. If any development projects are delayed or more expensive than contemplated, the Company's operations may be adversely impacted, and the Company may not realize, or may be delayed in realizing, the benefits of such projects. See Note 7 - *Expansion Projects*, for a discussion of the status of the Company's various development efforts, including, in particular, in Argentina and Paraguay.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Insurance risks

Where considered practical to do so, the Company maintains, and intends to continue maintaining, insurance against risks in the operation of its business and in amounts that it believes to be reasonable. Such insurance, however, contains, and may in the future contain, exclusions and limitations on coverage. There can be no assurance that such insurance will continue to be available, will be available at economically acceptable premiums or will be adequate to cover any resulting liability. The novelty of the cryptocurrency industry has impaired and may continue to impair the ability of the Company to acquire adequate insurance coverage for risks associated with its operations. The occurrence of an event that is not covered, in full or in part, by insurance may cause substantial economic damage to the Company. In some cases, such as with respect to environmental risks, coverage is not available or considered by Management to be too expensive relative to the perceived risk.

The Company's BTC, which is held in custody by Coinbase Custody and Anchorage Digital, is not insured. Although Coinbase Custody maintains an insurance policy of \$320 million for its cold storage and Anchorage Digital maintains an insurance policy of an aggregate of \$50 million for its cold and hot storage, the full limits of those policies may not be available to the Company or, if available, may not be sufficient to make the Company whole for any BTC that are lost or stolen from the Company's accounts. Therefore, a loss may be suffered with respect to the Company's BTC that is not covered by insurance and for which no person is liable in damages.

Any losses incurred by the Company that are not adequately covered by insurance or for which insurance coverage is not available or has not been obtained could adversely impact the Company, including its financial condition and results of operations.

Competition

The Company's business is in an intensely competitive industry, and the Company competes with other Mining companies, some of which have, or may in the future have, greater resources and experience. A fundamental property of Mining associated with many cryptocurrencies is that the computational complexity of the Mining algorithm increases over time. This factor, along with new industry entrants, price volatility and, with respect to BTC, any future BTC Halvings, may make certain cryptocurrencies relatively unprofitable to mine compared to others.

Regulation of cryptocurrency in certain jurisdictions has led some Mining companies to consider Paraguay as an attractive jurisdiction in which to operate, which may increase competition with the Company and its expansion efforts in Paraguay. Despite the Company's strategic planning and expected advantages over certain of its competitors, the Company may face unexpected competition in the form of new entrants in the marketplace. Such competition could erode the Company's expected market share and could adversely impact the Company's profitability. Increased competition could result in increased network computing resources and consequently increased hash difficulty.

If the award of coins for solving blocks and any related transaction fees are not sufficiently high, Mining companies may not have an adequate incentive to continue Mining and may cease their Mining operations. As the number of coins awarded for solving a block in the blockchain decreases, the incentive for Mining companies to continue to contribute processing power to the network may transition from a set reward to transaction fees.

19. RISK FACTORS (Continued)**Competition (Continued)**

In order to incentivize Mining companies to continue to contribute processing power to the network, the network may either formally or informally transition from a set reward to transaction fees earned upon solving for a block. This transition could be accomplished either by Mining companies independently electing to record on the blockchains they solve only those transactions that include payment of a transaction fee or by the network adopting software upgrades that require the payment of a minimum transaction fee for all transactions. If transaction fees paid for the recording of transactions in the blockchain become too high, the marketplace may be reluctant to accept the network as a means of payment, and existing users may be motivated to switch between cryptocurrencies or back to fiat currency. Decreased use and demand for BTC may adversely affect their value and result in a reduction in the market price of BTC, which could adversely impact the value of the Company's cryptocurrency holdings and investments. If Miners choose to cease operations, there would be a reduction in collective processing power, which would adversely affect the confirmation process for transactions (i.e., decreasing the speed at which blocks are added to the blockchain until the next scheduled adjustment in difficulty for blockchain solutions) and make the network more vulnerable to a malicious actor or botnet obtaining control in excess of 50 percent of the processing power. Any reduction in confidence in the confirmation process or processing power of the network may adversely impact the Company's Mining activities, the value of its inventory of coins and future investment strategies.

Uncertainty of acceptance and/or Widespread Use of Cryptocurrencies

Currently, cryptocurrencies are not widely used in the retail and commercial marketplaces in comparison to purchases of overall cryptocurrencies worldwide. Cryptocurrency payment methods have not been widely adopted as a means of a payment for goods and services by major retail and commercial outlets. A significant portion of cryptocurrency demand may be attributable to speculation.

The failure of individuals to widely utilize currently available, and/or the failure of retail and commercial marketplaces to adopt, cryptocurrency payment methods may result in increased volatility and/or a reduction in market prices, either of which may adversely impact the market price of the Company's cryptocurrency holdings and the profitability of its Mining operations.

Hazards Associated with High-voltage Electricity Transmission and Industrial Operations

The operations of the Company are subject to typical hazards associated with high-voltage electricity transmission and the supply of utilities to the facilities of the Company at an industrial scale including explosions, fires, inclement weather, natural disasters, flooding, mechanical failure, unscheduled downtime, equipment interruptions, remediation, chemical spills, discharges or releases of toxic or hazardous substances or gases and other environmental risks. These hazards can cause personal injury and loss of life, severe damage to or destruction of property and equipment and environmental damage, and may result in suspension of operations and the imposition of civil or criminal penalties.

19. RISK FACTORS (Continued)**Corruption**

Fraud, bribery and corruption are more common in some jurisdictions than in others. Doing business in international developing markets brings with it inherent risks associated with enforcement of obligations, fraud, bribery and corruption. The Company currently has operations in Argentina and Paraguay, which are jurisdictions perceived as having relatively high levels of corruption. While the Company uses its best efforts to prevent the occurrence of fraud, bribery and corruption, it may not be possible to detect or prevent every instance of fraud, bribery and corruption in every jurisdiction in which its employees, agents or contractors are located. The Company may therefore be subject to civil and criminal penalties and to reputational damage if any fraud, bribery or corruption is perpetrated by or on behalf of the Company. See "*The Company conducts operations in countries known to experience high levels of corruption, and any violation of anti-corruption laws could subject us to penalties and other adverse consequences.*"

Instances of fraud, bribery and corruption, and violations of laws and regulations in the jurisdictions in which the Company operates could have a material adverse effect on its business, prospects, financial condition or results of operations. In addition, as a result of the Company's anti-corruption policies and other safeguards, there is a risk that the Company could be at a commercial disadvantage and may fail to secure contracts within jurisdictions that have been allocated a low score on the Corruption Perceptions Index, to the benefit of other companies who may not have or comply with such anti-corruption safeguards.

US Foreign Corrupt Practices Act and Similar Legislation

The Foreign Corrupt Practices Act (United States), the Corruption of Foreign Public Officials Act (Canada) and anti-bribery laws in other jurisdictions generally prohibit companies and their intermediaries from making improper payments for the purpose of obtaining or retaining business or other commercial advantages. The Company's policies mandate compliance with applicable anti-bribery laws, which laws, if violated, often provide for the levy of substantial penalties against offending parties. The Company operates in jurisdictions that have experienced governmental and private sector corruption to varying degrees, and, in certain circumstances, strict compliance with anti-bribery laws may conflict with certain local customs and practices. There can be no assurance that the Company's internal control policies and procedures will always protect it from reckless or other inappropriate acts committed by the Company's affiliates, employees, agents or companies acquired by or merged with the Company. Violations of these laws, or allegations of such violations, could have a material adverse effect on the Company's reputation, as well as its business, financial position and results of operations, and could cause the market value of the Company's common shares to decline. Investigations by governmental authorities could also have a material adverse effect on the business, consolidated results of operations and consolidated financial condition of the Company.

19. RISK FACTORS (Continued)

US Foreign Corrupt Practices Act and Similar Legislation(Continued)

The Company has policies in place to minimize the risk of corruption or bribery, which includes enforcement of policies against giving or accepting money or gifts in certain circumstances; namely the Company's Code of Business Conduct and Ethics, Anti-Bribery and Anti-Corruption Policy and Whistleblower Policy. The Company uses its best efforts to prevent the occurrence of fraud, bribery and corruption, but it may not be possible to detect or prevent every instance of fraud, bribery and corruption in every jurisdiction in which its employees, agents or contractors are located. The Company, or any of its employees or contractors, could be charged with bribery or corruption as a result of the actual or perceived unauthorized actions of its employees or contractors. If the Company is found guilty of such a violation, which could include a failure to take effective steps to prevent or address corruption by its employees or contractors, the Company could be subject to onerous penalties and reputational damage. A mere investigation could lead to significant corporate disruption, high legal costs and forced settlements (such as the imposition of an internal monitor). Any government investigations or other allegations against the Company or its directors, officers, employees or contractors, or a finding of involvement in corruption or other illegal activity by such persons, could significantly damage the Company's reputation and its ability to do business and could have a material adverse effect on the Company's business, results of operations and financial condition.

Political Instability

The Company operates in multiple jurisdictions, including in geographic regions which may be subject to a greater risk of political instability, geopolitical upheaval and social unrest. The Company's ability to carry on its business in the normal course may be adversely affected by political and economic considerations such as civil unrest, war (including in neighbouring states), terrorist actions, labour disputes, corruption, sovereign risk (including coup d'état), political instability, the failure of foreign parties or governments to honour contractual relations, consents, rejections or waivers granted, changing government regulations with respect to cryptocurrency Mining, including environmental requirements, taxation, foreign investments, income repatriation and capital recovery (which changes may be arbitrary and with little or no notice), severe fluctuations in currency exchange and inflation rates, import and export restrictions, problems renewing licenses and permits, opposition to cryptocurrency Mining from non-governmental organizations, increased financing costs, instability due to economic under-development, inadequate infrastructure and the expropriation of property interests. The occurrence of any of the foregoing could result in conditions that have a material adverse impact on the Company and its operations.

Third-party Supplier Risks

The Company enters into contracts with a limited number of third-party suppliers to procure Mining hardware. If any of those suppliers is unable to or otherwise does not fulfill, or does not fulfill in a timely manner, its obligations to the Company for any reason (including, but not limited to, bankruptcy, computer or other technological interruptions or failures, personnel loss, negative regulatory actions, or acts of God) or engages in fraud or other misconduct during the course of such relationship, the Company may need to seek alternative third-party suppliers, or discontinue using certain Miners or otherwise alter its operations and may encounter delays. In addition, the Company may in the future be held directly or indirectly responsible, or be otherwise subject to liability, for actions or omissions of third parties undertaken in connection with the Company's arrangements with such third parties. Any such responsibility or liability in the future may have a material adverse effect on the Company's business, financial condition and results of operations.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

19. RISK FACTORS (Continued)

Potential of Bitfarms Being Classified as a Passive Foreign Investment Company

Generally, if for any taxable year 75% or more of the Company's gross income is passive income, or at least 50% of the average quarterly value of the Company's assets are held for the production of, or produce, passive income, the Company would be characterized as a passive foreign investment company ("PFIC") for U.S. federal income tax purposes. The Company does not believe it was a PFIC for 2023 and does not expect to be a PFIC for 2024. However, PFIC status is determined annually, and whether the Company will be a PFIC for any future taxable year is uncertain. Moreover, the Company is not committing to determine whether it is or is not a PFIC on an annual basis. If the Company is characterized as a PFIC, United States holders of the Company's shares may suffer adverse tax consequences, including the treatment of gains realized on the sale of the Company's shares as ordinary income, rather than as capital gain, the loss of the preferential income tax rate applicable to dividends received on the Company's shares by individuals who are United States holders, and the addition of interest charges to the tax on such gains and certain distributions. A United States shareholder of a PFIC generally may mitigate these adverse U.S. federal income tax consequences by making a Qualified Electing Fund ("QEF") election, or, to a lesser extent, a mark-to-market election. The Company does not intend to provide the information necessary for United States shareholders to make a QEF election if the Company is classified as a PFIC for any year.

Pandemic and Infectious Disease Risk

Pandemic risk is the risk of large-scale outbreaks of infectious diseases that can greatly increase morbidity and mortality over a wide geographic area and cause significant social and economic disruption. Pandemics, epidemics or outbreaks of an infectious disease could have an adverse impact on the global economy, the economies of the jurisdictions where the Company operates and the Company's business, including adverse changes to the way the Company and its counterparties operate and the ability of the Company to execute on its strategic goals and expansion plans in a timely manner or at all, and on the Company's financial condition and results of operations.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

20. SIGNIFICANT ACCOUNTING ESTIMATES

The preparation of the Company's Financial Statements requires Management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the reporting periods. Actual outcomes could differ from these estimates.

The Financial Statements include estimates that, by their nature, are uncertain. Key areas of estimation uncertainty include those relating to:

- revenue recognition (Note 4 and Note 9 to the Financial Statements);
- liquidity risk and going concern (Note 2 and Note 4 to the Financial Statements);
- leases (Note 4 and Note 18 to the Financial Statements);
- property, plant and equipment and intangible assets (Note 4, Note 13 and Note 14 to the Financial Statements);

- impairment and reversal of impairment of non-financial assets (Note 4 and Note 12 to the Financial Statements);
- goodwill (Note 4 to the Financial Statements);
- contingent liability (Note 4 and Note 15 to the Financial Statements); and
- effective interest rates of long-term debt (Note 4 and Note 17 to the Financial Statements).

The impacts of such estimates are pervasive throughout the Financial Statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Refer to Note 4 to the Financial Statements for more information regarding the Company's significant accounting estimates.

21. MATERIAL ACCOUNTING POLICY INFORMATION AND NEW ACCOUNTING POLICIES

Refer to Note 3 to the Financial Statements for more information regarding the Company's material accounting policy information and new accounting policies.

22. CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This MD&A contains forward-looking statements about the Company's objectives, plans, goals, aspirations, strategies, financial condition, results of operations, cash flows, performance, prospects, opportunities and legal and regulatory matters. Specific forward-looking statements in this MD&A include, but are not limited to, statements with respect to the Company's anticipated future results, events and plans, strategic initiatives, future liquidity, and planned capital investments. Forward-looking statements are typically identified by words such as "expect", "anticipate", "believe", "foresee", "could", "estimate", "goal", "intend", "plan", "seek", "strive", "will", "may", "maintain", "achieve", "grow", "should" and similar expressions, as they relate to the Company and its Management.

BITFARMS LTD.

Management's Discussion & Analysis

(In U.S. dollars, except where otherwise indicated)

22. CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS (Continued)

Forward-looking statements reflect the Company's current estimates, beliefs and assumptions, which are based on management's perception of historical trends, current conditions and expected future developments, as well as other factors it believes are appropriate under the circumstances. The Company's expectation of operating and financial performance is based on certain assumptions including assumptions about operational growth, anticipated cost savings, operating efficiencies, anticipated benefits from strategic initiatives, future liquidity, and planned capital investments. The Company's estimates, beliefs and assumptions are inherently subject to significant business, economic, competitive and other uncertainties and contingencies regarding future events and as such, are subject to change. The Company can give no assurance that such estimates, beliefs and assumptions will prove to be correct.

Numerous risks and uncertainties could cause the Company's actual results to differ materially from those expressed, implied or projected in the forward-looking statements. Such risks and uncertainties include:

- Bitcoin Halving event;
- insolvency, bankruptcy, or cessation of operations of mining pool operator;
- reliance on foreign mining pool operator;
- counterparty risk;
- emerging markets operating risks;
- reliance on manufacturing in foreign countries and the importation of equipment to the jurisdictions in which the company operates;
- dependency on continued growth in blockchain and cryptocurrency usage;
- the availability of financing opportunities and risks associated with economic conditions, including BTC price, Bitcoin network difficulty and share price fluctuations;
- global financial conditions;
- employee retention and growth;
- cybersecurity threats and hacking;
- limited operating history and limited history of de-centralized financial system;
- risk related to technological obsolescence and difficulty in obtaining hardware;
- economic dependence on regulated terms of service and electricity rates;
- costs and demands upon Management and accounting and finance resources as a result of complying with the laws and regulations affecting public companies;
- expense and impact of restatement of the Company's historical financial statements;
- lack of comprehensive accounting guidance for cryptocurrencies under IFRS Accounting Standards;
- internal control material weakness;
- increases in commodity prices or reductions in the availability of such commodities could adversely impact the Company's results of operations;
- permits and licenses;
- server or internet failures;
- tax consequences;
- environmental regulations and liability;
- adoption of environmental, social, and governance practices and the impacts of climate change;
- erroneous transactions and human error;
- facility developments;
- non-availability of insurance;
- competition;
- hazards associated with high-voltage electricity transmission and industrial operations;
- corruption, political and regulatory risk;
- potential being classified as a passive foreign investment company;
- lawsuits and other legal proceedings and challenges;
- conflict of interests with directors and management; and
- other factors beyond the Company's control.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

22. CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS (Continued)

The above is not an exhaustive list of the factors that may affect the Company's forward-looking statements. For a more comprehensive discussion of factors that could affect the Company, refer to the risk factors discussed above. Other risks and uncertainties not presently known to the Company or that the Company presently believes are not material could also cause actual results or events to differ materially from those expressed, implied or projected in its forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect the Company's expectations only as of the date of this MD&A. Except as required by law, the Company does not undertake to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

23. CAUTIONARY NOTE REGARDING NON-IFRS AND OTHER FINANCIAL MEASURES AND RATIOS

This MD&A makes reference to certain measures that are not recognized under IFRS and do not have a standardized meaning prescribed by IFRS. They are therefore unlikely to be comparable to similar measures presented by other companies. The Company uses non-IFRS and other financial measures and ratios including "EBITDA," "EBITDA margin," "Adjusted EBITDA," "Adjusted EBITDA margin," "Gross Mining profit," "Gross Mining margin," "Gross margin," "Operating margin," "Direct Cost," "Direct Cost per BTC," "Total Cash Cost" and "Total Cash Cost per BTC" as additional information to complement IFRS measures by providing further understanding of the Company's results of operations from Management's perspective. Refer to Section 10 - *Non-IFRS and Other Financial Measures and Ratios* of the MD&A for more details.

These measures are provided as additional information to complement IFRS measures by providing further understanding of the Company's results of operations from Management's perspective. Accordingly, they should not be considered in isolation nor as a substitute for analysis of the Company's financial information reported under IFRS. Reconciliations from IFRS measures to non-IFRS measures are included throughout this MD&A.

24. ADDITIONAL INFORMATION

Additional information and other publicly filed documents relating to the Company, including the Company's Annual Information Form, are available through the internet on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov/edgar.

25. GLOSSARY OF TERMS

Terms	Definition
ASIC	ASIC stands for Application Specific Integrated Circuit and refers primarily to specific computer devices designed to solve the SHA-256 algorithm.
Bitcoin (BTC)	BTC is a decentralized digital currency that is not controlled by any centralized authority (e.g., a government, financial institution or regulatory organization) that can be sent from user to user on the Bitcoin network without the need for intermediaries to clear transactions. Transactions are verified through the process of Mining and recorded in a public ledger known as the Blockchain. BTC is created when the Bitcoin network issues Block Rewards through the Mining process.
Block Reward	A Bitcoin block reward refers to the new BTC that are awarded by the Blockchain network to eligible cryptocurrency Miners for each block they successfully mine. The current block reward is 6.25 BTC per block.
Blockchain	A Blockchain is a cloud-based public ledger that exists on computers that participate on the network globally. The Blockchain grows as new sets of data, or 'blocks', are added to it through Mining. Each block contains a timestamp and a link to the previous block, such that the series of blocks form a continuous chain. Given that each block has a separate hash and each hash requires information from the previous block, altering information an established block would require recalculating all the hashes on the Blockchain which would require an enormous and impracticable amount of computing power. As a result, once a block is added to the Blockchain it is very difficult to edit and impossible to delete.
Exahash	One quintillion (1,000,000,000,000,000) hashes per second or one million Terahash.
Hash	A hash is a function that converts or maps an input of letters and numbers into an encrypted output of a fixed length, which outputs are often referred to as hashes. A hash is created using an algorithm. The algorithm used in the validation of Bitcoin transactions is the SHA-256 algorithm.
Hashrate	Hashrate refers to the number of hash operations performed per second and is a measure of computing power in Mining cryptocurrency.
Megawatt	A megawatt is 1,000 kilowatts of electricity and, in the industry of cryptocurrency Mining, is typically a reference to the number of megawatts of electricity per hour that is available for use.
Miners	ASICs used by the Company to perform Mining.
Mining	Mining refers to the process of using specialized computer hardware, and in the case of the Company, ASICs, to perform mathematical calculations to confirm transactions and increase security for the BTC Blockchain. As a reward for their services, Bitcoin Miners collect transaction fees for the transactions they confirm, along with newly created BTC as Block Rewards.
Mining Pool	A Mining pool is a group of cryptocurrency Miners who pool their computational resources, or hashrate, in order to increase the probability of finding a block on the BTC Blockchain. Mining pools administer regular payouts to mitigate the risk of Miners operating for a prolonged period of time without finding a block.

BITFARMS LTD.**Management's Discussion & Analysis**

(In U.S. dollars, except where otherwise indicated)

25. GLOSSARY OF TERMS (Continued)

Terms	Definition
Network Difficulty	Network difficulty is a unitless measure of how difficult it is to find a hash below a given target. The Bitcoin network protocol automatically adjusts Network Difficulty by changing the target every 2,016 blocks hashed based on the time it took for the total computing power used in Bitcoin Mining to solve the previous 2,016 blocks such that the average time to solve each block is ten minutes.
Network Hashrate	Network hashrate refers to the total global hashrate (and related computing power) used in Mining for a given cryptocurrency.
Petahash	One quadrillion (1,000,000,000,000,000) hashes per second or one thousand Terahash.
SHA-256	SHA stands for Secure Hash Algorithm. The SHA-256 algorithm was designed by the US National Security Agency and is the cryptographic hash function used within the Bitcoin network to validate transactions on the Bitcoin Blockchain.
Synthetic HODL	Synthetic HODL is the use of financial instruments to create BTC-equivalent exposure.
Terahash	One trillion (1,000,000,000,000) hashes per second.

CERTIFICATION

I, L. Geoffrey Morphy, certify that:

1. I have reviewed this Annual Report on Form 40-F of Bitfarms Ltd. (the “issuer”);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the issuer as of, and for, the periods presented in this report;
4. The issuer’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the issuer and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the issuer, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the issuer’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the issuer’s internal control over financial reporting that occurred during the period covered by the annual report that has materially affected, or is reasonably likely to materially affect, the issuer’s internal control over financial reporting; and
5. The issuer’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the issuer’s auditors and the audit committee of the issuer’s board of directors (or persons performing the equivalent functions):
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the issuer’s ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the issuer’s internal control over financial reporting.
